The dimensions of the walkway, as shown in ANNEXURE B, will be 4,05 m by 1,45 m.

Use ANNEXURE B to answer the questions that follow.

3.2.1 Calculate (in m²) the total area of the 12 concrete blocks.

You may use the following formula:

\[ \text{Area} = \text{side} \times \text{side} \] (3)

3.2.2 Calculate the area of the walkway that needs to be covered with pebbles.

You may use the following formula:

\[ \text{Area} = \text{length} \times \text{breath} \] (4)

3.2.3 Calculate the total number of bags of pebbles needed to cover an area of 5,7 m². (3)
3.3 As part of the renovations, Thabiso will also be changing the look of two different windows near the walkway. The glass panes of the window frame will be decorated with glass beads glued onto the glass pane as indicated in the picture below.

4.1.6 Field guides sometimes use drones (remote controlled aircrafts) to monitor the movement of animals in parks.

PICTURES OF DRONES

The drone travels at an average speed of 30 km/h. For a particular task, the drone flew a distance of 10 km from the guide and thereafter returned to the guide. Calculate the total time (in minutes) for this particular task.

You may use the following formula:

\[ \text{Time} = \frac{\text{distance}}{\text{speed}} \] (4)
