INTRODUCTION

A. What is Criminal Law about?

For anybody to be employed in the Criminal Justice System, a basic knowledge of the laws of the country is essential. This subject will enable the student to recognize the key principles of the criminal law and legal rules of South Africa. In the course of delivery of the subject the aim would be to identify and name the different sources of South African criminal law, in other words, where the laws come from. As this might be the student's first introduction to criminal law, this subject will further introduce the student to the principles and elements of crime and its place in criminal law, as well as provide analyses of specific crimes and statutory offences.

B. Why is Criminal Law important in the Safety in Society programme?

All the role players in the Criminal Justice System work on a daily basis with crime and other offences in their execution of duties as criminal justice officials. There is a relationship between the subjects Criminal Law and Police Practice, Criminology, Criminal Justice and Governance. As a result of the high crime rate in South Africa, criminal justice officials need to have a basic knowledge of criminal law and the statutory laws of our country in order to combat and adjudicate crime.

C. The link between Criminal Law Learning Outcomes and the Critical and Developmental Outcomes

After completion of this subject the student will have a basic knowledge of some principles of criminal law. This will enable them to understand the laws of the country and to perform duties as members of the policing agencies (South African Police Service (SAPS), Metropolitan Police Agencies, Traffic Policing Agencies and the Military Police Division (MPD)) and the judiciary.

D. Factors that contribute to achieving Learning Outcomes

Students should have a basic awareness of the manifestations and resolution of the crime problem. An interest in criminal law and how it empowers and assists criminal justice officers are basic necessities in order to be successful in this subject. After completion of this subject, students should have the ability to name and explain the basic principles embedded in the criminal law.

1 DURATION AND TUITION TIME

This is a one-year instructional programme comprising 200 teaching and learning hours. The subject may be offered on a part-time basis provided the student meets all the assessment requirements.

Students with special education needs (LSEN) must be catered for in a way that eliminates barriers to learning.

2 SUBJECT LEVEL FOCUS

Criminal Justice officials need to have a basic knowledge of the laws of our country – both statutory laws (laws made by parliament each year – e.g. Act 51 of 1977- Criminal Procedure Act) and common laws (laws that were carried over from one generation to another – e.g. murder, rape etc). This subject will enable the student to recognize the elements of SA Criminal Law and other legal rules of our country. In the course of delivery of this subject the aim would be to identify and name the different sources of the South African criminal law, in other words, where the laws come from. As this might be the student's first introduction to the criminal law, this subject will further introduce the principles and elements of crime and its place in the criminal law as well as analyses of specific crimes and statutory offences

3 ASSESSMENT REQUIREMENTS

3.1 Internal assessment (50 percent)

3.1.1 Theoretical component

The theoretical component forms 40 percent of the internal assessment mark.

Internal assessment of the theoretical component in Criminal Law (Level 3) takes the form of observation, class questions, group work, informal group competitions with rewards, individual discussions with students, class, topic and semester tests and internal examinations. Lecturers can observe students when marking exercises from the previous day and asking class questions.

Assignments, case studies and tests can be completed at the end of a topic. Tests and internal examinations must form part of the internal assessment.

3.1.2 Practical component

The practical component forms 60 percent of the internal assessment mark.

Practical components include applications and exercises. All practical components must be indicated in a Portfolio of Evidence (PoE).

Internal assessment of the practical component in Criminal Law Level 3 takes the form of assignments, practical exercises, case studies and practical examinations in a simulated business environment.

Students may complete practical exercises daily. Assignments and case studies can be completed at the end of a topic. Practical examinations can form part of internal practical assessment.

• **Some examples of practical assessments include, but are not limited to:**

- A. Presentations (lectures, demonstrations, group discussions and activities, practical work, observation, role-play, independent activity, synthesis and evaluation)
- B. Exhibitions by students
- C. Visits undertaken by students based on a structured assignment task
- D. Research
- E. Task performance in a "Structured Environment"

• **Definition of the term “Structured Environment”**

For the purposes of assessment, “Structured Environment” refers to a simulated workplace or workshop environment. Activities in the simulated workplace or environment must be documented in a logbook with a clear listing of the competencies to be assessed. The following information must be contained in the logbook:

- Nature of department or environment in which practical component was achieved
- Learning Outcomes
- Activities in the environment with which to achieve the Learning Outcomes
- Time spent on activities
- Signature of facilitator or supervisor and student

For the logbook to be regarded as valid evidence, it must be signed by an officially assigned supervisor.

• **Evidence in practical assessments**

All evidence pertaining to evaluation of practical work must be reflected in the student’s Portfolio of Evidence (PoE). The assessment instruments used for the purpose of conducting these assessments must be part of the evidence contained in the PoE.

3.1.3 Processing of internal assessment mark for the year

A year mark out of 100 is calculated by adding the marks of the theoretical component and the practical component of the internal continuous assessment (ICASS).

3.1.4 Moderation of internal assessment mark

Internal assessment is subjected to internal and external moderation procedures as set out in the *National Examinations Policy for FET College Programmes*.

3.2 External assessment (50 percent)

A national examination is conducted annually in October or November by means of a paper(s) set and moderated externally. A practical component will also be assessed.

External assessment details and procedures are set out in the *Assessment Guidelines: Criminal Law* (Level 3).

8 RESOURCE NEEDS FOR THE TEACHING OF CRIMINAL LAW - LEVEL 3

8.1 Physical resources

Classroom equipped with didactical requirements (e.g. writing board, overhead projector)

8.2 Human resources

The lecturer should ideally be a person with the relevant qualification. Practical experience in the field of the criminal justice is a recommendation.

8.3 Other resources

- Arrange for the attendance of a court hearing.
- Visit a police station and observe how the police operate in the client service centre when they take statements from complainants.
- Find a newspaper clipping which contains reports on crimes committed and court proceedings. Discuss these reports and proceedings with students
- Simulate a mock court in the class room
