FOREWORD

The Department of Basic Education (DBE) is pleased to release *Education Statistics in South Africa 2012*, the 14th such publication since 1999. The publication contains statistics on national schooling from Grade R to Grade 12, early childhood development (ECD), and schools with special needs subsectors.

Action Plan 2014, which forms part of the larger South African education vision of Schooling 2025, and the Outcomes-Based Performance Management System, which was adopted by the Presidency to enhance service delivery, still remains the current primary processes to accentuate the value of education statistics for planning and monitoring and evaluation. This publication provides the information on which evidence-based decision-making in education provision is based on.

The availability of education data for the past 14 years facilitates the analysis of trends in the education system over time. The statistics also serve as a measure of the success of education policies, and as proof that the DBE and the provincial education departments (PEDs) have been achieving their concurrent objectives.

The publication details the shape and size of the education system in South Africa, specifically in regard to numbers of learners, educators and schools. This means that education planners and decision makers and those entrusted with monitoring, evaluating and accounting for progress in the schooling system will have access to the necessary statistical evidence that will enable them to act in a suitable manner in order to achieve key education objectives and to increase efficiency and effectiveness in the system.

Both quantity and quality measurements are addressed by the current publication. It was the case that previous publication (with exception of 2010) dealt with enrolments and related characteristic statistics. The current publication includes quality of education considerations, namely learner performance. That is, the Annual National Assessment (ANA) results are included in the publication. The performance of learners for grades 1-6 and 9 in Mathematics, Home Language and First Additional Language provide a picture of the quality of education in the General Education and Training (GET) Band.

National Treasury is still recognised as the main user of these statistics, which inform the allocation of financial resources to education.

Stakeholders in education, such as researchers, publishers and statutory bodies, are welcome to utilise the information contained in this publication in their endeavours to improve the delivery of education in the country. The education statistics in this publication also form the basis for calculating education indicators reported to UNESCO, which enables South Africa to assess its achievement against the requirements of Education For All (EFA) and the Millennium Development Goals (MDGs) for the Second Decade of Education in Africa.

In the quest for improving the quality of education data, a random sample of institutions in the country is selected for external auditing of their data. The results of the audit are reported to the Council of Education Ministers and, via the PEDs, to the institutions. Therefore, I would like to remind all institutions that, as sources of education information, they might be selected at random to have their data audited to determine the accuracy of the information that they keep and on which they report.

The statistical quality of the data provided in the publication has furthermore been improved by ensuring that the systems and techniques for acquiring and processing education information are subjected to annual quality audits and compliancy monitoring.

The report includes several indicators that contribute towards the monitoring and evaluation of education policies and service-delivery programmes. These serve to guide crucial policy interventions and strategies. Indicators such as learner-educator ratio (LER), learner-school ratio (LSR), educator-school ratio (ESR), gross enrolment ratio (GER) and

gender parity index (GPI) give an idea of the progress that government is making towards the achievement of access and quality in education.

This publication would not have been possible without the contribution of the heads of the nine provincial Education Management Information Systems (EMIS) units and their staff, regional and district officials, school principals, special school principals, and ECD centre managers, who had the challenging task of setting up, managing and maintaining the management information systems that yielded its contents. We also remain deeply indebted to other partners in the education environment, whose ongoing feedback and recommendations will provide the basis for the further development and improvement of statistical reporting on education in South Africa.

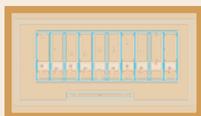

I thank the provinces yet again for their efforts, in 2012, towards the collection of education information.

SG PADAYACHEE

1. INTRODUCTION

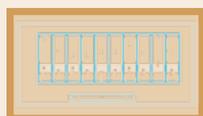

This publication is based on data collected via the 2012 SNAP Survey for Ordinary Schools and Special Need Education (SNE) (Includes both independent and public ordinary schools) and 2012 Annual Survey for Early Childhood Development (ECD). However, some data for previous years are provided to allow for comparative analysis over time. These surveys were undertaken by the Department of Basic Education (DBE) together with the Provincial Education Departments (PEDs). The SNAP survey for ordinary schools is conducted on the tenth schooling day of every year while the SNAP Survey for Special Schools and Annual Survey for Early Childhood Development are conducted on the first Tuesday in March of every year.

The publication also includes information from other sources such as the National Senior Certificate (NSC) examination report, the Annual National Assessment and 2012 population estimates projected in July 2013.

The first section of the publication focuses on the overview of the education system in South Africa. The second section looks at information regarding ordinary public and independent schools. This is done by analysing basic school data, region and district data on learners, educators and schools, district municipality and metropolitan municipality data on learners, educators and schools, staff complement and national senior examination. The last section deals with information from other sectors such as ECD and SNE.

2. OVERVIEW OF THE EDUCATION SYSTEM IN SOUTH AFRICA

The centrefold shows that, in South Africa in 2012, there were 30 231 established public and registered independent education institutions that submitted the survey forms. Of these, 25 826 were ordinary schools and 4 405 were other education institutions – namely, ECD centres and special schools.

The figure of 25 826 for ordinary schools comprised the following:

- 14 206 primary schools, with 6 000 607 learners and 186 285 educators;
- 6 411 secondary schools, with 4 018 232 learners and 147 945 educators; and
- 5 209 combined and intermediate schools, with 2 409 230 learners and 90 937 educators.

Figure 1: Percentage distribution of learners in the education system in 2012

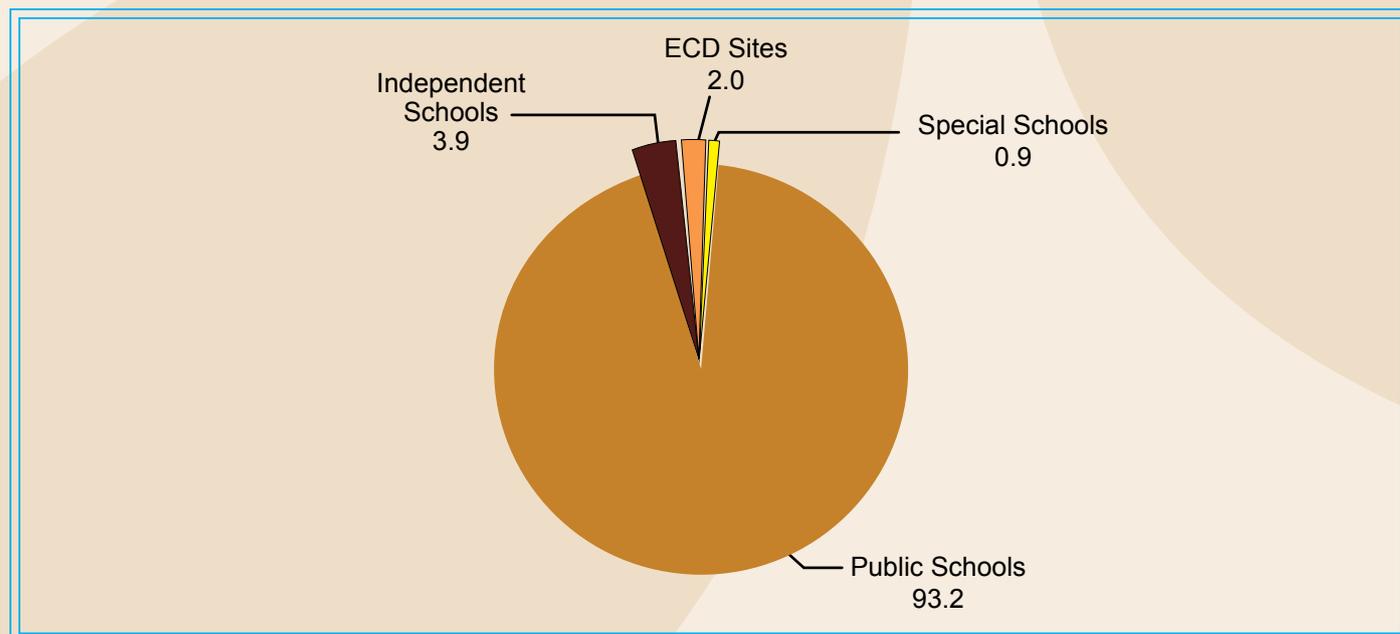

Figure 1, Table 18, Table 19 and the centrefold show that, of the 12 804 772 learners and students enrolled in all sectors of the basic education system in 2012, 11 932 681 (93.2%) were in ordinary public schools and 495 388 (3.9%) were in ordinary independent schools. Of the learners in other institutions, 265 105 (2.0%) were in ECD centres and 111 598 (0.9%) were in special schools.

In summary, there were 12 804 772 learners and students in the basic education system, who attended 30 231 education institutions and were served by 446 008 educators.

3. ORDINARY PUBLIC AND INDEPENDENT SCHOOL

3.1 Introduction

This section reports on the number of schools, learners and educators in ordinary public and independent schools. Approximately 99.7% of open ordinary schools submitted the survey forms, and imputation was done to establish a data set of 100%. **The figures in this publication are final after the preliminary figures that appeared in the Department's report *School Realities 2012* were updated.**

3.2 Basic school data

Table 1: Number of learners, educators and schools in the ordinary public school funding type, by province, in 2012

Source: 2012 SNAP Survey.

3.2.1 Schools (see Tables 2 and 3)

In 2012, there were 25 826 ordinary schools in South Africa. KwaZulu-Natal (6 176, or 23.9% of the national total) and the Eastern Cape (5 754, or 22.3% of the national total) had the highest and second highest number of ordinary schools, while the Northern Cape (580, or 2.2% of the national total) had the lowest number. Of the 25 826 schools in the country, 1 544 (6.0%) were independent schools.

3.2.2 Learners (see Tables 2 and 3)

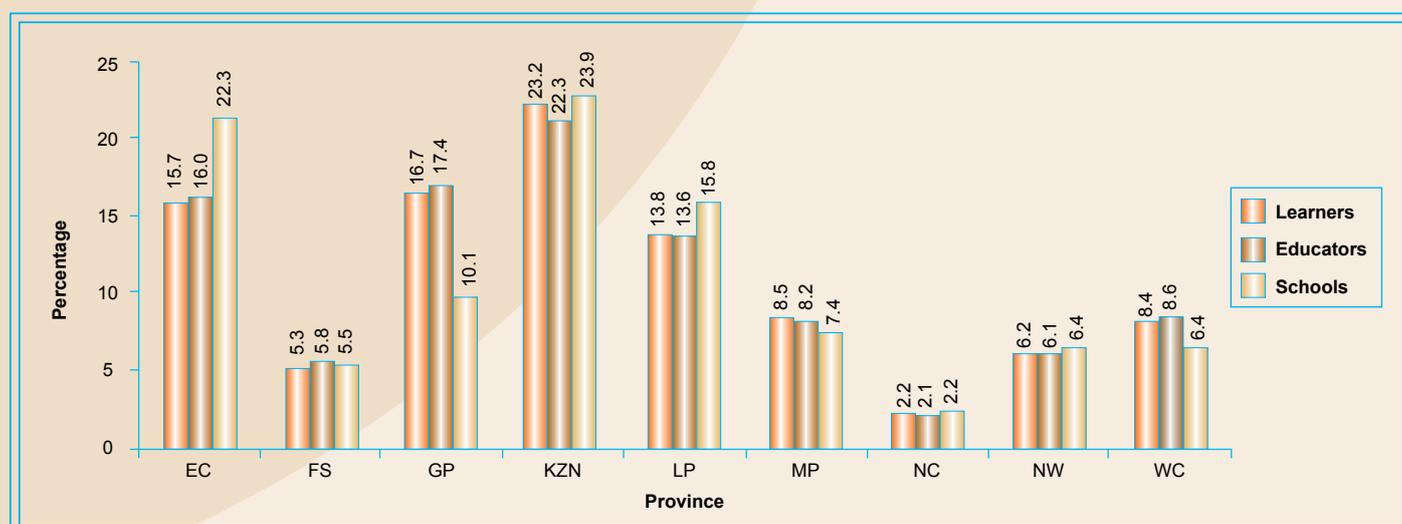

In 2012, there were 12 428 069 learners in ordinary schools in the country as a whole. Three provinces – namely, the Free State, the Northern Cape and North West – respectively showed less than a million learners in ordinary schools. In Gauteng and KwaZulu-Natal more than two million learners were enrolled in ordinary schools, comprising, respectively, 16.7% and 23.2% of the national total. Of the 12 428 069 learners in the country, 495 388 (4.0%) were in independent schools.

3.2.3 Educators (see Tables 2 and 3)

There were 425 167 educators in ordinary schools in South Africa in 2012. KwaZulu-Natal (94 932, or 22.3% of the national total) had the highest number of educators in ordinary schools, while three provinces – namely, the Free State, the Northern Cape and North West – had fewer than 30 000 educators each. Of the 425 167 educators in the country, 32 495 (7.6%) were employed in the independent school funding type.

3.2.4 Distribution of learners, educators and schools

Figure 2: Percentage distribution of learners, educators and schools in ordinary school, by province, in 2012

The mainly rural provinces tend to have proportionally more schools with fewer learners than the more urbanised provinces, which tend to have proportionally fewer schools with more learners, an indication of higher population density. Figure 2 shows that, in 2012, the Eastern Cape, one of the more rural provinces, had 22.3% of the national total of ordinary schools serving 16.0% of South Africa's learners, while Gauteng, the most urbanised province, had 10.1% of the national total of ordinary schools serving 16.7% of the country's learners.

Figure 3: Distribution of learners, educators and schools in the independent school funding type, as a percentage of provincial totals in the ordinary school funding type, by province, in 2012

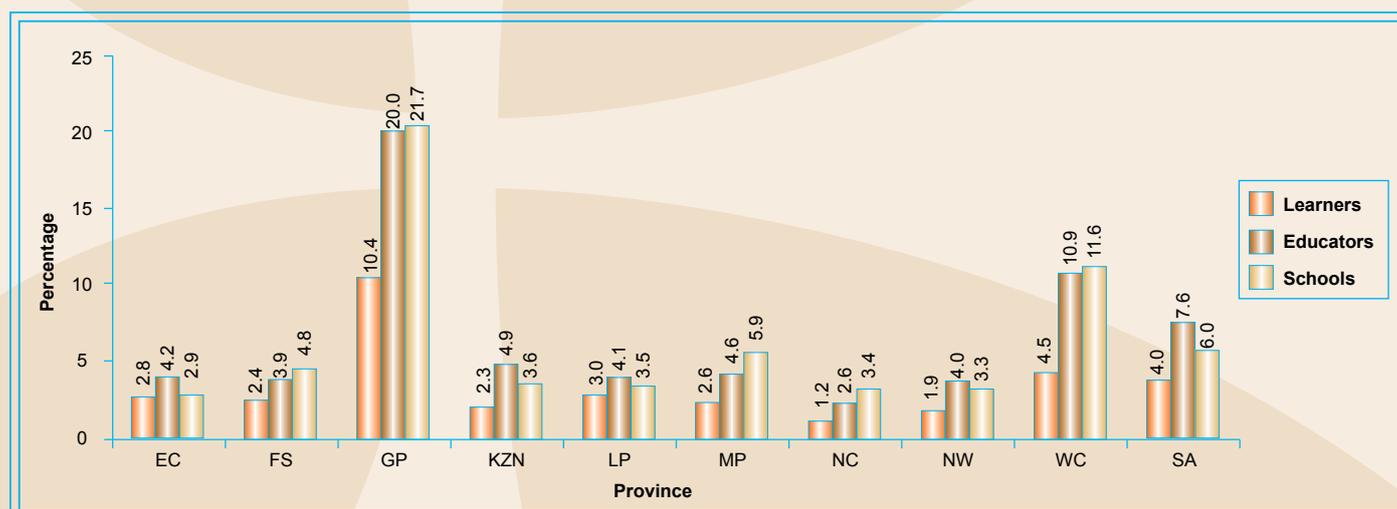

Figure 3, as calculated from Tables 2 and 3, indicates that, in 2012, Gauteng had the largest proportion of learners, educators and schools (10.4%, 20.0% and 21.7%, respectively) in the independent school funding type, while the Northern Cape had the smallest proportion of learners and educators (1.2% and 2.6%, respectively), and the Eastern Cape the smallest proportion of schools (2.9%) in the same funding type.

3.2.5 Indicators

- **Learner-educator ratio (LER) (see Table 3)**

In 2012, the national average LER in ordinary schools in the country was 29.2:1, ranging from 26.7:1 in the Free State to 30.4:1 in Mpumalanga.

- **Learner-school ratio (LSR) (see Table 3)**

The national average LSR in ordinary schools in South Africa was 481:1 in 2012, ranging from 339:1 in the Eastern Cape to 795:1 in Gauteng. In three provinces (Gauteng, Mpumalanga and the Western Cape), the ratio was higher than the national average with 795:1, 549:1 and 632:1 respectively.

- **Educator-school ratio (ESR) (see Table 3)**

In 2012, the national average ESR in ordinary schools in the country was 16.5:1, ranging from 11.8:1 in the Eastern Cape to 28.3:1 in Gauteng.

Gross enrolment ratio (GER) (see Tables 4 and 5)

Table 4: Gross enrolment ratio (GER) and gender parity index (GPI) in ordinary schools, by province and gender, in 2012

Province	Gender	School Phases (Gr. 1-12)						School Bands (Gr. R-12)

Source 1: 2012 SNAP Surveys.

Source 2: Population estimates, Statistics South Africa (July 2013).

Note 1: Underlying population data not shown in the publication.

Note 2: GER values have been rounded off to whole numbers.

Education in ordinary schools could be grouped in terms of either the GET and FET bands or the traditional primary and secondary phases. The GET band (Grades R to 9) caters for the following phases: foundation phase (Grades R to 3), intermediate phase (Grades 4 to 6) and senior phase (Grades 7 to 9). The FET band caters for Grades 10 to 12 and excludes learners in FET colleges.

GER is defined as the number of learners, regardless of age, enrolled in a specific school phase (e.g. primary phase for Grades 1 to 7) as a percentage of the total appropriate school-age population (e.g. seven- to 13-year-olds for the primary phase). For example, a GER of more than 100% indicates that there are more learners in the formal schooling system than in the appropriate school-age population (total potential population), which indicates enrolment of under-aged and over-aged learners owing to early or late entry and grade repetition.

In 2012, as shown in Table 4, the national total GER for the combined GET and FET bands (Grades R to 12) was 93%, which is lower than the GER of 95% for the combined primary and secondary phases (Grades 1 to 12). This is perhaps due, mainly, to the fact that a significant number of Grade R learners of the appropriate school age are not in ordinary primary schools. Some provinces reflected GER values of more than 100% for the various GER groupings, suggesting that inappropriately-aged learners were enrolled in those groupings. For the secondary phase and the FET band, the national GER was higher for females than for males, indicating that, relative to the appropriate school-age population, there were more female learners than male learners in the school system. It could also mean that, for a variety of reasons, female learners remain in the system longer than male learners.

Figure 4: Gross enrolment ratio (GER) for Grades R to 12 in ordinary schools, by province and gender, in 2012

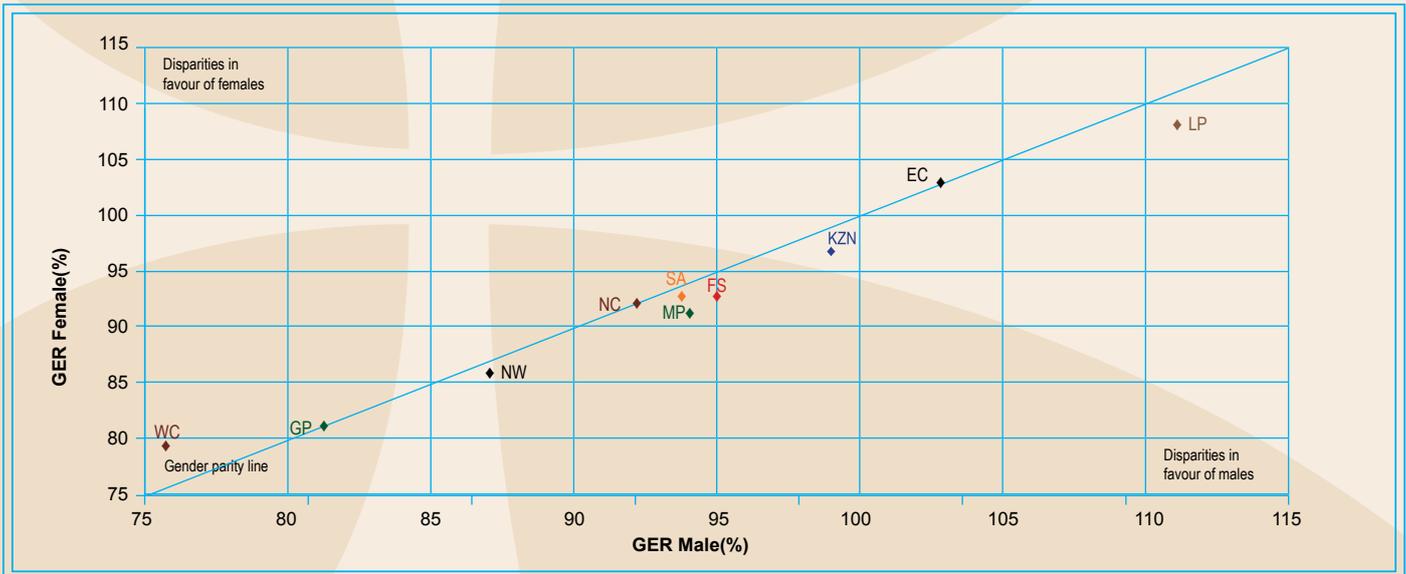

Figure 4 compares the total GER for male and female learners, Grades R to 12, in 2012. If the GER value for a province lies above the gender parity line, this shows that more female learners than male learners of the same appropriate school-age population are enrolled, which indicates a disparity in favour of females. The National GER value lies below the gender parity line, which means that there were more male learners than female learners. The provinces with the largest gender gap – that is, whose GER values lie furthest from the gender parity line – were the Western Cape in favour of females and Limpopo in favour of males. Three provinces – namely, the Eastern Cape, Gauteng and the Northern Cape – showed no gender gap.

- Gender parity index (GPI) (see Table 4)**

GPI is defined as GER for females divided by GER for males. This index is used to indicate the level of access to education that females have, compared to the level of access that males have. For example, a GPI of more than 1 indicates that, in proportion to the appropriate school-age population, there are more females than males in the school system. In 2012, as indicated in Table 4, the national highest GPI (1.14) was reflected in the FET band and the lowest in the primary phase (0.95), confirming that, relative to the appropriate school-age population, there were more female learners in the FET band than there were in the primary phase.

Figure 5: Gender parity index (GPI) for Grades R to 12 in ordinary schools, by province, in 2012

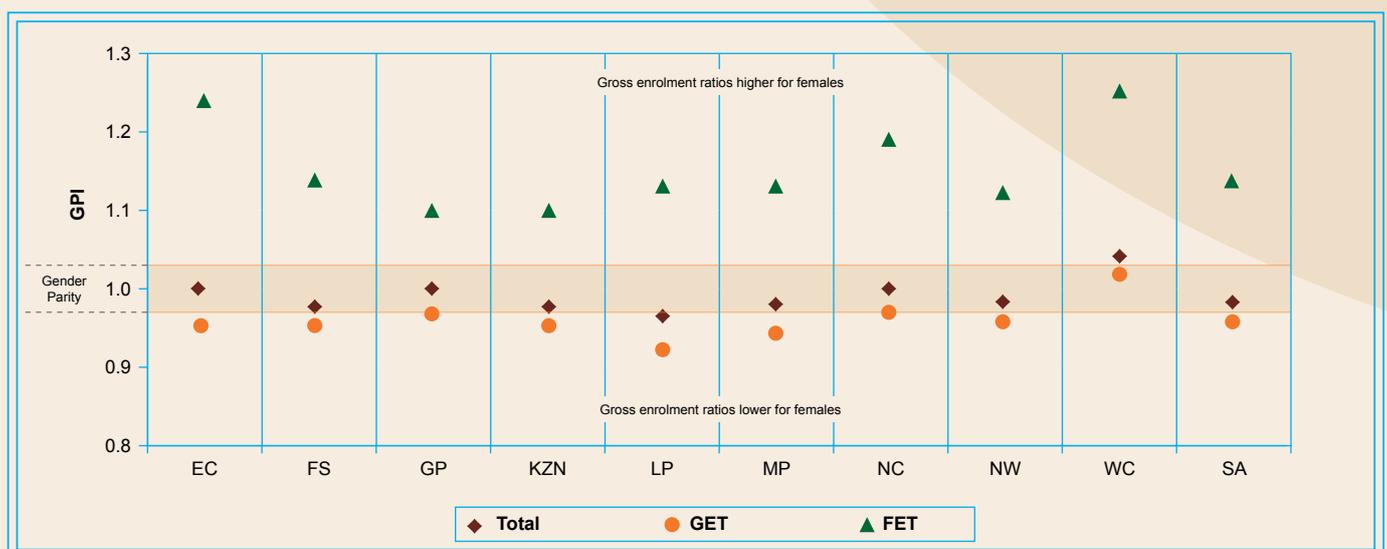

Figure 5 shows the GPI for Grades R to 12 (GET and FET bands), by province, in 2012. Gender parity is considered to have been attained when the GPI lies between 0.97 and 1.03 (Global Education Digest 2005, UNESCO Institute for Statistics). Gender parity in the combined GET and FET bands has been achieved in eight of the nine provinces. However, the Western Cape was the only province with GPI of greater than 1.03. The GPI deviated from the norm most strongly in the FET band. Every province reveals a GPI of greater than 1.03.

3.2.6 Learners, by grade and school phase

Table 5: Number of learners in ordinary schools, by province, sector, gender and grade, in 2012

Source: 2012 SNAP Survey.

Note 1: Data are for ordinary schools only and exclude learners at stand-alone ECD sites, special schools.

Note 2: Owing to a shortage of space in the table, the male enrolment figures for ordinary public and independent schools are intentionally omitted in the provincial data, but they are included in the national data.

1) Learners not grouped in any of the grades provided.

Figure 6: Percentage distribution of learners in ordinary schools, by phase, in 2012

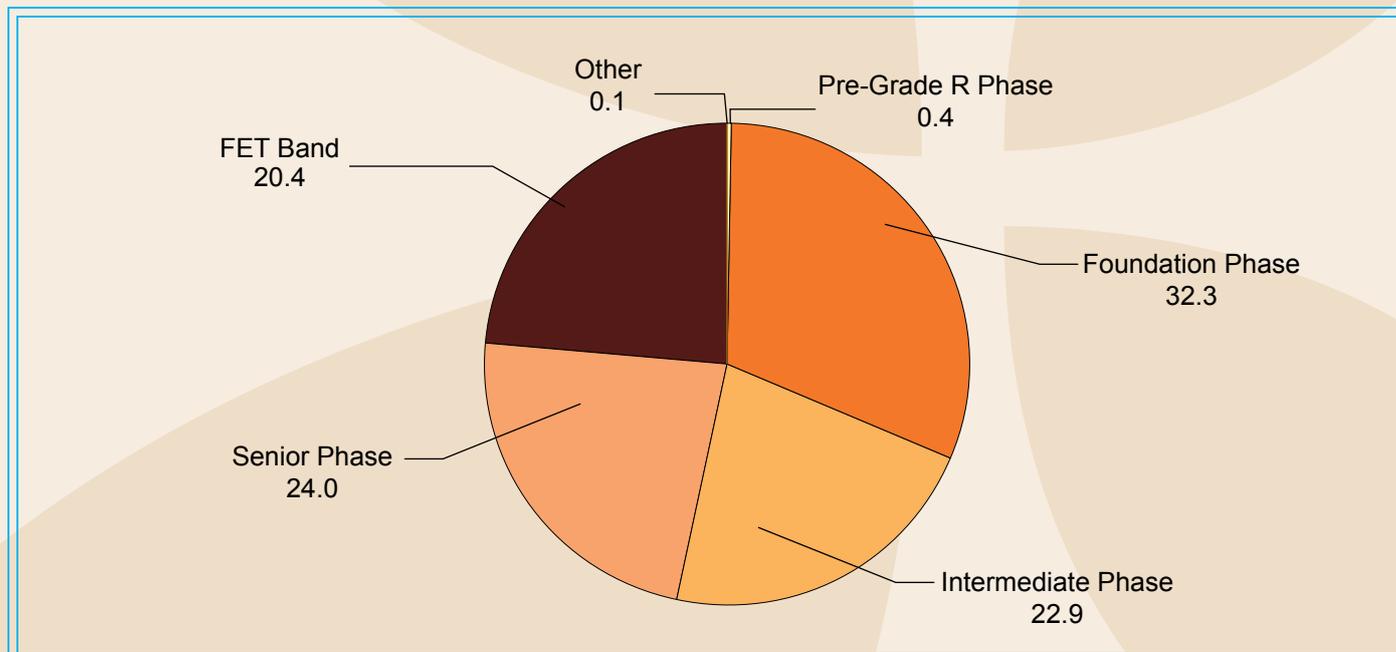

Figure 6 reveals that, in 2012, the highest proportion of learners in ordinary schools was located in the foundation phase (32.3%). As one moves up to higher levels within the schooling system, the proportion of learners decreases. Hence, in 2012 the FET band comprised only 20.4% of learners in ordinary schools. The proportion of learners in the pre-Grade R phase was very low (0.4%). This is not surprising, as it is not the policy intent of government to provide pre-Grade R programmes in school.

Figure 7: Percentage distribution of learners in ordinary schools, by phase and gender, in 2012

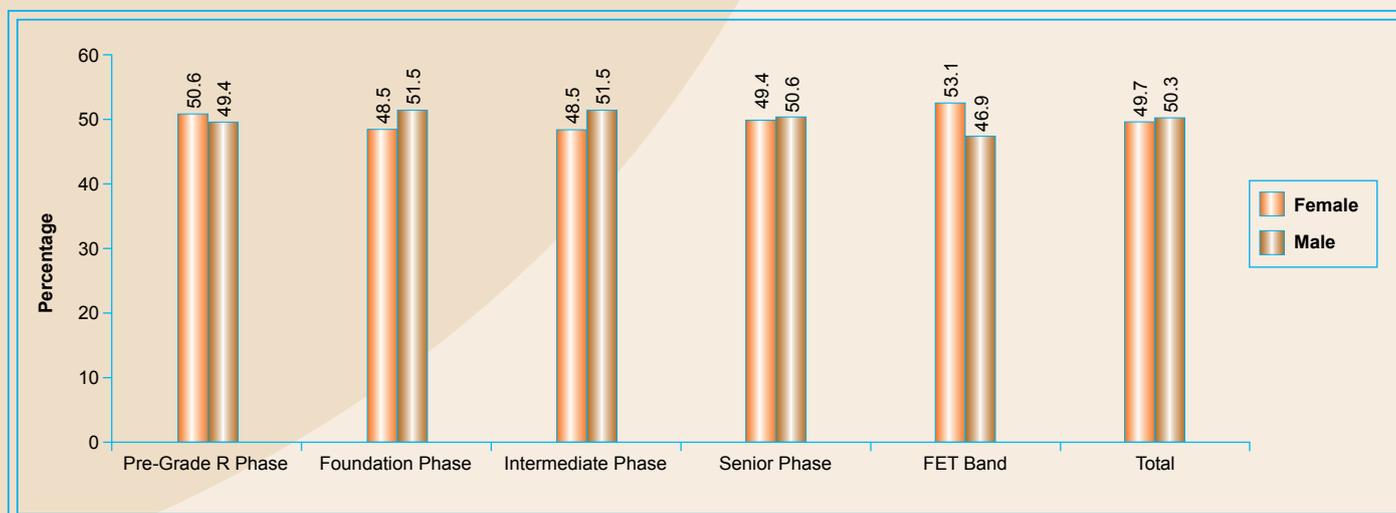

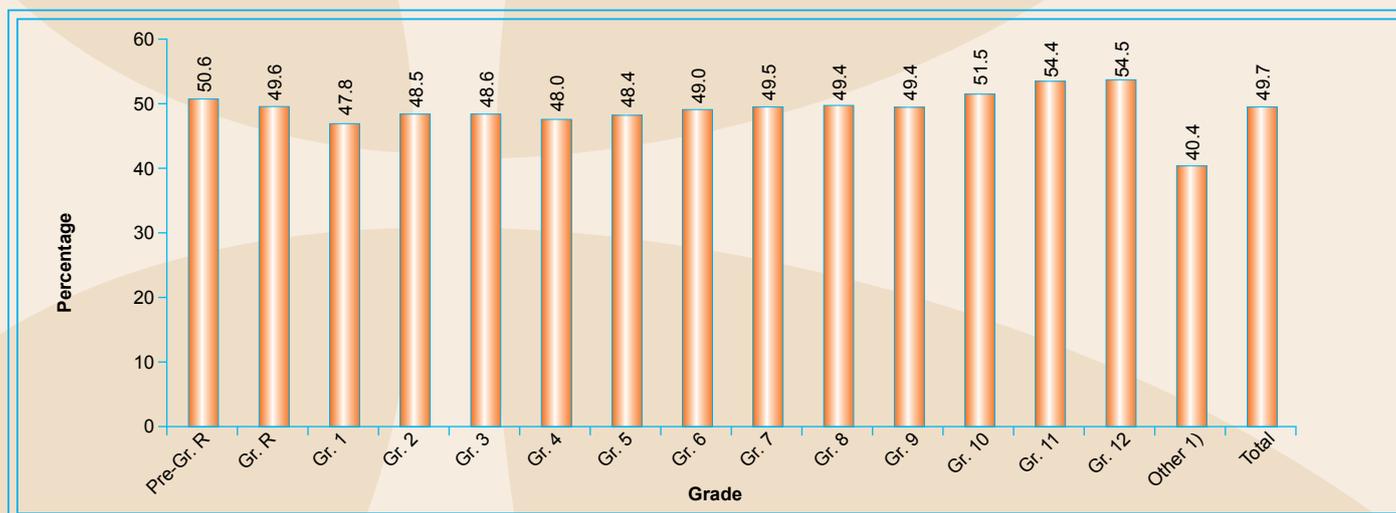

Figure 7 indicates that, in 2012, females and males were almost equally represented in ordinary schools in South Africa (females 49.7% and males 50.3%). There were more males than females in the foundation phase, intermediate phase and senior phase and more females than males in the other two phases. The highest percentage of females (53.1%) was found in the FET band.

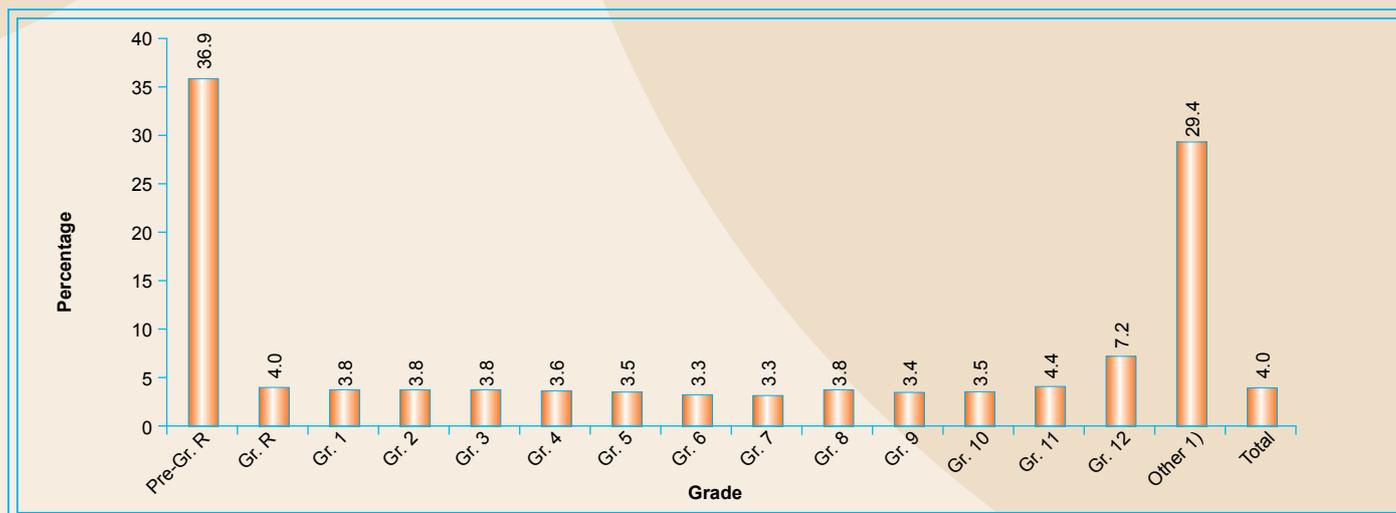

Figure 8: Percentage distribution of female learners in ordinary schools, by grade, in 2012

1) Included as grades in this figure in order to offer a complete picture of all learners in the ordinary school sector.

In 2012, as indicated in Figure 8, there were fewer female than male learners (less than 50%) in Grades R to 9, and Other, while the opposite was true for the other grades. Grade 12 females (54.5%) accounted for the highest female enrolment in all the primary and secondary-level grades. The lowest female enrolment was for Other (40.4%).

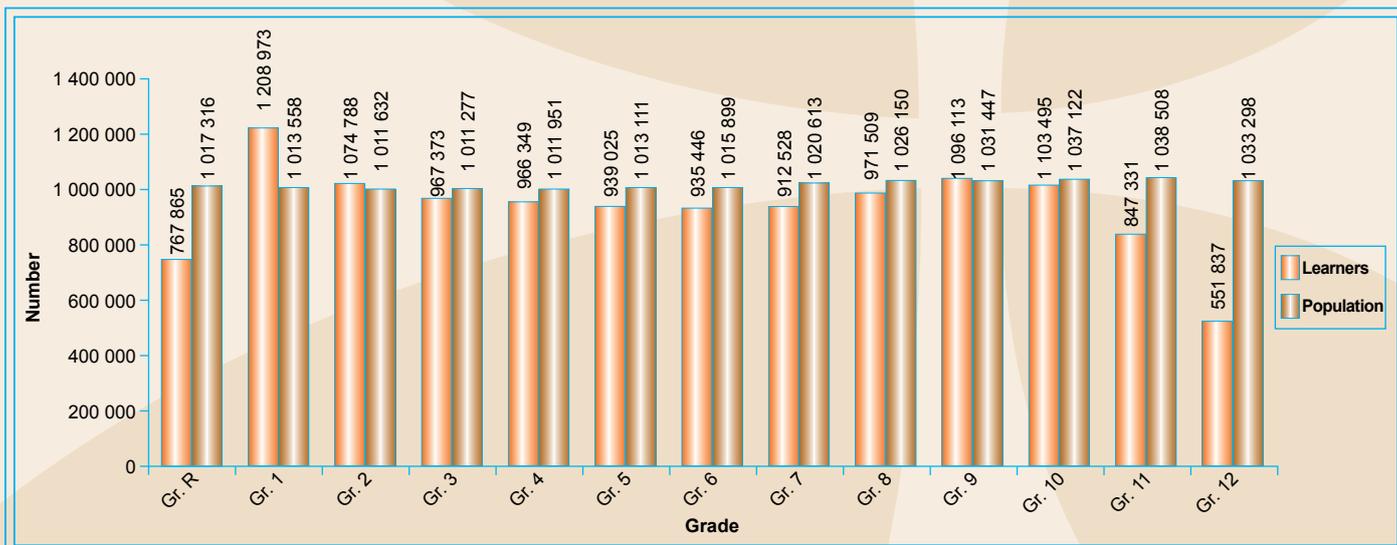

Figure 9: Distribution of learners in ordinary independent schools as a percentage of ordinary school learners, by grade, in 2012

1) Included as grades in this figure in order to offer a complete picture of all learners in the ordinary school sector.

Figure 9 shows that, in 2012, the percentage of learners in independent schools in the ordinary school system was the highest for pre-Grade R (36.9%), the second highest for Other (29.4%), and the lowest for Grades 6 and 7 (3.3%). The total national average of learners in independent schools was 4.0%.

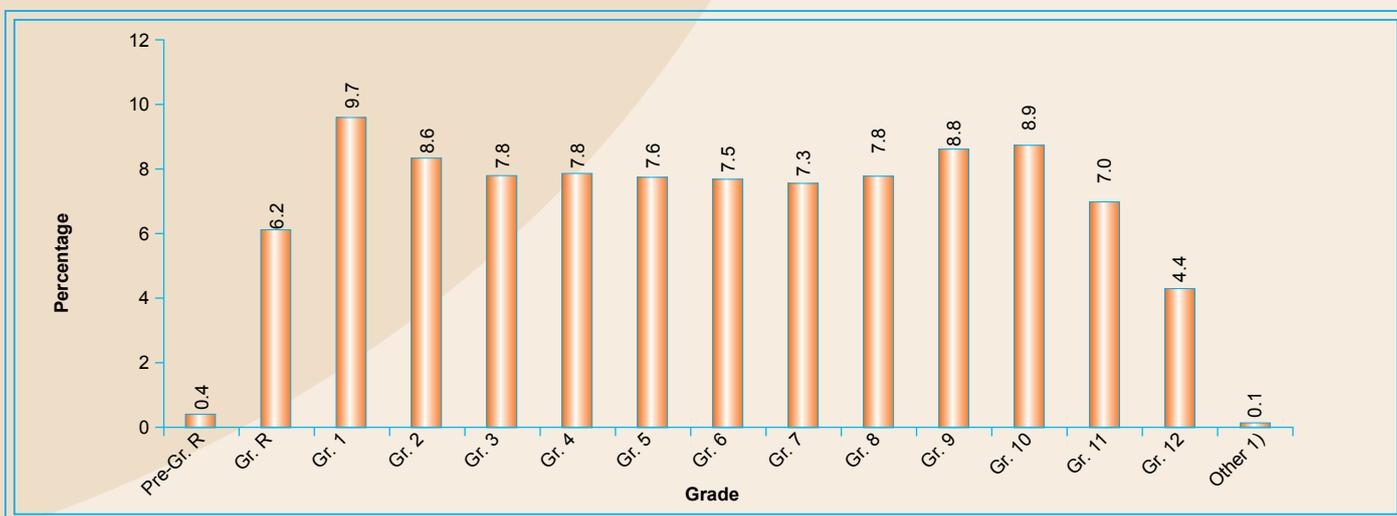

Figure 10: Number of learners in ordinary schools, by grade, compared with the appropriate age group in the population, in 2012

Source: Population estimates, Statistics South Africa (July 2013).

Figure 10 shows learner enrolment in 2012 as compared to the appropriate school-age population for each grade (taking the year in which a learner turns seven as the appropriate age for entry into Grade 1). Grades 1, 2, 9 and 10 were over-enrolled, which probably indicates enrolment of over-aged and under-aged learners. From Grade 11 to Grade 12 there was a significant increase in the degree of under-enrolment. The highest under-enrolment was experienced in Grades R and 12, which reflected an enrolment of 75.4% and 53.4%, respectively, of the appropriate school-age population. It must be noted that some learners who were at the FET band age were also enrolled in FET colleges and that others attended ABET classes, which is not a compulsory schooling phase.

Figure 11: Percentage distribution of learners in ordinary schools, by grade, in 2012

1) Included as grades in this figure in order to offer a complete picture of all learners in the ordinary school sector.

Figure 11 shows that, not counting pre-Grade R and Other, in 2012, the highest proportion of learners in ordinary schools was enrolled in Grade 1 (9.7%), while the lowest proportion was enrolled in Grade 12 (4.4%). The pattern of enrolment across grades reveals a steady decline in the proportion of learners from Grades 1 to 2, while the enrolment stayed almost the same from Grades 3 to 8. An anomaly occurs in Grade 10, where there is an unexpected increase in the proportion of learners. This could possibly be explained by higher levels of retention in Grade 10 than in other grades. The decline in the proportion of learners from Grade 11 to Grade 12 is significant, suggesting possible dropout or movement out of the schooling system to other education institutions.

2009-2011: As published in *Education Statistics in South Africa*.

2012: SNAP Survey.

As can be seen in Table 6, between 2009 and 2012, learner numbers and educators showed a net increase of 1.6% and 2.9% (12 227 963 to 12 428 069 and 413 067 to 425 167) respectively, while the number of schools decreased by 0.3% (25 906 to 25 826).

- Learners in independent schools as a percentage of all learners (see Table 7)

Table 7: Comparing the share of learners in ordinary independent schools, and learner-educator ratio (LER), learner-school ratio (LSR) and educator-school ratio (ESR) in the ordinary school sector, by province, from 2009 to 2012

Table 7 shows that, from 2009 to 2012, the percentage of learners in ordinary independent schools nationally increased from 3.2% to 4.0%, a net increase of 25.0%.

• **Learner-educator ratio (LER) (see Table 7)**

Table 7 shows that, from 2009 to 2012, the national average LER at ordinary schools in the country decreased from 29.6:1 to 29.2:1, a net decrease of 1.4%.

• **Learner-school ratio (LSR) (see Table 7)**

Table 7 shows that, from 2009 to 2012, the national average LSR at ordinary schools in the country increased from 472:1 to 481:1, a net increase of 1.9%.

• **Educator-school ratio (ESR) (see Table 7)**

Table 7 shows that, from 2009 to 2012, the national average ESR at ordinary schools in the country increased from 15.9:1 to 16.5:1, a net increase of 3.8%.

• **Gross enrolment ratio (GER) (see Table 8)**

Table 8: Comparing gross enrolment ratio (GER) and gender parity index (GPI) in the ordinary school sector, by province, from 2009 to 2012

Sources:

2009-2011: As published in Education Statistics in South Africa.

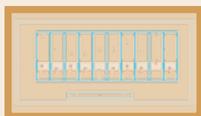

2012: SNAP Survey, and Statistics South Africa population estimates published in July 2013.

Note: Underlying population data for 2012 not shown in the publication.

Table 8 shows that the total national average GER for Grades 1 to 12 increased over the four-year period 2009 to 2012 – namely, from 92% to 95%. Although the inclusion of Grade R had a decreasing effect on the GER (Grades R to 12) values for the same period, the national averages to 93 in 2012 and 89 in two of the four years.

Gender parity index (GPI) (see Table 8)

Table 8 shows that, from 2009 to 2012, the national average GPI for Grades 1 to 12 decreased from 1.01 to 0.99. In the same four-year period, the national average GPI for Grades R to 12 remained almost the same – namely, 1.01 in one of the four years and 1.00 in the remaining years.

Source: 2012 SNAP Survey.

Note 1: Data are for ordinary schools only and exclude learners, educators and institutions associated with stand-alone ECD sites and special schools.

Note 2: Owing to a shortage of space in the table, the figures for male learners and male educators are intentionally omitted.

Note 3: n.a. = not applicable.

1) Learners not grouped in any of the grades provided.

3.4 District municipality and metropolitan municipality data on learners, educators and schools

Table 10: Number of learners, educators and schools in the ordinary school sector, by province, district municipality and metropolitan municipality, in 2012

Note: These data exclude substitute staff

Table 11 and Figure 12 reflect the number and percentage of various staff type in the country between 2011 and 2012. It show that educators comprised approximately 80.5% (425 167) of all staff members, and support staff approximately 12.0% (63 376).

As can be seen in Table 11, between 2011 and 2012 the number of administrative staff showed a net increase of 1.6% (from 28 952 to 29 427).

3.6 National Senior Certificate examination

3.6.1 Introduction

The National Senior Certificate (NSC) examination of 2008 was the first examination that was based on the New Curriculum Statement (NCS), which requires all learners in Grades 10 to 12 to take seven subjects. Two of these subjects must be South African languages, one of which must be the Language of learning and Teaching (LOLT). In addition to two languages, all learners must take Life Orientation and either Mathematics or Mathematical Literacy. In addition to these four compulsory subjects, learners must choose three subjects from a list of approved subjects.

To obtain an NSC a candidate must, depending on the minimum requirements, achieve either 40% or 30% in six subjects. In the seventh subject a candidate is allowed to achieve less than 30% in order to pass.

3.6.2 Overall results of full-time candidates

Source: Report on the 2011 National Senior Certificate Examination Results, DBE (January 2012).

In 2012, as indicated in Table 12, the overall national pass rate in the NSC examination was 73.9%. In all the provinces more females than males wrote the NSC examination. However, in relative terms, as indicated in Table 12 and Figure 13, the national pass rate of male candidates (75.7%) was higher than the national pass rate of female candidates (72.4%). A similar trend was seen in all nine provinces. In all the provinces, more female than male candidates passed. Furthermore, Table 12 shows that the overall pass rate, by province, varied from 82.8% in the Western Cape to 61.6% in the Eastern Cape.

Figure 13: Percentage distribution of the National Senior Certificate examination pass and failure rates, by gender, in 2012

Table 13: Comparing pass rates of the National Senior Certificate examination, by province, in 2011 and 2012

Province	Pass Rate (%)	
	2011	2012
Eastern Cape	58.1	61.6
Free State	75.7	81.1
Gauteng	81.1	83.9
KwaZulu Natal	68.1	73.1
Limpopo	63.9	66.9
Mpumalanga	64.8	70.0
North West	77.8	79.5
Northern Cape	68.8	74.6
Western Cape	82.9	82.8
South Africa	70.2	73.9

Source: Report on the 2012 National Senior Certificate Examination Results, DBE (January 2013).

Table 13 shows that the national pass rate of the NSC examination increased from 70.2% in 2011 to 73.9% in 2012. A similar increasing trend was seen in all provinces, albeit to different degrees.

Source: Report on the 2012 National Senior Certificate Examination Results, DBE (January 2013).

Figure 14: Percentage distribution of the National Senior Certificate examination percentage pass rates of schools within different percentage groupings in 2011 and 2012

In 2012, as shown in Table 14 and Figure 14, 6.7% (approximately 441) of the 6 623 schools in South Africa that offered the NSC examination obtained 100% passes. This is lower than the 8.3% of 2011. The percentage of schools that obtained a pass rate of between 80% and 100% increased from 37.0% in 2011 to 39.4% in 2012. As for schools that performed poorly, 1.9% of them obtained a pass rate of between 0% and 19.9% in 2012, which is lower than the 2.4% of 2011. Nationally, 0.0% of schools (approximately 2) scored a 0% pass rate in 2012, which is lower than in 2011.

Figure 15: Percentage distribution of the National Senior Certificate examination achievements at 30% and above for selected subjects in 2011 and 2012

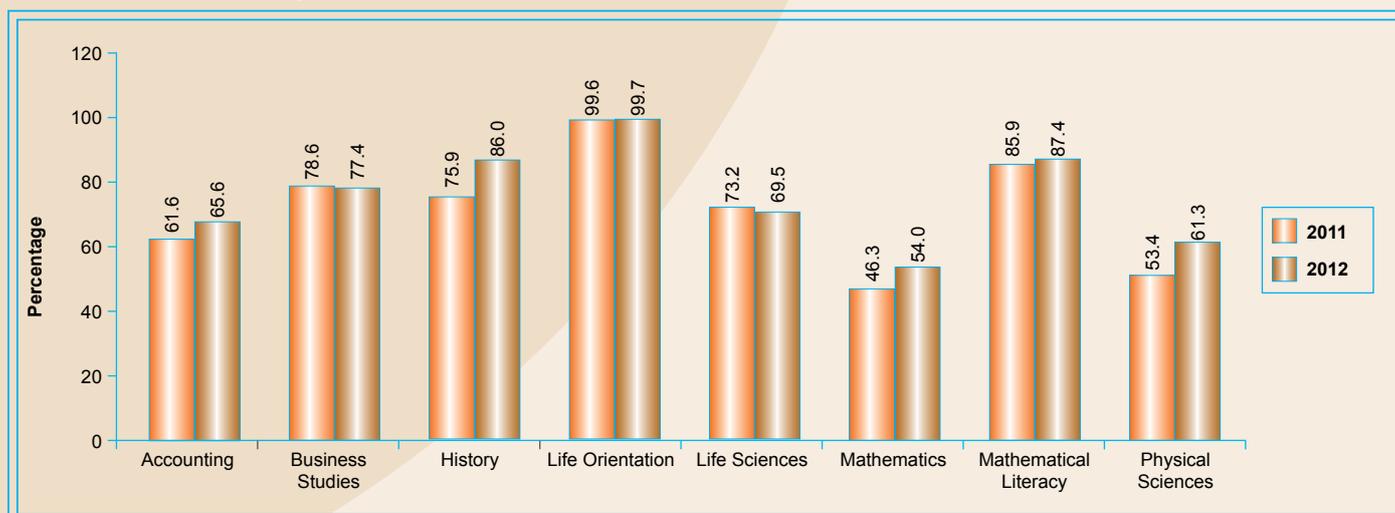

Table 15 and Figure 15 show the achievement rates of candidates in eight selected subjects in the 2011 and 2012 NSC examinations. In both the category 40% and above and the category 30% and above, the highest overall achievement rates were obtained in Life Orientation. The pass rate for Life Orientation remained almost the same in the two years. While nearly all subjects had an increase in the pass rate. Life Sciences and Business Studies are the only subjects that had a decrease in pass rate from 73.2 in 2011 to 69.5 in 2012 and 78.6 to 77.4 respectively.

3.7 ANNUAL NATIONAL ASSESSMENTS

3.7.1 Introduction

The improvement of the quality and levels of educational outcomes in the schooling system is a top priority of both Government and the Department of Basic Education (DBE). The extent to which these outcomes are achieved will be monitored through the administration of the Annual National Assessments (ANA).

ANA is expected to have four key effects on schools:

- to expose educators to better assessment practices;
- to make it easier for districts to identify the schools that are most in need of assistance;
- to encourage schools to celebrate outstanding performance;
- and to empower parents with important information about their children's performance.

The ANA 2012, which involved standardised Home Language, First Additional Language and Mathematics tests written by all learners who were in Grades 1 to 6 and 9 in 2012, was managed by the schools themselves. This series of tests is referred to as the "Universal ANA".

3.7.2 Analysis based on the Foundation Phase test instrument

Table 16: Average percentage score of learners in the Foundation phase Home Language and Mathematics, by province, in 2012

Province	Grade	Home Language		Mathematics	
		Average Percentage Mark	Percentage of Learners Achieving 50% and More	Average Percentage Mark	Percentage of Learners Achieving 50% and More
Eastern Cape	Grade 1	55.0	60.0	65.2	72.8

	Grade 3	52.0	56.6	41.2	36.3

Source: Report on the Annual National Assessments 2012

- Analysis based on Grade 1 results**

Table 16 shows that, in 2012, the average score for a grade 1 learner in South Africa was 57.5% in Home Language and 68.1 in Mathematics. Of all Grade 1 learners who wrote ANA tests, about 64% obtained 50% and more in Home Language and 77.4% in Mathematics.

Gauteng had the highest percentage of Grade 1 learners (85.7%) who achieved 50% and above in Mathematics, while North West and the Northern Cape had the lowest (71.2 and 71.6 respectively).

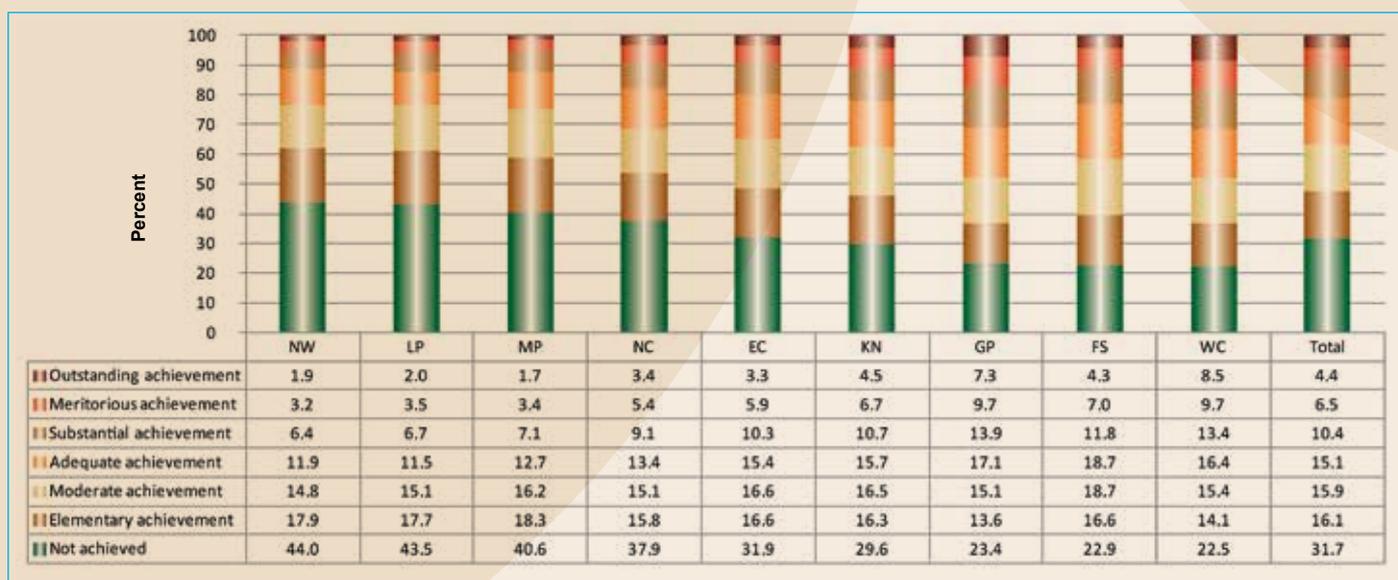

- Analysis based on Grade 2**

Table 16 indicates that, in 2012, the average score for a grade 2 learner in South Africa was 55.2% in Home Language and 57.4% in Mathematics. The average scores for Home Language for Grade 2 learners range from about 59% in Gauteng and the Western Cape to 46.9% in North West.

Table 16 also indicates that, of all Grade 2 learners who wrote ANA test in 2012, 64.0% and 67.8% achieved 50% and above in Home Language and Mathematics, respectively.

- Analysis based on Grade 3**

Figure 16: Percentage of learners in various achievement levels for Grade 3 Mathematics, by province, in 2012

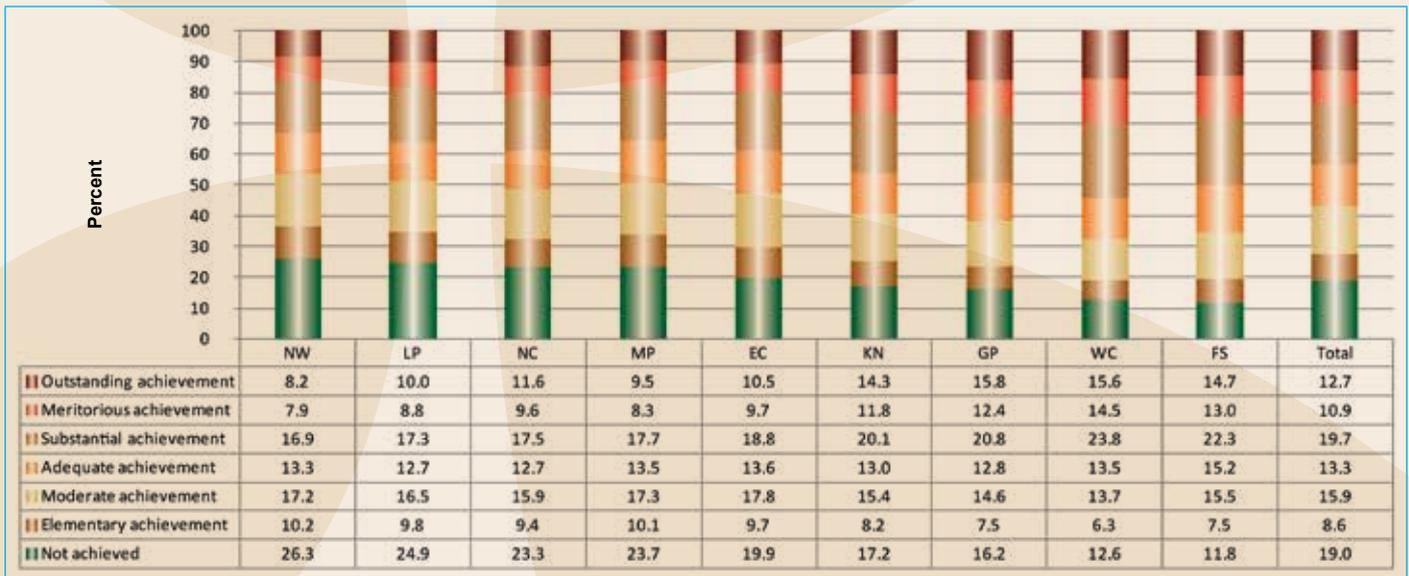

Source: Report on the Annual National Assessments 2012

1) See footnote for interpretation of scores.

1 Key to levels of achievement

Rating Code	Marks in Percentage	Description of achievement
Level 1	0-29	Not achieved
Level 2	30-39	Elementary achievement
Level 3	40-49	Moderate achievement
Level 4	50-59	Adequate achievement
Level 5	60-69	Substantial achievement
Level 6	70-79	Meritorious achievement
Level 7	80-100	Outstanding achievement

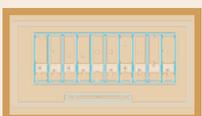

Figure 17: Percentage of learners in various achievement levels for Grade 3 Home Language, by province, in 2012

Source: Report on the Annual National Assessments 2012

In 2012, the average score for a grade 3 learner in South Africa was 52.0% in Home Language and 41.2% in Mathematics. The Western Cape had the highest percentage of learners (67.4) who achieved 50% and more in Home language followed by the Free State with 65.2%, while North West had the lowest percentage.

Figures 16 and 17 show that, about a third of learners at national level attained a level of performance that represented not achieved in Grade 3 Mathematics and approximately 19% in Home Language.

- Analysis based on Grade 4**

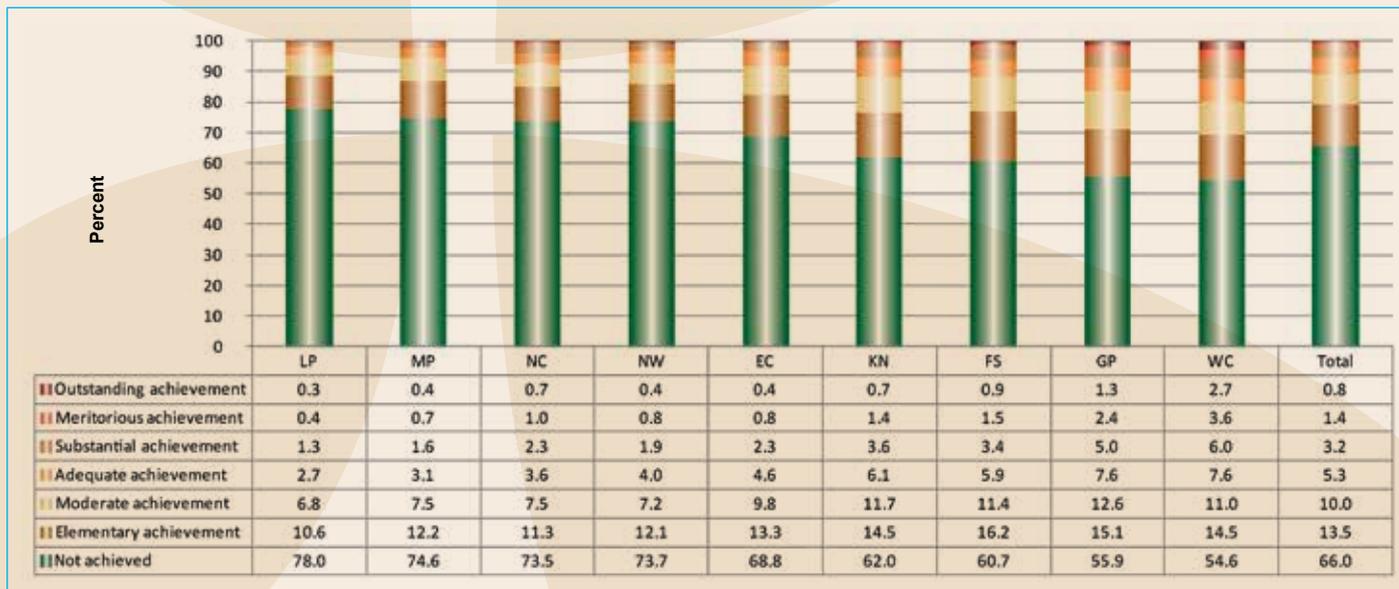

Table 17 shows that, in 2012 the average test score for a Grade 4 learner was 42.6% in Home Language, 33.6% in First Additional Language and 37.0% in Mathematics. In Mathematics, the Western Cape (42.2%) had the highest percentage of learners who achieved 50% and more followed by Gauteng with 35.9%.

- Analysis based on Grade 5**

In 2012, the average score for Grade 5 learners was 39.9% in Home Language, 29.6% in First Additional Language and 30.4% in Mathematics. The average scores for Grade 5 Home Language range in descending order from about 50.9% in the Western Cape to 24.2% in Limpopo, while for First Additional Language ranges between 35.8% in Gauteng to 25.2% in Limpopo.

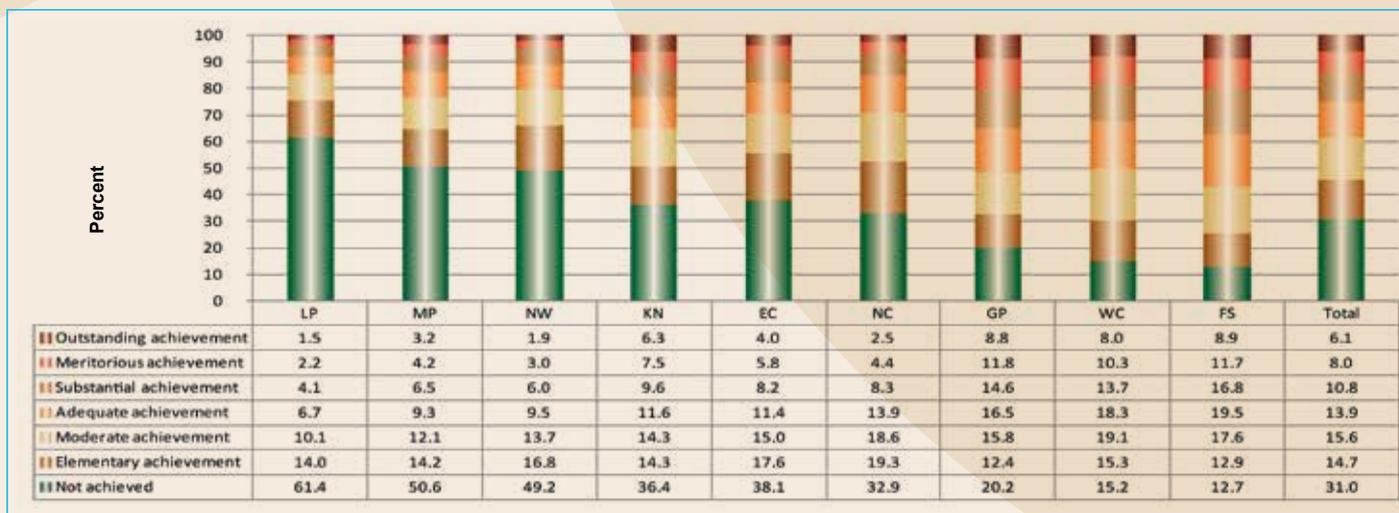

- Analysis based on Grade 6

Figure 18: Percentage of learners in various achievement levels for Grade 6 Mathematics, by province, in 2012

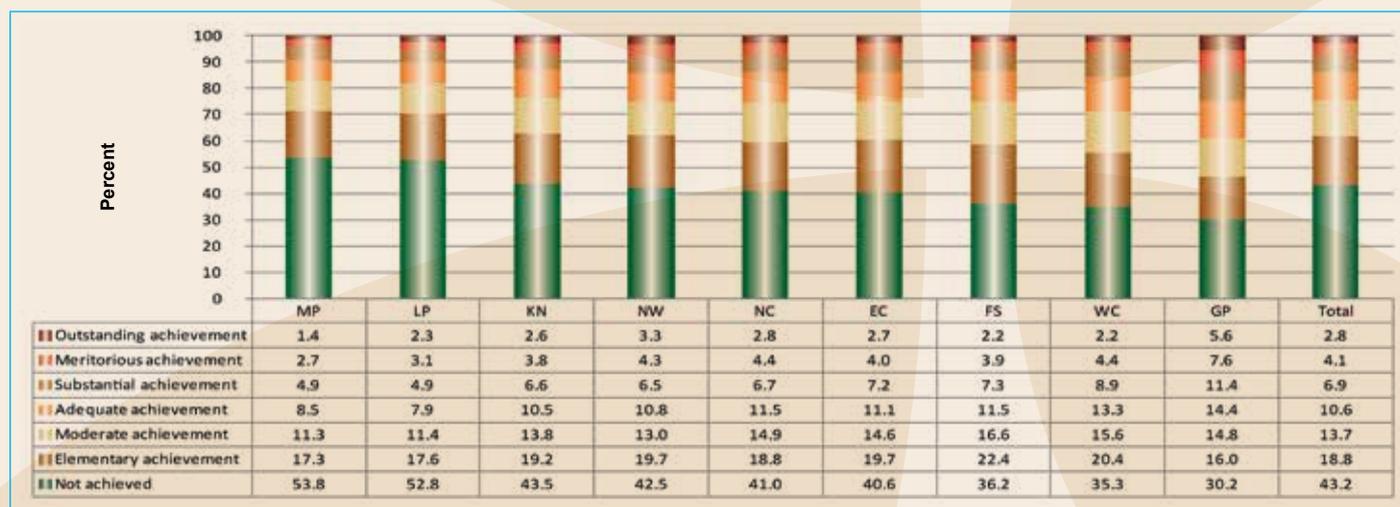

Source: Report on the Annual National Assessments 2012

Figure 19: Percentage of learners in various achievement levels for Grade 6 Home Language, by province, in 2012

Source: Report on the Annual National Assessments 2012

Figure 20: Percentage of learners in various achievement levels for Grade 6 First Additional Language, by province, in 2012

Source: Report on the Annual National Assessments 2012

Table 17 shows that, in 2012, the average score for a Grade 6 learner in South Africa was 42.8% in Home Language, 35.6% in First Additional and 26.7 in Mathematics. Of all Grade 6 learners who wrote ANA tests, about 38.7% obtained 50% and more in Home Language, 24.4 in First Additional Language and 10.6% in Mathematics.

In Grade 6 Mathematics, in 2012, as shown in figure 18, the majority of learners (66.0%) attained not achieved level of achievement, while only 0.8% achieved at outstanding achievement.

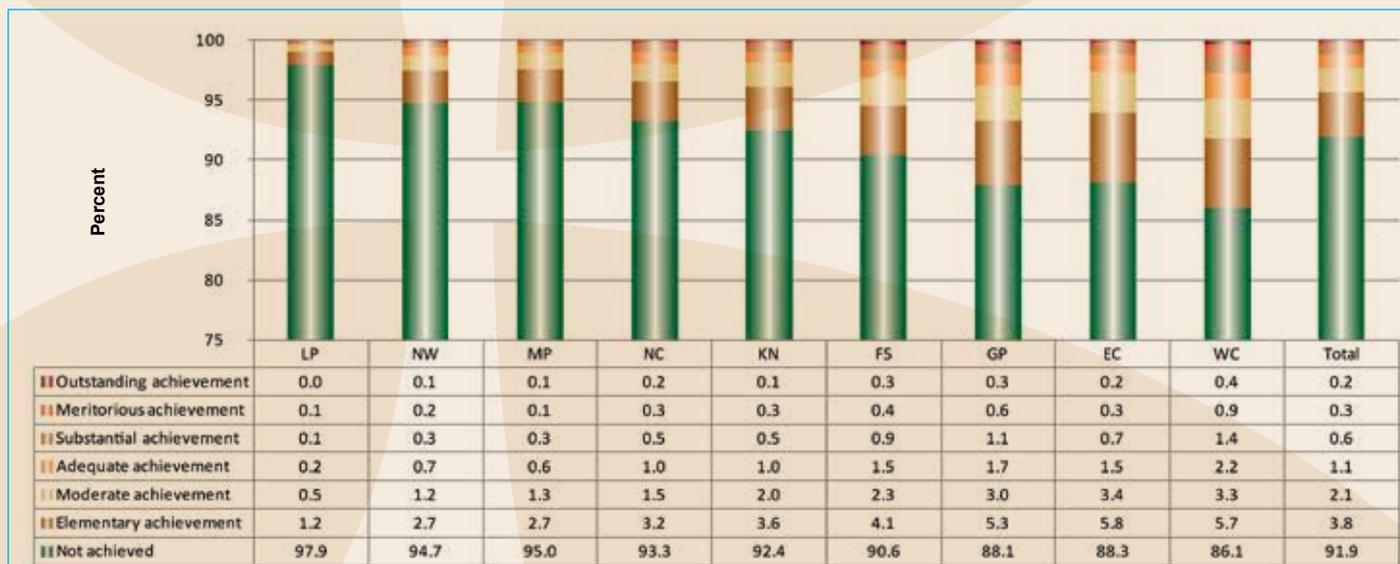

3.7.4 Analysis based on the Senior Phase test instrument

Table 18: Average percentage score of learners in Grade 9 Home Language, First Additional Language and Mathematics, by province, in 2012

Province	Home Language		First Additional Language		Mathematics	
	Average Percentage Mark	Percentage of Learners Achieving 50% and More	Average Percentage Mark	Percentage of Learners Achieving 50% and More	Average Percentage Mark	Percentage of Learners Achieving 50% and More
Eastern Cape	42.6	36.0	35.0	20.9	14.6	2.6
Free State	48.9	48.7	37.2	22.9	14.0	3.1
Gauteng	50.3	54.1	40.3	31.0	14.7	3.7
KwaZulu-Natal	37.7	28.4	32.3	17.6	12.0	1.9
Limpopo	31.2	17.0	29.8	13.7	8.5	0.5
Mpumalanga	40.3	32.8	37.4	24.8	11.9	1.0
Northern Cape	44.3	36.1	37.9	26.2	13.2	2.0
North West	39.3	29.2	39.1	27.0	11.2	1.4
Western Cape	48.4	47.4	37.2	22.9	16.7	5.0
South Africa	43.4	38.9	34.6	20.8	12.7	2.3

Figure 21: Percentage of learners in various achievement levels for Grade 9 Mathematics, by province, in 2012

Source: Report on the Annual National Assessments 2012

Figure 22: Percentage of learners in various achievement levels for Grade 9 Home Language, by province, in 2012

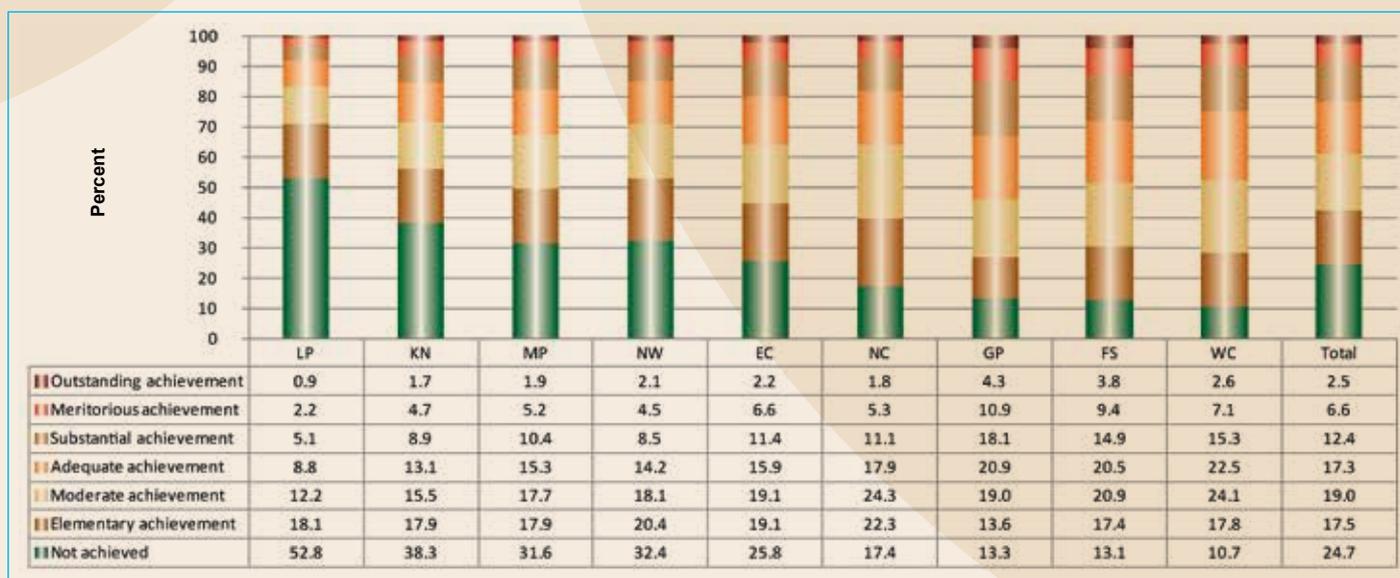

Figure 23: Percentage of learners in various achievement levels for Grade 9 First Additional Language, by province, in 2012

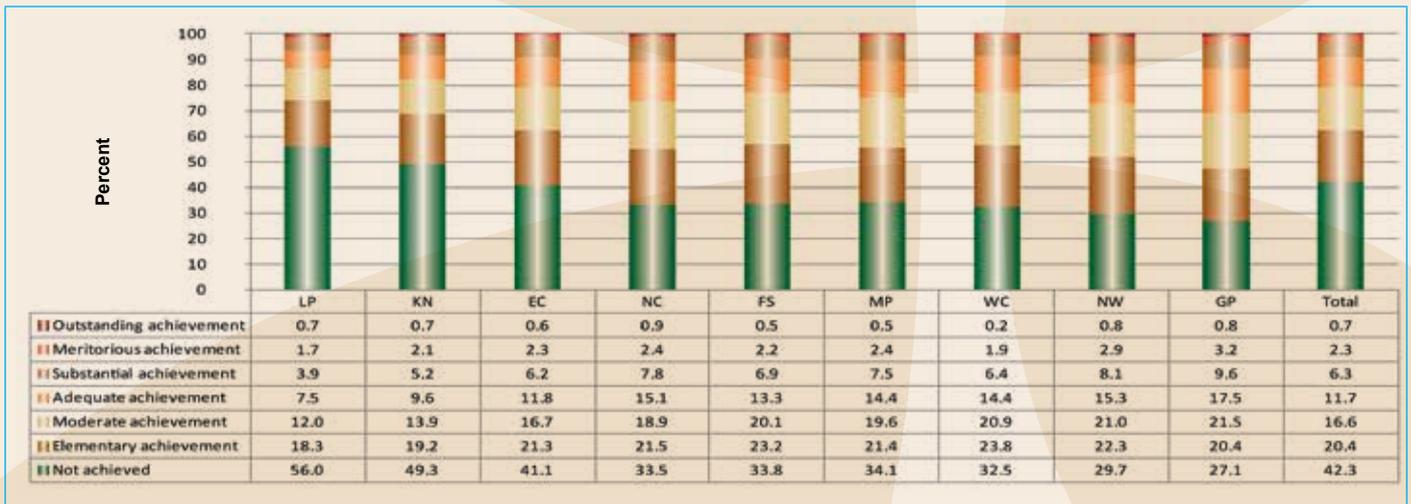

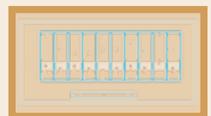

Table 18 indicates the average percentage scores of learners in Grade 9 for Home Language, First Additional Language and Mathematics. In 2012, the average test score for Grade 9 learners was 43.4% in Home Language, 34.6% in First Additional Language and 12.7% in Mathematics. Only about 2% of learners obtained 50% and more in Mathematics.

2012: SNE SNAP Surveys.

Note 1: Institution count based on open institutions that submitted the survey forms.

Figure 24: Percentage of learners, educators and institutions in SNE centres, by province, in 2012

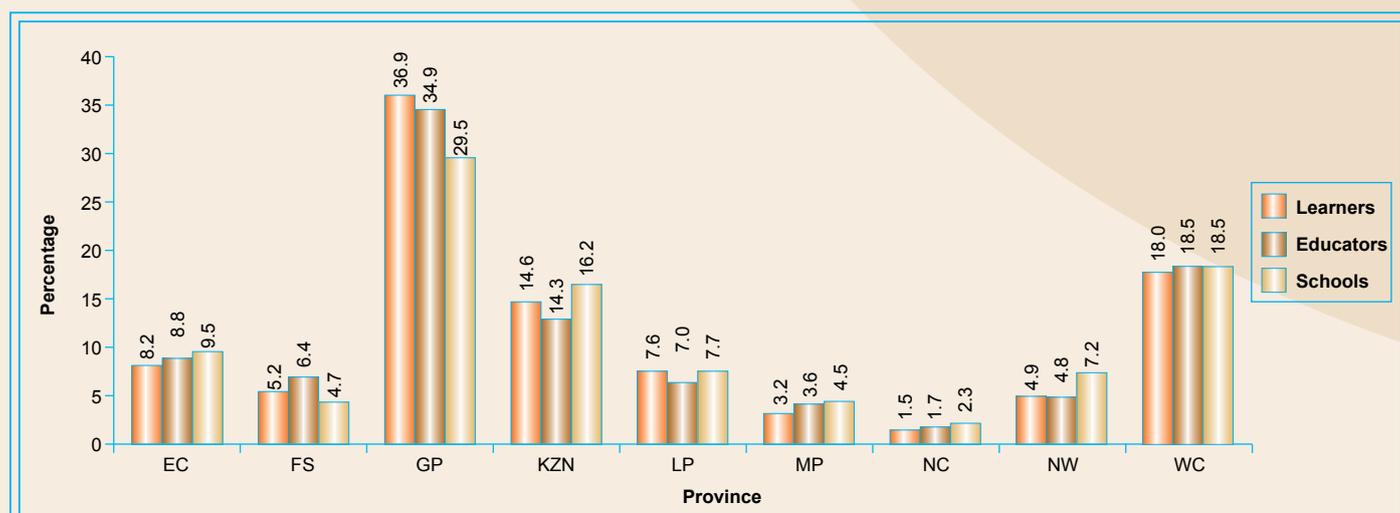

Table 19 reflects learners and educators in special schools (catering for SNE learners), and the numbers of these institutions, for both 2011 and 2012. It indicates that, there were 111 598 learners in the Special Need schooling sector who attended 444 institutions and were served by 9 739 educators.

According to figure 24, the majority of learners in SNE schools were found in Gauteng (36.9%) followed by the Western Cape with 18.0%.

Sources:

2011: As published in *Education Statistics in South Africa*.

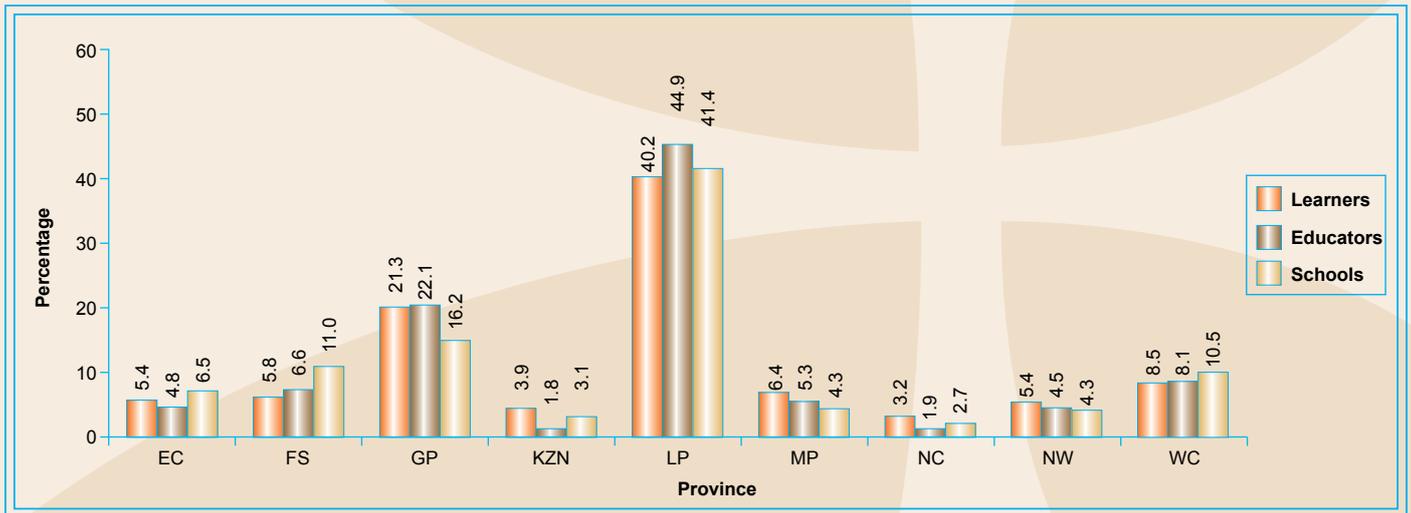

2012: ECD Annual Surveys.

Note 1: Institution count based on open institutions that submitted the survey forms.

Table 21 reflects learners and educators in ECD sites and the numbers of these institutions. It shows that, in 2011 there were 265 105 learners attending ECD sites in South Africa. Nationally, the number of learners in ECD sites decreased by 6.8% from 284 595 in 2011 to 265 105 in 2012.

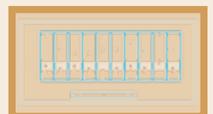

Table 21 also shows the national LER, LSR and ESR for the sectors. On average, the national LER in ECD sites was 23.9, LSR was 66.9 and ESR 2.8.

Figure 25: Percentage of learners, educators and institutions in ECD sites, by province, in 2012

Sources: 2012 ECD Annual Surveys.

Figure 25 indicates the percentage distribution of learners, educators and institutions in the ECD sector. The majority of ECD learners were found in Limpopo (40.2%) followed by Gauteng with about 21.3%.

5. EXPLANATORY NOTES

5.1 Introduction

The publication comprises aggregated information from all education institutions elaborated in the scope of the surveys below. The information in the publication reflects the situation during the 2012 academic year.

5.2 Scope of the surveys

The census frame covers number of learners, educators and schools in the following education sectors:

- Ordinary schools (public and independent);
- Early childhood development (ECD) centres (public and independent);
- Special schools (public and independent);

5.3 Survey methodology and design

The process of acquiring education information involves the national and provincial education departments (PEDs) as well as education regions and districts and education institutions, and adheres to the following two processes:

5.3.1 Data acquisition

The Department of Basic Education (DBE) consults with PEDs and all other stakeholders on education information user needs, and designs all required data acquisition instruments. Once this has been done, HEDCOM (Heads of Education Departments Committee) authorises these survey instruments. The DBE also develops and implements policy, standards, definitions and classifications for national alignment, standardisation and uniformity in the collection of education information.

PEDs utilise the national data acquisition instruments to collect and process education information for submission to the DBE. The process and information platforms that the PEDs utilise adhere to nationally instituted standards.

The DBE then integrates education information collected by the PEDs to create a national database and to update it.

5.3.2 Reporting and dissemination

Education information is sent directly to its users and is posted on the DBE's website. Current statistical publications on the website are:

- *Education Statistics in South Africa at a Glance* (1999 to 2005);
- *Education Statistics in South Africa (2006 to 2011)*; and
- *School Realities* (2005 to 2013).

5.4 Comparability with previous censuses

The 2012 census is generally comparable with the 2011 census, owing to the fact that both censuses are based on the new provincial demarcation boundaries.

5.5 Response rate

Approximately 99.7% of open ordinary schools submitted the 2012 survey forms. Simple mean imputation (i.e. the replacement of a missing observation with the mean of the non-missing observations for that variable) was done to establish a data set of 100%.

5.6 Users

The principal users of EMIS data are the Minister of Education, Parliament, the DBE, National Treasury, other government departments, international agencies such as UNESCO, and regional EMIS bodies.

Other users include researchers, parents and the general public, school book publishers and the general publishing media in the country.

5.7 Data sources

The sources of data used for this report are the following:

- Ordinary schools – 2012 SNAP survey conducted on the 10th school day
- National Senior Certificate examination – *Report on the National Senior Certificate Examination Results 2012*
- *Annual National Assessment-Report on the Annual National Assessments 2012: Grades 1 to 6 and 9*
- ECD – 2012 Annual Survey
- SNE – 2012 SNAP surveys
- Population Figures – 2013 Statistics South Africa estimates

5.8 Glossary

Administrative staff-school ratio

The average number of administrative staff per school

Combined school

An ordinary school offering at least one grade in each of the following four phases: foundation phase, intermediate phase, senior phase and FET band.

District management area (DMA)

A municipal area which may include a nature reserve, a game reserve or a wildlife sanctuary.

ECD centre

Any building or premises maintained or used, whether or not for gain, for the admission, protection and temporary or partial care of more than six children away from their parents. Depending on the conditions of its registration, an ECD centre can admit babies, toddlers and/or children of pre-school age. The term “ECD centre” can refer to a crèche, a day care centre for young children, a playgroup, a pre-school, an after-school care facility, etc. ECD centres are sometimes referred to as ECD sites.

Education district/region

The geographic area within a PED that the MEC for Education has demarcated as the first-level administrative subdivision.

Educator

Any person who teaches, educates or trains other persons or who provides professional education services.

Educator-school ratio (ESR)

The average number of educators per school.

FET band

Grades 10 to 12 offered at ordinary schools.

Foundation phase

Grade R (reception year) and Grades 1 to 3 offered at ordinary schools.

Further education and training (FET)

All learning and training programmes leading to qualifications from Levels 2 to 4 of the NQF as contemplated in the NQF Act, which levels are above general education but below higher education.

Funding type

The funding sector to which the educational institution belongs, for example independent and public

Gender parity index (GPI)

The ratio of female to male values of a given indicator.

General education and training (GET)

All programmes leading to a qualification on Level 1 of the NQF. It represents nine years of schooling – that is, from Grades 1 to 9 as well as ABET Levels 1 to 4.

Gross enrolment ratio (GER)

The number of learners or students enrolled in a given level of education, regardless of age, expressed as a percentage of the population in the theoretical age group for the same level of education.

Independent school

A school registered or deemed to be registered in terms of section 46 of the SASA.

Indicator

A measure designed to assess the performance of a system, policy, programme or project.

Intermediate phase

Grades 4 to 6 offered at ordinary schools.

Intermediate school

An ordinary school offering both upper primary grades and lower secondary grades.

Learner

Any person receiving education or obliged to receive education in terms of the SASA.

Learner-administrative staff ratio (LER)

The average number of learners per administrative staff

Learner-educator ratio (LER)

The average number of learners per educator at a specific level of education in a given school year.

Learner-school ratio (LSR)

The average number of learners per school.

Ordinary school

A school that is not a special school.

Post-matric

Any other classes offered to learners that have completed matric (Grade 12).

Primary disability

The predominant impairment of a learner or the area in which the functional limitation is most severe.

Primary school

An ordinary school offering at least one grade in the range Grades R to 7, and no grades in the range Grades 8 to 12.

Public school

A school as defined in section 1 of the SASA.

School

An education institution which enrolls learners in one or more grades from Grade R (reception) to Grade 12.

Secondary school

An ordinary school offering at least one grade in the range Grades 8 to 12, and no grades in the range Grades 1 to 7.

Senior phase

Grades 7 to 9 offered at ordinary schools.

Special needs education (SNE)

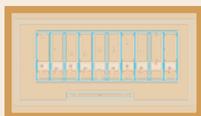

Education that is specialised in its nature and addresses barriers to learning and development experienced by learners with special education needs (including those with disabilities) at special as well as ordinary schools.

Special school

A school resourced to deliver education to learners requiring high-intensity education and other support on either a full-time or a part-time basis. The learners who attend these schools include those who have physical, intellectual or sensory disabilities or serious behaviour and/or emotional problems, and those who are in conflict with the law or whose health-care needs are complex.

6. CONTACT DETAILS

6.1 Provincial EMIS units

Provincial and institutional information (contact details, etc.) may be requested (preferably by email) from the following provincial Education Management Information System (EMIS) Units:

Eastern Cape Education Department

Mr Riaan Janse van Rensburg
Head, EMIS Unit
Education Leadership Institute, Education Department
25 Epsom Road, Stirling, East London, 5201
Email: riaan.jansevanrensburg@edu.ecprov.gov.za
Tel.: 043 735 1820/1
Fax: 043 735 1993

Gauteng Education Department

Ms Diana Zhou
Head, EMIS Unit
PO Box 7710, Johannesburg, 2000
Email: diana.zhou@gauteng.gov.za
Tel.: 011 355 0043
Fax: 011 355 0670

Limpopo Education Department

Ms M.E Sekole
Head, EMIS Unit
Private Bag X9489, Polokwane, 0700
Email: sekoleME@edu.limpopo.gov.za
Tel.: 015 290 7635
Fax: 015 297 0134

North West Education Department

Ms Matshidiso Assegaai
Head, EMIS Unit
Private Bag X2044, Mmabatho, 2740
Email: massegaai@nwpg.gov.za
Tel.: 018 389 8024
Fax: 018 389 8240

Western Cape Education Department

Mr Abdurahman Noordien
Head, EMIS Unit
Private Bag X9114, Cape Town, 8000
Email: anoordie@pgwc.gov.za
Tel.: 021 467 9255
Fax: 021 425 7445

Free State Education Department

Mr Frans Kok
Head, EMIS Unit
,Private Bag X20565, Bloemfontein, 9301
