Learning about the Constitution of the Republic of South Africa (1996)

The Constitution of South Africa (1996) is the highest law in the country. This law is higher than the President, higher than the courts and higher than the government. It describes how the people of our country should treat each other, and what their rights and responsibilities are. The constitution of a country is there to protect all of us now, and our children in the future.

Be aware of our past. **Let us not repeat the mistakes of past.** **Our Constitution helps us to imagine and build a better future for all.**

We, the people of South Africa;
Recognise the injustices of our past;
Honour those who suffered for justice and freedom in our land;
Respect those who have worked to build and develop our country; and
Believe that South Africa belongs to all who live in it, united in our diversity.

We therefore, through our freely elected representatives, adopt this Constitution as law of the Republic so as to—

Heal the division of the past and establish a society based on democratic values, social justice and fundamental human rights;
Lay the foundations for a democratic and open society in which government is based on the will of the people and every citizen is equally protected by law;
Improve the quality of life of all citizens and free the potential of each person; and
Build a united and democratic South Africa able to take its rightful place as a Sovereign state in the family of nations.

Claim your rights as a South African and be responsible to protect the rights of others. **Know your Bill of rights & Bill of Responsibilities.**

*May God protect our people.
Nkosi Sikelel' iAfrika. Morena boloka setjhaba sa heso.
God seën Suid-Afrika. God bless South Africa.
Mudzimu fhatutshedza Afurika. Hosi katekisa Afrika.*

Book I

Date: _____

Term I

How many stars?

Compare answers.

Estimate how many stars. _____

Now count them. _____

Find the winner!

Who made the best estimate?

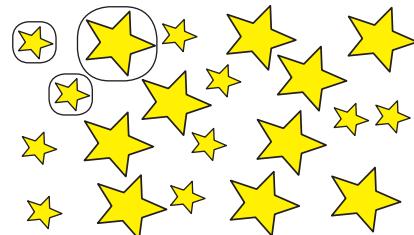

Fill in your names and answers in this table.

Name				
Estimate				
Number counted				
Difference between your estimate and your count				

I counted
in ones.

Ways to count. Help us to write it down.

1, 2, 3, _____

2, _____

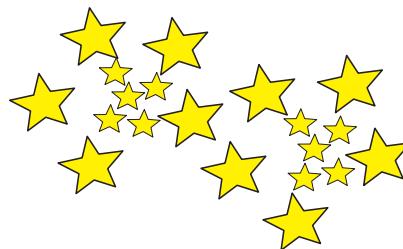

I counted
in twos.

I counted
in fives.

5, _____

I counted
in tens.

Write number sentences

Count the total number of big and small stars in the picture on page 2.

Write them in two ways.

Big Small like this

or

like this

$$\star + \star = \underline{\quad}$$

$$\star + \star = \underline{\quad}$$

and as a number sentence.

$$\underline{\quad} + \underline{\quad} = \underline{\quad} \quad \text{or} \quad \underline{\quad} + \underline{\quad} = \underline{\quad}$$

When you add any two numbers it does not matter what their order is.

Clever counting

Counting the pumpkins

Find an easy way to count them.

Answer: _____

Packing the pumpkins

Ten pumpkins go in one bag.

How many bags can you fill with the pumpkins? _____

How many pumpkins are left over? _____

How many more pumpkins are needed to fill one more bag? _____

From + to × (addition to multiplication)

Complete the number sentences.

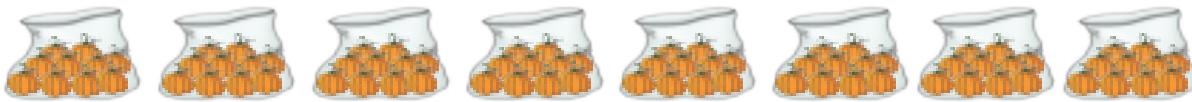

Example:

$$10 + 10 + 10 + 10 = 40 \rightarrow 4 \text{ groups of } 10 = 40 \rightarrow 4 \times 10 = 40$$

a. $10 + 10 + 10 = \underline{\hspace{2cm}}$

$$\underline{\hspace{2cm}} \text{ groups of } 10 = \underline{\hspace{2cm}} \rightarrow \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

b. $10 + 10 + 10 + 10 + 10 + 10 + 10 = \underline{\hspace{2cm}}$

$$\underline{\hspace{2cm}} \text{ groups of } 10 = \underline{\hspace{2cm}} \rightarrow \underline{\hspace{2cm}} \times \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Hands and fingers

How many hands?

How many fingers?

Write your answer in 2 ways.

$$\underline{\hspace{2cm}} \text{ groups of } 10 = \underline{\hspace{2cm}}$$

and

$$\underline{\hspace{2cm}} \times 10 = \underline{\hspace{2cm}}$$

Shoes in the class

Read the story.

Thabo: Wow, Miss! Jack is a giant! He wears size 6 shoes!

Mrs Khoza: Well! Yes, Thabo, that is big for a nine year old!
What size shoe do you wear Thabo? What sizes do the rest of the class wear?
Let's do a survey!

The learners call out their sizes, one by one.

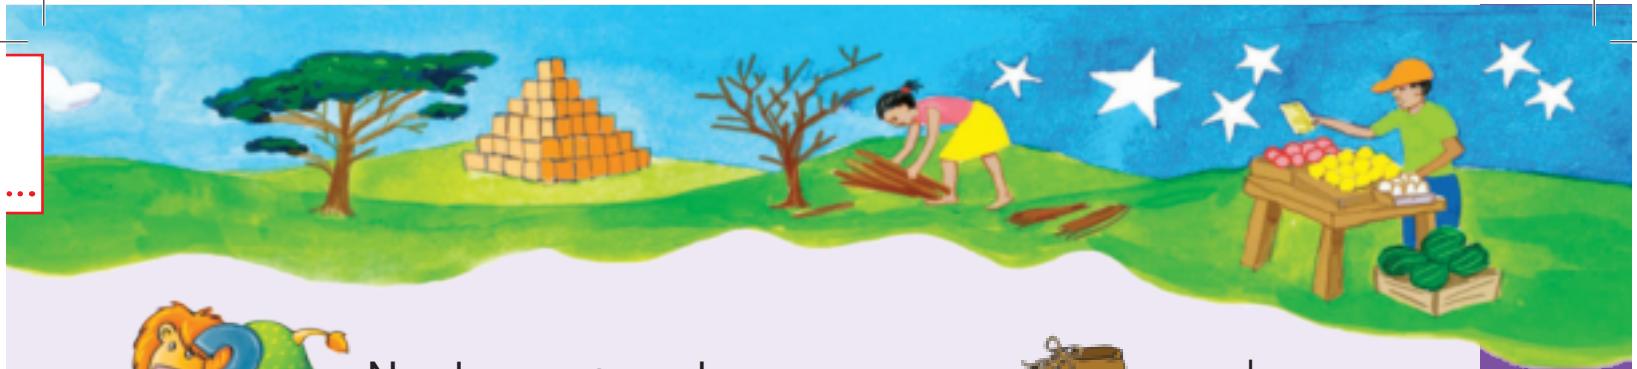

Mrs Khoza writes the sizes on the board.

Mrs Khoza: Count, then write how many of each size.

2	2	3	1	2	3	1	4	3	2	3
2	3	2	6	2	2	3	3	3	4	3
4	2	2	3	3	5	3	2	2	2	1
1	1	2	4	2	3	2	3	4	2	4
4	3	2	2	3	1	2	2	1	4	3

Fill in the table below.

Shoe sizes in the class					
Size 1	Size 2	Size 3	Size 4	Size 5	Size 6

Now draw a pictograph

= one learner

Size 1	Size 2	Size 3	Size 4	Size 5	Size 6

Now answer these questions.

- Most learners wear shoe size _____.
- The fewest number wear size _____.
- _____ children took part in this survey.

What about you?

Find out what shoe sizes you and your friends wear!

- Work in a group of 6 to 8.
- Collect your data.
- Write the number of shoe sizes in a table.
- Compare answers with other groups.

Add on a number line

Sit at your desk!

In our school each learner has their own desk.

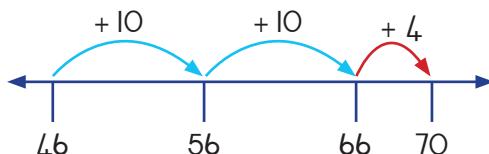

There are 46 learners in Grade 3A and 24 in Grade 3B.

How many desks do we need for both classes?

Working with a partner

Look at how these three learners used a number line to solve the problem. Complete the sums using the example.

This is what I do: I first add 10. This brings me to 56.

Then I jump another 10 to get to 66.

And lastly, I jump 4 more to land at 70.

I must add
24 to 46.

$$= 46 + 10 + 10 + 4$$

$$= 56 + 10 + 4$$

$$= 66 + 4$$

$$= 70$$

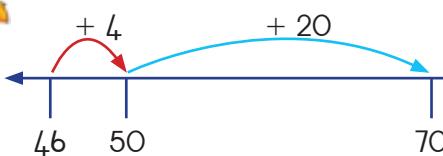

a. $32 + 25 =$

b. $52 + 26 =$

c. $46 + 25 =$

I must add 24
to 46.

This is what I do: First I will jump 4. That will bring me to 50.
I can jump 20 more, which brings me to 70.

$$= 40 + 10 + 20$$

$$= 50 + 20$$

$$= 70$$

a. $36 + 41 =$

11 12 13 14 15 16 17 18 19 20

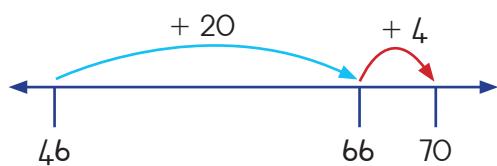

20b

Date:

Term I

Add on a number line (continued)

b. $57 + 19 = \square$

I must add
24 to 46.

This is what I do: From 46, I can jump 20. That brings me to 66.
Now I have to jump 4 more and then I reach 70.

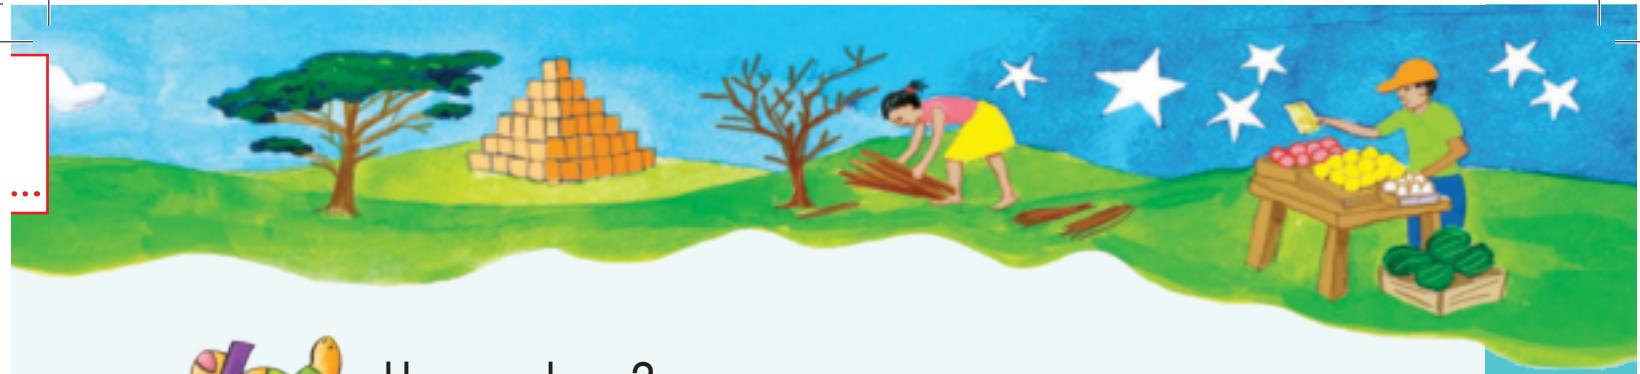

$$\begin{aligned} &= 46 + 20 + 4 \\ &= 66 + 4 \\ &= 70 \end{aligned}$$

a. $63 + 24 = \square$

b. $65 + 29 = \square$

How many loaves?

The baker delivers 54 brown and 68 white loaves.

- a. How many loaves altogether?

- b. Find the total on a number line. Show the **numbers** and the **size** of the jumps.

Add the following without using a number line. Use any other method you like.

$38 + 24 =$

$58 + 17 =$

$75 + 16 =$

$83 + 29 =$

2|a

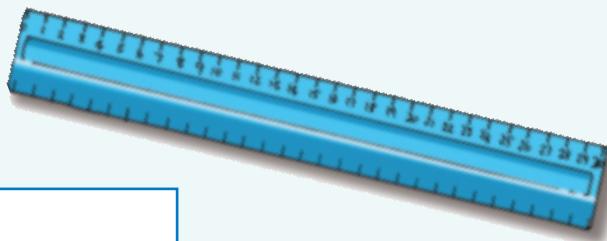

Date:

Subtract on a number line

One learner! One ruler!

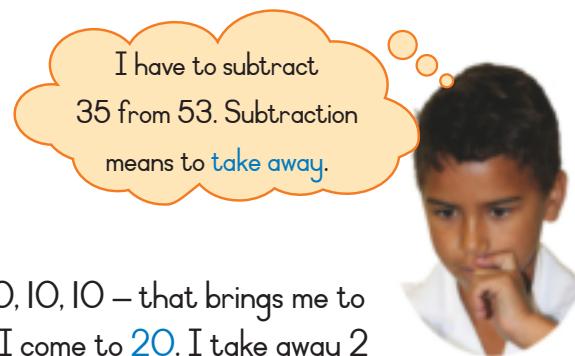

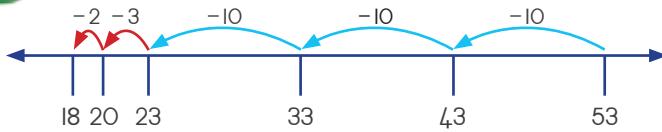

The class needs 53 rulers. We have only 35.

How many more do we need? $53 - 35 =$

Working with a partner

Read how the same three learners use a number line here. Complete the sums using the example.

So, I will start at 53 and take away. I'll take away 10, 10, 10 – that brings me to 23. Now to take away five. First I take away 3, and I come to 20. I take away 2 more and I get to 18. So we need 18 rulers.

$$= 53 - 10 - 10 - 10 - 3 - 2$$

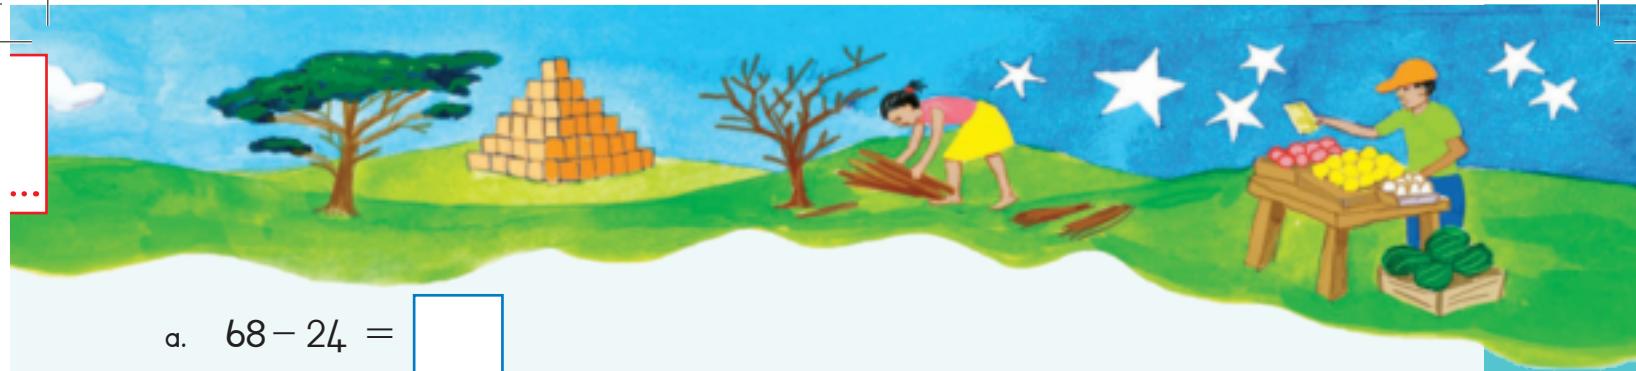

$$= 43 - 10 - 10 - 3 - 2$$

$$= 33 - 10 - 3 - 2$$

$$= 23 - 3 - 2$$

$$= 20 - 2$$

$$= 18$$

a. $68 - 24 = \square$

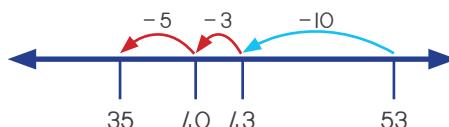

→ ←

b. $74 - 38 = \square$

→ ←

c. $92 - 87 = \square$

→ ←

Subtraction means to find the difference between 53 and 35.

I'll start at 53 and count down to 35 to find the difference. If I count back by 10, I get to 43. I can count back 3 more to get to 40. Then I count down 5 more to get to 35.

10 plus 3 plus five is 18. So we need 18 more rulers.

a. $38 - 14 = \square$

→ ←

Money then and now

The story of our money

In South Africa we use rands and cents as our money.
We started to use rands and cents in 1961.

In those days the 1 cent coin had the lowest value, then the 2 cent coin and then the 5 cent coin.

I used these small coins to pay for a lot of things. Things were so cheap then!

Yes, you're right, they are no longer being made!

About 50 years ago we still used pounds, shillings and pence.

Yes, I remember! 1 pound was 20 shillings, and 1 shilling was 12 pence.

Count the cents

Count the 1 cents.

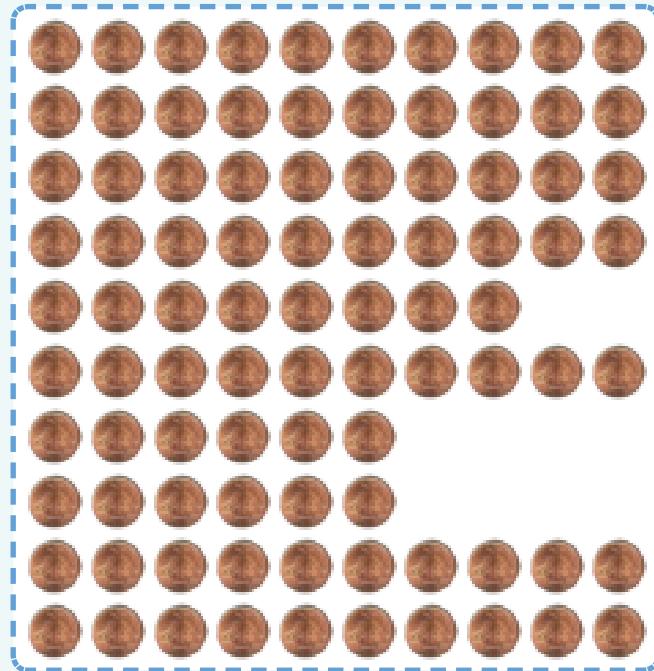

How many cents are there?

How many more cents do you need to make R1,00?

						186			
								198	200

Writing the numbers

- Write the missing number in each blue square.
- Write in the rest of the numbers.
- Write the next 10 numbers after 200.

200; _____ ; _____ ; _____ ; _____ ; _____ ; _____ ; _____ ; _____ ; _____

Write the missing numbers

a.

200		180				
					110	
50						
					0	

b.

87		107		
167				
		207		
				237

Complete

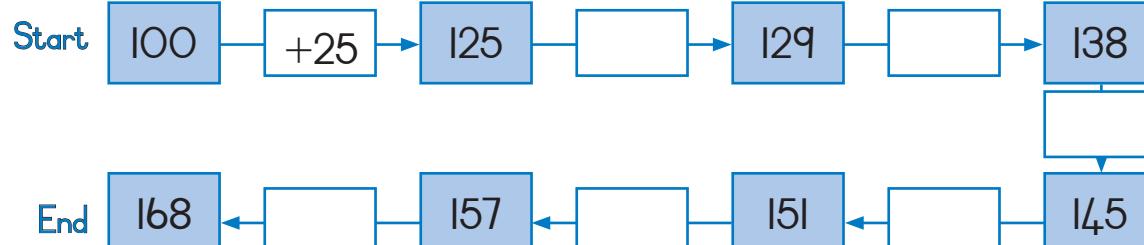

$$\begin{array}{r} \boxed{200} + \boxed{30} + \boxed{5} = 235 \\ \boxed{200} + \boxed{40} + \boxed{7} = \boxed{ } \\ \boxed{200} + \boxed{60} + \boxed{8} = \boxed{ } \\ \boxed{ } + \boxed{ } + \boxed{ } = 293 \\ \boxed{ } + \boxed{ } + \boxed{ } = 256 \end{array}$$

Write the numbers in order from smallest to biggest.

Counting on from 100

Work out what you need to get to the next number.

Working with groups of numbers

Packing candles

Ma Nkosi works at a candle factory.
When the candles are ready, she packs them out like this in boxes on racks.

How many candles in each box? _____

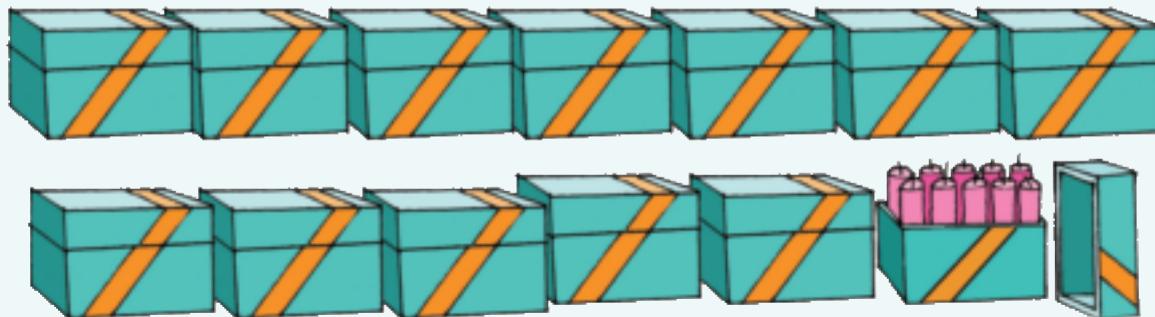

How many boxes on each rack? _____

How many candles on each rack? _____

Boxes of candles

Ma Nkosi closes the boxes.

- a. Count all the boxes.

How many boxes? _____

How many candles altogether? _____

How many more boxes does she need to fill to have 200 candles? _____

- b. How many candles in:

2 boxes? _____	4 boxes? _____
5 boxes? _____	3 boxes? _____
6 boxes? _____	7 boxes? _____

- c. How many boxes does she need for:

40 _____ boxes	70 _____ boxes
50 _____ boxes	30 _____ boxes

35a

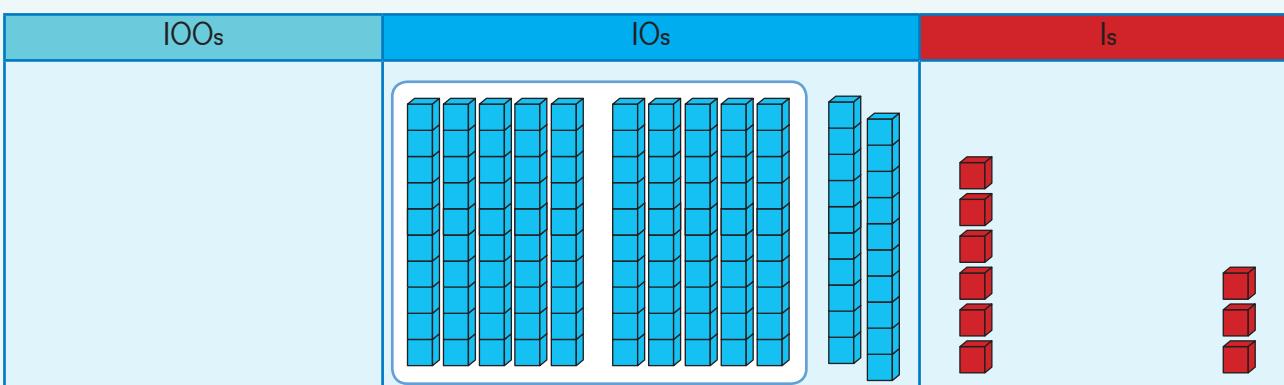

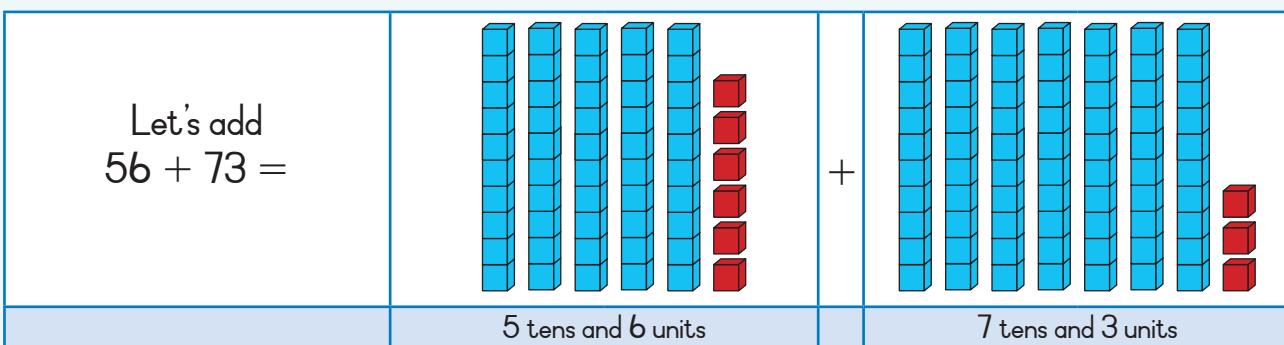

Date:

Term 2

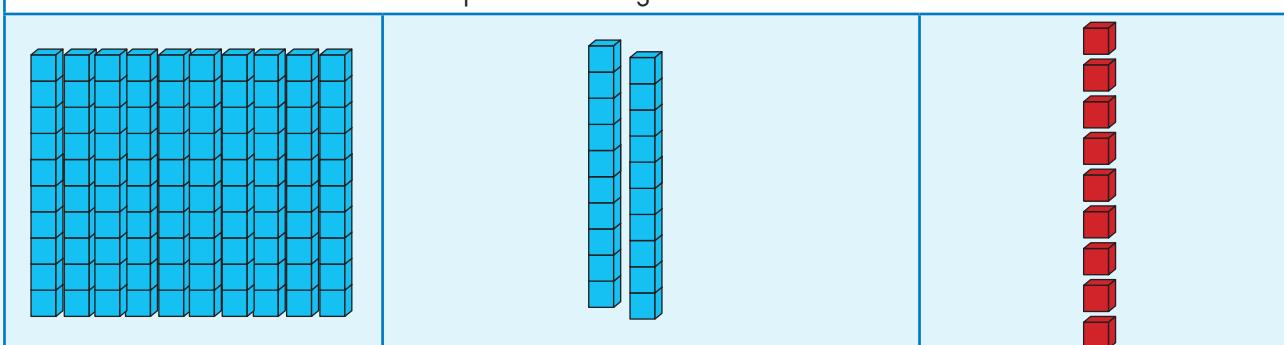

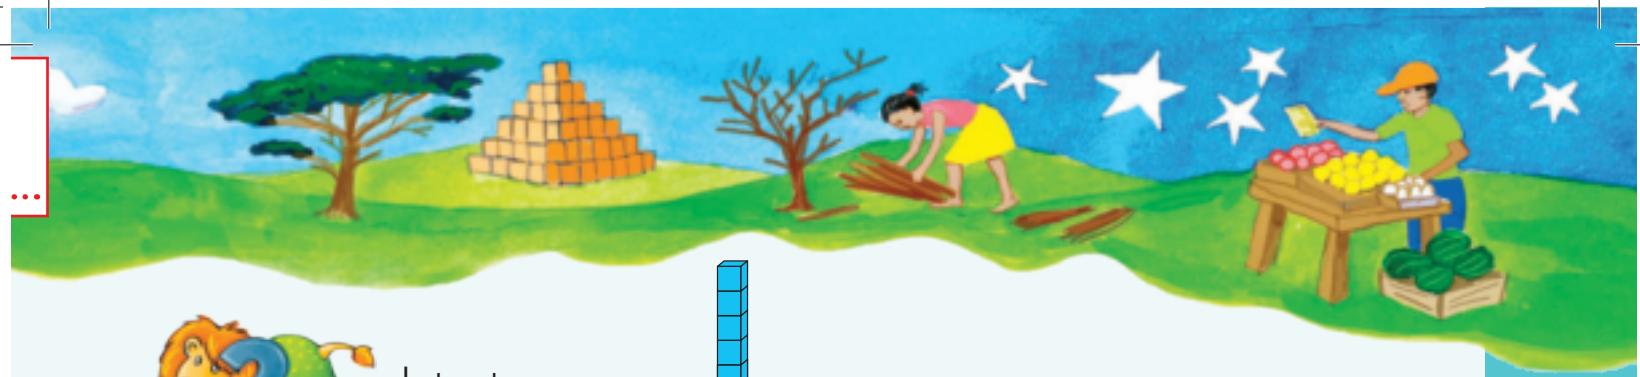

Putting tens together and taking them apart

Putting tens together when we add.

Together we have 12 tens.
We can put 10 tens together to make 1 hundred.

Let us try.

$$= \square \text{ and } \blacksquare = \circ$$

Example: $82 + 34$

$$100 + 20 + 6 = 126$$

a. $65 + 52$

b. $76 + 63$

c. $86 + 65$

35b

Date:

Term 2

Putting tens together and taking them apart (continued)

Use your place value blocks.

Use base ten blocks to make these two numbers.	All together how many tens? how many units?	Did you group tens or units? Check the place value where you regrouped.	Write the number.
$23 + 99 =$	_____ tens _____ units	$11 \text{ tens} + 12 \text{ units}$ $= 110 + 12$	122
$38 + 25 =$	_____ tens _____ units		
$77 + 31 =$	_____ tens _____ units		
$68 + 45 =$	_____ tens _____ units		
$83 + 47 =$	_____ tens _____ units		

Taking tens apart when we subtract

When we subtract, we sometimes need to show one ten as ten units, or one hundred as 10 tens.

Let's subtract: $60 - 55 =$

We start with six tens and no units. We want to subtract five tens and five units.

(The units we are taking away we colour grey.)

We can show six tens like this.	Or as five tens and ten units.	Take away five tens and five units. Five units are left.	
			$60 - 55 = 5$

Let us try.

a. $70 - 28$

7 tens	6 tens and 10 units	$70 - 28 =$	

b. $90 - 46$

c. $80 - 53$

Finding the number pair

A visit to the dentist

A group of children visit the dentist.

This is what the children tell him.

= 1 time

	✓	✓	✓	✓	✓	✓	✓	✓	✓					
	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
	✓	✓	✓	✓	✓									

a. Count the ticks (✓) showing how often children brush their teeth. Write the numbers.

	Once a day	
	Twice a day	
	Three times a day	

b. What can you see from the table?

Most of the children brush _____ a day.

There are _____ children in the group.

Draw a pictograph of how many times a day the children brush their teeth.

Do a survey in your class. Ask 15–20 learners.

- How many times a day they brush their teeth? _____
- Draw a pictograph like the one above to show your findings.

Add and combine

Writing out your sum

Busi can add **units** and **tens** and regroup them. She can add and subtract on paper, without blocks. Sometimes she likes to start with her number cards to show the numbers.

So for the sum $56 + 73$, she finds these cards:

$$\begin{array}{r} 50 \text{ } \boxed{6} \\ + \quad 70 \text{ } \boxed{3} \end{array}$$

She adds the units and puts down the 9 card.

9

She knows: $50 + 70 = 120$.

She takes the **hundreds**, the 20 and the 9 card to make a 3-digit number.

$$\begin{array}{r} 100 \\ 20 \\ \hline 9 \end{array}$$

She writes it out like this:

$$\begin{aligned} 50 + 70 + 6 + 3 \\ = 50 + 70 + 9 \\ = 120 + 9 \\ = 100 + 20 + 9 \\ = 129 \end{aligned}$$

Dumi knows how the blocks work.

She does $56 + 73$ like this:

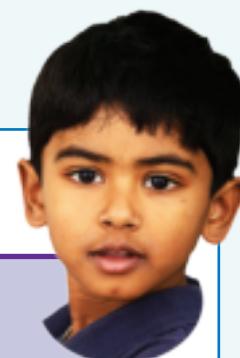

$$\begin{aligned} 50 + 6 + 70 + 3 \\ \swarrow \quad \searrow \\ 120 + 9 \\ = 129 \end{aligned}$$

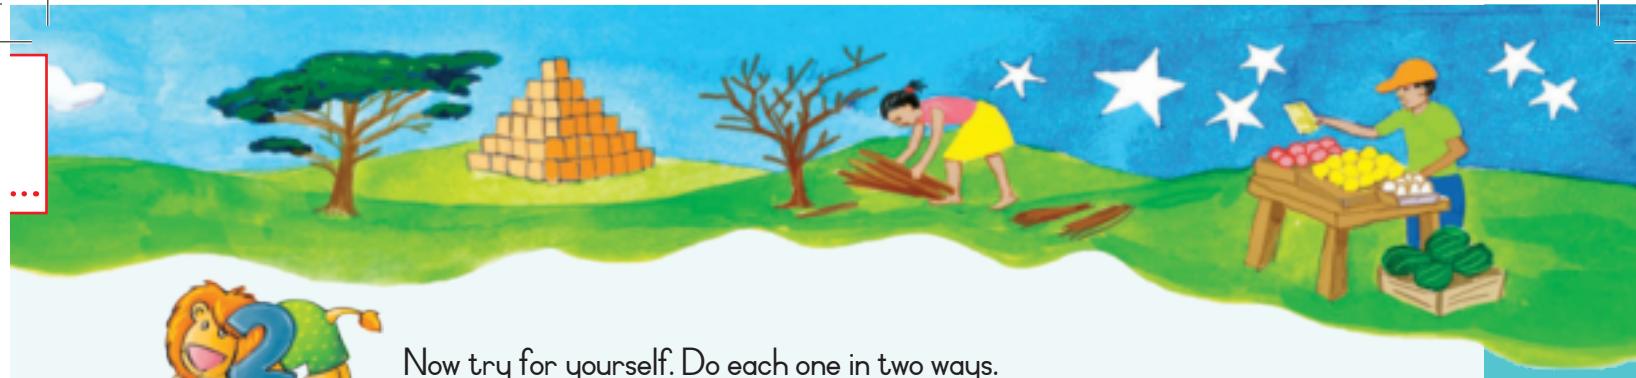

Aakar likes to round off.

Here's how he does this one:

$$\begin{aligned} 56 + 73 \\ = 50 + 70 + 10 - 1 \\ = 130 - 1 = 129 \end{aligned}$$

Now try for yourself. Do each one in two ways.

a. $86 + 62$

Busi's method

$$80 + 60 + 6 + 2$$

Dumi's method

$$80 + \cancel{6} + \cancel{60} + 2$$

b. $72 + 63$

c. $81 + 57$

d. $69 + 71$

Use Aakar's method to do this one.

Teacher:

Date:

Term 2

Now let's subtract.

a. $87 - 53$

Busi's method

$$\begin{aligned}80 - 50 + 7 - 3 \\= 30 + 4 \\= 34\end{aligned}$$

Dumi's method

$$\begin{aligned}80 + 7 - 50 + 3 \\= 30 + 4 \\= 34\end{aligned}$$

b. $95 - 73$

c. $86 - 62$

d. $85 - 69$

Solve it!

There are many ways to add **units** and **tens** together. Choose the way you know and like best to solve these problems. Show your work.

- a. Peter first picks 34 peaches and then 67 peaches.
How many peaches altogether?

- b. The Malusi kids save R47 together.
Their mother gives them another R58. How much do they have now?

- c. The school bus travels 88 km in the morning and 73 km in the afternoon.
How many km altogether?

38

Date:

Term 2

Bottle tops

Solve it!

Use any method you like. Show your work.

Sipho

Andile

Sipho counts out 87 bottle tops. Andile counts out 38.

How many more bottle tops does Sipho count than Andile?

The school concert

Musa

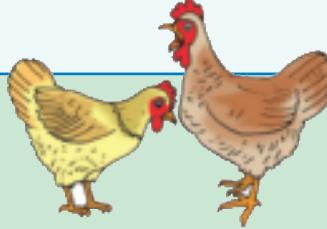

Musa sells tickets. He had 92 tickets to begin with. He has 67 left.

How many tickets has Musa sold so far?

More practice

There are 69 chickens in one pen and 95 in another.

How many chickens are there altogether?

Read how Gugu and Aakar solve the problem.

Gugu's way

$$\begin{aligned} & 60 + 90 + 9 + 5 \\ & = 100 + 50 + 14 \\ & = 150 + 10 + 4 \\ & = 164 \end{aligned}$$

Aakar's way

$$\begin{aligned} & 69 + 95 \\ & = 70 + 95 - 1 \\ & = 70 + 90 + 5 - 1 \\ & = 160 + 4 \\ & = 164 \end{aligned}$$

I subtracted 1.
Do you know why?

- a. The boys collect R96 for a class trip. The girls collect R79.

How much do they collect altogether?

Use Gugu's way

Use Aakar's way

- b. One school collects 76 kg of cans. Another school collects 68 kg cans.

How many kg of cans do the two schools collect altogether?

Use Gugu's way

Use Aakar's way

Subtracting back from 220 to 100

Subtract the numbers in the pink box each time.

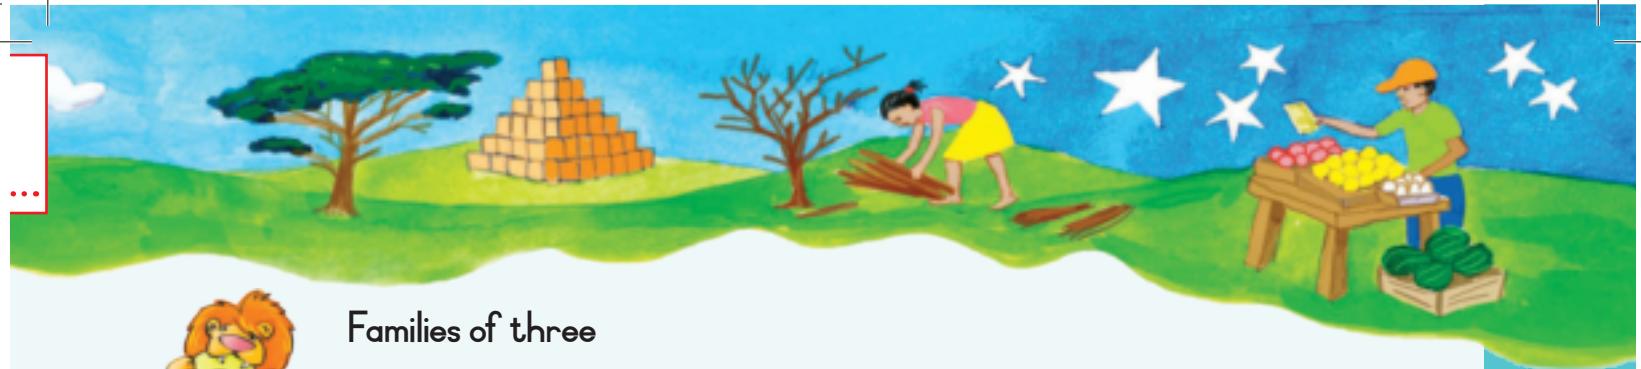

We have done the first one for you.

Here is a way to check your answers.

Start at 100. Work back to 220.

But this time, add the numbers.

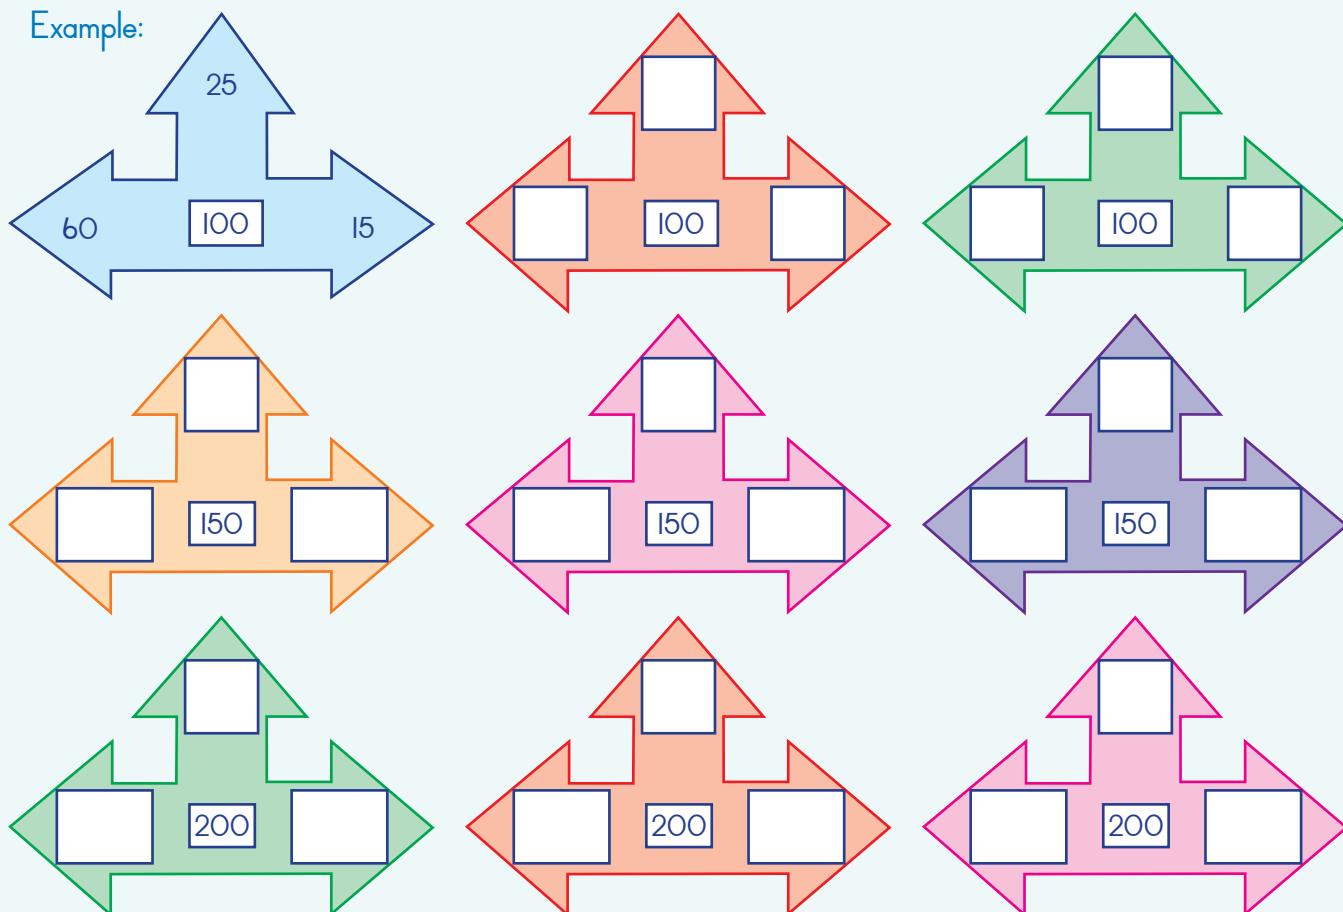

Families of three

Find 3 numbers that add up to the target number.

Rule: Only one number can end in 0.

Example:

50 more and 50 less

Write the answers in the 2nd row.

	70	125	150	81	96	122	134	111	70
+50									
	120								
-50									
	186	200	158	179	139	79	126	138	99
	136								

Measuring in centimetres

How big is a centimetre?

The numbers on the ruler stand for **centimetres**.

We use the abbreviation or symbol **cm**.

When you use a ruler, you must start to measure from 0.

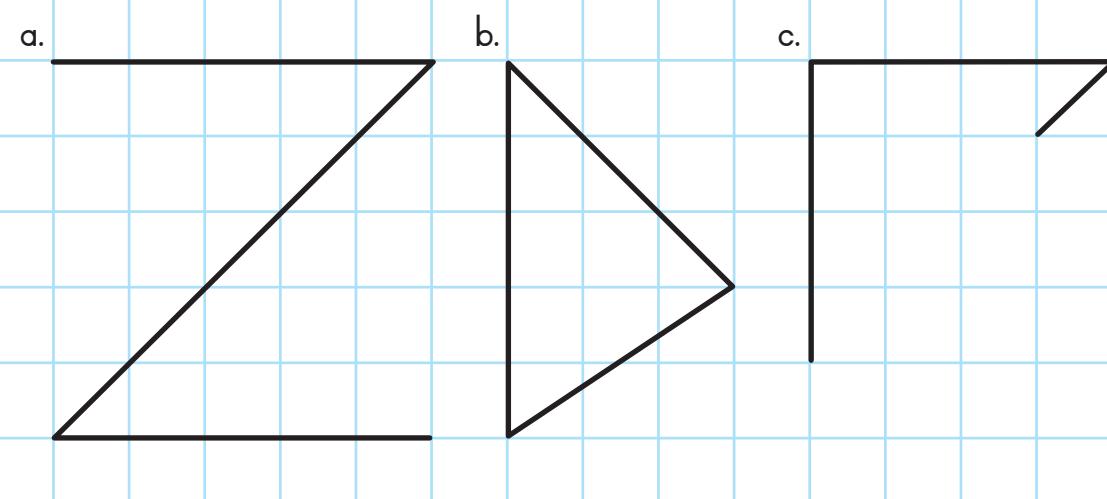

Some rulers do not show the 0 like the one on this page.

Find zero cm on the ruler. Write 0 on the ruler.

Where is 10 cm on this ruler? Write 10 there.

Estimate, then measure accurately with your ruler, the length in cm of the line making each shape.

a. Estimate cm

Measure cm

b. Estimate cm

Measure cm

c. Estimate cm

Measure cm

How long is each line?

How many cm long is each line?

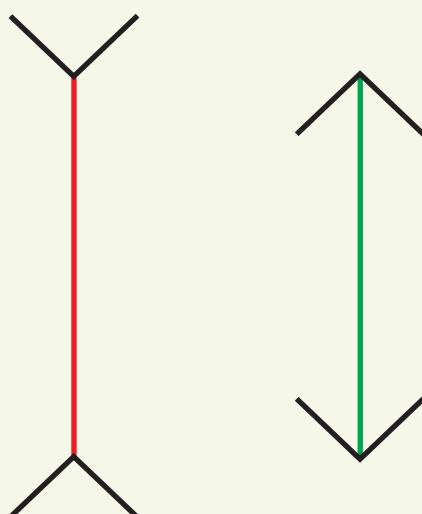

a.		cm	d.		cm
b.		cm	e.		cm
c.		cm	f.		cm

Are you sure?

Which is longer, the red line or the green line?

How can you check?

This is what is called an optical illusion.
This happens when your eyes are tricked into seeing something that is not really there.
The two lines are the same length.
The black lines extending outward make the red line look longer and the black lines going inwards make the green line look shorter.

Weighing in

Add some kilograms.

Add and write the answers.

Rounding off and adding!

Think smart!

Jackal 25 kg	Tortoise 98 kg	Baboon 59 kg	Baby zebra 88 kg	Pelican 9 kg

Round off the mass of each animal to the nearest 10 kg.

Write the mass of each animal in order from light to heavy.

Estimate the total mass of the 5 animals.

Combine their mass

I may not be as heavy as you, old Tortoise,
but I sure am faster!

Steps

- Use your rounded off amounts to estimate.
- Estimate the mass of the animals in each row.
- Calculate the totals using the actual mass.
- Compare the two totals and write the difference.

	I estimate	I calculate	The difference
+			
+ +			
+ +			

Vusi's mass

Check. Compare. Correct.

Vusi adds his own mass to the mass of and .

Their total mass is **239 kg**. How much does Vusi weigh? Show your answer.

--	--

What's my weight?

Play in a group. Take turns ...

Add your mass to the mass of some of the animals. Work out the total. Tell the answer to the group. Don't show them your work!

They must then try and work out your mass.

-----------------	-----------------	-----------------

b. Write the next two numbers.

373, 375, <u>377</u> , <u>379</u>	480, 482, _____, _____	262, 264, _____, _____
-----------------------------------	------------------------	------------------------

c. Write the next two numbers.

346, 348, _____, _____	415, 417, _____, _____	297, 299, _____, _____
------------------------	------------------------	------------------------

11 12 13 14 15 16 17 18 19 20

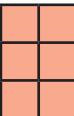

Planning a garden

Mrs Mabena has some pretty tiles.

She uses them to pave an area in her garden.

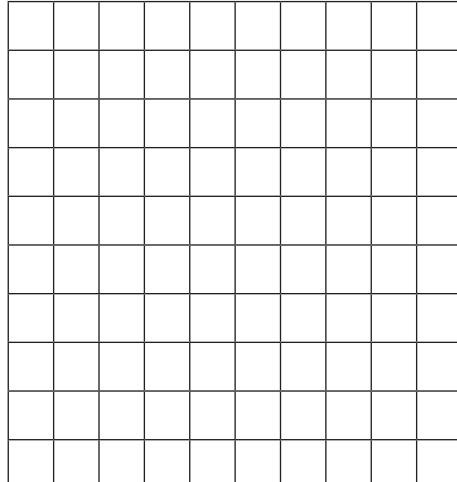

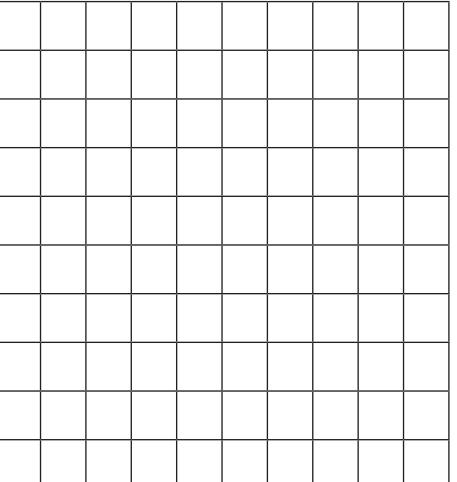

There are **6** square tiles of the same size.

I can make 1 row with 6 tiles.	I can make 2 rows with 3 tiles in a row.	I can make 3 rows with 2 tiles in each row.
		
$6 \times 1 = 6$	$3 \times 2 = 6$	$2 \times 3 = 6$

Now it's your turn!

Shade blocks to show how you can arrange 8 and 9 square tiles.

8 squares	9 squares
	

Write number sentences for each drawing.

Arrange 12 tiles

Thabo has 12 square tiles to pave next to the house. Help him find all the ways he can do this.

Write a number sentence for each way.

Example:	$1 \times 12 = 12$ $12 \times 1 = 12$

Arrange 24 tiles

- Use the grid in Cut-out sheet 2.
- Shade 24 blocks in different ways.
- Write number sentences to match each drawing.

--

I can multiply!

$12 = 2 \times$ <input type="text"/>	$3 \times$ <input type="text"/> $= 12$	$9 =$ <input type="text"/> $\times 3$
$6 = 3 \times$ <input type="text"/>	<input type="text"/> $\times 3 = 12$	$24 = 3 \times$ <input type="text"/>

Term 2

Using fives

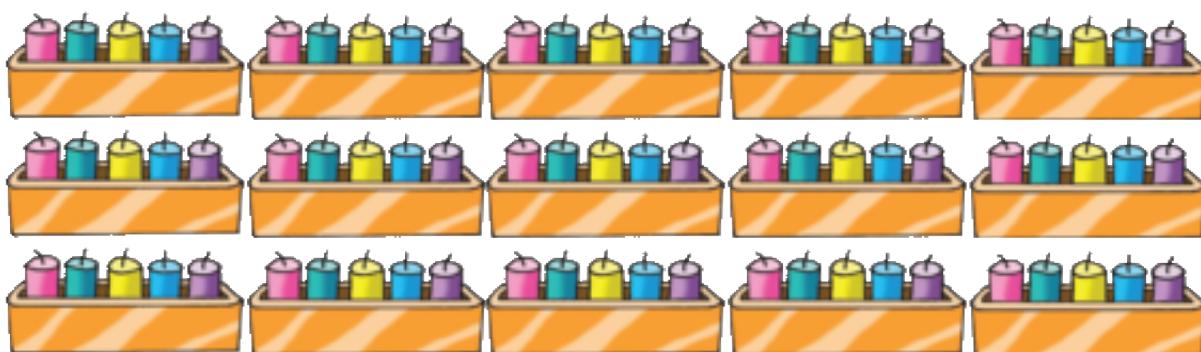

Knowing your 5s

Fill in the answers.

	1	2	3	4	5	6	7	8	9	10
× 5	5									

Counting the candles

- How many **candles** in each **box**? _____
- How many **boxes** in each **row**? _____
- How many **candles** in each **row**? _____
- How many **candles** altogether? _____

Showing the answer

Tick (✓) the number sentences that show the total number of candles.

- $5 \times 3 \times 3 = \square$
- $15 \times 3 = \square$
- $3 \times 5 \times 5 = \square$
- $15 \times 5 = \square$

Counting forwards and backwards in 5s

- a. 85; _____; _____; 70; _____; _____; 55; _____; _____
 b. 240; _____; _____; 255; _____; _____; _____; _____; 280
 c. 405; _____; 395; _____; _____; 380; _____; _____; 365; _____

Collecting R5 coins

The children collect R5 coins. How many R5 coins do they need to collect to have R____?
 We have done the first two for you.

$R5 \div R5 = 1$ coin	$R10 \div R5 = 2$ coins	R15? _____	R20? _____	R25? _____
R30? _____	R35? _____	R40? _____	R45? _____	R50? _____

$$2 \times R5 = R\boxed{}$$

$$4 \times R5 = R\boxed{}$$

Do you see the pattern?

$$3 \times R5 = R\boxed{}$$

$$6 \times R5 = R\boxed{}$$

Multiplying by 5s

Think smart! Build on facts you know!

Example: $1 \times 5 = 5$; $2 \times 5 = 10$; $3 \times 5 = 15$

1	2	3	4	5	6	7	8	9	10
5	10								
10	12	13	14	15	16	17	18	19	20

Working with time

Term 2

Drawing the times

				12:45	6:15	4:30
Half past 5	Quarter to eleven	Quarter past 12				

Time problem

Nomis's mom leaves home at **2:30**.
She comes back at **5:15**.
How long is she out for?

We can use a time line to work it out.
Put your finger on 2:30.
the time it is now.

Check. Compare. Connect.

Time problems

Solve each problem. Use the time lines to help you.

- a. Queenie visits her Dad at the clinic at **15:45**.

She leaves at **17:15**.

How long does she visit for?

- b. Musa goes to the park at **10:45**.

He comes home at **12:30**.

How long is he away for?

- c. Tumi starts to study at **13:15**.

She finishes at **14:45**.

How long does Tumi study for?

1 2 3 4 5 6 7 8 9 10

11 12 13 14 15 16 17 18 19 20

Count in 3s and 4s

Pots with 3 legs

Add and write the answers.

55

Term 2

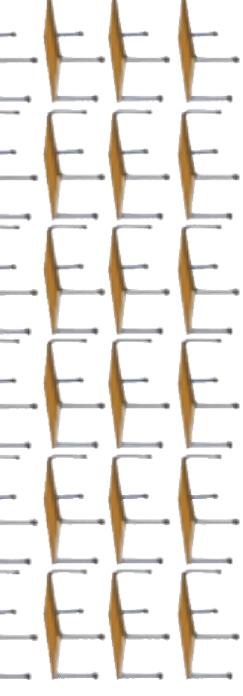

Table legs

- How many tables in a row? _____
- How many legs in a row? _____
- How many rows of tables? _____
- How many legs altogether? Show how you work it out.

At the factory

A carpenter makes tables. He first makes the legs. He has made 48 so far. How many tables can he make?

How many more legs does he need for one more table?

1 pot	3 legs	10 pots legs	5 pots legs	12 pots legs	14 pots legs	15 pots legs	13 pots legs	11 pots legs	10 legs	8 legs	5 legs	3 legs	2 legs	6 legs	4 legs	3 legs	2 legs	12 legs
2 pots	6 legs	20 pots legs	15 pots legs	24 pots legs	28 pots legs	30 pots legs	26 pots legs	22 pots legs	18 legs	16 legs	12 legs	9 legs	7 legs	14 legs	10 legs	8 legs	6 legs	18 legs
5 pots	15 legs	50 pots legs	40 pots legs	60 pots legs	70 pots legs	75 pots legs	65 pots legs	55 pots legs	45 legs	40 legs	30 legs	25 legs	20 legs	35 legs	28 legs	22 legs	18 legs	50 legs

Complete the grid by filling in the answers

Fractions: halves and quarters

Divide the balls equally between the boxes.

Term 2

Colour in $\frac{1}{2}$ of each shape.

Colour in $\frac{1}{4}$ of each shape.

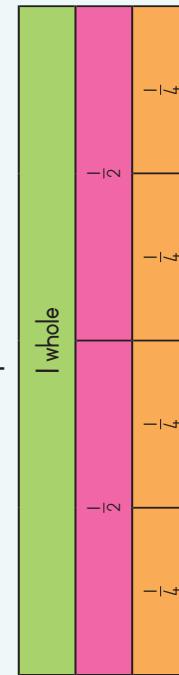

Colour in $\frac{2}{4}$ of each shape.

Colour in $\frac{3}{4}$ of each shape.

Look at the fraction strips.

<ul style="list-style-type: none"> How many balls are in each box? How many balls in the purple box? What fraction is in the purple box? 	<ul style="list-style-type: none"> How many balls are in each box? How many balls in the purple box? What fraction is in the purple box?
<input type="text"/> <input type="text"/> <input type="text"/>	<input type="text"/> <input type="text"/> <input type="text"/>

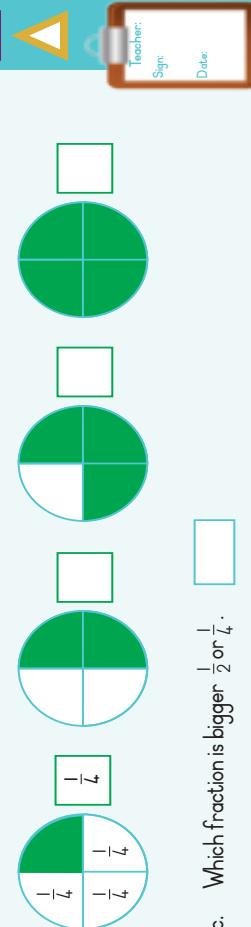

Look at the pictures and answer the questions.

<p>How many circles do you count? What is $\frac{1}{2}$ of the circles?</p>	<p>How many circles do you count? What is $\frac{1}{4}$ of the circles?</p>
<input type="text"/> <input type="text"/>	<input type="text"/> <input type="text"/>

- a. How many halves ($\frac{1}{2}$) make one whole?
How many quarters ($\frac{1}{4}$) make one whole?
How many quarters ($\frac{1}{4}$) make one half?

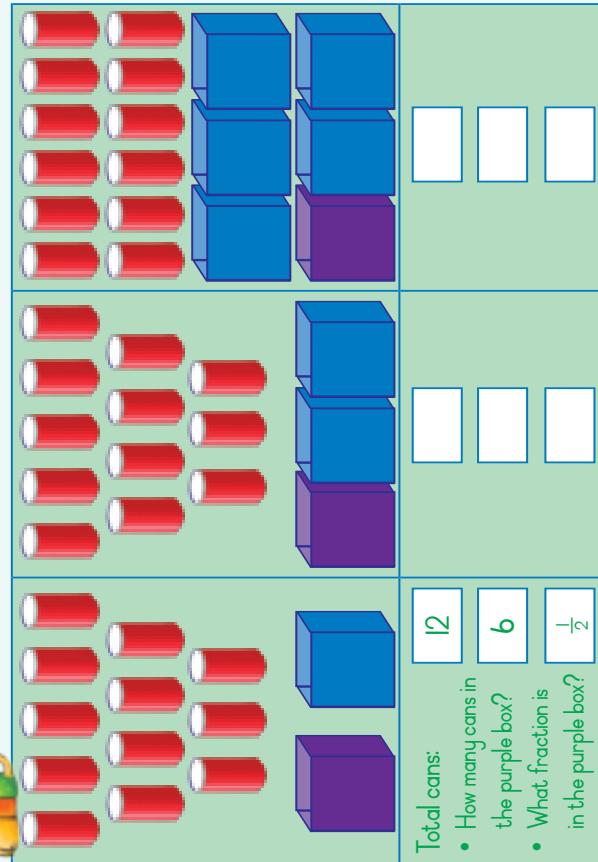

- b. Look at the diagrams and write a fraction for the shaded part.
- | | | | |
|---------------|---------------|---------------|---------------|
| $\frac{1}{2}$ | $\frac{1}{4}$ | $\frac{3}{4}$ | $\frac{1}{2}$ |
|---------------|---------------|---------------|---------------|

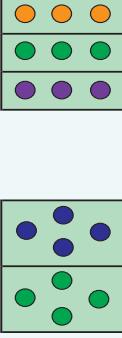

- c. Which fraction is bigger $\frac{1}{2}$ or $\frac{1}{4}$.

Fractions: halves, thirds and sixths

Divide the cans (cylinders) equally between the boxes.

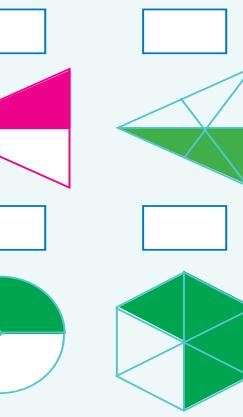

Look at the pictures and answer the questions.

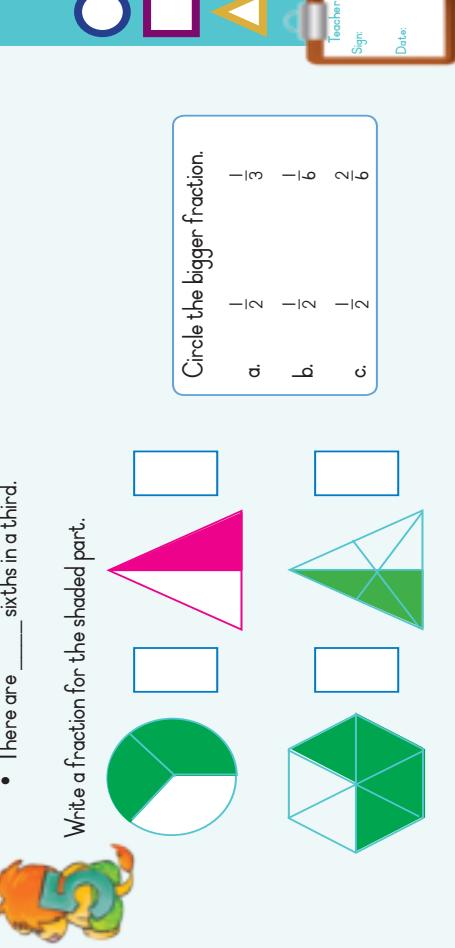

What is $\frac{1}{2}$ of the circles?
What is $\frac{1}{3}$ of the circles?
What is $\frac{2}{3}$ of the circles?
What is $\frac{3}{3}$ of the circles?

- a. $\frac{1}{2}$ b. $\frac{1}{2}$ c. $\frac{2}{6}$
- What is $\frac{1}{6}$ of the circles?
What is $\frac{2}{6}$ of the circles?
What is $\frac{3}{6}$ of the circles?
What is $\frac{4}{6}$ of the circles?
What is $\frac{5}{6}$ of the circles?

- Circle the bigger fraction.
- a. $\frac{1}{3}$ b. $\frac{1}{6}$ c. $\frac{2}{6}$

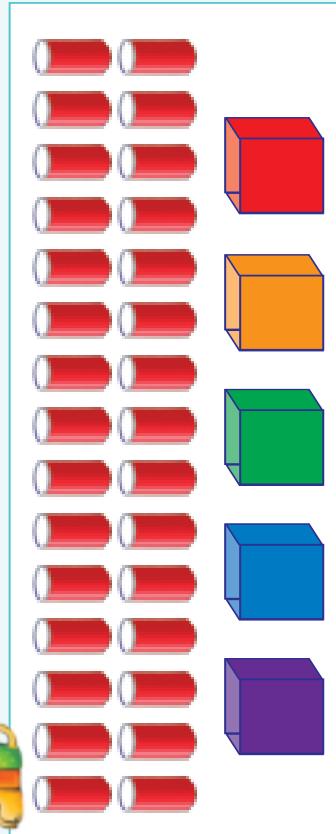

Write a fraction for the shaded part.

Fractions: fifths

Divide the cans into the 5 boxes.

- In one fifth of the boxes are cans.
- In two fifths of the boxes are cans.
- In three fifths of the boxes are cans.
- In four fifths of the boxes are cans.
- In five fifths of the boxes are cans.

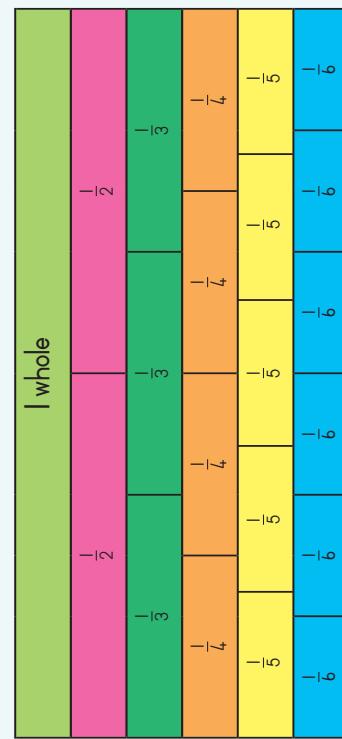

5q

Term 2

Colour $\frac{1}{5}$ of the measurement of the ruler.

Look at the fraction strips and answer the questions.

Look at the picture and answer the questions.

- How many chocolates are in the box?
- one fifth ($\frac{1}{5}$) of the chocolates equal to
 - two fifths ($\frac{2}{5}$) of the chocolates equal to
 - three fifths ($\frac{3}{5}$) of the chocolates equal to
 - four fifths ($\frac{4}{5}$) of the chocolates equal to
 - five fifths ($\frac{5}{5}$) of the chocolates equal to
 - On day 1 I ate $\frac{1}{5}$ of the chocolates. How many chocolates are left?
 - On day 2 I ate another $\frac{1}{5}$. How many chocolates are left?

3D objects

Count the boxes (prisms).

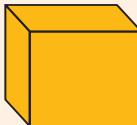

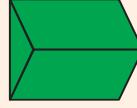

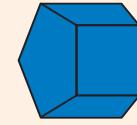

Count the balls (spheres).

Count the cylinders.

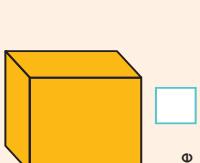

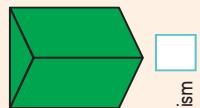

These are all boxes.

Use Cut-out sheets 3 and 4 to make them.

Each flat surface is called a face. Stick or draw one smiley on each face of the boxes.

How many faces did you stick on:

prism

prism

cube

Are the faces of the prisms flat or curved?

Now make the cylinder from Cut-out sheet 4.

Are the faces of the cylinder flat or curved?

60

Term 2

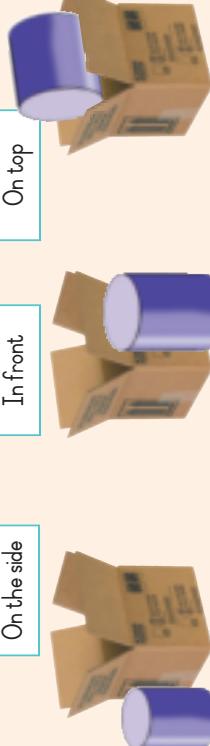

Use your objects to build the following.

Describe the position of the cylinder using the words.

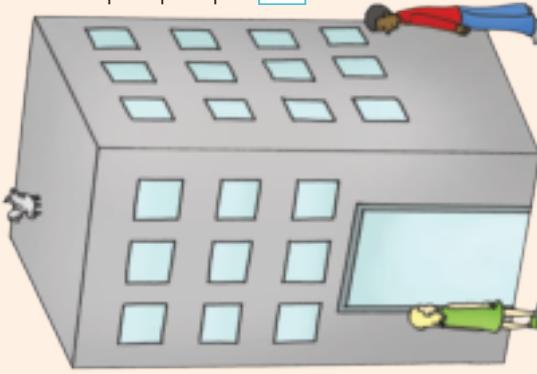

On top

In front

On the side

Use the words below to complete the sentences.

The girl looks at the _____ of the building.

The man looks at the _____ of the building.

The bird looks at the _____ of the building.

side

front

top

19

Double and half

Do you remember?

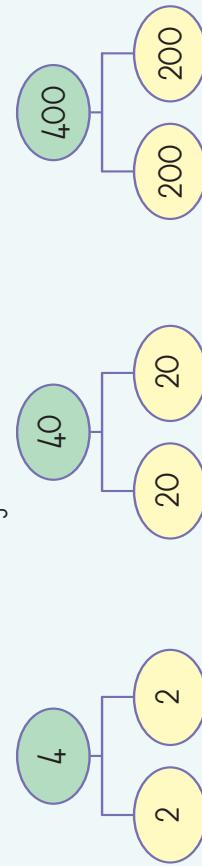

2 is half of 4

4 is double 2

20 is half of 40

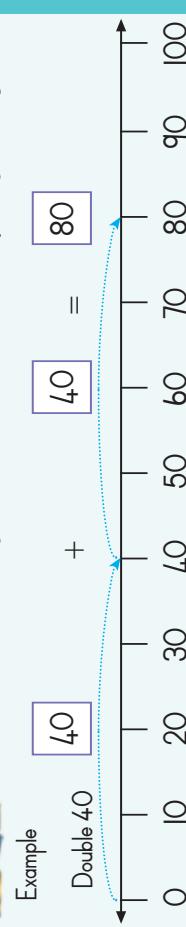

40 is double 20

Remember! We can show this in a drawing ...

Term 2

Double the number using a number line. The first example is given to you.

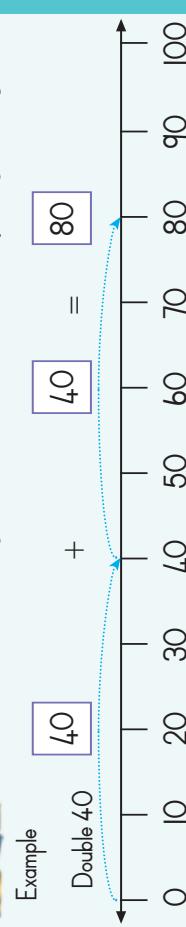

- a. Double 60 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- b. Double 150 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- c. Double 200 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

11 12 13 14 15 16 17 18 19 20

Term 2

Double the number using a number line. The first example is given to you.

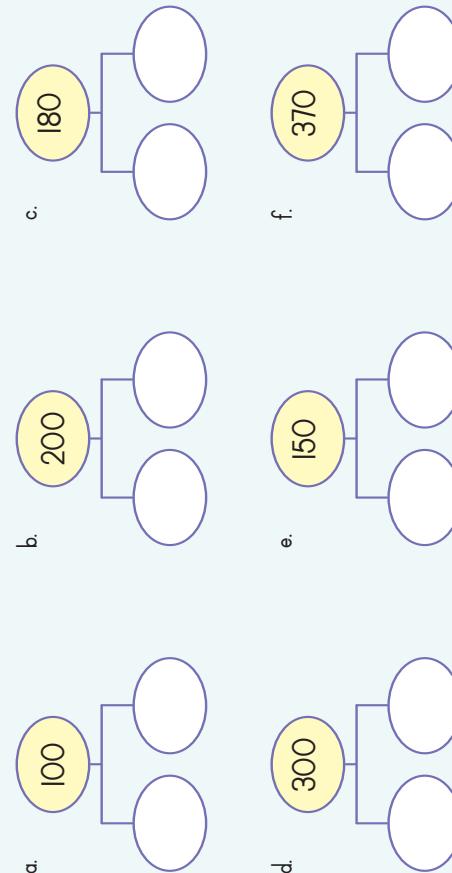

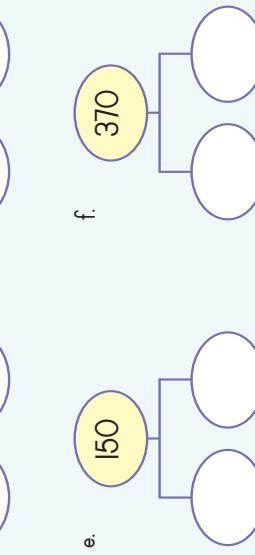

- a. Double 60 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- b. Double 150 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- c. Double 200 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

Complete the following

- a. Half 220 $\boxed{\quad} + \boxed{\quad} = \boxed{110}$
- b. Half 180 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- c. Half 260 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- d. Half 60 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- e. Half 320 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

- a. Double 100 $\boxed{\quad} + \boxed{\quad} = \boxed{200}$
- b. Double 150 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- c. Double 120 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- d. Double 200 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- e. Double 170 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

- a. Half 220 $\boxed{\quad} + \boxed{\quad} = \boxed{110}$
- b. Half 180 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- c. Half 260 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- d. Half 60 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$
- e. Half 320 $\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$

62

More double and halving

Finding the doubles or halves

- a. b. c. d. e. f.
- Each diagram shows a number at the top connected by lines to two empty circles below it.

Saving for a bicycle

Aakar saves R25 a week to buy this bicycle.
For how many weeks must he save?
Answer: _____ weeks

Sale R450

Half price: was R900

Weeks: _____

On sale

All the items are on sale for half the price.
Write the sale price next to each item.

- a. Blankets R190
Sale price _____
- c. Cushions R54
Sale price _____

- b. Sheets R154
Sale price _____
- d. Chairs R220
Sale price _____

How many rands?

Musa wants the shirt. He only has half the amount.

R135

How much does he still need? R _____

R78.50

How much do Aakar's shoes cost? R _____

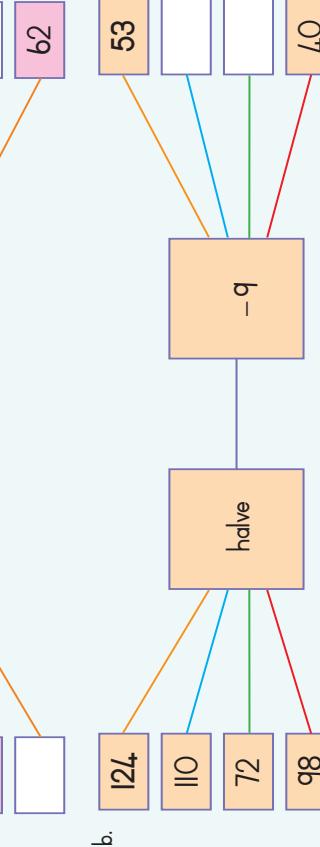

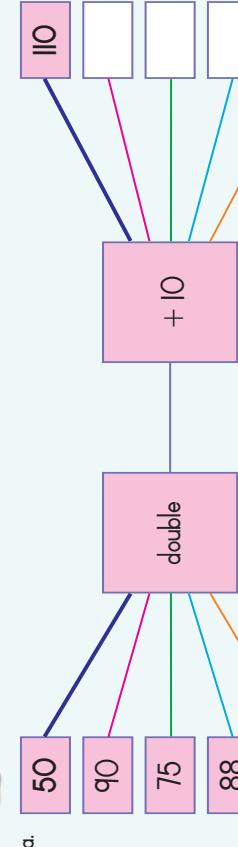

R97

Phindi's dress is double the price of this one.
How much does Phindi's dress cost? R _____

What goes in? What comes out?

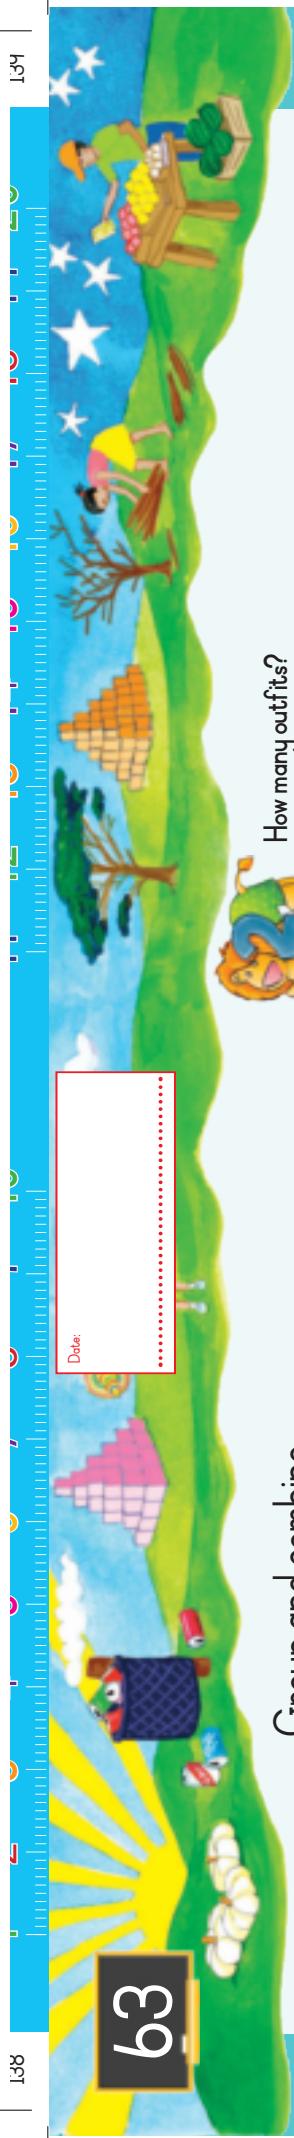

Follow the example. Fill in the missing numbers.

Term 2

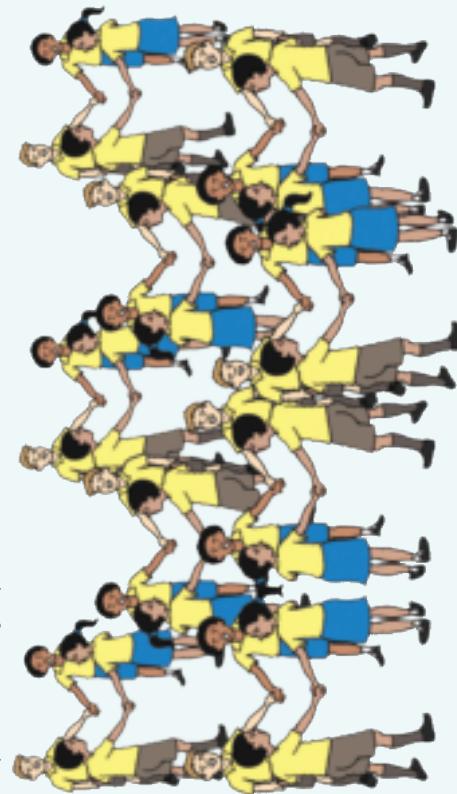

Teacher: _____

Group and combine

Grouping the children

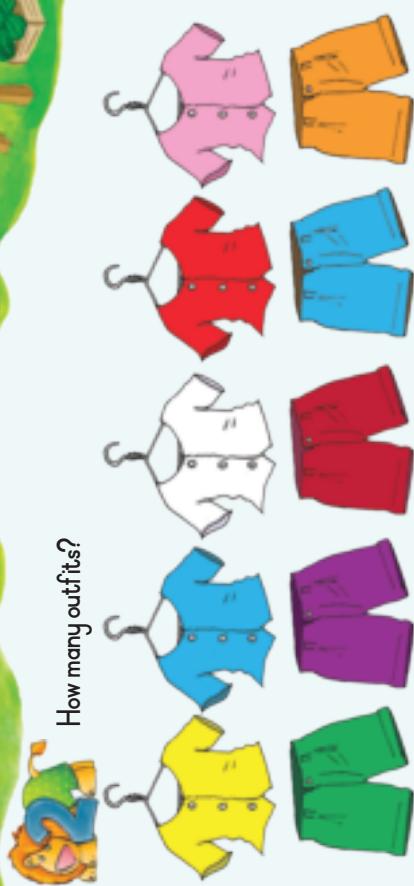

Mrs Nolaba wants to divide the class into equal-sized groups for outdoor games. First she puts them into groups of 4.

- Count the children?
- How many teams does she make?
- Show all the other ways they can be grouped into equal sized groups.

Check. Compare.
Correct.

How many outfits?

Phindi has 5 coloured shirts and 5 coloured shorts.

How many different outfits can she make using different combinations of the colours?

For example: Blue shirt/blue shorts. Blue shirt/orange shorts.

Write the first letter of each colour. Show all the other possible outfits.

Predict: What if Phindi has 6 different colours of shirts and shorts?

How many outfits can she make?

Check. Compare.
Correct.

Maths fun

Look for a rule

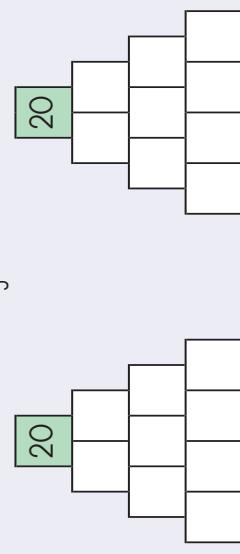

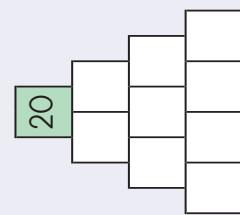

Use the rule to find the missing numbers.

Now do these:

Build to 20 in 3 different ways.

Challenge

Just think!

Use the numbers 1, 2, 3, 4 and 5.

The 3 numbers in each row must add up to 10.

Rule: Use each number only once.

Term 2

Finding the numbers

a. Rule: The numbers in each row must add up to 16.

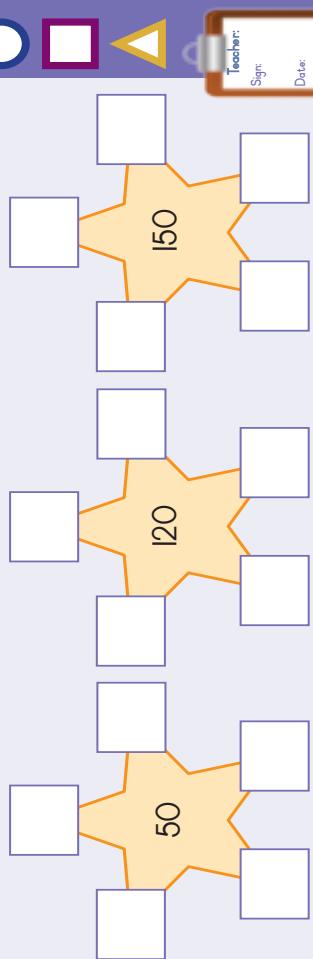

2	5	3	6
			2
			2

b. Rule: The 3 numbers, across the rows and down the columns, add up to the same total.

23	28	21
12		26
	10	

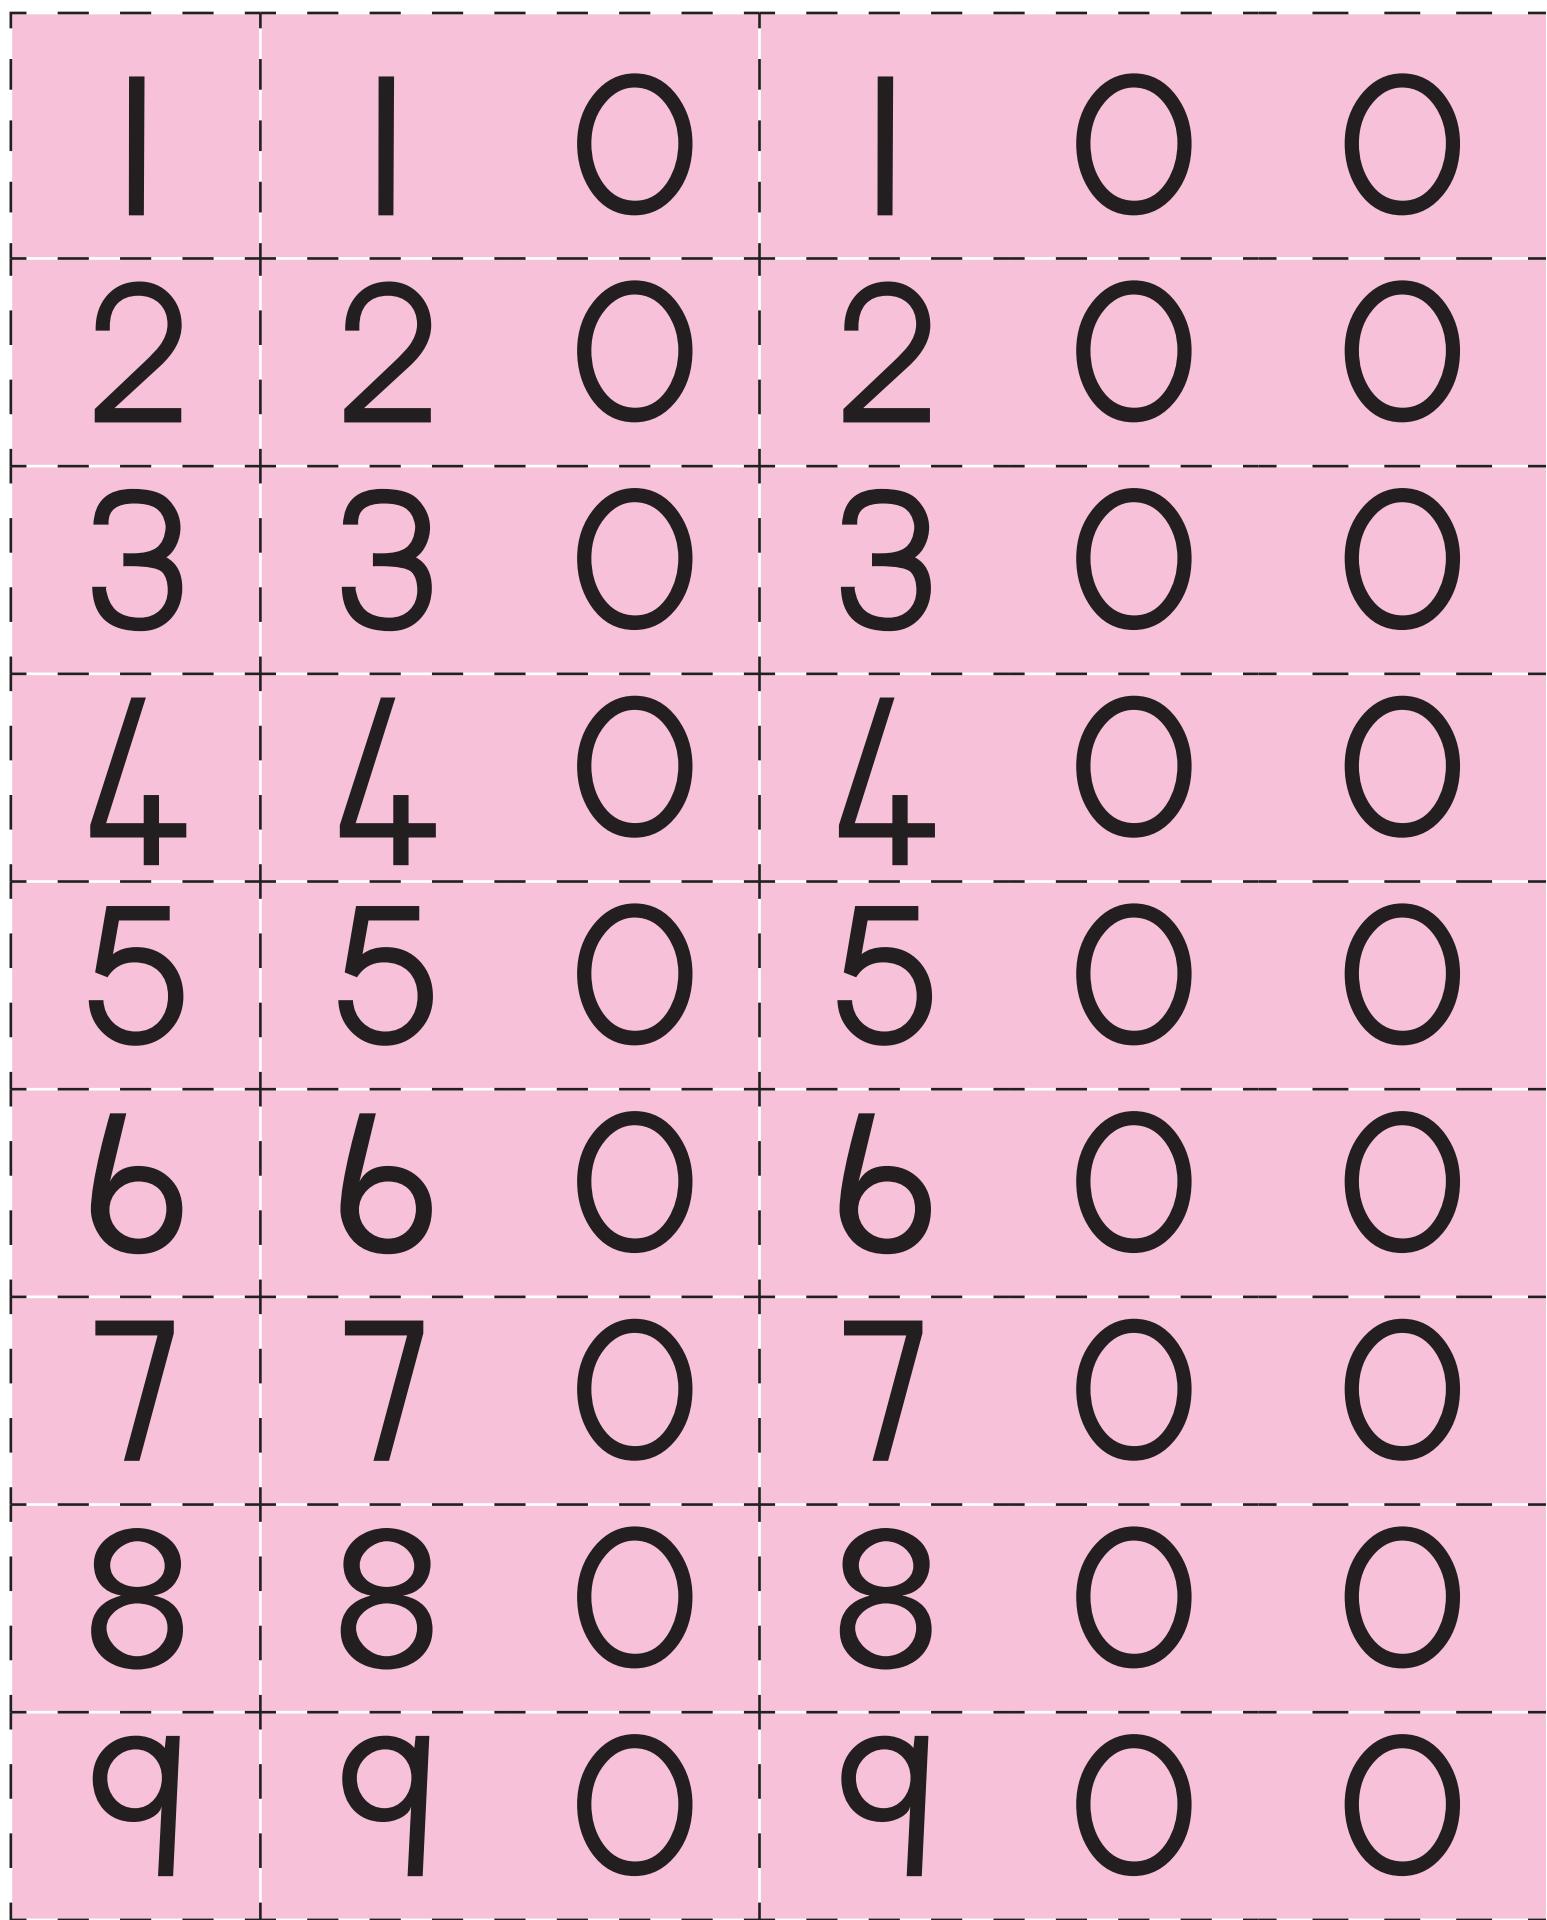

2	7	6
q		1
	3	8

c. Rule: Write in any 5 numbers that add up to the middle number inside the star.
