1. INTRODUCTION

1.1. Background

The Minimum Uniform Norms and Standards for Public School Infrastructure were promulgated on 26 November 2013 Aimed at addressing the uneven development with respect to provisioning of basic school infrastructure to all public schools in order to provide relevant, effective, responsive and sustainable teaching and learning environment.

It is a requirement that in terms of Clause 4 (6) (a) that "A Member of the Executive Council must, within a period of 12 months after the publication of the regulations and thereafter annually on a date and in the manner determined by the minister, provide the Minister with detailed plans on the manner in which the norms and standards are to be implemented as far as schools referred to in sub-regulation (1) are concerned".

This report gives the status for Mpumalanga Department of Education towards meeting the targets as at the end of November 2018, the fifth anniversary of the Norms and Standards. financial year.

1.2. Objectives of the Regulations

The objectives of the Regulations Relating to the Minimum Uniform Norms and Standards for Public Schools Infrastructure are given as;

- a) To define the minimum uniform norms and standards for the school infrastructure.
- b) To ensure that there is compliance with these norms and standards in terms of design and construction of new schools, additions, alterations and improvements to the existing schools.
- c) To provide timeframes within which school infrastructure backlogs must be eradicated.

1.3. Description of Targets and their Timeframes

The table below gives a summary of the targets and their delivery timeframes as spelt out in the Norms and Standards. This forms the baseline of the infrastructure delivery.

	DESCRIPTION OF TARGET	TARGET DATE
3 YEAR	a) Any Form of Water Supply b) Any Form of Electricity Supply c) Any Form of Sanitation d) Eradication of Inappropriate Materials or Structures	2016
7 YEAR	a) Appropriate Fencing b) Eradication of Overcrowding c) Electronic Connectivity	2020
10 YEAR	a) No Library or Media Centre b) No Laboratories	2023
15 YEAR	a) Inappropriate materials maintenance and growth (New Schools) b) Appropriate provision of sports facility, kitchen, school halls/forums, car parks, multi-purpose centres. c)	2030

2. OVERVIEW OF MPUMALANGA DEPARTMENT OF EDUCATION'S STATUS REGARDING MEETING THE NORMS AND STANDARDS

The department's status regarding meeting the Norms and Standards is as follows:

- a) The department as at the end of November 2018 had not met the target in terms of the three year basic services targets. However, the picture would be different the end of the 2018/19 financial year, that is 31 March 2019. As at end of November 2018, Mpumalanga Department of Education still had:
- 84 out of 127 schools with plain pit toilets only, are to be eradicated of the pit toilets. All the 84 schools had projects at different stages of construction targeting completion by June 2019.
 - 75 schools provided with acceptable sanitation facilities, but still have plain pit toilets that were not demolished. These are going to be eradicated by 30 June 2019
- b) The province has now eradicated structures constructed wholly by inappropriate materials. However, the department has old and dilapidated schools constructed by the communities in Bohlabela District as a different backlog category which the Department is eradicating.
- c) There is no school in the province that does not have access to any form of power supply. Some of the schools however require addressing general and vandalism damages. Thus it is more of electrical maintenance.
- d) There is no school that does not have access to any form of sanitation. The province however, has schools with ordinary pit latrines in both good and dilapidated states. Once these toilets are full, the school status becomes that of a school with no sanitation facilities at all.
- e) In terms of water supply, some form of water supply to schools is available. However, some of the water sources are not reliable. Even schools with complete water infrastructure, supply of the water may be erratic due to various reasons like drying of boreholes (draught) and shortfalls from the municipal connections/supplies.

3. OVERVIEW OF THE PROGRESS MADE IN INFRASTRUCTURE PROVISIONING FROM 2013/14 TO 30 NOVEMBER 2018 AND THE OVERAL INFRASTRUCTURE BACKLOG STILL TO BE ADDRESSED

3.1. MDOE's Progress in Infrastructure Provisioning from the Promulgation of the Norms and Standards

Table 3.1 below gives an overall summary of the infrastructure provided from the promulgation of the Norms and Standards on 29 November 2013 to 30 November 2018, the fifth anniversary of the Norms and Standards.

**Table 3.1: Overall Summary of Infrastructure Provided from 2013/14 to End of November 2018
(Fifth Anniversary of the Norms and Standards)**

3.2. MDOE's Progress in Infrastructure Provisioning from the Promulgation of the Norms and Standards

Table 3.2 below gives the department's costed infrastructure backlog to be eradicated for effective schools by the year 2030. MDOE presented the plan which was approved by EXCO in 2017-18 on the framework for effective schools, where part of the presentation looked at infrastructure required towards effective schools.

The plan advocated for an ideal case scenario towards infrastructure development when all required funding is made available within the norms stipulated target dates factoring in the current infrastructure plans (Table B5) and assuming the outstanding 3yr Target projects are completed by November 2020.

3.3. Analysis of Progress on Infrastructure Provisioning & Backlogs

- a) From 2013/14 to 30 November 2018 in the 2018/19 financial year, the department has provided acceptable basic services (water, sanitation and electricity) to a total of 754. List attached herewith as **Annexure A** to this report specifically gives sanitation projects completed from the time of promulgation of the Norms and Standards.
- b) As at the end of 2019/20 Financial Year, the Department still has school infrastructure backlogs to be eradicated by 2030 to a value of R42,3 billion.
- c) With the current reduced annual budget of the magnitude of R900 million, the department may not be able to eradicate the R42,3 billion backlog by 2030 in line with the Norms and Standards.
- d) The department has a boarding school programme aimed at providing quality education and conducive teaching and learning environment to the small unviable farm schools. From 2013/14 financial year the Department has provided six (6) boarding schools (Ezakheni and Izimbali in Mkhondo Local Municipality, Emakhazeni in Emakhazeni Local Municipality, Steve Tshwete in Steve Tshwete Local Municipality, Shongwe in Nkomazi Local Municipality and Thaba Chweu in Thaba Chweu Local Municipality) that replaced 41 unviable farm schools. Thaba Chweu boarding school will be completed in May 2019.
- e) Against the set norms and standards in summary, the Department is still behind in meeting its targets towards the provisioning of education infrastructure, with the most affected target being the provision of basic services as the Department had to attend to unforeseen and unplanned disasters like storm damages and arson related damages. However, from 2018/19 financial year the province took a position of not repairing schools burnt by communities as a way of demanding school infrastructure.

5. MDOE's SANITATION BACKLOG AND PROGRESS ON ITS ERADICATION

5.1 MDOE's Audited Sanitation Backlog and Progress to Address them

As at the beginning of 2018/19 financial year, the department carried out a detailed audit of its sanitation backlog per district in terms of the following categories:

- Schools with pit toilets only
- Demolish pit toilet on schools provided with acceptable sanitation
- Overall inadequate sanitation (with or without demolishing)
- Provision of fit for purpose Grade R sanitation (retrofit)

The overall summary of MDoE costed backlogs at start of 2018/19 financial year for categories a) to d) above are given in the ensuing table:

Table 5.1: Overall Department's Sanitation Backlog Summary as at Start of 2018/19 Financial Year

5.2.4 Eradication of Entire Sanitation Challenges in MDoE

The Department targets to eradicate all the sanitation backlogs at the end of 2020/21 financial year.

6. MDOE's CHALLENGES AFFECTING INFRASTRUCTURE DELIVERY TO MEET NORMS AND STANDARDS AND PROPOSED REMEDIAL ACTIONS

6.1 MDOE's Challenges Affecting Infrastructure Delivery

The following are challenges facing project delivery and performance, including the mitigation measures.

No	Challenge	Improvement Strategy
Category A – MDOE Challenges		
1	Infrastructure planning deficiencies resulting in non-compliance with Infrastructure Delivery Management System (IDMS) prescripts requiring :	
1.1	Needs raised outside the department's business processes.	<ul style="list-style-type: none"> Strengthen Community feedback mechanisms through Education stakeholders' consultation as well as broader community consultations pre and post planning phases (vis. During the municipal IDP processes and District Management meetings)
1.2	Delayed infrastructure delivery due to site identification and confirmation. Or cases where a site was identified at pre-planning stage, site is invaded by communities at time of commencing with construction.	<ul style="list-style-type: none"> Internally ensuring that land is identified in line with the department's needs as identified U-AMP and IPMP. Developing and management of landbank in line with Municipal Spatial Development Frameworks and Municipal IDPs.
2	Non-credible Infrastructure Plans leading to inadequate budget spending	
2.1.	In-year Cancellation of projects against the approved plans	<ul style="list-style-type: none"> Use the NEIMS conditions assessments to verify infrastructure needs identified through the prioritisation process.
2.2.	Requesting the IA to implement additional projects to avert possible under expenditure	<ul style="list-style-type: none"> Use the relevant planning tools to inform estimated project costs in the infrastructure plans vis: <ul style="list-style-type: none"> ✓ To minimize budget set aside for retention fees and capital costs for the multi-year projects by ensuring technical consultation with the IA to make informed decisions on estimated project costing.
3.	Inadequate programme monitoring and management.	<ul style="list-style-type: none"> Improved districts' capacity to closely monitor the projects by recruiting works inspectorate personnel (Works inspectorate mentorship by TA, IDMS Introductory to all DoRA technical posts by TA & Provincial Treasury, NEIMS Condition Assessment by DBE, IRM training to all new DoRA head office officials by Provincial Treasury)

		<ul style="list-style-type: none"> • Conducting in-house training and mentorship sessions in partnership with DBE and Provincial Treasury. • Developed project monitoring and evaluation tool used for early identification and reporting of problematic projects.
4	High staff turnover on DoRA funded technical posts.	<ul style="list-style-type: none"> • Immediate recruitment and appointment once posts are vacated. • Retention strategies include continuous training and mentorship as well as availing tools of trade, decent office space and furniture.
Category B – Implementing Agent (IA) Related Challenges		
5.	Inadequate programme management and projects monitoring by the IA	<ul style="list-style-type: none"> • Continuous engagements through the institutional arrangements (mode of communication) viz. POMM, JOC and PPICC. • Close interrogation of the IDIP report by MDOE to ensure up-to-date reporting
6	Late Appointment of Service Providers by the IA leading to Under spending on the infrastructure programme	<ul style="list-style-type: none"> • Ensuring that MDOE is submitting the Infrastructure Plans (A-AMP, IPMP and Construction Procurement Strategy) to the IA in line with the timeframes stipulated by the Division of Revenue Act and the Education Infrastructure Grant Framework (EIG) • Request for additional Implementing Agent capacity in the Province through submitting a memo to EXCO requesting for the same.
7.	Delayed procurement processes	The IA together with the Provincial Treasury to engage and come up with a solution to fast track submission of stamped bids to DPWRT.
8	Slow and late commencement with construction works after site hand over and disruptions by communities and other interest groups.	The IA to engage relevant stakeholders to engage communities on the issue of the 30%
9	Non-submission of payment certificates by service providers for work done;	Continuous engagement of all service providers by the IA to have all work done claimed for.

7. RECOMMENDATIONS

It is recommended that the Honourable Minister: Basic Education, takes note of Mpumalanga Provincial Department's progress in addressing the norms and standards and provide further support.
