INSTRUCTIONS AND INFORMATION
1. This question paper consists of FOUR questions.
2. Answer ALL the questions.
3. ALL drawings are in third-angle orthographic projection, unless otherwise stated.
4. ALL drawings must be completed using instruments, unless otherwise stated.
5. ALL answers must be drawn accurately and neatly.
6. ALL the questions must be answered on the QUESTION PAPER as instructed.
7. ALL the pages, irrespective of whether the question was attempted or not, must be re-stapled in numerical sequence in the TOP LEFT-HAND CORNER ONLY.
8. Time management is essential in order to complete all the questions.
9. Print your examination number in the block provided on every page.
10. Any details or dimensions not given must be assumed in good proportion.

This question paper consists of 6 pages.
QUESTION 1: ANALYTICAL (MECHANICAL)
Given:
Three views and two detailed enlargements of a tapping valve assembly, a title block and a table of questions. The drawings have not been prepared to the indicated scale.

Instructions:
Complete the table below by neatly answering the questions, which all refer to the accompanying drawings and the title block.

<table>
<thead>
<tr>
<th>QUESTIONS</th>
<th>ANSWERS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 What is the title of the assembly?</td>
<td>1</td>
</tr>
<tr>
<td>2 On what date was the drawing drawn?</td>
<td>1</td>
</tr>
<tr>
<td>3 What is the drawing number?</td>
<td>1</td>
</tr>
<tr>
<td>4 What scale is indicated for the drawing?</td>
<td>1</td>
</tr>
<tr>
<td>5 Which drawing program was used?</td>

TOTAL: 30
QUESTION 2: LOCI
NOTE: Answer QUESTIONS 2.1 and 2.2.

2.1 MECHANISM
Given:
- A schematic drawing of a mechanism consisting of gear A and gear B as well as a slotted bar CD attached at C to gear A
- The position of pin E on gear B
- The position of centre point F

Motion:
As gear A rotates in an anti-clockwise direction, it drives gear B in a clockwise direction. The slotted bar CD slides over pin E during the rotation.

Instructions:
- Draw, to scale 1:1, the given schematic drawing of the mechanism.
- Trace the locus generated by point D for ONE complete revolution of the mechanism.
- Show ALL necessary construction.

2.2 CAM
Given:
- The detail of a roller-ended follower, drawn to a reduced scale
- The displacement graph and the cam shaft, drawn to scale 1:1, in the correct position

Specifications:
- The follower reciprocates along the 30° centre line that runs through the centre of the cam shaft
- Rotation = clockwise

Instructions:
- Draw, to scale 1:1, the roller-ended follower in its correct position.
- Project and draw the cam profile from the given displacement graph.
- Show the direction of rotation on the cam profile.
- Show ALL necessary construction.

DISPLACEMENT GRAPH
SCALE 5 mm = 30°

ASSESSMENT CRITERIA 2.1
1. GIVEN + CENTRE LINES 6
2. CONSTRUCTION 6
3. POINTS + CURVE 8
SUBTOTAL 2.1 19

ASSESSMENT CRITERIA 2.2
1. CONSTRUCTION + FOLLOWER + DIRECTION 8
2. PLOTTING 7
3. CAM PROFILE 6
SUBTOTAL 2.2 21

TOTAL 40
EXAMINATION NUMBER 3
QUESTION 3: ISOMETRIC DRAWING

Given:
- The front view, top view and left view of a woodworking plane
- The position of point P on the drawing sheet

Instructions:
Using scale 1 : 1, convert the orthographic views of the woodworking plane into a sectional isometric drawing on cutting plane A-A.

- Make P the lowest point of the drawing.
- Show ALL necessary construction.
- NO hidden detail is required.

[34]
QUESTION 4: MECHANICAL ASSEMBLY

Given:
- The exploded isometric drawing of the parts of a bearing puller assembly, showing the position of each part relative to all the others
- Orthographic views of each of the parts of the bearing puller assembly

Instructions:
- Answer this question on page 6.
- Draw, to scale 1:1 and in third-angle orthographic projection, the following views of the assembled parts of the bearing puller assembly:
  4.1 A half sectional front view according to cutting plane A-A. Show the left side in section, as seen from the direction of the arrow shown on the exploded isometric drawing. The cutting plane is shown on the top view of the beam (part 4).
  4.2 The top view.
- ALL drawings must comply with the guidelines as contained in the SANS 10111.

NOTE:
- The two strong arms (part 5) must be placed against the cylindrical part of the beam (part 4) so that points R and T will be at the indicated positions.
- The worm screw (part 1) must be completely screwed into the beam (part 4) so that point S will be at the indicated position.
- The lever (part 2) must be placed in the centre of the worm screw (part 1).
- Draw only the rear M8 bolt, as indicated by the exploded isometric drawing.
- Show THREE faces of the head of the M8 bolt in the front view.
- Add the cutting plane A-A to the drawing.
- NO hidden detail is required.
