FOREWORD

This year we celebrated the 20th anniversary of the South African Constitution that was signed into law by former President Nelson Mandela, marking an exceptional moment in South Africa's history. A cornerstone of our democracy remains the commitment to improve the quality of basic education by consistently reviewing the gains made over the years and being responsive to the systemic gaps that have emerged. The Class of 2016 is the third cohort of Grade 12 learners to have written the National Senior Certificate (NSC) examination based on the Curriculum and Assessment Policy Statement (CAPS). I have noted changes in the number of candidates that wrote Mathematics and Mathematical Literacy this year (in Mathematics, the number of candidates increased by 1 907, from 263 903 in 2015 to 265 810 in 2016 whilst in Mathematical Literacy, the number of candidates decreased by 26 980 from 388 845 in 2015 to 361 865 in 2016. As was observed in 2015, more girls than boys enrolled for the NSC examination.

I appreciate and acknowledge the hard work, sacrifice and sheer effort made by our teachers, learners, parents, guardians, school managers, district and provincial officials and wider school communities who heeded our call to support the sector's commitment to improve the quality of teaching and learning, and learner attainment. In 2016, there was increased investment in the education sector to bring about an improvement in the participation of school communities in the strategic interventions that are driven by the National Strategy for Learner Attainment (NSLA). The strategy aims to align the key national and provincial interventions that were introduced to add value to teaching and learning in our schooling sector. Provinces and districts intensified the support and monitoring of the differentiated subject interventions throughout the year to ensure optimal participation and quality output.

In this Schools Subject Report we provide the performance of all schools in the country in the key subjects, over the last two years. The intention is to place in the public domain a more detailed account of how our schools are performing at the subject level. Overall improvement in school performance can only be attained if schools target their areas of weakness relating to specific subjects. Through this report it is envisaged that schools will identify those subjects where there has been under-performance and together with their district support teams, they will develop improvement plans targeting these specific areas.

I wish our school principals, teachers, parents and learners well in their endeavours to improve learner performance in the 2017 academic year/

MRS AM MOTSHEKGA, MP
MINISTER OF BASIC EDUCATION
04 JANUARY 2016

1. INTRODUCTION

This report is part of the Department's ongoing initiative to improve the use of the National Senior Certificate results as a monitoring and tracking tool for school improvement. In this report the subject results of all schools in the province are compiled into a single document, which allows for easy access by all officials that engage with schools. This report focuses on the eleven key subjects and in order to ensure a comparative analysis, subject performance data for both 2015 and 2016 are included.

Since 2012, the Schools Subject Report has been well received by provincial and district officials, who considered it a useful tool in providing necessary data to design and support relevant interventions. This report should be read together with the following three reports on the 2016 National Senior Certificate published by the Department of Basic Education:

a) The 2016 National Senior Certificate Examination Report

b) National Schools Performance Report presents the overall school results, per school over the last three years;

c) National Diagnostic Report which analyses learner performance in the gateway subjects; identifies areas of poor performance; and recommends appropriate remedial measures in each of the subjects.

Together, these four reports provide a holistic evaluation of the NSC.

2. SCOPE OF THE SCHOOLS SUBJECT REPORT

The Schools Subject Report provides performance data on the eleven key subjects: Accounting, Agricultural Sciences, Business Studies, Economics, English First Additional Language (FAL), Geography, History, Life Sciences, Mathematical Literacy, Mathematics and Physical Sciences. Candidates' performance in the key subjects at a national level over the last four years precedes the summary table of candidates' performance by district in these subjects in this report. In the section of the report relating to each province, the candidates' performance per subject, per individual school, within each district, is provided so that every school will be able to evaluate the performance in the specific subject in 2015 and 2016.

3. UTILISATION OF THE SCHOOLS SUBJECT REPORT

This report can be used by school managers, subject advisors, curriculum specialists and district planners to do a quick comparative analysis of the performance of schools within a circuit, cluster or district. The report would also help them to evaluate the impact of their interventions on specific subjects. This exercise will also be useful for designing contextually appropriate interventions at school, district and at the provincial levels, to focus on the subjects that require additional support and intervention in the new school year.

The schools subject data also provides the opportunity for school managers, subject advisors and curriculum planners to identify any patterns of correlation in learner performance across the key subjects. Schools that perform well in one subject should also perform at an equivalent level in other subjects e.g. Mathematics and Physical Science. Where there is a lack of correlation between related subjects, further investigations must be carried out by subject advisors to establish the reason for this non-alignment of performance. This may quite often point to competency levels of teachers, difference in the cohort of learners, or other resource limitations. The overall school performance results usually masks the performance of the teachers, and individual teachers could escape from the accountability chain. With the Schools Subject Report, accountability is re-instated to the teacher.

4. SUMMARY OF CANDIDATE'S PERFORMANCE IN KEY SUBJECTS

4.1 NATIONAL PERFORMANCE IN 11 MOST POPULAR SUBJECTS: 2013-2016
