FOREWORD BY THE MINISTER

Our national curriculum is the culmination of our efforts over a period of seventeen years to transform the curriculum bequeathed to us by apartheid. From the start of democracy we have built our curriculum on the values that inspired our Constitution (Act 108 of 1996). The Preamble to the Constitution states that the aims of the Constitution are to:

- heal the divisions of the past and establish a society based on democratic values, social justice and fundamental human rights;
 - improve the quality of life of all citizens and free the potential of each person;
 - lay the foundations for a democratic and open society in which government is based on the will of the people and every citizen is equally protected by law; and
- build a united and democratic South Africa able to take its rightful place as a sovereign state in the family of nations.

Education and the curriculum have an important role to play in realising these aims.

In 1997 we introduced outcomes-based education to overcome the curricular divisions of the past, but the experience of implementation prompted a review in 2000. This led to the first curriculum revision: the *Revised National Curriculum Statement Grades R-9* and the *National Curriculum Statement Grades 10-12* (2002).

Ongoing implementation challenges resulted in another review in 2009 and we revised the *Revised National Curriculum Statement* (2002) to produce this document.

From 2012 the two 2002 curricula, for *Grades R-9* and *Grades 10-12* respectively, are combined in a single document and will simply be known as the *National Curriculum Statement Grades R-12*. The *National Curriculum Statement for Grades R-12* builds on the previous curriculum but also updates it and aims to provide clearer specification of what is to be taught and learnt on a term-by-term basis.

The *National Curriculum Statement Grades R-12* accordingly replaces the Subject Statements, Learning Programme Guidelines and Subject Assessment Guidelines with the

- (a) Curriculum and Assessment Policy Statements (CAPS) for all approved subjects listed in this document;
- (b) *National policy pertaining to the programme and promotion requirements of the National Curriculum Statement Grades R-12*; and
- (c) *National Protocol for Assessment Grades R-12*.

SECTION 1

INTRODUCTION TO THE CURRICULUM AND ASSESSMENT POLICY STATEMENTS FOR BUSINESS STUDIES GRADES 10-12

1.1 Background

The *National Curriculum Statement Grades R-12 (NCS)* stipulates policy on curriculum and assessment in the schooling sector.

To improve implementation, the National Curriculum Statement was amended, with the amendments coming into effect in January 2012. A single comprehensive Curriculum and Assessment Policy document was developed for each subject to replace Subject Statements, Learning Programme Guidelines and Subject Assessment Guidelines in Grades R-12.

1.2 Overview

- (a) The *National Curriculum Statement Grades R-12 (January 2012)* represents a policy statement for learning and teaching in South African schools and comprises the following:
- (i) *Curriculum and Assessment Policy Statements for each approved school subject;*
 - (ii) *The policy document, National policy pertaining to the programme and promotion requirements of the National Curriculum Statement Grades R-12; and*
 - (iii) *The policy document, National Protocol for Assessment Grades R-12 (January 2012).*
- (b) The *National Curriculum Statement Grades R-12 (January 2012)* replaces the two current national curricula statements, namely the
- (i) *Revised National Curriculum Statement Grades R-9, Government Gazette No. 23406 of 31 May 2002, and*
 - (ii) *National Curriculum Statement Grades 10-12 Government Gazettes, No. 25545 of 6 October 2003 and No. 27594 of 17 May 2005.*
- (c) The national curriculum statements contemplated in subparagraphs b(i) and (ii) comprise the following policy documents which will be incrementally repealed by the *National Curriculum Statement Grades R-12 (January 2012)* during the period 2012-2014:
- (i) *The Learning Area/Subject Statements, Learning Programme Guidelines and Subject Assessment Guidelines for Grades R-9 and Grades 10-12;*
 - (ii) *The policy document, National Policy on assessment and qualifications for schools in the General Education and Training Band d, promulgated in Government Notice No. 124 in Government Gazette No. 29626 of 12 February 2007;*
 - (iii) *The policy document, the National Senior Certificate: A qualification at Level 4 on the National Qualifications Framework (NQF), promulgated in Government Gazette No.27819 of 20 July 2005;*

- (iv) *The policy document, An addendum to the policy document, the National Senior Certificate: A qualification at Level 4 on the National Qualifications Framework (NQF), regarding learners with special needs, published in Government Gazette, No.29466 of 11 December 2006, is incorporated in the policy document, National policy pertaining to the programme and promotion requirements of the National Curriculum Statement Grades R-12; and*
- (v) *The policy document, An addendum to the policy document, the National Senior Certificate: A qualification at Level 4 on the National Qualifications Framework (NQF), regarding the National Protocol for Assessment (Grades R-12), promulgated in Government Notice No.1267 in Government Gazette No. 29467 of 11 December 2006.*
- (d) The policy document, *National policy pertaining to the programme and promotion requirements of the National Curriculum Statement Grades R-12*, and the sections on the Curriculum and Assessment Policy as contemplated in Chapters 2, 3 and 4 of this document constitute the norms and standards of the *National Curriculum Statement Grades R-12*. It will therefore, in terms of *section 6A of the South African Schools Act, 1996 (Act No. 84 of 1996)*, form the basis for the Minister of Basic Education to determine minimum outcomes and standards, as well as the processes and procedures for the assessment of learner achievement to be applicable to public and independent schools.

1.3 General aims of the South African Curriculum

- (a) The *National Curriculum Statement Grades R-12* gives expression to the knowledge, skills and values worth learning in South African schools. This curriculum aims to ensure that children acquire and apply knowledge and skills in ways that are meaningful to their own lives. In this regard, the curriculum promotes knowledge in local contexts, while being sensitive to global imperatives.
- (b) The National Curriculum Statement Grades R-12 serves the purposes of:
- equipping learners, irrespective of their socio-economic background, race, gender, physical ability or intellectual ability, with the knowledge, skills and values necessary for self-fulfilment, and meaningful participation in society as citizens of a free country;
 - providing access to higher education;
 - facilitating the transition of learners from education institutions to the workplace; and
 - providing employers with a sufficient profile of a learner's competences.
- (c) The National Curriculum Statement Grades R-12 is based on the following principles:
- Social transformation: ensuring that the educational imbalances of the past are redressed, and that equal educational opportunities are provided for all sections of the population;
 - Active and critical learning: encouraging an active and critical approach to learning, rather than rote and uncritical learning of given truths;
 - High knowledge and high skills: the minimum standards of knowledge and skills to be achieved at each grade are specified and set high, achievable standards in all subjects;
 - Progression: content and context of each grade shows progression from simple to complex;

- Human rights, inclusivity, environmental and social justice: infusing the principles and practices of social and environmental justice and human rights as defined in the Constitution of the Republic of South Africa. The National Curriculum Statement Grades R-12 is sensitive to issues of diversity such as poverty, inequality, race, gender, language, age, disability and other factors;
 - Valuing indigenous knowledge systems: acknowledging the rich history and heritage of this country as important contributors to nurturing the values contained in the Constitution; and
 - Credibility, quality and efficiency: providing an education that is comparable in quality, breadth and depth to those of other countries.
- (d) The National Curriculum Statement Grades R-12 aims to produce learners that are able to:
- identify and solve problems and make decisions using critical and creative thinking;
 - work effectively as individuals and with others as members of a team;
 - organise and manage themselves and their activities responsibly and effectively;
 - collect, analyse, organise and critically evaluate information;
 - communicate effectively using visual, symbolic and/or language skills in various modes;
 - use science and technology effectively and critically showing responsibility towards the environment and the health of others; and
 - demonstrate an understanding of the world as a set of related systems by recognising that problem solving contexts do not exist in isolation.
- (e) Inclusivity should become a central part of the organisation, planning and teaching at each school. This can only happen if all teachers have a sound understanding of how to recognise and address barriers to learning, and how to plan for diversity.

The key to managing inclusivity is ensuring that barriers are identified and addressed by all the relevant support structures within the school community, including teachers, District-Based Support Teams, Institutional-Level Support Teams, parents and Special Schools as Resource Centres. To address barriers in the classroom, teachers should use various curriculum differentiation strategies such as those included in the Department of Basic Education's *Guidelines for Inclusive Teaching and Learning* (2010).

2.2 The purpose of Business Studies

Business Studies will ensure that learners:

- acquire and apply essential business knowledge, skills and principles to productively and profitably conduct business in changing business environments;
- create business opportunities, creatively solve problems and take risks, respecting the rights of others and environmental sustainability;

- apply basic leadership and management skills and principles while working with others to accomplish business goals;
- are motivated, self-directed, reflective lifelong learners who responsibly manage themselves and their activities while working towards business goals;
- are committed to developing themselves and others through business opportunities and ventures;
- are able to secure formal employment, and are in a position to pursue sustainable entrepreneurial and self-employment career pathways.

2.3 Time allocation for Business Studies in the Curriculum

The teaching time for Business Studies is 4 hours per week, per grade (Grade 10, 11 and 12) on the timetable.

2.4 Requirements to offer Business Studies as a subject

Resources to offer Business Studies as a subject are the responsibility of the school.

SECTION 4

4.1 Assessment in Business Studies

Assessment is a continuous, planned process of identifying, gathering and interpreting information about the performance of learners, using various forms of assessment. It involves four steps: generating and collecting evidence of achievement; evaluating this evidence; recording the findings and using this information to understand and thereby assist the learner's development in order to improve the process of learning and teaching.

Assessment should be both informal (Assessment for Learning) and formal (Assessment of Learning). In both cases regular feedback should be provided to learners to enhance the learning experience.

Assessment in Business Studies focuses on the knowledge, skills and values necessary for informed, ethical, productive and responsible participation in economic sectors. The study and assessment of Business Studies must not only cover essential business knowledge, skills and principles, but should also promote entrepreneurial initiatives, sustainable enterprises and economic growth.

Business Studies covers valuable skills such as leadership, risk taking, problem solving and management skills that prepare learners for success in different business environments. Teachers must take all these skills into account when planning teaching, learning and assessment activities.

4.2 Informal or daily assessment

Assessment for Learning aims to continuously collect information of a learner's achievement that can be used to improve their learning.

Informal assessment is a daily monitoring of learners' progress. This is done through observations, discussions, practical demonstrations, learner-teacher conferences, informal classroom interactions, etc. Informal assessment may be as simple as stopping during the lesson to observe learners or to discuss with learners how learning is progressing. Informal assessment should be used to provide feedback to the learners and to inform planning for teaching, but need not be recorded. It should not be seen as separate from learning activities in the classroom. Learners or teachers can mark these informal assessment tasks.

Self assessment and peer assessment actively involves learners in assessment. This is important as it allows learners to learn from and reflect on their own performance. The results of the informal daily assessment tasks are not formally recorded unless the teacher wishes to do so. The results of daily assessment tasks are not taken into account for promotion and certification purposes.

4.3 Formal assessment

All assessment tasks that make up a formal programme of assessment for the year are regarded as Formal Assessment. Formal assessment tasks are marked and formally recorded by the teacher for progression and certification purposes. All Formal Assessment tasks are subject to moderation for the purpose of quality assurance and to ensure that appropriate standards are maintained.

Formal assessment provides teachers with a systematic way of evaluating how well learners are progressing in a grade and in a particular subject. Examples of formal assessments include tests, examinations, practical tasks,

projects, oral presentations, demonstrations, performances, etc. Formal assessment tasks form part of a year-long formal Programme of Assessment in each grade and subject.

The Programme of Assessment for Business Studies in Grades 10 and 11 comprises seven tasks which are internally assessed. Of the seven tasks, the six tasks which are completed during the school year make up 25% of the total mark for Business Studies, while the end-of-year examination is the seventh task and makes up the remaining 75%..

In Grade 12, assessment is made up of two components: a Programme of Assessment which makes up 25% of the total mark for Business Studies and an external examination which makes up the remaining 75%. The Programme of Assessment for Business Studies comprises seven tasks which are internally assessed. The external examination is externally set and moderated.

Formal assessment tasks form part of a year-long formal Programme of Assessment in each grade and subject, are school-based and are weighted as follows for the different grades:

Grades	Tasks done during the year	End-of-year examination
R-3	100%	n/a
4-6	75%	25%
7-9	40%	60%
10 and 11	25%	75%
12	25%	External examination: 75%

The forms of assessment used should be appropriate to age and developmental level. The design of these tasks should cover the content of the subject and include a variety of tasks designed to achieve the objectives of the subject.

Formal assessments must cater for a range of cognitive levels and abilities of learners as shown below.

Table 1

Cognitive levels	Activity	Percentage of task
Knowledge and comprehension Levels 1 and 2	Basic thinking skills (e.g. factual recall, low-level application and low-level comprehension)	30%
Application and analysis Levels 3 and 4	Moderately high thinking skills (e.g. more advanced application, interpretation and low-level analysis)	50%
Synthesis and evaluation Levels 5 and 6	Higher-order thinking skills (e.g. advanced analytical skills, synthesis and evaluation)	20%

4.4 Programme of Assessment Grade 10-12

The Programme of Assessment is designed to spread formal assessment tasks in all subjects in a school throughout a term. The requirements (number and nature of tasks) for Business Studies are indicated below.

The Programme of Assessment in Grade 10

	Term 1		Term 2		Term 3			Term 4

FORMS OF ASSESSMENT

In Business Studies, the following forms of assessment are preferred, although they are not the only ones that may be used:

- Projects
- Oral presentations
- Case studies
- Reports
- Tests
- Data responses
- Examinations

4.4.1. Other forms of assessment

Project

A project is mandatory in all the grades. Only one project per annum is recommended per grade. When preparing a project, consider the following minimum requirements:

- Learners should be given the necessary guidance prior to commencement of the project and progress must be monitored throughout the project.
- All criteria used to assess the project must be discussed with the learners prior to them commencing with the project.
- Generally, projects are given a longer period of time to complete as they involve some form of research, consolidating and choosing relevant information and preparing a written document as evidence.
- Projects generally work well if they are structured around some form of problem.
- The purpose of a research assignment/project is to develop the research, critical thinking and problem-solving skills of learners.
- Research will form part of the project - the project is the evidence of the research conducted.
- Projects should ideally be given to learners towards the end of a particular term, e.g. the first term for submission during the **next** (second) term.

Presentation

- Presentations can be written or oral, but there must be evidence of the presentation.
- All criteria used to assess the presentation must be discussed with the learners prior to the commencement of the presentation.

- Where the resources are available, use of electronic presentation might be encouraged and where resources are not available, posters and handout presentations should be encouraged.

Case Study

- Case studies are a very good way of keeping the subject up to date and relevant.
- Learners are presented with a real-life situation, a problem or an incident related to the topic.
- They are expected to assume a particular role in articulating the position.
- They would draw on their own experience, the experience of peers or prior learning to interpret, analyse and solve the problem or set of problems.
- Newspaper articles, magazine articles, TV or radio presentations form excellent case studies.
- Learners have to read and/or listen, digest the information and then make informed decisions.
- Questions can be from lower order - direct quotes from the article - to higher order when they are asked to analyse comments and possibly make suggestions.

Report

A report is generally the written evidence of a survey, analysis or investigation. Generally, this will be shorter than a project and more specific to the topic, e.g. the business has come to you for advice on their liquidity. Often this implies consulting with an expert for advice on some problem - therefore it links very well with problem solving.

Tests

Two tests, written under **controlled** conditions, are prescribed for Grades 10-12. These tests should adhere to the following:

- They should be completed by all classes in the same grade on the same day.
- All learners write the same test under examination conditions.
- Questions must comply with year-end examination standards.
- Where there is more than one teacher, agreement must be reached on the scope, as well as the date and time of the test.
- The duration of each of these tests should be at least one hour for 100 marks.
- Tests should cover the different cognitive levels as in examinations. See table on cognitive levels under 'Examinations' in the following section.
- Tests should also include problem-solving questions.
- Tests should cover a range of integrated topics, as determined by the work schedule and assessment plan.
- The two tests should be written in Terms 1 and 3.

4.4.2 Examinations

The following guidelines should be considered when constructing examinations:

- Content

Content stipulated specifically for the grade	100%
---	------

- Cognitive levels

Basic thinking skills (e.g. factual recall, low-level application and low-level comprehension)	30%
Moderately high thinking skills (e.g. more advanced application, interpretation and low-level analysis)	50%
Higher-order thinking skills (e.g. advanced analytical skills, synthesis and evaluation)	20%

- Problem solving

Approximately 10% of all examinations should address problem-solving questions using critical and creative thinking. These include the solving of real-life problems within the context of the Business Studies curriculum.

These problem-solving questions must also cover a range of cognitive skills (lower, middle and higher order) to cater for all learners, but within the context of the learners.

While ratio and analysis can form very interesting problem-solving questions, the topic goes a lot further and should be integrated into all aspects of the curriculum so that the learners develop the skills to apply the knowledge acquired.

Mid-year examinations

Below is an outline of the structure of the mid-year examination in each of the grades:

Grades	Paper	Time	Marks	Topics
Grade 10	1	2 hours	200	As per Annual Teaching Plan per grade
Grade 11	1	3 hours	300	
Grade 12	1	3 hours	300	

Exam Paper	Section A	Section B	Section C	Total
Grade 10	30 marks	90 marks	80 marks	200 marks

Trial examination (Grade 12 only)

A trial examination is one of the seven tasks of the Programme of Assessment for **Grade 12**. Ideally, the trial examination should cover the full scope of the Grade 12 curriculum and should model the final Grade 12 examination. Below is an outline of the structure of the trial examination:

	Paper	Time	Marks	Content
Grade 12	1	3 hours	300	Full scope

End-of-year examinations

Grade 10-12 should write a 3-hour examination of 300 marks as a final examination.

	Paper	Time	Marks	Business Environment	Business Venture	Business Role	Business Operation
Grade 10-12	1	3 hours	300	25%	25%	25%	25%

4.5 Recording and reporting

Recording is a process in which the teacher documents the level of a learner's performance in a specific assessment task. It indicates learner progress towards the achievement of the knowledge as prescribed in the Curriculum and Assessment Policy Statements. Records of learner performance should provide evidence of the learner's conceptual progression within a grade and her/his readiness to progress or promote to the next grade. Records of learner performance should also be used to verify the progress made by teachers and learners in the teaching and learning process.

Reporting is a process of communicating learner performance to learners, parents, schools, and other stakeholders. Learner performance can be reported in a number of ways. These include report cards, parents' meetings, school visitation days, parent-teacher conferences, phone calls, letters, class or school newsletters, etc. Teachers in all grades report in percentages against the subject. Seven levels of competence have been described for each subject listed for Grades R - 12. The various achievement levels and their corresponding percentage bands are as shown in the Table below.

CODES AND PERCENTAGES FOR RECORDING AND REPORTING

RATING CODE	DESCRIPTION OF COMPETENCE	PERCENTAGE
7	Outstanding achievement	80 - 100
6	Meritorious achievement	70 - 79
5	Substantial achievement	60 - 69
4	Adequate achievement	50 - 59
3	Moderate achievement	40 - 49
2	Elementary achievement	30 - 39
1	Not achieved	0 - 29

Note: The seven-point scale should have clear descriptors that give detailed information for each level.

Teachers will record actual marks against the task by using a record sheet; and report percentages against the subject on the learners' report cards.

4.6 Moderation of assessment

Moderation refers to the process that ensures that the assessment tasks are fair, valid and reliable. Moderation should be implemented at school, district, provincial and national levels. Comprehensive and appropriate moderation practices must be in place for the quality assurance of all subject assessments.

Formal Assessment (SBA)

All Grade 10 and 11 tasks are internally moderated, while Grade 12 tasks should be externally moderated. The subject head for Business Studies or Head of Department for the Business, Commerce and Management subjects at the school will generally manage this process. Moderation at the school will be carried out at least once per school term.
