

NATIONAL ANTHEM of SOUTH AFRICA

COMMEMORATING 120 YEARS OF NKOSI SIKELEL' iAFRICA

In 1897 Enoch Sontonga of the Mpinga clan of the amaXhosa was inspired to write a hymn for Africa. At the time he was 24 years old, a teacher, a choirmaster, a lay minister in the Methodist church and a photographer. At the time Mr Sontonga lived in Nancefield near Johannesburg.

In 1899, this beautiful hymn, Nkosi Sikelel' iAfrika, was sung in public for the first time, at the ordination of Reverend Boweni, a Methodist priest. It had a powerful effect on everyone who heard it, and became so well loved that it was added to, translated, and sung all over the African continent.

A further seven verses were added to the hymn by poet SEK Mqhayi, and on 16 October 1923, Nkosi Sikelel' iAfrika was recorded by Solomon T Plaatje, accompanied by Sylvia Colenso on the piano. It was sung in churches and at political gatherings and in 1925, it became the official anthem of the African National Congress (ANC).

Although his hymn was very well known, Sontonga was not famous in his lifetime. For many years, historians searched for information about this humble man's life and death.

Enoch Sontonga died on 18 April 1905, at the age of 33. His grave was discovered many years later in a cemetery in Braamfontein in Johannesburg, after a long search by the National Monuments Council. In 1996, on Heritage Day, 24 September, President Mandela declared Sontonga's grave a national monument, and a memorial was later erected at the gravesite.

For a while, in 1994 and 1995, South Africa had two official national anthems: Nkosi Sikelel' iAfrika and Die Stem, the apartheid era anthem. Both anthems were sung in full, but it took such a long time to sing them that the government held open meetings to ask South Africans what they wanted for their National Anthem. In the end, the government decided on a compromise, which included the shortening of both anthems and the creation of a harmonious musical bridge to join the two songs together into a single anthem. Our national anthem, which is sung in five different languages – isiXhosa, isiZulu, Sesotho, Afrikaans and English – is unique and demonstrates the ability of South Africans to compromise in the interest of national unity and progress.

Nkosi Sikelel' iAfrika became the first stanza of our new National Anthem.

Nkosi Sikelel' iAfrica

Nkosi, sikelel' iAfrika,
Malupnakanyisw' udumo lwayo;
Yizwa imithandazo yethu
Nkosi sikelela,
Thina lusapho lwayo

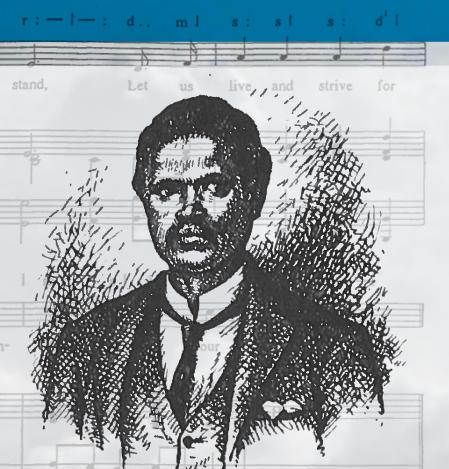

Nkosi, sikelel' iAfrika,
Malupnakanyisw' udumo lwayo;
Yizwa imithandazo yethu
Nkosi sikelela,
Thina lusapho lwayo

Woza Moya (woza, woza),
Woza Moya (woza, woza),
Woza Moya, Oyingcweli.
Usiskelele, Thina lusapho lwayo.

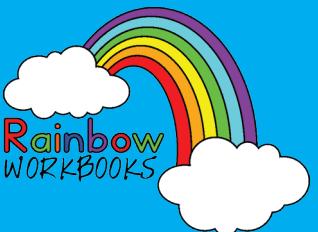

Morena boloka sechaba sa heso
O fedise dintwa le matshwenyeho
Morena boloka sechaba sa heso,
O fedise dintwa le matshwenyeho

O se boloke, o se boloke,
O se boloke, o se boloke.
Sechaba sa heso, Sechaba sa heso.
O se boloke morena se boloke,
O se boloke sechaba, se boloke.
Sechaba sa heso, sechaba sa Africa.

Ma kubu njalo! Ma kubu njalo!
Kude kubu ngunaphakade.
Kude kubu ngunaphakade!

Mrs Angie Motshekga,
Minister of
Basic Education

Mr Enver Surty,
Deputy Minister of
Basic Education

These workbooks have been developed for the children of South Africa under the leadership of the Minister of Basic Education, Mrs Angie Motshekga, and the Deputy Minister of Basic Education, Mr Enver Surty.

The Rainbow Workbooks form part of the Department of Basic Education's range of interventions aimed at improving the performance of South African learners in the first six grades. As one of the priorities of the Government's Plan of Action, this project has been made possible by the generous funding of the National Treasury. This has enabled the Department to make these workbooks, in all the official languages, available at no cost.

We hope that teachers will find these workbooks useful in their everyday teaching and in ensuring that their learners cover the curriculum. We have taken care to guide the teacher through each of the activities by the inclusion of icons that indicate what it is that the learner should do.

We sincerely hope that children will enjoy working through the book as they grow and learn, and that you, the teacher, will share their pleasure.

We wish you and your learners every success in using these workbooks.

Describing and ordering fractions

Term 3

- How many numbers are marked between the given numbers?
- How far is the unnumbered mark from the next number?

What do the fraction strips tell you?

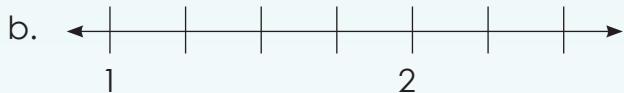

1. Use these number lines to answer the questions:

- What do the interval marks between 0 and 1 show us? _____
- How did you work it out? _____

iii. What will the interval be between 0 and the next mark after 1?

- What do the interval marks between 1 and 2 show us? _____
- How did you work it out? _____

iii. What will the interval be between 1 and the next mark after 2?

- What do the intervals between 3 and 4 tell us? _____
- How did you work it out? _____

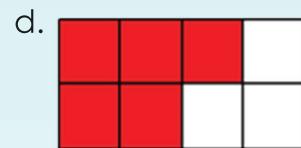

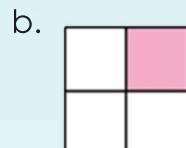

iii. What will the interval be between 3 and the second mark after 4?

2

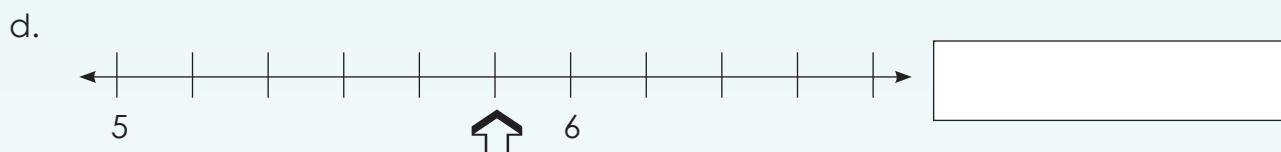

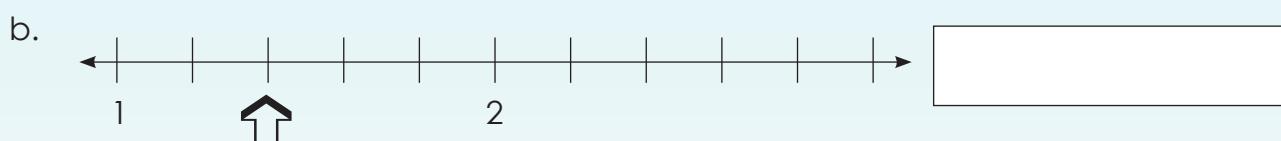

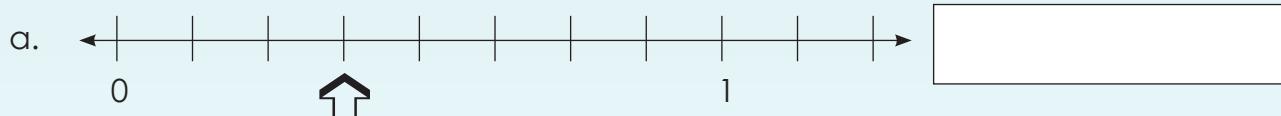

2. What fraction of the pictures below have been coloured?

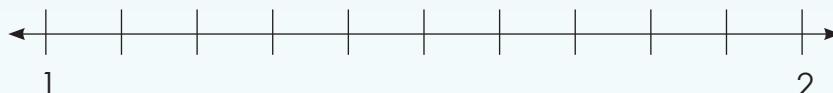

3. What fraction does the arrow show?

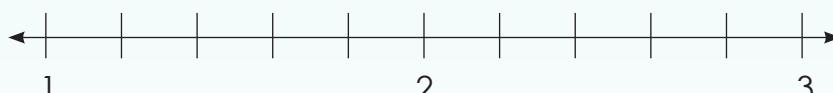

4. Show the following on the number lines.

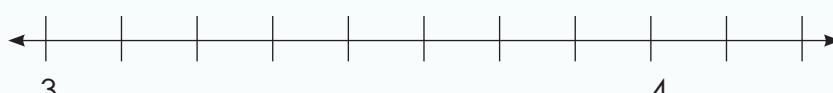

a. One and a half

b. Two and one quarter

c. Three and one eighth

d. Two and one fifth

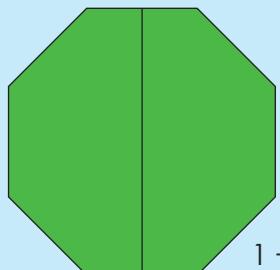

Sharing sweets

If 5 children share 35 sweets, how many sweets will each child get? What fraction of the sweets will each child get?

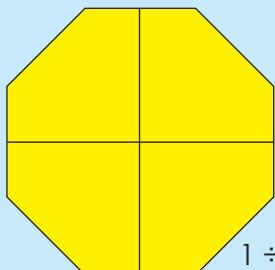

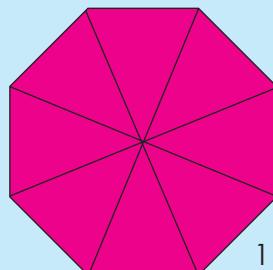

Look at the fractions and the sums. Talk about it.

Halves

Quarters

Eighths

$$1 \div 2 = \frac{1}{2}$$

$$1 \div 4 = \frac{1}{4}$$

$$1 \div 8 = \frac{1}{8}$$

1. Using the above diagrams, write an equivalent fraction for:

a. $\frac{1}{2} = \boxed{\frac{2}{4}}$

b. $\frac{3}{4} = \boxed{\quad}$

c. $\frac{4}{8} = \boxed{\quad}$

d. $\frac{2}{4} = \boxed{\quad}$

e. $\frac{2}{2} = \boxed{\quad}$

f. $\frac{6}{8} = \boxed{\quad}$

2. Fill in <, > or =.

a. $\frac{1}{2} \boxed{>} \frac{1}{4}$

b. $\frac{1}{2} \boxed{\quad} \frac{2}{8}$

c. $\frac{1}{4} \boxed{\quad} \frac{3}{8}$

d. $\frac{1}{2} \boxed{\quad} \frac{2}{4}$

e. $\frac{2}{4} \boxed{\quad} \frac{1}{8}$

f. $\frac{5}{8} \boxed{\quad} \frac{2}{4}$

g. $\frac{2}{4} \boxed{\quad} \frac{6}{8}$

h. $\frac{1}{4} \boxed{\quad} \frac{4}{8}$

i. $\frac{4}{8} \boxed{\quad} \frac{1}{2}$

j. $\frac{1}{2} \boxed{\quad} \frac{3}{4}$

k. $\frac{1}{2} \boxed{\quad} \frac{1}{8}$

l. $\frac{5}{8} \boxed{\quad} \frac{1}{2}$

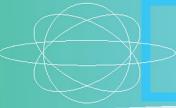

m. $\frac{1}{2} \boxed{\quad} \frac{8}{8}$

n. $\frac{4}{4} \boxed{\quad} \frac{7}{8}$

o. $\frac{1}{2} \boxed{\quad} \frac{7}{8}$

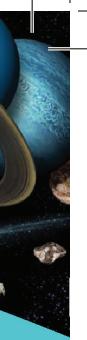

X

8

3

3. Complete the following:

a. One whole = $\frac{1}{2}$ +

d. One whole = $\frac{3}{4}$ +

b. One whole = $\frac{2}{4}$ +

e. One whole = $\frac{3}{8}$ +

c. One whole = $\frac{4}{8}$ +

f. One whole = $\frac{2}{8}$ +

4. Draw a picture for the following:

a. Jabu had two quarters of a slab of chocolate, and William had five eighths of another slab. Who ate the most chocolate?

b. Ben had $\frac{1}{4}$ of a cool drink, and then another $\frac{1}{4}$. Sam had $\frac{1}{4}$ of the same type of cool drink. What do you notice?

Divide any object into eighths.

Show one quarter of the object.

Show one half of the object.

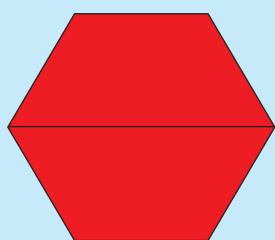

More equivalent fractions

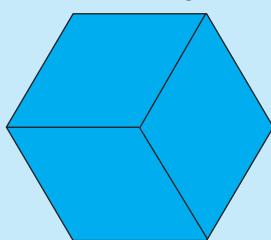

Look at the fractions and the sums. Talk about it.

$$1 \div 2 = \frac{1}{2}$$

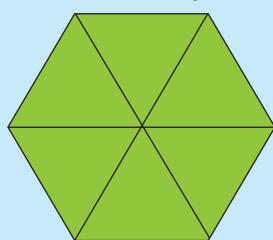

Halves

$$1 \div 3 = \frac{1}{3}$$

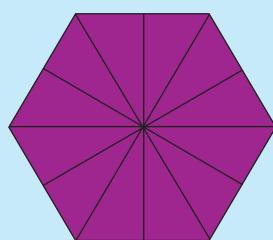

Thirds

$$1 \div 6 = \frac{1}{6}$$

Sixths

$$1 \div 12 = \frac{1}{12}$$

Twelfths

1. Using the above diagrams, write an equivalent fraction for:

a. $\frac{1}{2} = \boxed{\frac{3}{6}}$

b. $\frac{1}{3} = \boxed{\quad}$

c. $\frac{1}{6} = \boxed{\quad}$

d. $\frac{2}{3} = \boxed{\quad}$

e. $\frac{3}{6} = \boxed{\quad}$

f. $\frac{10}{12} = \boxed{\quad}$

g. $\frac{4}{6} = \boxed{\quad}$

h. $\frac{12}{12} = \boxed{\quad}$

i. $\frac{6}{12} = \boxed{\quad}$

2. Fill in < or >.

a. $\frac{6}{12} \boxed{<} \frac{2}{3}$

b. $\frac{1}{2} \boxed{<} \frac{2}{6}$

c. $\frac{9}{12} \boxed{<} \frac{1}{2}$

d. $\frac{1}{2} \boxed{<} \frac{4}{6}$

e. $\frac{2}{6} \boxed{<} \frac{3}{12}$

f. $\frac{7}{12} \boxed{<} \frac{2}{3}$

g. $\frac{11}{12} \boxed{<} \frac{6}{6}$

h. $\frac{1}{12} \boxed{<} \frac{4}{6}$

i. $\frac{2}{3} \boxed{<} \frac{1}{2}$

j. $\frac{1}{2} \boxed{<} \frac{5}{6}$

k. $\frac{11}{12} \boxed{<} \frac{2}{3}$

l. $\frac{10}{12} \boxed{<} \frac{2}{3}$

m. $\frac{1}{2} \boxed{<} \frac{1}{3}$

n. $\frac{10}{12} \boxed{<} \frac{1}{6}$

o. $\frac{1}{3} \boxed{<} \frac{5}{12}$

X

3. Complete the following:

a. One whole = $\frac{1}{2}$ +

d. One whole = $\frac{1}{3}$ +

b. One whole = $\frac{3}{6}$ +

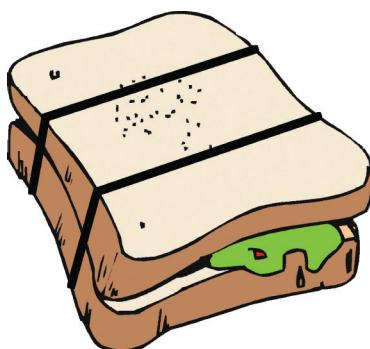

e. One whole = $\frac{5}{6}$ +

c. One whole = $\frac{6}{12}$ +

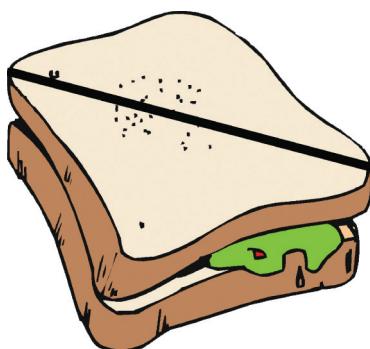

f. One whole = $\frac{5}{12}$ +

4. Write a word problem for each.

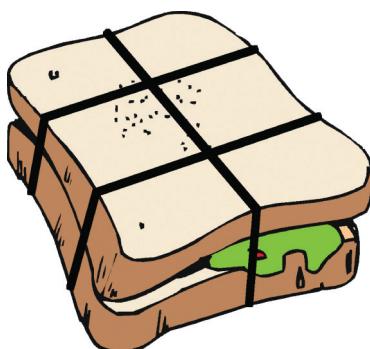

a.

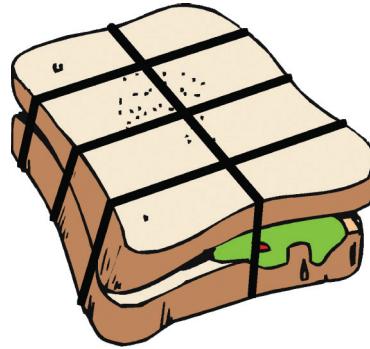

b.

c.

d.

Suraya made 12 samoosas.

Two-sixths of the samoosas were chicken.

How many chicken samoosas did Suraya make?

Make a drawing to help you to solve this.

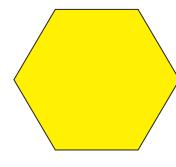

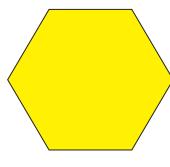

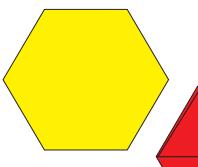

Fraction problems

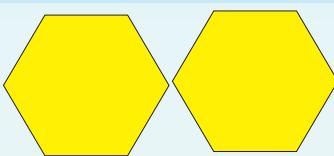

Sign:
Date:

Talk about these yellow whole hexagons and the fractions.

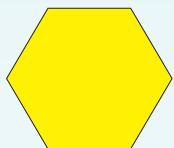

1. Answer the following questions. Use two

= 1 whole

a. The yellow hexagon

is which part of the whole?

b. The red trapezium

is which part of the whole?

c. The blue rhombus

is which part of the whole?

d. The green triangle

is which part of the whole?

2. Do these.

a. How many green triangles

are in one blue rhombus

b. How many green triangles

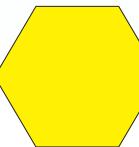

are in one red trapezium

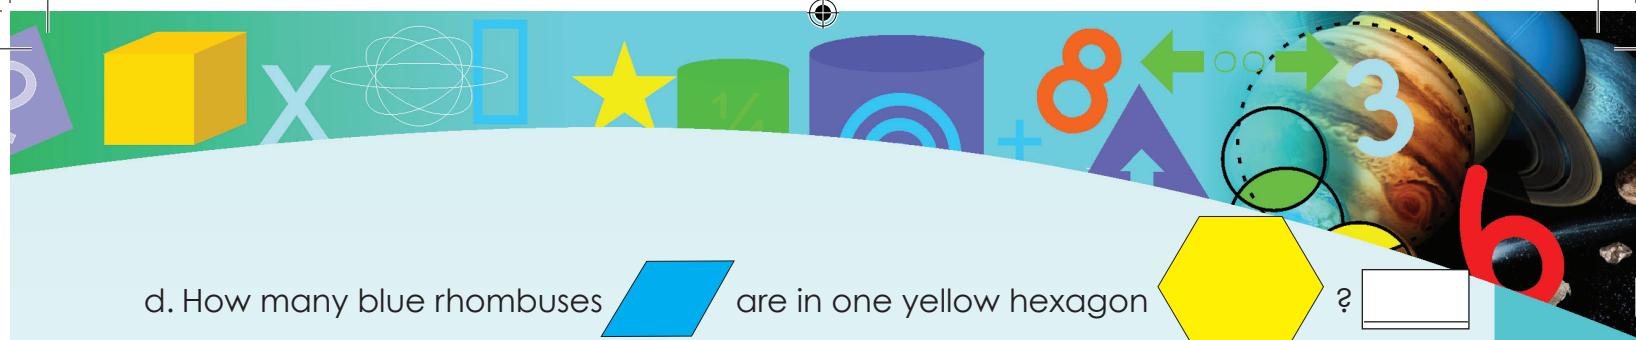

c. How many green triangles

are in one yellow hexagon

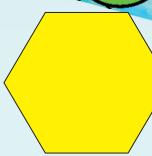

d. How many blue rhombuses are in one yellow hexagon?

are in one yellow hexagon

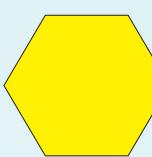

?

e. How many red trapezium are in one yellow hexagon?

are in one yellow hexagon

?

3. Complete the following by drawing shapes.

$$\text{Yellow Hexagon} = \text{Blue Rhombus} + \quad \quad \quad$$

$$\text{Yellow Hexagon} = \quad \quad \quad + \text{Red Trapezium}$$

$$\text{Yellow Hexagon} = \text{Red Trapezium} + \quad \quad \quad$$

$$\text{Yellow Hexagon} = \quad \quad \quad + \text{Green Triangle}$$

$$\text{Yellow Hexagon} = \text{Green Diamond} + \quad \quad \quad$$

$$\text{Yellow Hexagon} = \quad \quad \quad + \text{Blue Rhombus}$$

$$\text{Yellow Hexagon} = \quad \quad \quad + \text{Blue Rhombus}$$

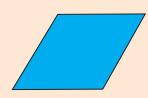

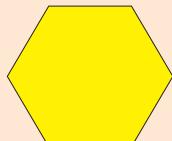

$$\text{Yellow Hexagon} = \quad \quad \quad + \text{Green Diamond}$$

$$\text{Yellow Hexagon} = \text{Green Triangle} + \quad \quad \quad$$

$$\text{Yellow Hexagon} = \quad \quad \quad + \text{Red Trapezium}$$

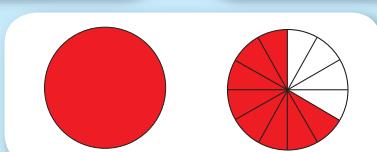

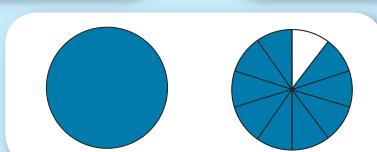

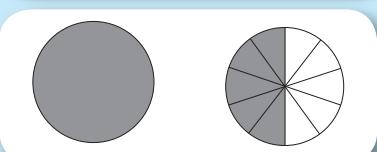

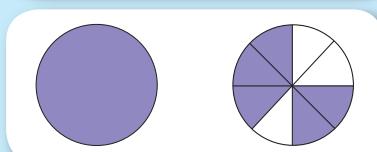

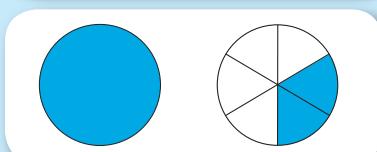

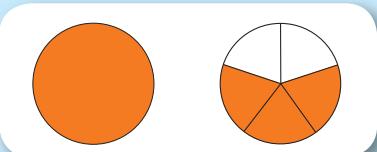

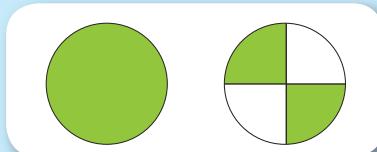

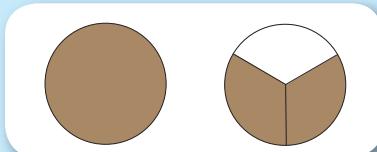

Make my own sums

Make five of your own fraction sums using the shapes on the left.

9

Look at the diagram. Make addition sums using the colour fraction circles?

1. Do these calculations. Use the diagram to help you.

a. = $\frac{1}{3}$ +

b. = $\frac{1}{4}$ + +

c. = $\frac{1}{5}$ + + +

d. = $\frac{1}{6}$ + +

e. = $\frac{1}{8}$ + + +

f. = $\frac{1}{9}$ + + +

g. = $\frac{1}{10}$ + + +

h. = $\frac{1}{12}$ + + + +

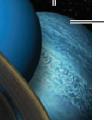

X

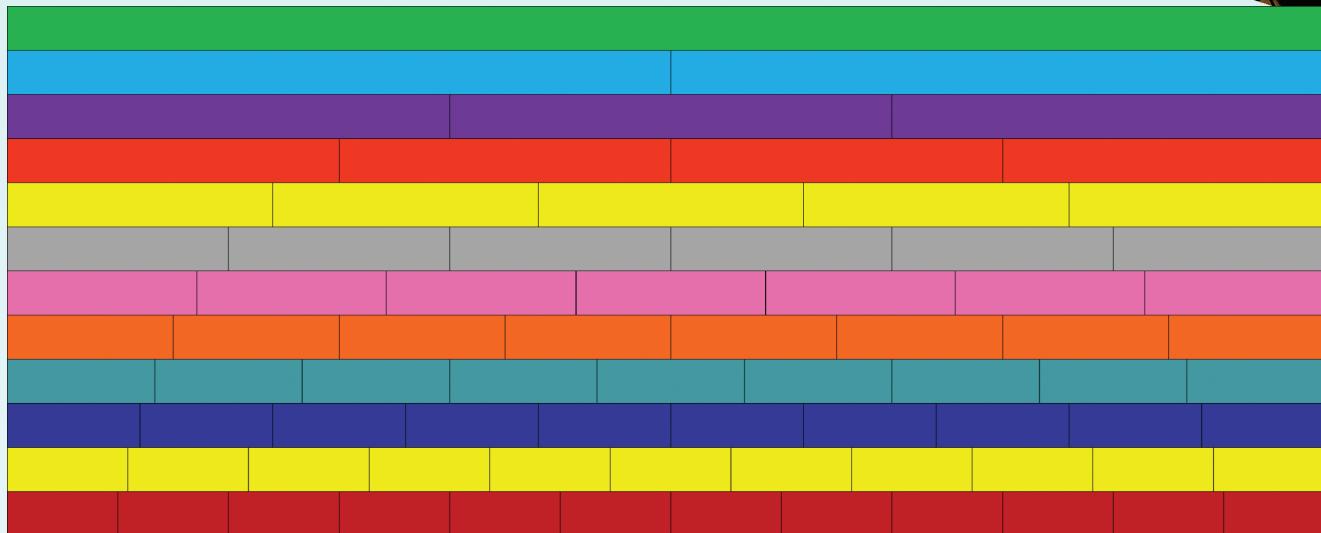

8 ← → 3

+ 6

2. Use the diagram to complete the sums.

a. $\frac{1}{4} + \frac{2}{4} = \boxed{\frac{3}{4}}$

b. $\frac{6}{10} + \frac{2}{10} = \boxed{}$

c. $\frac{7}{8} - \frac{3}{8} = \boxed{}$

d. $\frac{9}{12} - \frac{7}{12} = \boxed{}$

e. $\frac{4}{7} - \frac{3}{7} = \boxed{}$

f. $\frac{5}{11} + \frac{4}{11} = \boxed{}$

g. $\frac{8}{10} - \frac{6}{10} = \boxed{}$

h. $\frac{3}{6} + \frac{1}{6} = \boxed{}$

i. $\frac{1}{3} + \frac{1}{3} = \boxed{}$

j. $\frac{3}{12} + \frac{8}{12} = \boxed{}$

k. $\frac{11}{12} - \frac{8}{12} = \boxed{}$

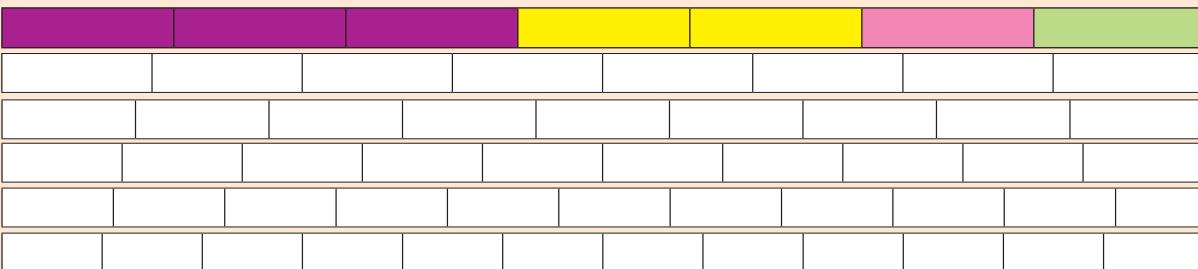

l. $\frac{6}{11} + \frac{3}{11} = \boxed{}$

3. At the party I ate $\frac{2}{12}$ of a pizza, my friend had $\frac{1}{12}$ and my big brother had $\frac{4}{12}$ of the same pizza. How much pizza did we eat altogether? Show your answer. Show your answer on a separate piece of paper.

Fraction sums

Colour each fraction strip in different colours. Ask a friend to write down the fractions each colour represents in the fraction strip. We coloured the first one for you.

Addition of mixed numbers

What is each picture telling you?

We say that
these are mixed
numbers.

Think carefully
with the next
two.

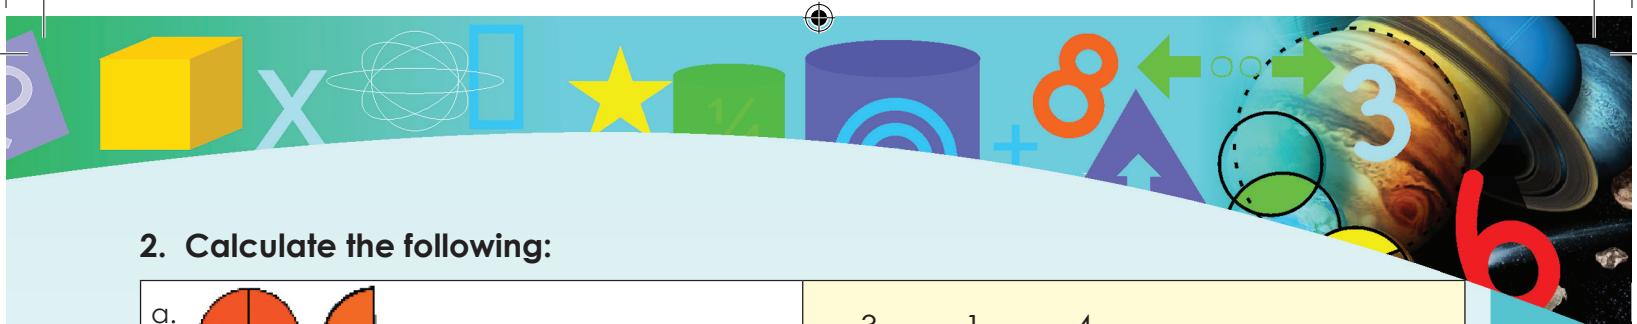

1. Write it as a mixed number:

Term 3

a.		$1 \frac{2}{5}$
b.		<input type="text"/>
c.		<input type="text"/>
d.		<input type="text"/>
e.		<input type="text"/>
f.		<input type="text"/>
g.		<input type="text"/>
h.		<input type="text"/>
i.		<input type="text"/>
j.		<input type="text"/>

12

2. Calculate the following:

a.		$1\frac{3}{5} + \frac{1}{5} = 1\frac{4}{5}$
b.		$1\frac{5}{8} + \frac{2}{8} =$
c.		$1\frac{3}{6} + \frac{1}{6} =$
d.		$1\frac{2}{4} + \frac{1}{4} =$
e.		$1\frac{3}{9} + \frac{4}{9} =$
f.		$1\frac{2}{12} + \frac{6}{12} =$
g.		$1\frac{2}{12} + \frac{4}{12} =$
h.		$2\frac{3}{8} + \frac{1}{8} =$
i.		$3\frac{2}{6} + \frac{3}{6} =$
j.		$3\frac{2}{8} + \frac{4}{8} =$

What does this mean?

Make a drawing to show this.

$1\frac{1}{2}$ glasses of water

$3\frac{1}{2}$ plates of food

$1\frac{3}{4}$ cakes

Sign: _____

Date: _____

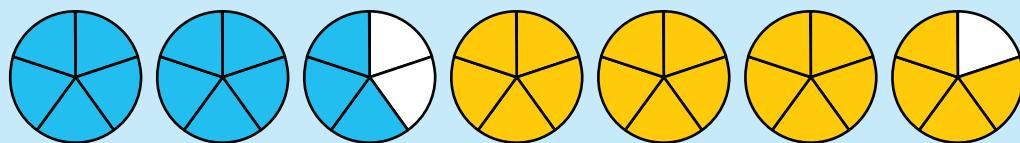

Addition and subtraction of mixed numbers

Term 3

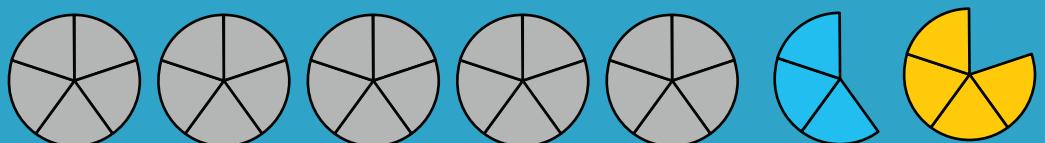

Look at the sum and the diagrams. Explain this in your own words.

Step 1

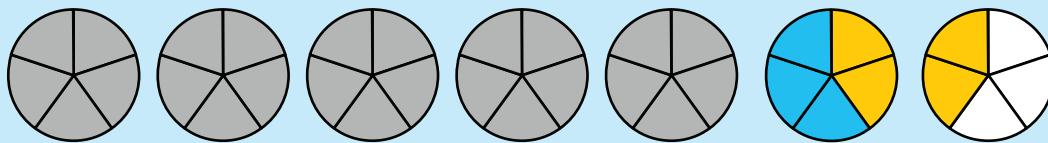

$$2 \frac{3}{5} + 3 \frac{4}{5}$$

**Step 2**

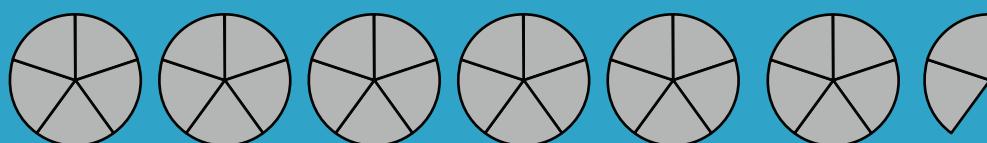

$$= 5 \frac{7}{5}$$

**Step 3**

$$5 + \frac{5}{5} + \frac{2}{5}$$

**Step 4**

$$= 6 \frac{2}{5}$$

1. Complete the following addition sums.

a. $\frac{3}{4} + \frac{1}{4} =$

b. $\frac{2}{5} + \frac{1}{5} =$

c. $\frac{4}{7} + \frac{1}{7} =$

d. $2 \frac{3}{8} + \frac{3}{8} =$

e. $1 \frac{2}{4} + \frac{1}{4} =$

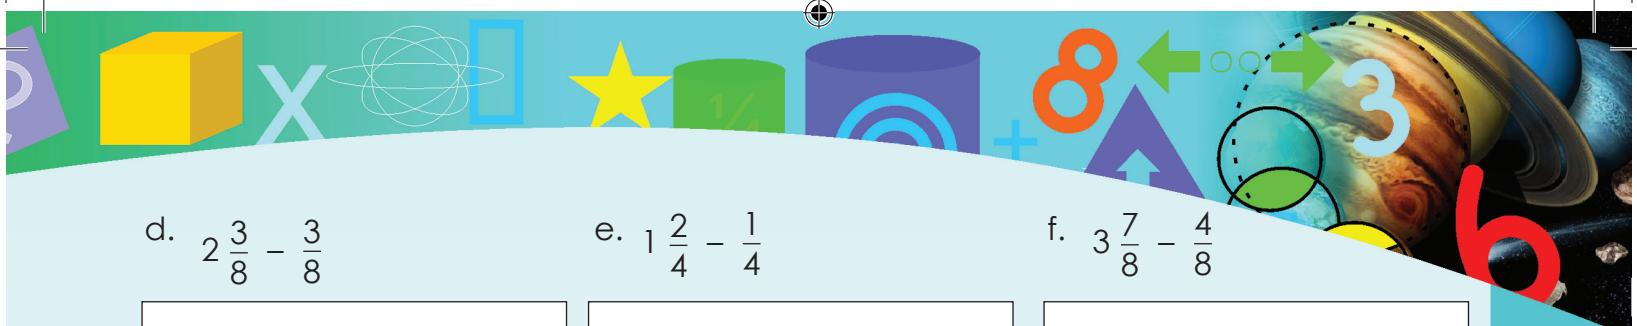

f. $4 \frac{1}{8} + \frac{4}{8} =$

2. Complete the following subtraction sums.

a. $\frac{3}{4} - \frac{1}{4} =$

b. $\frac{2}{5} - \frac{1}{5} =$

c. $\frac{4}{7} - \frac{1}{7} =$

d. $2\frac{3}{8} - \frac{3}{8}$

e. $1\frac{2}{4} - \frac{1}{4}$

f. $3\frac{7}{8} - \frac{4}{8}$

3. Complete the following sums and remember to show your calculations.

a. $1\frac{3}{4} + \frac{1}{4} =$

b. $3\frac{2}{5} + \frac{1}{5} =$

c. $5\frac{4}{7} + \frac{1}{7} =$

d. $2\frac{3}{8} + 4\frac{3}{8} =$

e. $2\frac{2}{4} - 1\frac{1}{4} =$

f. $4\frac{1}{8} + 4\frac{4}{8} =$

g. $7\frac{3}{8} - 2\frac{3}{8} =$

h. $9\frac{2}{4} + 1\frac{1}{4} =$

i. $3\frac{1}{8} - 3\frac{4}{8} =$

4. Complete the following story sums.

a. Father brings home $5\frac{3}{8}$ chocolate from work. If Mother eats $2\frac{1}{8}$, how much is left for me?

b. John buys 3 cakes. He and his friends eat $2\frac{1}{8}$. How much is left over?

c. Sipho has 6 oranges. His family eats $2\frac{1}{6}$. How much is left over?

a.

b.

c.

Reading fractions

Bongi enjoys reading. She has read $\frac{3}{4}$ of a 120-page book. How many pages of the book does she still have to read?

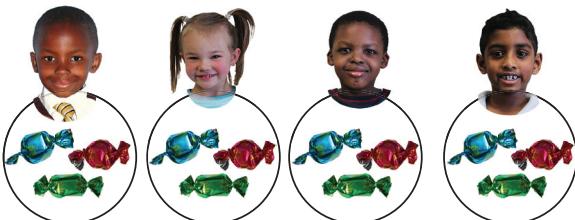

Discuss the following:

Divide 12 sweets between 3 learners.

- What fraction did each one get? $\frac{1}{3}$
- How many sweets did each learner get?

Divide 12 sweets between 4 learners.

- What fraction did each one get? $\frac{1}{4}$
- How many sweets did each learner get?

1. Write a fraction number sentence for each.

Example 1:

- If we divide 12 **sweets** between 3 learners, each one gets 4 sweets.
- This means that each learner gets $\frac{1}{3}$.
- $\frac{1}{3}$ of 12 sweets equals 4.
- We write it as a number sentence:
 $\frac{1}{3}$ of 12 = 4

Example 2:

- If we divide 12 **sweets** between 4 learners, each one gets 3 sweets.
- This means that each learner gets $\frac{1}{4}$.
- $\frac{1}{4}$ of 12 sweets equals 3.
- We write it as a number sentence:
 $\frac{1}{4}$ of 12 = 3

a. If we divide 24 marbles between 3 children, each one will get 8 marbles.

b. If we divide 45 cards between 5 children, each one will get 9 cards.

c. If we divide 35 counters between 7 children, each one will get 5 counters.

d. If we divide 32 sweets between 4 children, each one will get 8 sweets.

e. If we divide 63 blocks between 7 children, each one will get 9 blocks.

f. If we divide 72 coins between 6 children, each one will get 12 coins.

X

8

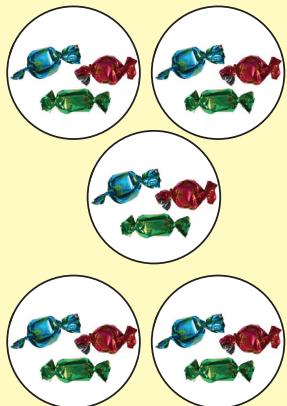

3

6

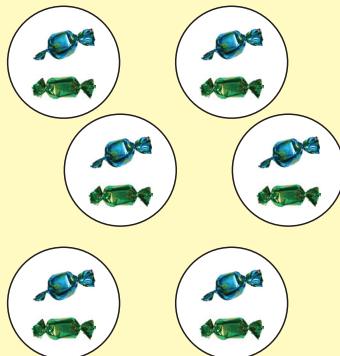

2. Solve the following. Show a drawing for each.

Example 1:

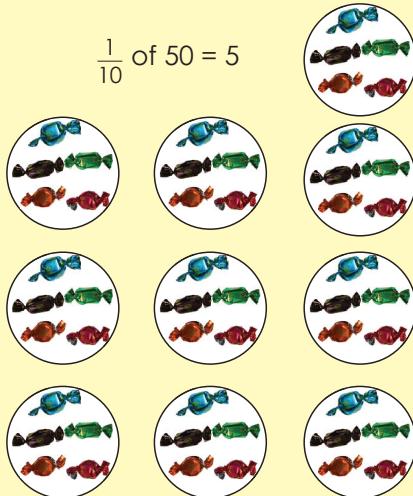

$$\frac{1}{5} \text{ of } 15 = 3$$

$$\frac{1}{6} \text{ of } 12 = 2$$

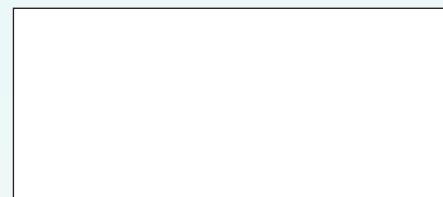

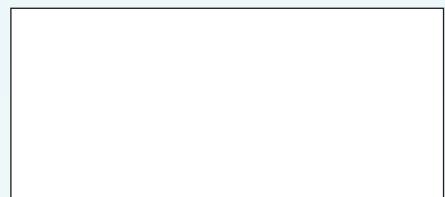

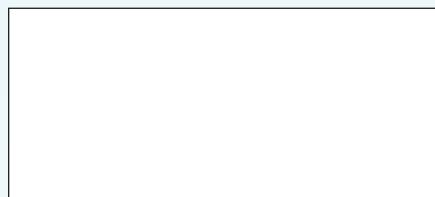

$$\frac{1}{10} \text{ of } 50 = 5$$

a. $\frac{1}{3}$ of 24 =

b. $\frac{1}{11}$ of 44 =

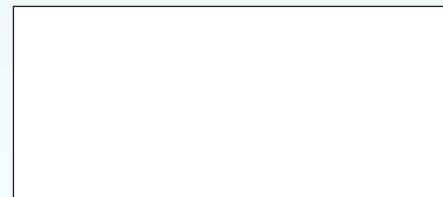

c. $\frac{1}{7}$ of 63 =

d. $\frac{1}{4}$ of 40 =

e. $\frac{1}{7}$ of 77 =

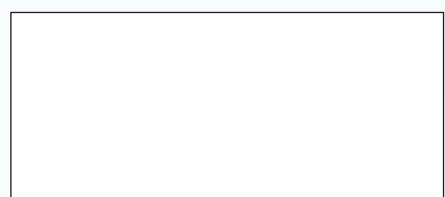

f. $\frac{1}{4}$ of 48 =

g. $\frac{1}{10}$ of 100 =

h. $\frac{1}{6}$ of 24 =

i. $\frac{1}{9}$ of 54 =

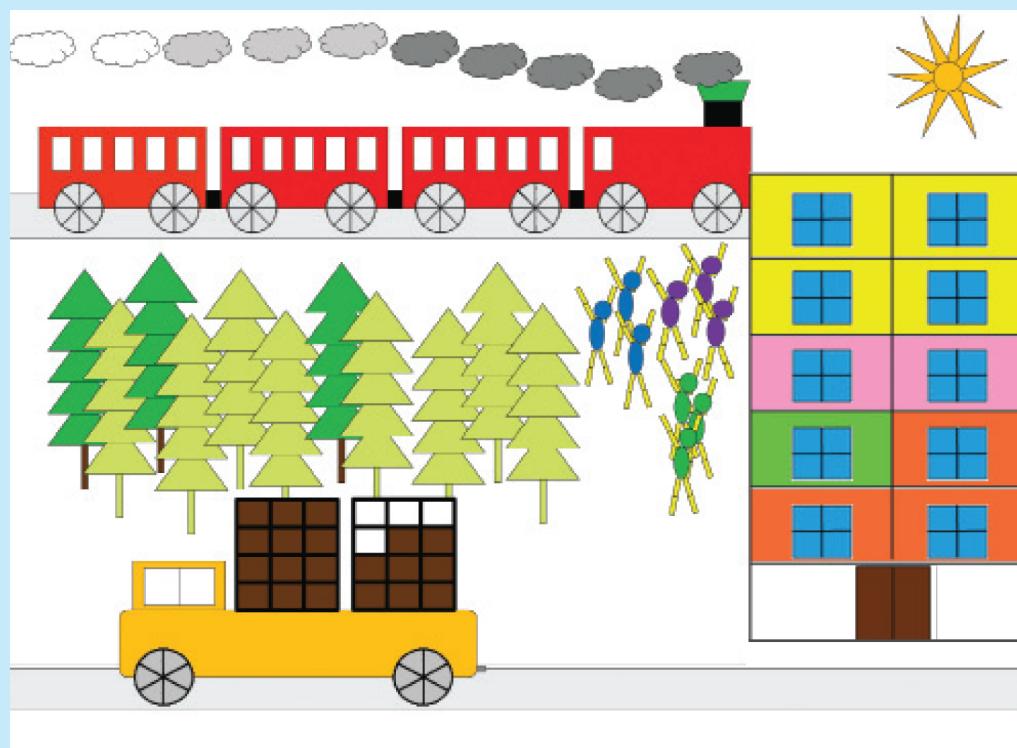

Sweet fractions

My mother buys a big bag of Fizzers with 144 sweets inside. My brother and 11 friends share the bag between them. How many will each child receive? What fraction of the fizzers will each child get?

Sign:

Date:

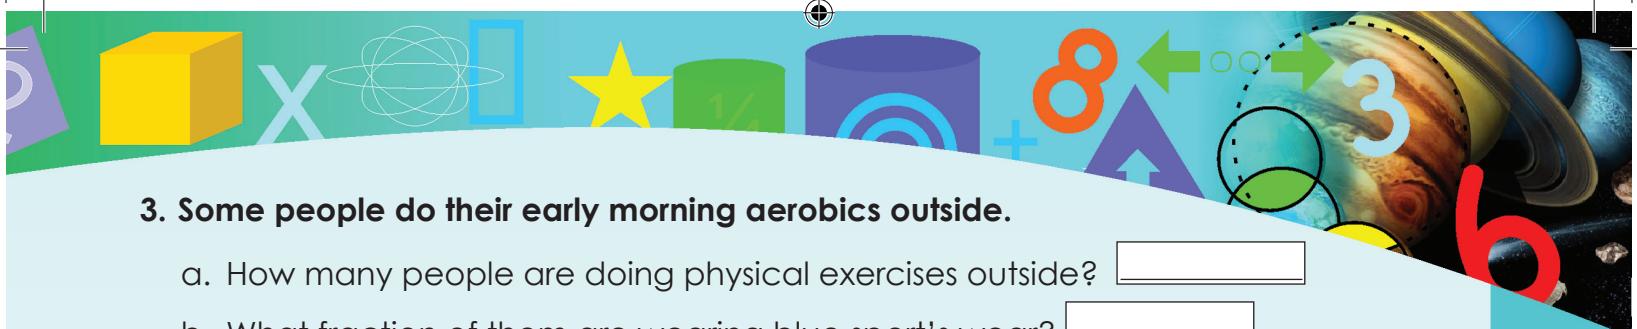

1. Use the picture above to answer the questions.

- What fraction of the trees are light green?
- What fraction of the trees are dark green?
- Write a fraction sum for the trees
- The forestry department planted one more dark green tree. What fraction of the trees are now dark green? light green?
- Two light green trees died. What fraction of the trees are now dark green? light green?

2. Use the picture above to answer the questions.

- How many big containers are on the truck?
- Each container is filled with small boxes.
How many small boxes are in the first container?
How many small boxes are in the second container?
Write it as a fraction of the second container.
- Another 6 small boxes are to be loaded onto the truck.
Write it as a fraction of all the small boxes now on the truck.

3. Some people do their early morning aerobics outside.

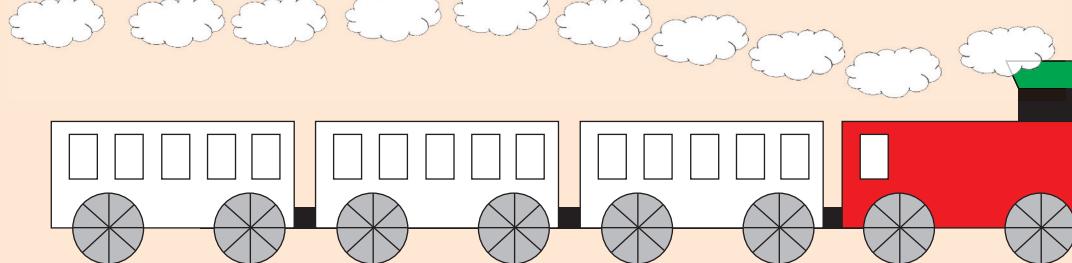

- How many people are doing physical exercises outside?
- What fraction of them are wearing blue sport's wear?
- What fraction of them are wearing purple sport's wear?
- What fraction of them are wearing green sport's wear?
- Write a fraction sum for the clothing of all the people doing exercises.

4. Look at the building. Answer the questions.

- What fraction of the building is yellow? pink?
orange? green?
- Write a fraction sum to show the colours of the building.
- What fraction of the building has windows?
- What fraction of the building has a door?
- Complete the table below:

Fraction of building	$\frac{1}{12}$	$\frac{2}{12}$	$\frac{3}{12}$	$\frac{4}{12}$	$\frac{5}{12}$	$\frac{6}{12}$	$\frac{7}{12}$	$\frac{8}{12}$	$\frac{9}{12}$	$\frac{10}{12}$
Windows panes	4									

My own questions

Look at the picture of the train. Colour the carriages and then write your own fraction question. Remember it should be different from the questions in the worksheet.

Measuring and recording mass

What would you weigh with the following measuring instruments? Give three examples.

1. Would you weigh the following in grams or kilograms?

a. A dog:

b. Sugar for baking a cake:

c. A paper clip:

d. Your friend:

2. Give three examples of each: Something that weighs:

a. between 1 kg and 2 kg

b. less than 1 kg but more than 500 g

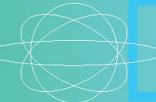

c. more than 1,5 kg but less than 2 kg

d. less than 5 000 g but more than 2 kg

e. between 2 500 g and 3 kg

X

3

6

3. Fill in the intervals on these two 10 kg scales.

4. Complete the intervals on these 10 kg scales. How much do the objects weigh?

5. Calculate the total mass of all the objects.

Remember to add
the grams first and
then the kilograms.

Magazines and newspapers

Find items advertised for sale between R20 000 and R50 000.

Paste three examples here.

Rounding off

What would you rather say?

My mother is going to purchase lounge suite for **R11 835**.

My mom is going to purchase a lounge suite for **R12 000**.

My brother is going to buy a flat screen television for **R10 250**.

My brother is going to buy a flat screen for **R10 000**.

The truck transported **14 772** potatoes.

The truck transported **15 000** potatoes.

1. Between what two ten-thousands do the following numbers lie:

- | | | |
|-----------|-------------------------------------|-------------------------------------|
| a. 14 789 | <input type="text" value="14 000"/> | <input type="text" value="15 000"/> |
| c. 12 234 | <input type="text"/> | <input type="text"/> |
| e. 17 578 | <input type="text"/> | <input type="text"/> |
| g. 11 943 | <input type="text"/> | <input type="text"/> |
| i. 10 178 | <input type="text"/> | <input type="text"/> |

- | | | |
|-----------|----------------------|----------------------|
| b. 13 472 | <input type="text"/> | <input type="text"/> |
| d. 15 893 | <input type="text"/> | <input type="text"/> |
| f. 16 178 | <input type="text"/> | <input type="text"/> |
| h. 18 389 | <input type="text"/> | <input type="text"/> |

2. Give any number between

- | | |
|----------------------|----------------------|
| a. 20 000 and 30 000 | <input type="text"/> |
| b. 30 000 and 40 000 | <input type="text"/> |
| c. 10 000 and 20 000 | <input type="text"/> |
| d. 40 000 and 50 000 | <input type="text"/> |

3. Go back to the numbers you wrote in question 2. Underline the ten thousand that is closest to your answer. Example:

20 000 and 30 000 **20 387**

X

4. Round off to the nearest 10. Circle the digits which you look at when deciding whether to round up or down to the nearest 10. Complete the sentences.

- 44 321 is between 44 320 and 44 330 and would be rounded to 44 320.
- 23 548 is between and and would be rounded to .
- 16 648 is between and and would be rounded to .
- 33 339 is between and and would be rounded to .
- 49 999 is between and and would be rounded to .

5. Round off to the nearest 100. Circle the digits which you look at when deciding whether to round up or down to the nearest 100. Complete the sentences.

- 13 548 is between 13 500 and 13 600 and would be rounded to 13 500.
- 20 488 is between and and would be rounded to .
- 34 078 is between and and would be rounded to .
- 39 529 is between and and would be rounded to .
- 29 956 is between and and would be rounded to .

6. Round off to the nearest 1 000. Circle the digits which you look at when deciding whether to round up or down to the nearest 1 000. Complete the sentences.

- 11 781 is between 11 000 and 12 000 and would be rounded to 12 000.
- 18 945 is between and and would be rounded to .
- 20 378 is between and and would be rounded to .
- 31 069 is between and and would be rounded to .
- 49 500 is between and and would be rounded to .

Help a friend

Big numbers with meaning

Find five 5-digit numbers in a newspaper or magazine. What do each of these numbers mean?

What would happen if you removed that number from the text in the magazine or newspaper?

Addition and subtraction

Term 3

What is the difference between the numbers? Count forwards.

10 000	20 000	30 000	40 000	50 000
6 700	16 700	26 700	36 700	46 700
33 500	34 500	35 500	36 500	37 500
5 666	15 666	25 666	35 666	45 666
9 999	10 099	10 199	10 299	10 399

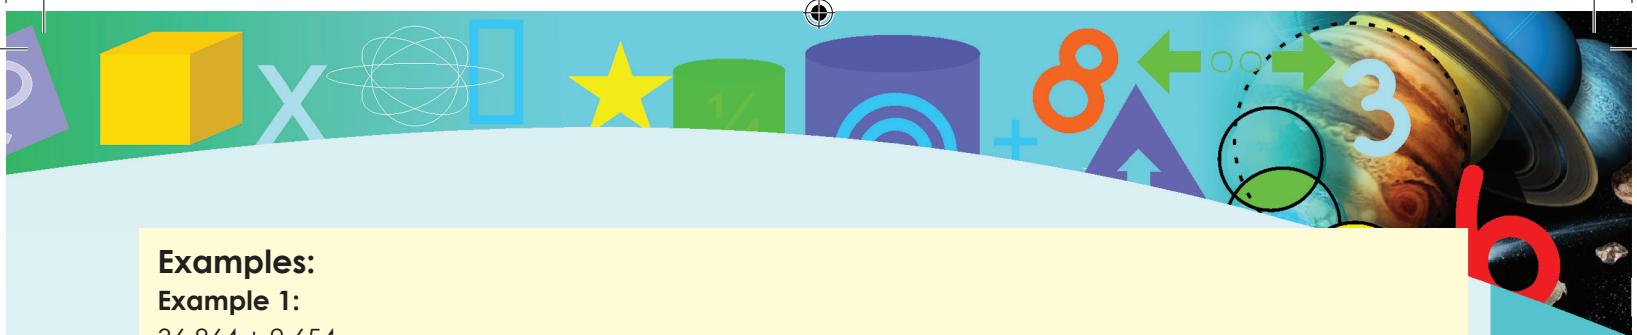

What is the difference between the numbers? Count backwards.

1. What number comes next?

- 12 000, 22 000, 32 000, _____
- 14 500, 15 500, 16 500, _____
- 16 666, 26 666, 36 666, _____
- 19 620, 20 620, 21 620, _____

2. Complete the table: Add to or subtract from the given number.

Number	Add 1 000	Subtract 1 000	Add 10 000	Subtract 10 000
13 254				
18 654				
26 847				
34 518				
37 777				

Examples:

Example 1:

$$\begin{aligned}
 36\,864 + 9\,654 &= 30\,000 + 6\,000 + 9\,000 + 800 + 600 + 60 + 50 + 4 + 4 \\
 &= 30\,000 + 15\,000 + 1\,400 + 110 + 8 \\
 &= 30\,000 + 10\,000 + 5\,000 + 1\,000 + 400 + 100 + 10 + 8 \\
 &= 40\,000 + 6\,000 + 500 + 10 + 8 \\
 &= 46\,518
 \end{aligned}$$

Example 2:

$$\begin{array}{r}
 & 3 & 6 & 8 & 6 & 4 \\
 + & 9 & 6 & 5 & 4 \\
 \hline
 & 8 & & & & (4+4) \\
 & 1 & 1 & 0 & & (60+50) \\
 & 1 & 4 & 0 & 0 & (800+600) \\

Solving money problems with a budget

Can you remember what a budget is? Use the words to describe it.

plan

money

spending

Term 3

1. How much money do I have? if _____

- a. I had R95,20. I spend R42,30. I earn R36,50.
- b. I had R75,60. I spend R69,30. I earn R44,20.
- c. I had R100,75. I spend R37,25. I earn R46,15.
- d. I had R97,65. I spend R89,75. I earn R43,95.
- e. I had R195,25. I spend R108,98. I earn R58,99

2. Complete these flow diagrams. Replace the "I spend" block with the amount in the matching coloured block at the top.

R300

R200

R5 000

R2 500

X

1/4

8

6

3. Mbali earns pocket money once a month. Her parents encourage her to keep a budget.

The money we get is called income.

The money we spend is called expenditure.

Oct	Money I get	Money I spend	Money left
5	Pocket money R150,00		R150,00
8		Book R45	R105,00
14	Extra chores R25,00		R130,00
22	Birthday present R55,00		R185,00
25		Hamburger R28	R157,00
26	Extra chores R25,00		R182,00
28		DVD on special R55,00	R127,00
29		Gift for friend R65,50	R61,50

- What was Mbali's income on the 5th of October?
- What was Mbali's expenditure on the 8th of October?
How much money does she have left on that day?
- On the 8th of October Mbali had R105,00 left.
Why does she have R130,00 left on the 14th of October?
- On the 14th of October Mbali had R130,00 left. On the 26th of October Mbali had R182,00 left.
What happened?
- Write down all the income and expenditure Mbali had for the month of October.

Income	Expenditure

Budget

Draw up your own budget. It can be real or you can make up one.

Using the vertical column method to add

$$\begin{array}{r}
 1 \\
 2 \quad 5 \\
 + \quad 1 \quad 7 \\
 \hline
 4 \quad 2
 \end{array}$$

- Add the units (5 and 7) first.
- Note how we split the 12 (5 + 7) into 1 ten and 2 units.
- We then write the 1 ten at the top of the tens column.
- Add up the tens.

Rather than say 'carry over 1' (which does not help us to understand place value) we should say 'write the ten at the top of the tens column'.

Term 3

1. How fast can you calculate the following using the column method?

a. $73 + 19 =$

b. $63 + 28 =$

c. $53 + 29 =$

2. Calculate the following.:

Example:

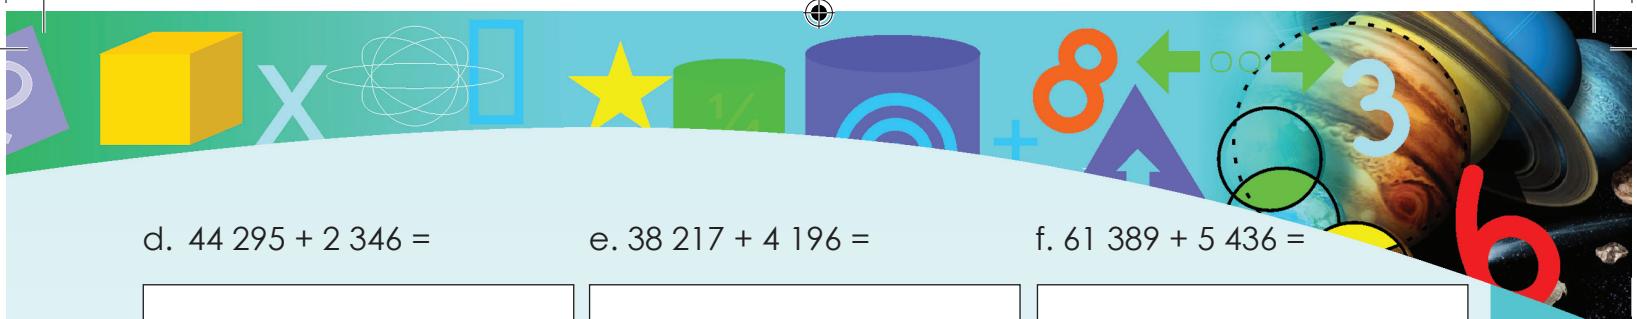

$$\begin{array}{r}
 & 1 & 1 \\
 5 & 6 & 4 & 8 & 3 \\
 + & 1 & 2 & 3 & 9 \\
 \hline
 5 & 7 & 7 & 2 & 2
 \end{array}$$

- Add the units first.
- We split the 12 (3 + 9) into 1 ten and 2 units.
- We then write the 1 ten at the top of the tens column.
- Add up the tens.
- We then split 120 (80 + 30 + 10) into 1 hundred and 2 tens.
- Add up the hundreds.
- Add up the thousands.
- Add up the ten thousands.

a. $95\ 312 + 2\ 346 =$

b. $47\ 264 + 1\ 428 =$

c. $45\ 224 + 3\ 896 =$

d. $44\ 295 + 2\ 346 =$

e. $38\ 217 + 4\ 196 =$

f. $61\ 389 + 5\ 436 =$

3. Calculate the following:

a. $87\ 125 + 14\ 997 =$

b. $23\ 238 + 57\ 986 =$

c. $23\ 476 + 87\ 895 =$

4. Calculate the following:

a. Find the sum of 23 624 and 19 999.

b. Add these two numbers using two different methods: $43\ 852 + 19\ 620 =$

Vehicle sums

My father buys a second-hand car for R64 540 and a motor cycle for R21 350. How much did he pay for the two vehicles?

Using the vertical column method to subtract

$$\begin{array}{r}
 5 & 10 \\
 \cancel{6} & 5 \\
 - & 2 \quad 7 \\
 \hline
 3 & 8
 \end{array}$$

- Subtract the units (5 and 7) first.
- Take note of how we break down the 60 into $50 + 10$. We then add the 10 to the 5; that gives us 15.
- Now we can subtract the units.
- Subtract the tens.

Take note that saying 'carry over 1' does not help us to understand place value. Rather say 'We write the 10 at the top of the units column'.

1. How fast can you calculate the following using the column method?

a. $96 - 48$

b. $83 - 25$

c. $94 - 46$

2. Calculate the following:

Example:

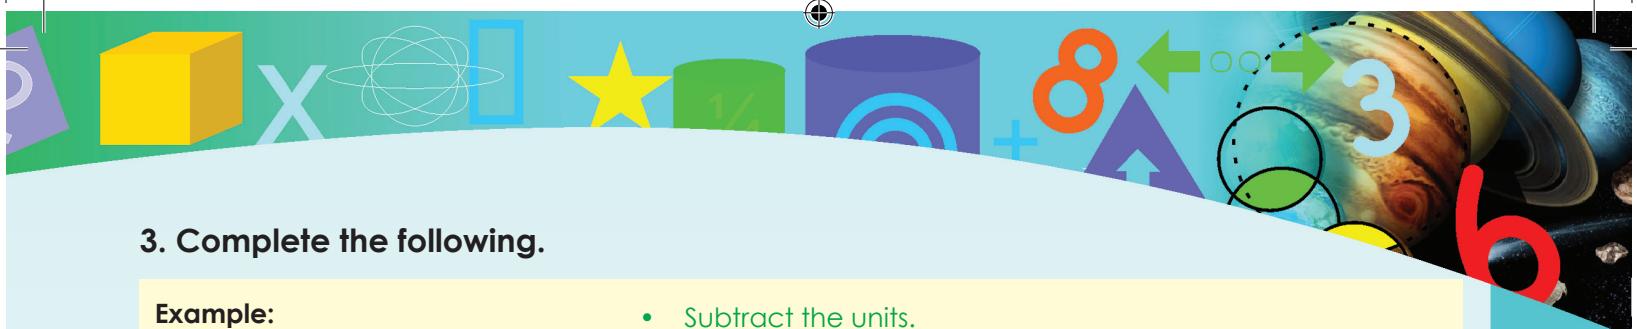

$$\begin{array}{r}
 2 \quad 5 \quad 7 \quad 4 \quad 6 \\
 - \quad 1 \quad 4 \quad 5 \quad 3 \quad 2 \\
 \hline
 1 \quad 1 \quad 2 \quad 1 \quad 4
 \end{array}$$

- Subtract the units, then
- subtract the tens, then
- subtract the hundreds, then
- subtract the thousands, then
- subtract the ten thousands.

a. $90\ 237 - 34\ 012$

b. $59\ 429 - 26\ 213$

c. $65\ 515 - 23\ 204$

3. Complete the following.

Example:

$$\begin{array}{r} & 3 & 10 \\ 2 & 5 & 7 & \cancel{4} & 6 \\ - & 1 & 4 & 5 & \cancel{3} & 8 \\ \hline 1 & 1 & 2 & 0 & 8 \end{array}$$

- Subtract the units.
- Note how we break down the 40 into 30 + 10. We then add the 10 to the 6; that gives us 16.
- Now we can subtract the units.
- Subtract the tens.
- Subtract the hundreds, thousands and ten thousands.

a. $95\ 242 - 42\ 135$

b. $62\ 363 - 21\ 057$

c. $86\ 843 - 41\ 028$

4. Complete the following.

Example:

$$\begin{array}{r} & 4 & 10 & 3 & 10 \\ 2 & \cancel{5} & 7 & \cancel{4} & 6 \\ - & 1 & 2 & 9 & \cancel{3} & 8 \\ \hline 1 & 2 & 8 & 0 & 8 \end{array}$$

a. $41\ 483 - 10\ 295$

b. $81\ 536 - 30\ 269$

c. $52\ 262 - 20\ 178$

5. Test your answers in question 4 using addition. You will need extra paper to do this activity.

The cost of university

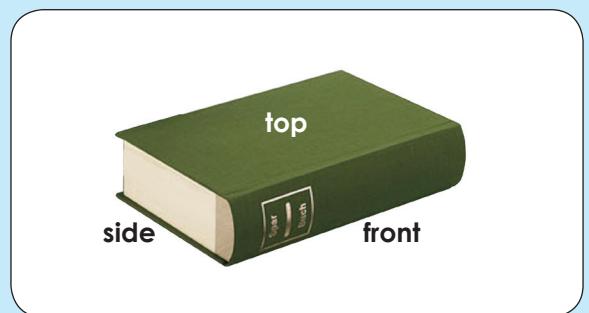

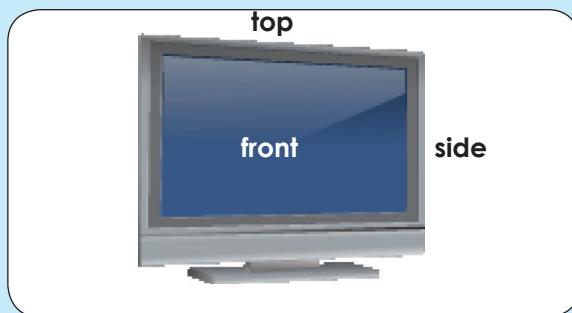

My father paid R36 780 for my brother to study at the university this year. The cost next year will rise to R42 990. How much extra would my father pay for my brother next year?

Here are the six faces of a cube:

Here are three views of the cube:

Can you deduce where the faces are in relation to each other and record them on the net of the cube?

1. Complete the table by drawing the side, front and top views of the blocks.

Term 3

Picture	Side view	Front view	Top view

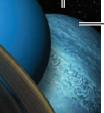

X

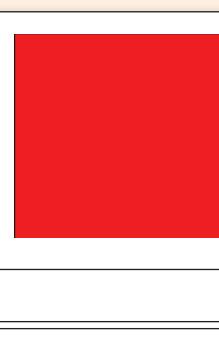

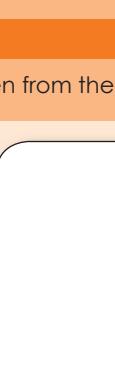

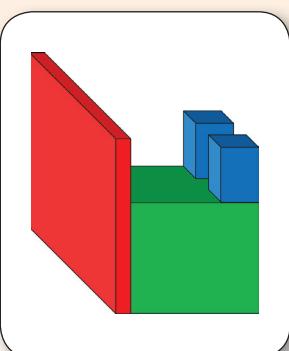

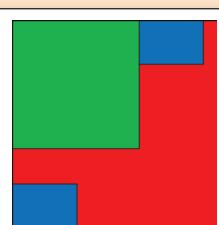

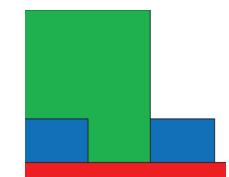

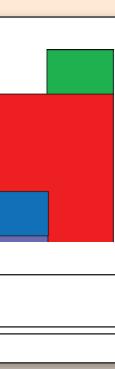

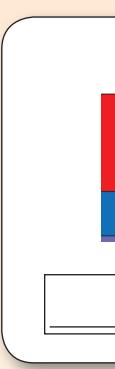

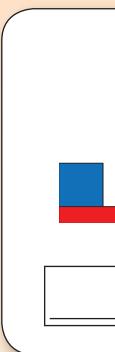

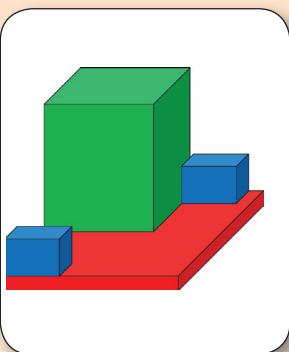

8 ← → 3

+ 6

2. Name the following views:

Views

Find a picture in a magazine that is taken from the:

Front view

Top view

Side view

Straight sides:

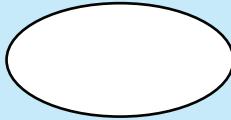

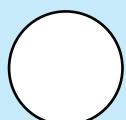

What type of sides will the following shapes have?

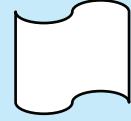

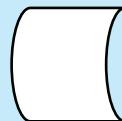

- A triangle
- A square
- A rectangle
- A pentagon
- A hexagon

Tri-angle:	Tri - 3
Quad-rilateral:	Quad - 4
Pent-agon:	Pent - 5
Hex-agon:	Hex - 6
Hept-agon:	Hept - 7
Oct-agon:	Oct - 8

Curved sides:

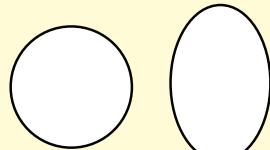

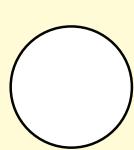

Straight and curved sides:

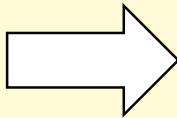

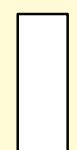

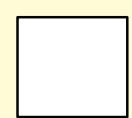

Example of closed shapes with curved and straight sides.

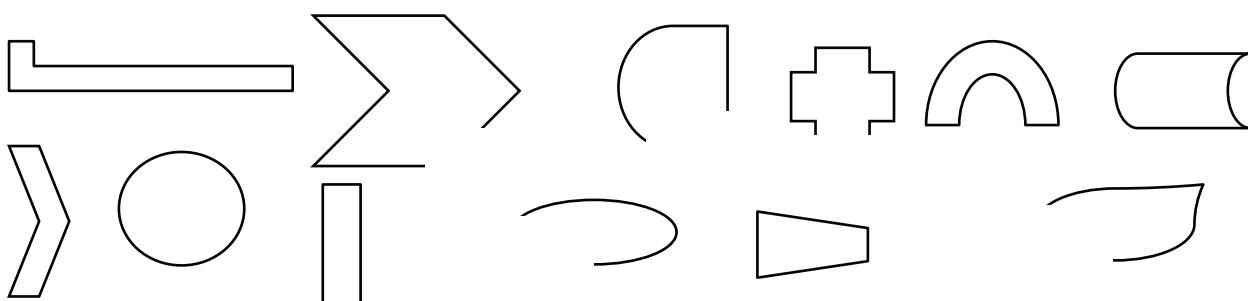

Curved sides

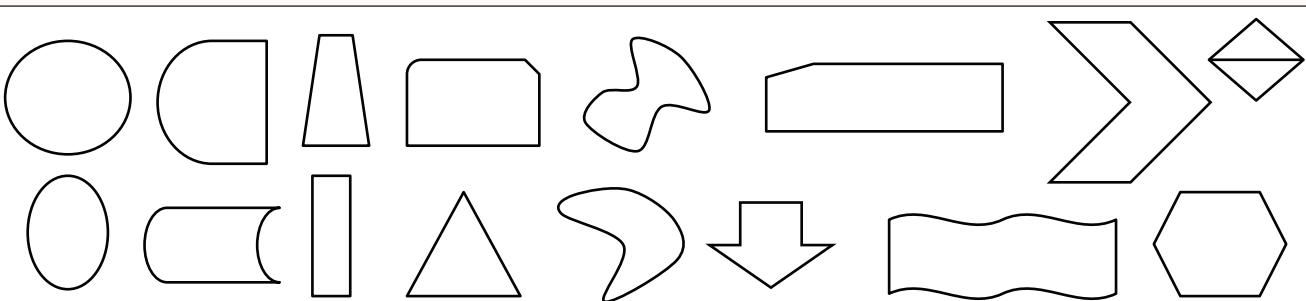

Straight sides

1. Colour in the closed shapes.

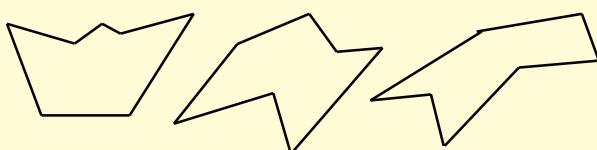

2. Colour in the shapes with straight sides only.

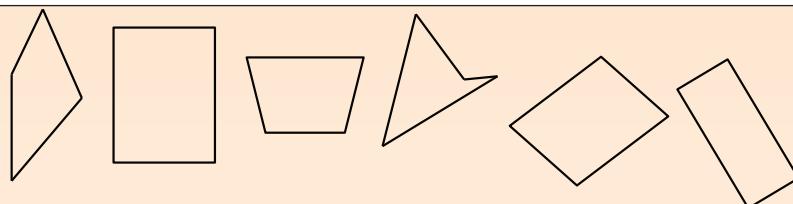

3. These are all closed 2-D shapes. What are their names and why do they have those names?

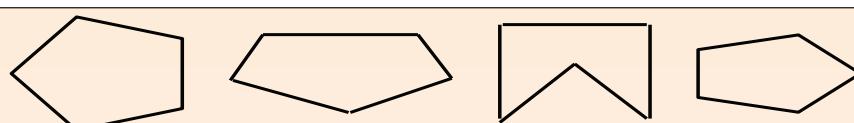

a. Heptagons because they have seven straight sides.

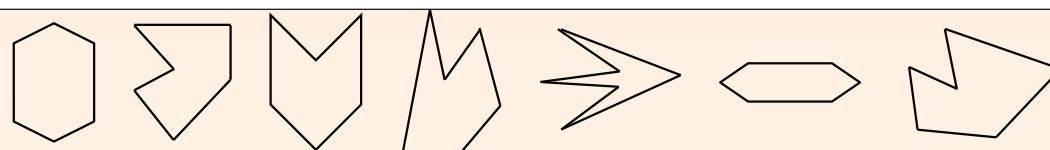

b.

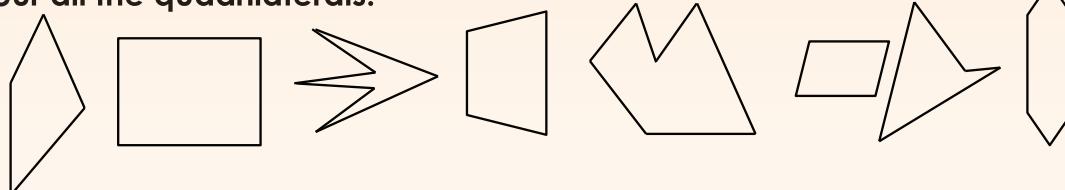

c.

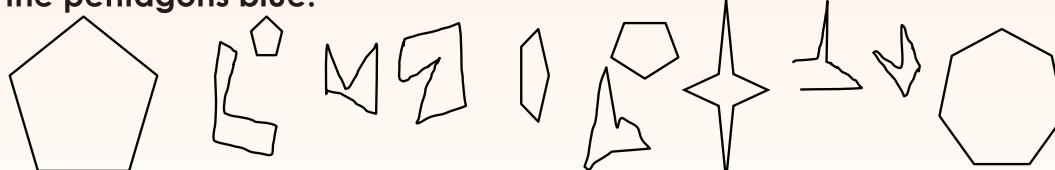

d.

3. Colour all the quadrilaterals.

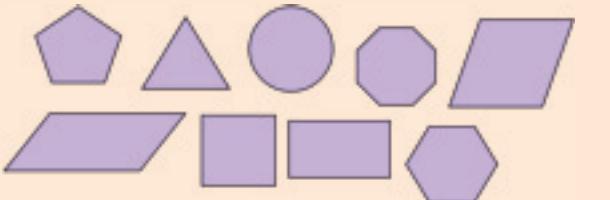

4. Colour the pentagons blue.

Special shapes

Name the shapes below which are quadrilaterals and have special names. If they are quadrilaterals which do not have special names just write "Quad" under it.

Right angles

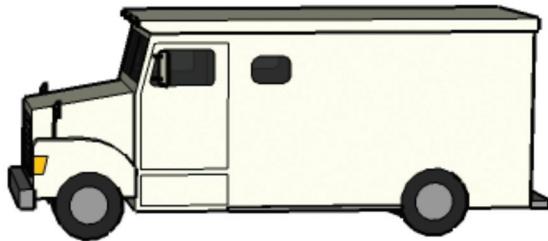

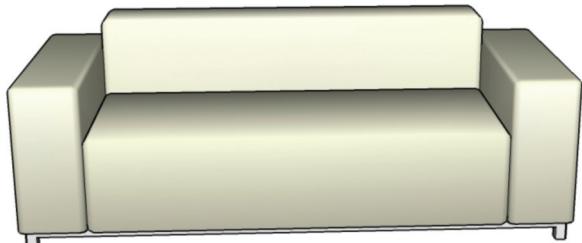

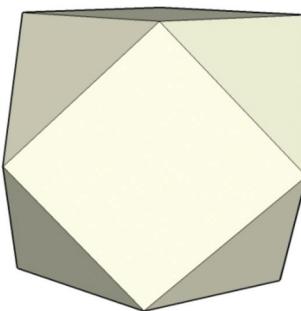

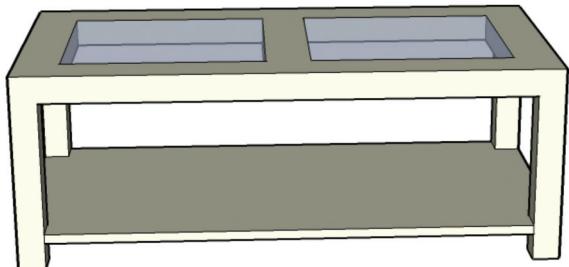

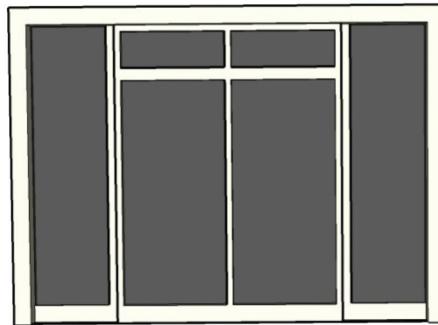

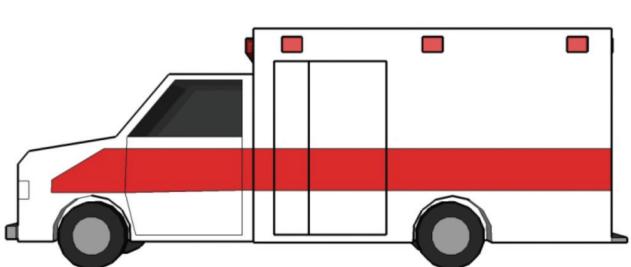

Identify all the things in the picture that look like this:

We say that
the angles are
right angles.

1. Identify and mark as many right angles as possible in the pictures below.

56

X

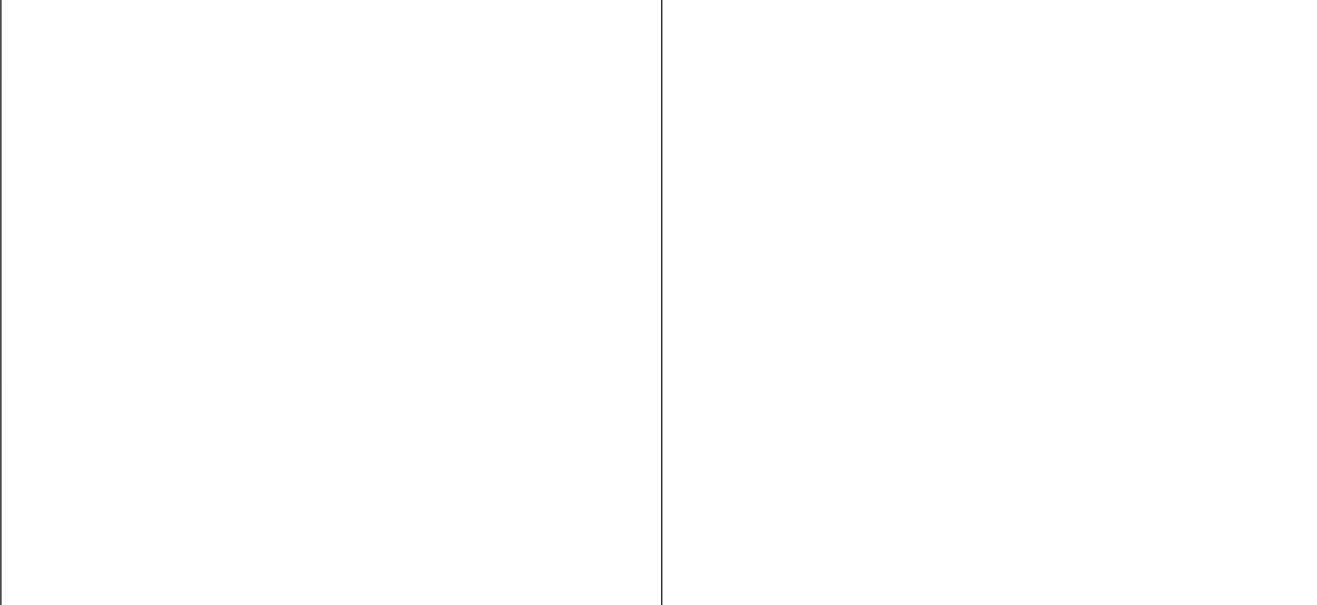

8 ← →

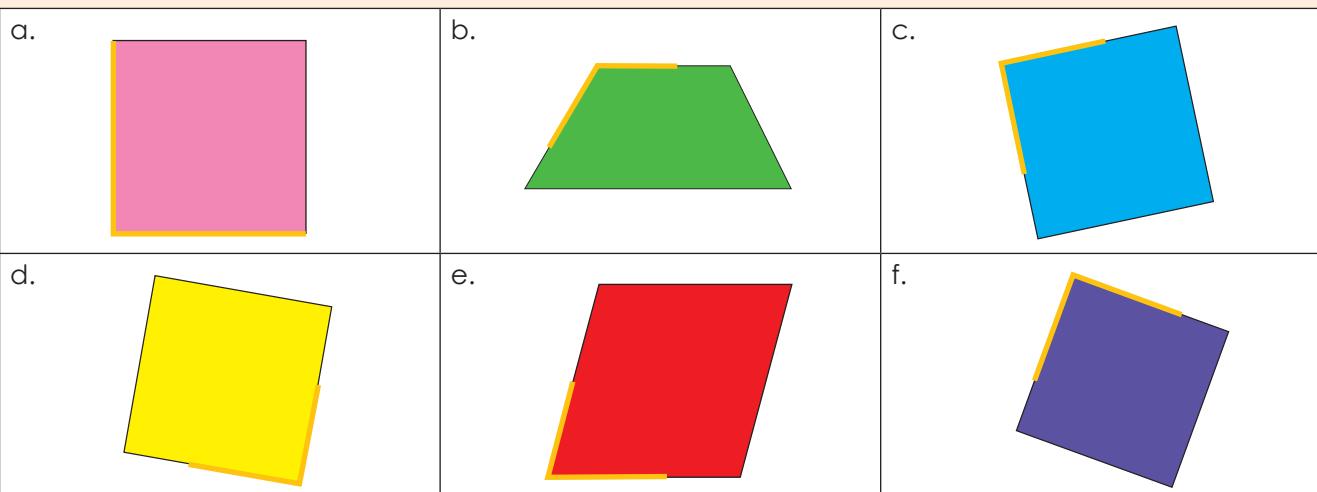

3

2. Find pictures in magazines or newspapers, and identify the right angles in them.

3. Say if the angles are right angles or not.

I am a car designer.

Draw a picture of a motor car on grid paper mainly with right angles.
Does it look like a modern car or a car from the past? Why do you say so?

More right angles

2

Term 3

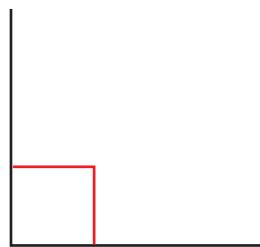

A right angle is also called a 90 degree angle.

When we say 90 degrees we can write it as 90° .

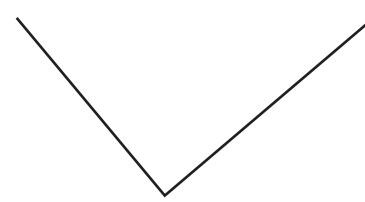

So the little symbol $^\circ$ means degrees.

We also have a symbol to show it is a 90 degrees angle.

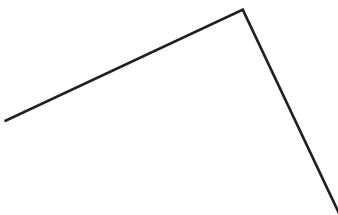

1. Show which is the right angle and write its size in degrees.

a. 90° 

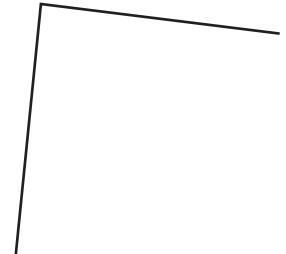

b. _____

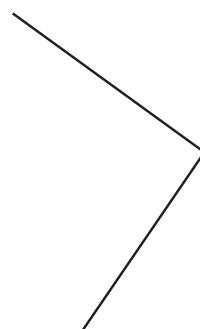

c. _____

d. _____

e. _____

f. _____

X

8

3

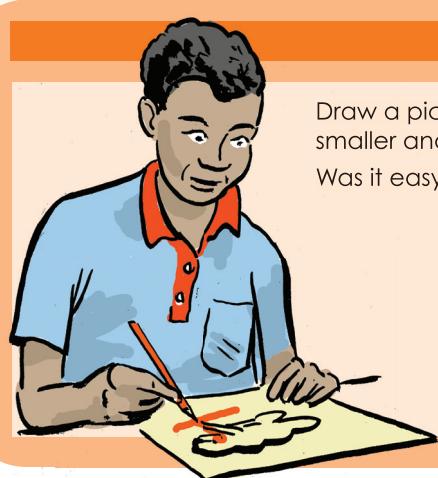

2. Draw four different right angles.

a.	b.
c.	d.

3. Use 90° angles to help you to draw animals. We did the first one for you.

a. 	b.	c.
d.	e.	f.

I am an architect.

Draw a picture of a building on grid paper using right angles and angles smaller and greater than right angles.

Was it easy or difficult? Why or why not?

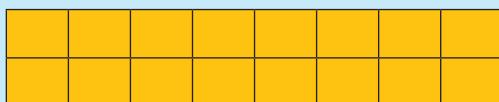

90

Tessellation

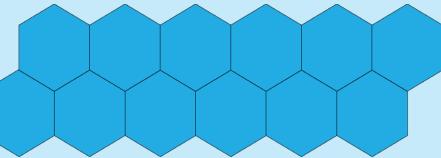

These three tessellations are regular tessellations.

A tessellation of triangles

A tessellation of squares

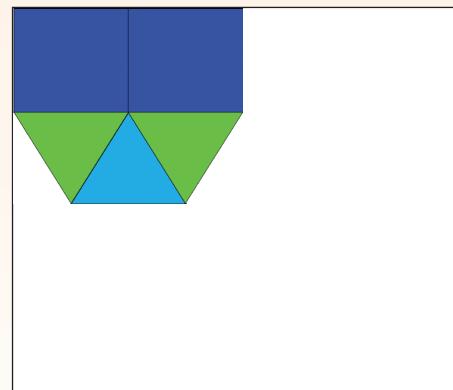

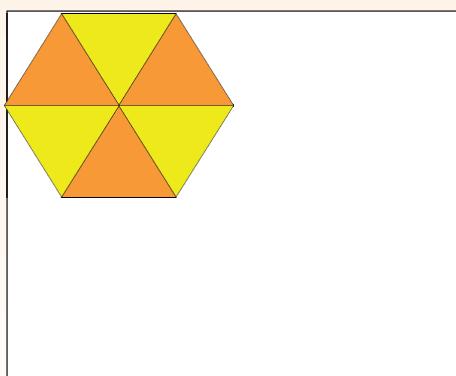

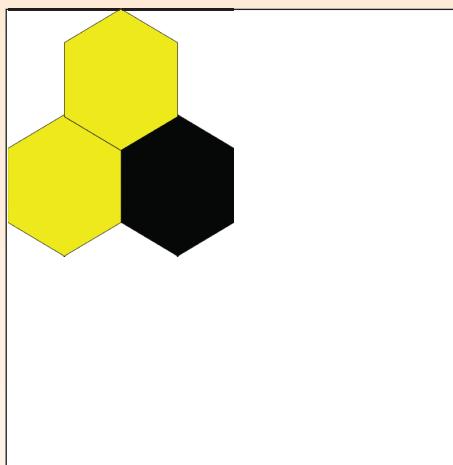

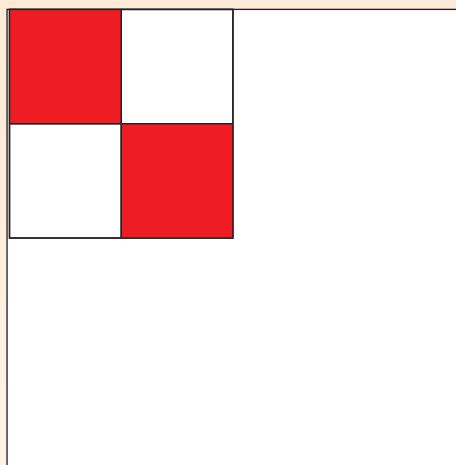

A tessellation of hexagons

Another word for tessellations is tiling.

1. Tile the rest of the floor with these patterns.

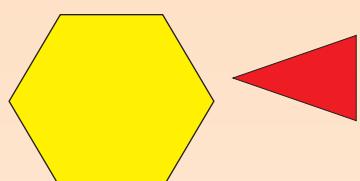

We can also use two or more shapes to make a tessellation pattern.

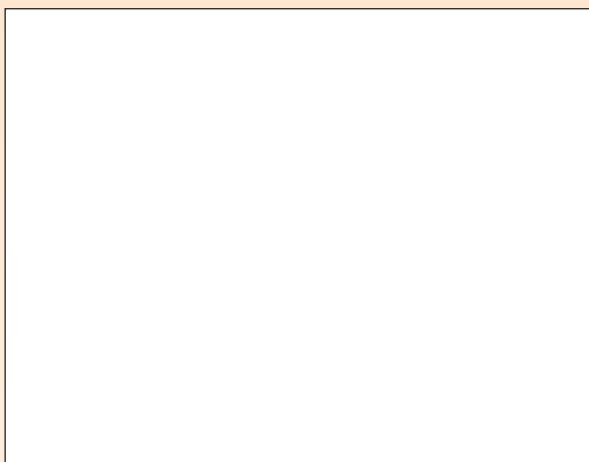

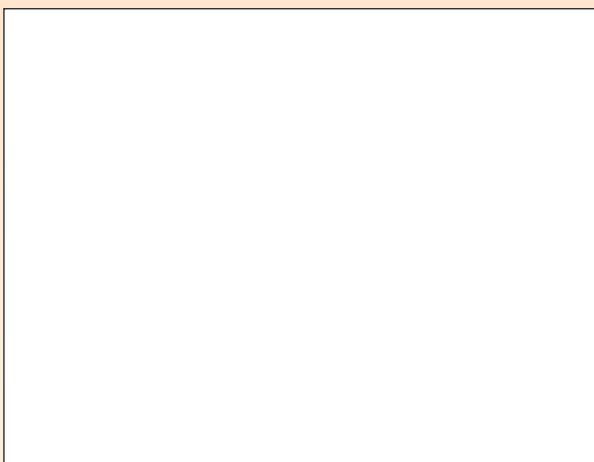

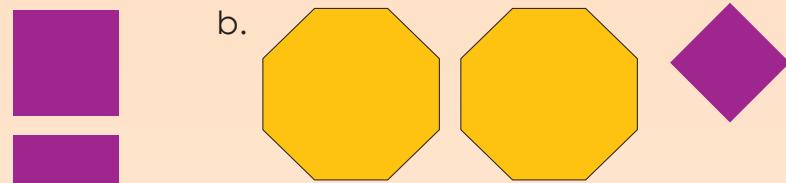

60

2. Show a tessellation pattern using these shapes:

a.

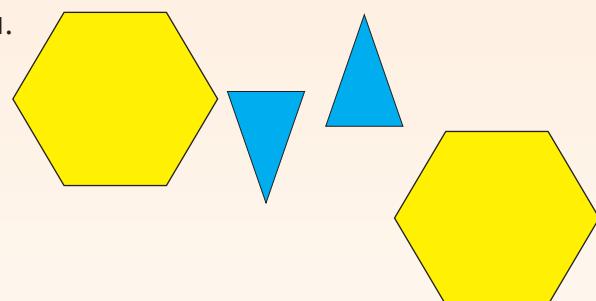

b.

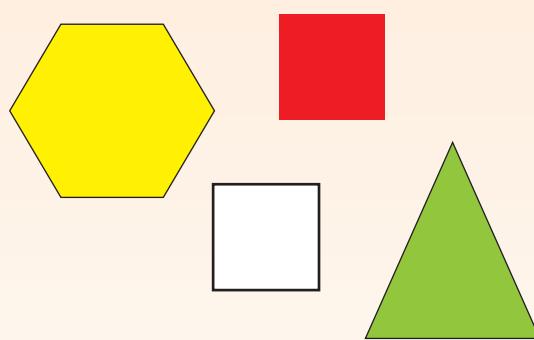

3. Will these shapes tessellate?

a.

b.

Tessellation pattern

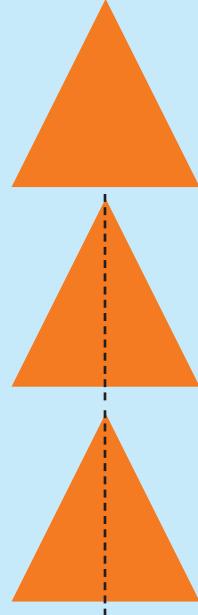

Create your own tessellation pattern.

What is the difference between reflective symmetry and reflection?

Reflective symmetry

A type of symmetry where one half is the reflection of the other half.

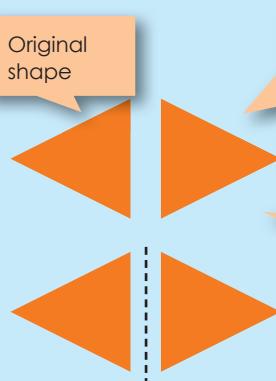

Let us see if this shape has reflective symmetry

We draw a line down the middle of the shape. Is the one half the same as the other?

We can then call this a line of symmetry and this shape has reflective symmetry

Reflection

An image or shape as it would be seen in a mirror or on a smooth lake

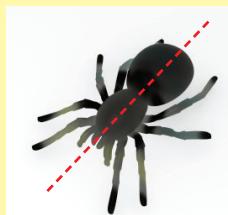

Remember a mirror does not cut you in half. So reflection shows the whole shape.

Mirror shape

We call this reflection and the line is called a line of reflection.

It is important to remember that the distance from the original shape to the line of reflection must be the same as the distance between the line of reflection and the mirror shape.

1. We get reflective symmetry in nature. Show it by drawing a line of symmetry.

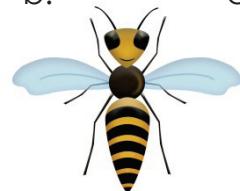

The line of symmetry shows the reflective symmetry on the spider.

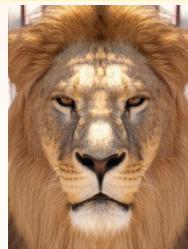

a.

b.

c.

2. We also get reflection in nature. Show it by drawing a line of reflection

Reflection can be seen in water.

a.

b.

Words we can use to describe reflective symmetry.

mirror, shape, line of symmetry, number of lines of symmetry

Words we can use to describe reflection.

mirror shape, original shape, line of reflection, lines of symmetry

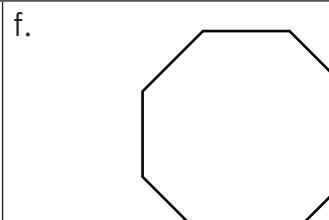

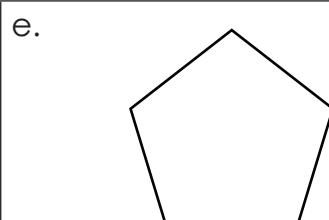

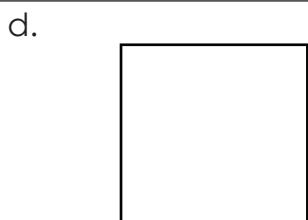

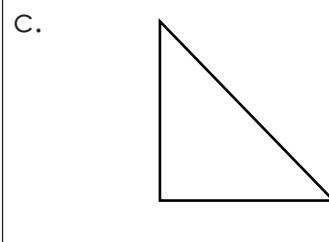

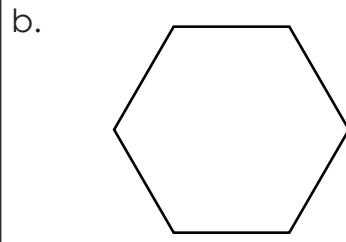

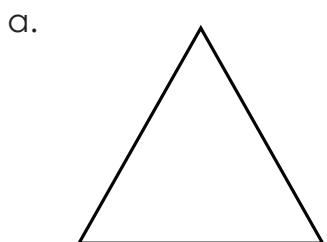

X

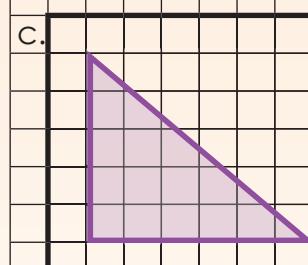

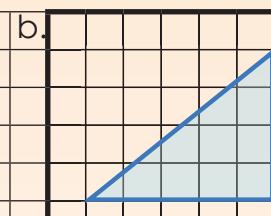

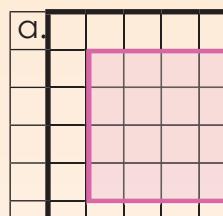

8 ← → 3

3. Draw all the lines of symmetry on these shapes.

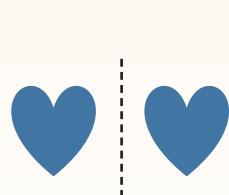

4. Draw the reflection of the shape and show the line of reflection.

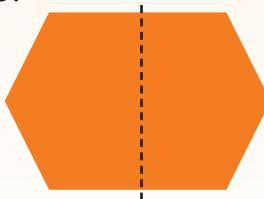

5. Describe each picture using your knowledge of reflection and reflective symmetry.

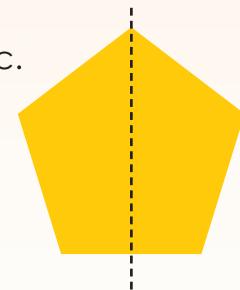

a.

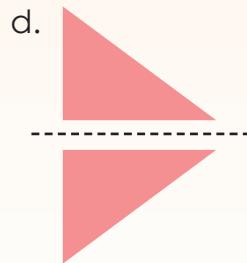

b.

c.

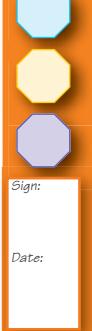

d.

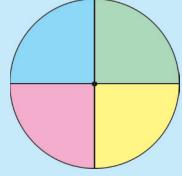

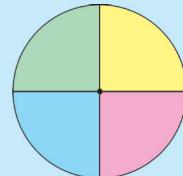

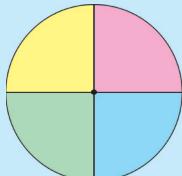

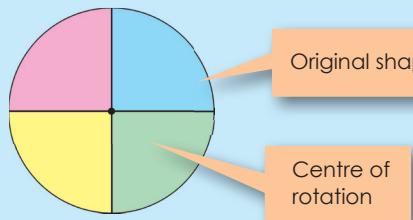

I am a designer

Design a tessellation pattern using reflection.

**Rotational symmetry**

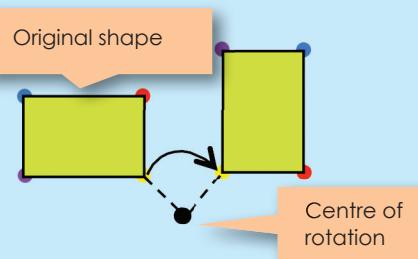

When a shape has rotational symmetry it means the outline of the turning figure matches its original shape. Does this circle have rotational symmetry? Explain.

Why do we say the circle has an order of symmetry of 4?

Rotation

There is a central point that stays fixed and everything else moves around that point in a circle. Look at the drawing and explain it.

The dots are drawn in different colours so that we can see in which direction the shape has been rotated.

Words to describe rotation

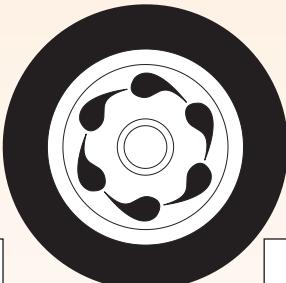

rotated or turned, clockwise, anti-clockwise, point of rotation and distance.

1. How many times will the wheel turn to get back to its original position?

a.

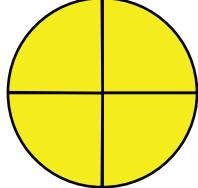

b.

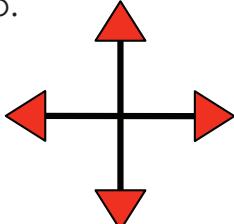

c.

**2. Are these examples of rotational symmetry or rotation.**

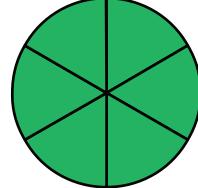

a.

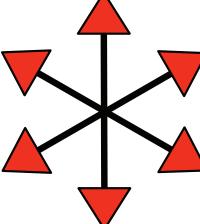

b.

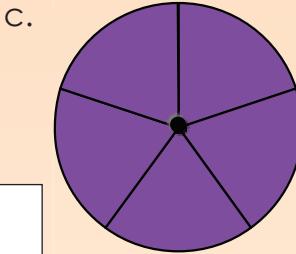

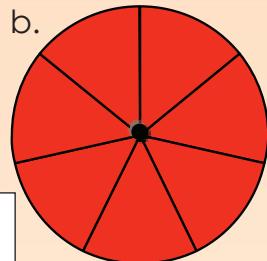

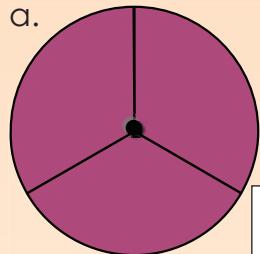

c.

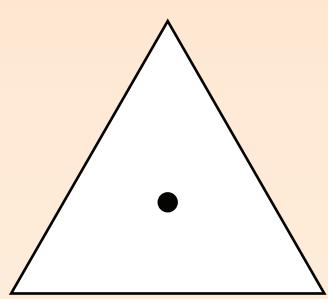

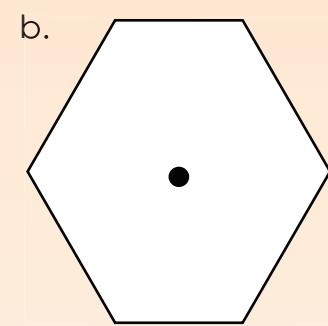

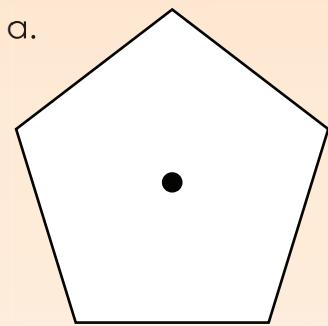

d.

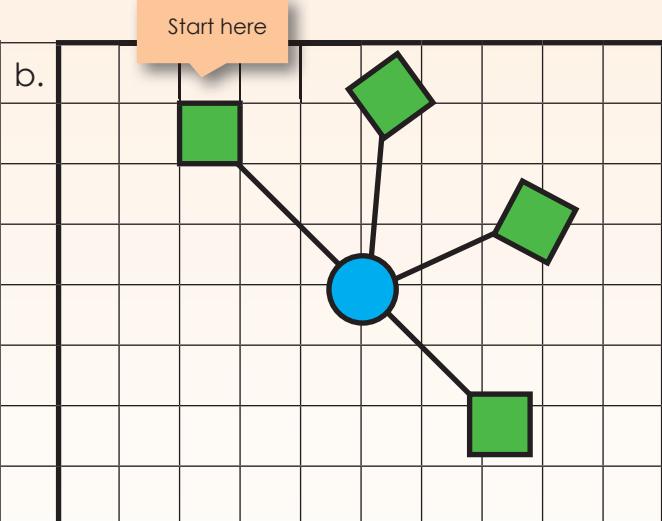

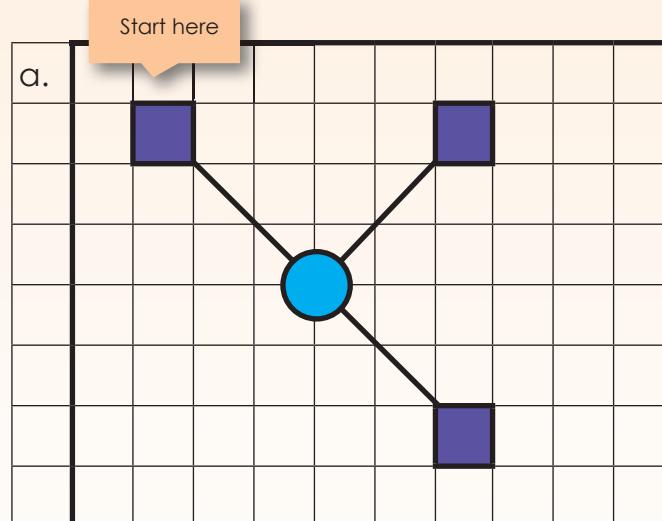

3. How many times will each circle turn to get back to its starting point?

4. Draw the lines of symmetry. How many times will each shape rotate?

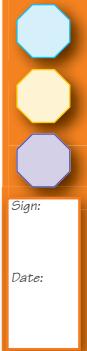

5. Complete the rotation.

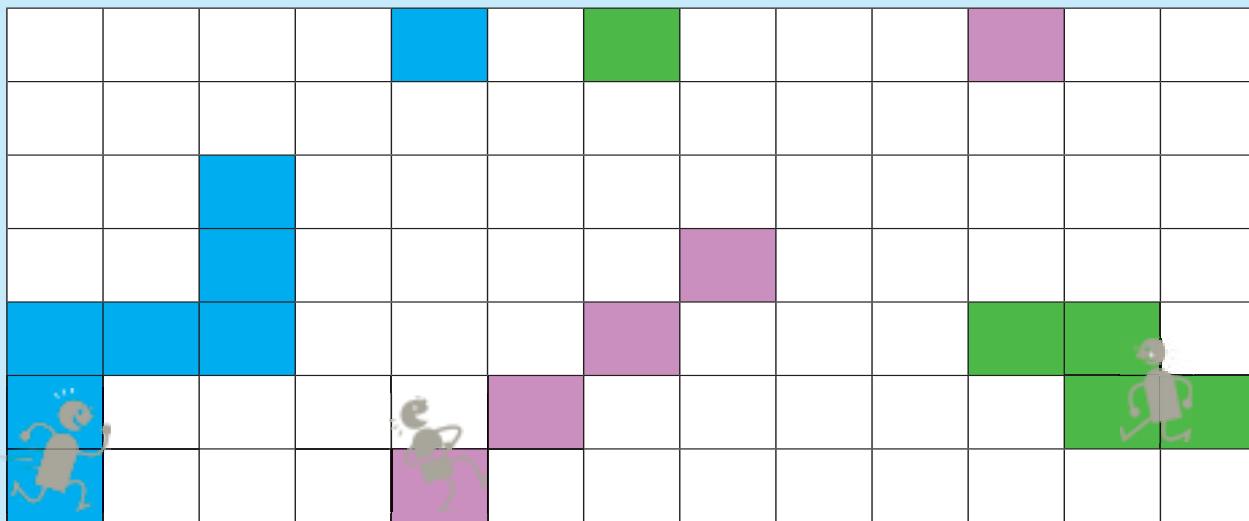

Drawing rotation

Draw your own example of a shape that has rotational symmetry.

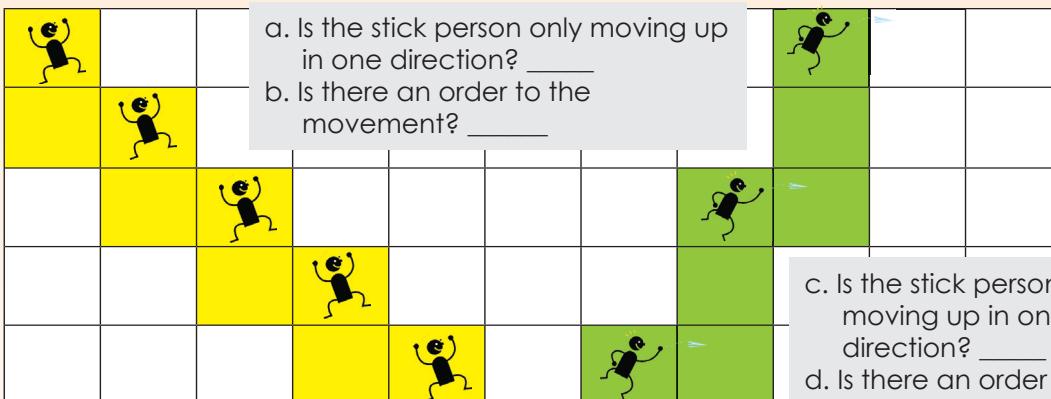

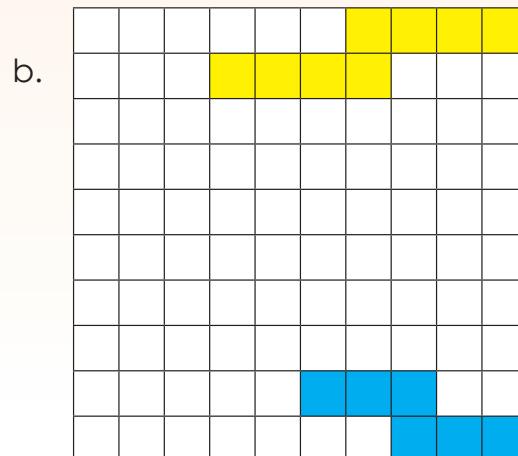

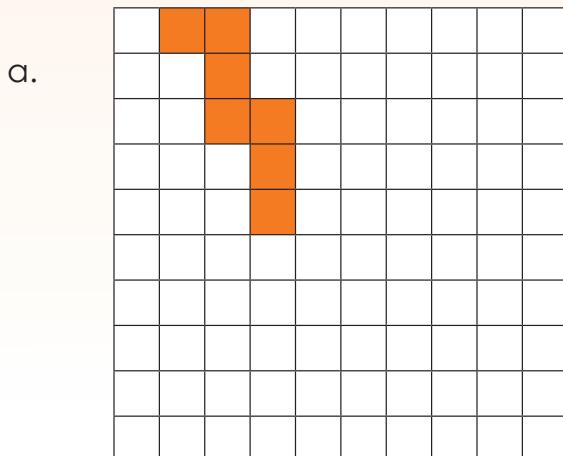

Help the stick person to get to the top block by filling in the missing parts of the pattern.

1. Look at the translations and answer the questions.

2. Complete the patterns.

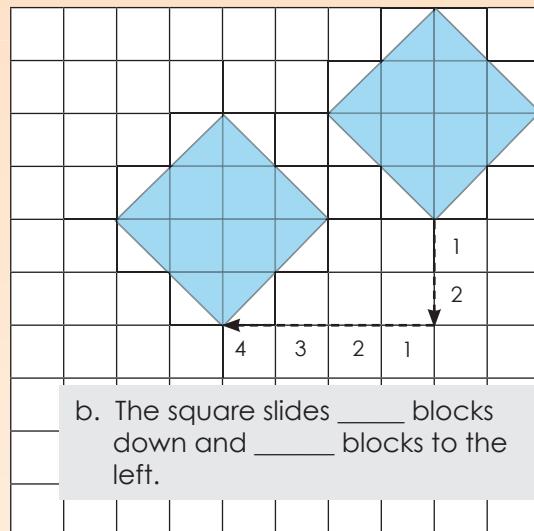

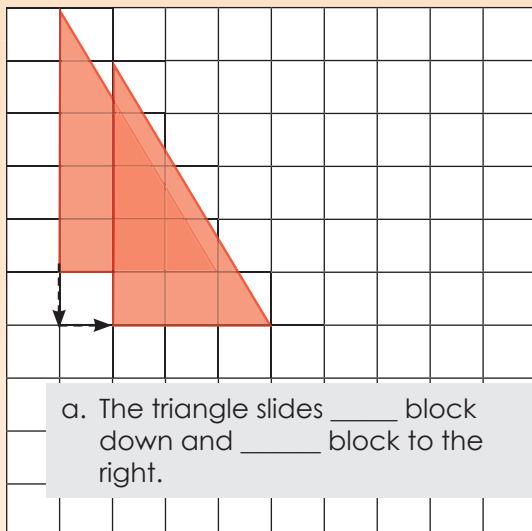

X

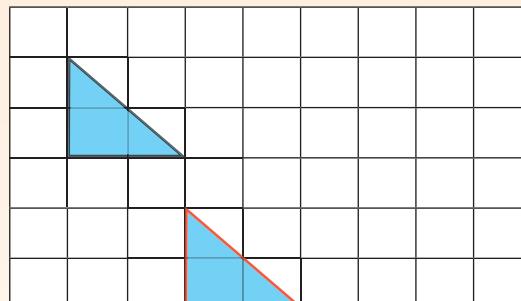

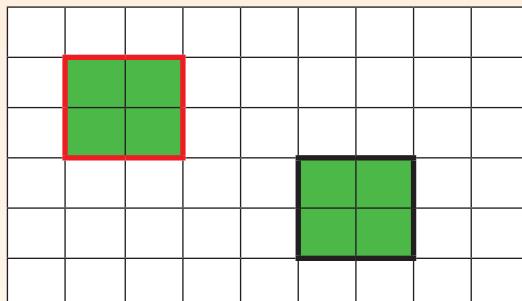

8 ← → 3

6

3. Describe the translation. The sentences at the bottom can be given to help them explain what has happened.

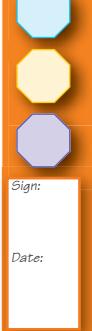

4. Describe what has happened to these translated shapes. The original shape has a red border.

- a. How many places down did we slide the green block?
- b. How many places to the left did we slide the triangle?
- c. Have we changed the shape, size or orientation of the shapes?
- d. Can we say that the shapes have been translated?

Moving a star

Draw a star that has been translated three blocks down and four to the left.

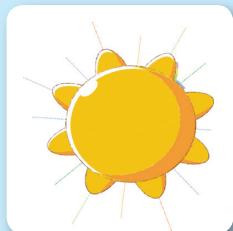

Temperature and the weather

Look at the pictures. What weather does it show?

1. Look at the calendar. Answer the questions below.

Term 3

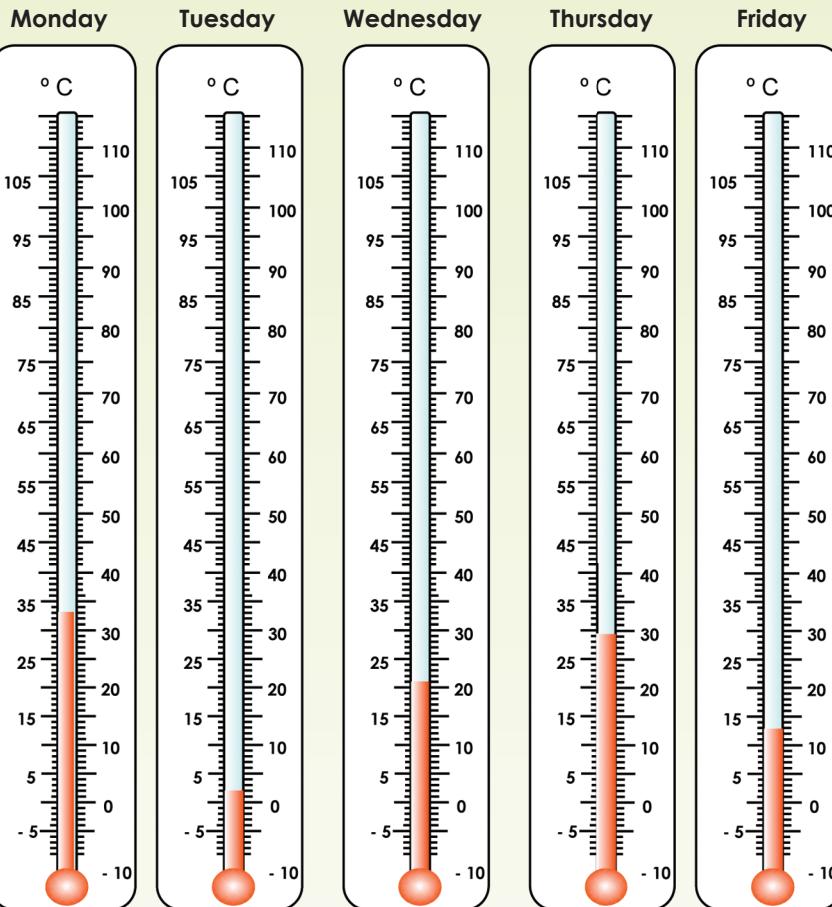

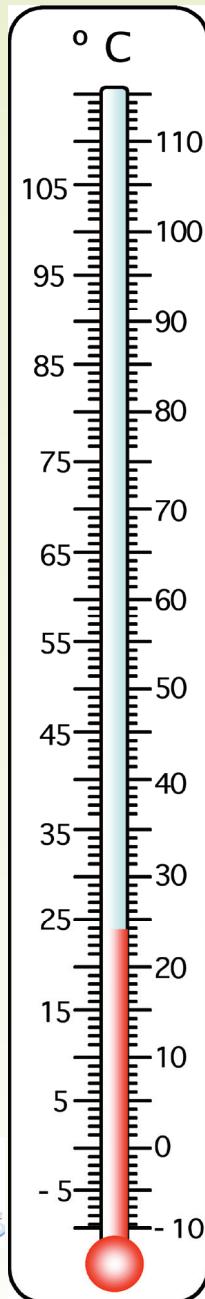

November						
Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
		1 	2 	3 	4 	5
6 	7 	8 	9 	10 	11 	12
13 	14 	15 	16 	17 	18 	19
20 	21 	22 	23 	24 	25 	26
27 	28 	29 	30 			

- Write down the dates the sun was shining brightly. _____
- Do you think it was hot or cold on those days? Why? _____
- Write down the dates it was raining. _____
- Do you think it was hot or cold on those days? Why? _____
- Write down the dates it was partly cloudy. _____
- Do you think it was hot or cold on those days? Why? _____

The degree Celsius ($^{\circ}\text{C}$) is the metric unit for measuring temperature.

When we say it is hot or cold we are referring to temperature.

We use thermometer to measure it.

2. What was the temperature on:

- Monday: _____
- Tuesday: _____
- Wednesday: _____
- Thursday: _____
- Friday: _____

Temperatures

Look in a newspaper for tomorrow's expected temperature:

Minimum temperature

Maximum temperature

Pie charts

99

What is this pie chart telling us.

Schools that reduce, reuse, recycle and not

This a pie chart. A pie chart is a circle graph divided into sectors, each displaying the size of some related piece of information.

1. After a survey was done. The pie chart above was drawn.

a. How many schools took part in this survey?

b. How do you know that?

c. How many schools are?

i) reducing

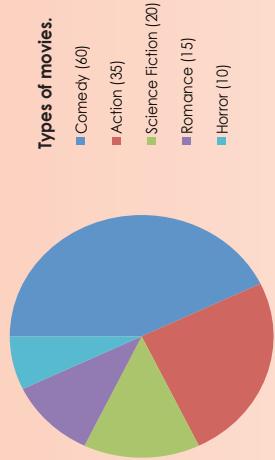

ii) re-using

iii) recycling

iv) not reducing, re-using or recycling

d. Why do you think more schools recycle than re-use?

2. Grade 5 learners were asked what their favourite type of movie is. This was the result. Answer the questions below.

- What data was collected?

- How was it collected?

- How many learners like comedy?

- How many learners like romance?

- How many learners like science fiction?

- Who would want to collect this information?

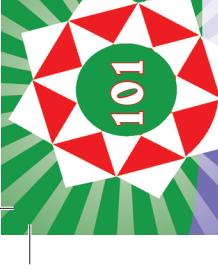

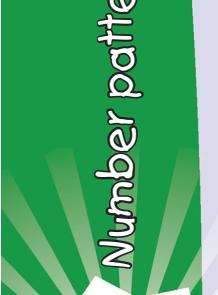

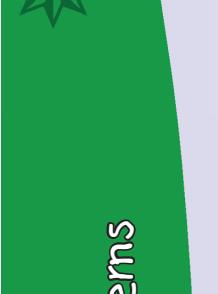

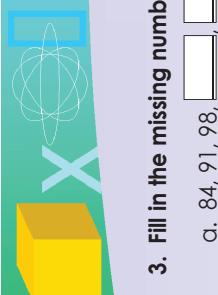

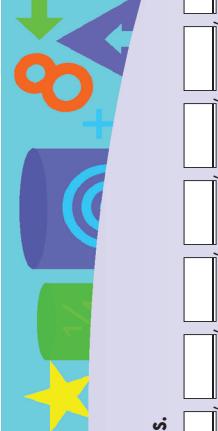

- If we wanted to treat the learners on the last day of school, which two movies would we hire? Why?

Write a paragraph on the pie chart above.

Date:

Number patterns

10

3. Fill in the missing numbers.

Describe the patterns.

10	9	8	7	6	5	4	3	2	1

100	99	98	97	96	95	94	93	92	91

1 Complete the pattern

- a.                                                                                                                                       

2. Complete the pattern.

- a.                                                                                                                                

a.                                                                                                                                                                                                                                              

Term 3

Path

Complete the pattern.

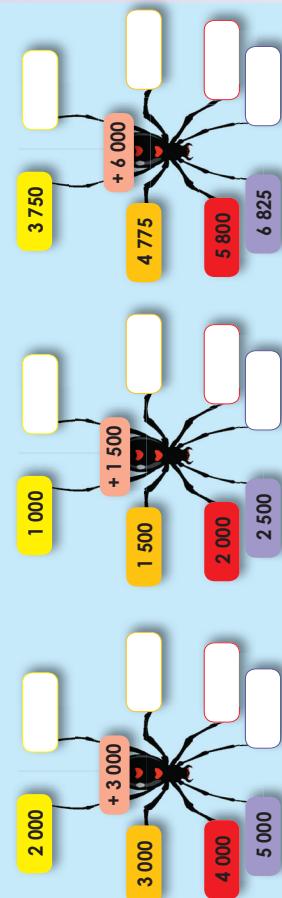

A rectangular box divided into two sections. The left section is labeled "Sign:" and the right section is labeled "Date:". Both sections are currently empty.

87

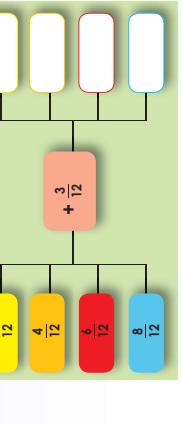

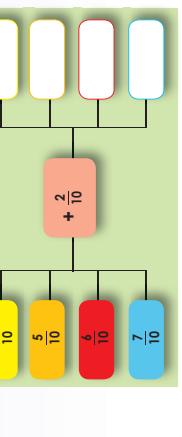

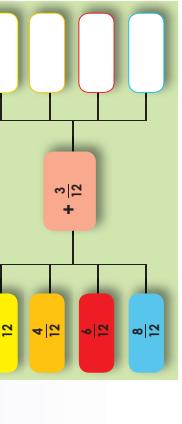

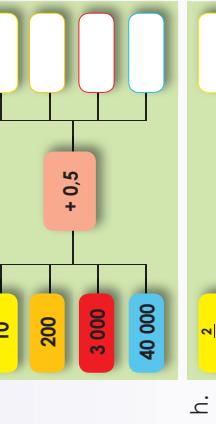

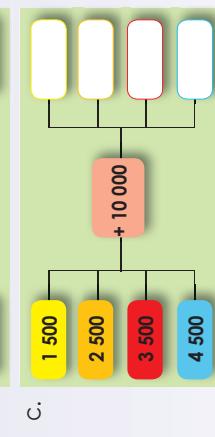

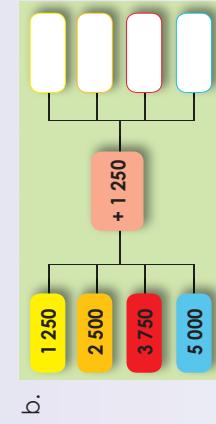

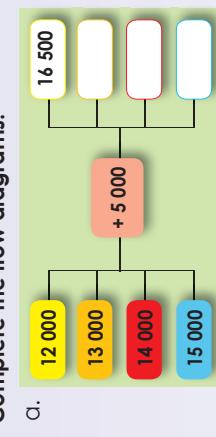

More number patterns

102

What is the answer?

1. Complete the flow diagrams.

2. Complete the table.

a.

+ 1	+ 1	+ 1	+ 1	+ 1	+ 1	+ 1	+ 1	+ 1	+ 1
x 5	5	10	+ 5						
1	2	3	4	5	6	7	8	9	10

b.

- 6	- 6	- 6	- 6	- 6	- 6	- 6	- 6	- 6	- 6
72	66	60	54	48	42	36	30	24	18
÷ 6	12	11	- 1	- 1	- 1	- 1	- 1	- 1	- 1

103a Multiplication: 3-digit by 2-digit and 4-digit by 1-digit

1. Complete the table below.

What number comes next?

	Number	$\times 100$	$\times 200$	$\times 300$	$\times 400$	$\times 500$	$\times 600$	$\times 700$	$\times 800$	$\times 900$
15	4	8	16	32	?	3	9	27	81	?
20	40	80	160	320	?	30	90	270	810	?
25	400	800	1600	3200	?	300	900	2700	8100	?
30										
50										

2. Use both methods to do the multiplication below.

a. $287 \times 78 =$

b. $387 \times 66 =$

Continue on an extra sheet of paper

Number	$\times 100$	$\times 200$	$\times 300$	$\times 400$	$\times 500$	$\times 600$	$\times 700$	$\times 800$	$\times 900$
15									
20									
25									
30									
50									

Term 3

You did 3-digit x 2-digit multiplication before but this time your answers will be bigger than 20 000 and smaller than 50 000. See if this is true!!

Continue on an extra sheet of paper

c. $984 \times 35 =$

d. $498 \times 53 =$

Continue on an extra sheet of paper

e. $623 \times 44 =$

Continue on an extra sheet of paper

Examples:

Example 1:

$$\begin{aligned}
 369 \times 68 &= (300 \times 60) + (60 \times 60) + (9 \times 60) + (300 \times 8) + (60 \times 8) \\
 &\quad + (9 \times 8) \\
 &= 18 000 + 3 600 + 540 + 2 400 + 480 + 72 \\
 &= 10 000 + 8 000 + 3 000 + 600 + 500 + 40 + 2 000 + \\
 &\quad 400 + 400 + 80 + 70 + 2 \\
 &= 10 000 + 13 000 + 1 900 + 190 + 2 \\
 &= 10 000 + 10 000 + 3 000 + 1 000 + 900 + 100 + 90 + 2 \\
 &= 20 000 + 4 000 + 1 000 + 90 + 2 \\
 &= 25 092
 \end{aligned}$$

Example 2:

$$\begin{array}{r}
 3\ 6\ 9 \\
 \times \quad 6\ 8 \\
 \hline
 2\ 9\ 5\ 2
 \end{array}$$

(9 x 8)
(60 x 8)
(300 x 8)
(9 x 60)
(60 x 60)
(300 x 60)

2 Calculate the following:

$$\text{b. } 426 \times 84 =$$

Continue on an extra sheet of paper

$$d \quad 9427 \times 8 =$$

Continue on an extra sheet of paper

they spend altogether?

b. The TV costs R7 899. The shop sold 8 TVs. How much money did they get for all the TVs?

c. 9 999 people each had 1 litre of milk each day for a week. How much milk did they drink altogether?

Continue on an extra sheet of paper

Multiply the numbers with the same colour.

95

Term 3

Numbers 0 – 1 000 000

105

How much is 100 000?

What is the number just before 100 000?

1. Say if the following is true or false:

- There are 500 R200 notes in R100 000.
- There are 500 R100 notes in R100 000.
- There are 1 000 R100 notes in R100 000.
- There are 100 000 millilitres in 10 000 litre.
- There are 100 000 millilitres in 100 litres.

2. Complete the following:

- $100\ 000 + 30\ 000 + 1\ 000 + 200 + 90 + 6 =$
- $100\ 000 + 90\ 000 + 5\ 000 + 600 + 7 =$
- $100\ 000 + 40\ 000 + 8 =$
- $100\ 000 + 9 =$
- $10 + 40\ 000 + 7\ 000 + 100\ 000 + 6 =$

3. What is the place value of each of the underlined digits in each number?

- $18\underset{2}{3}\ 586$ = 80 000 and 80
- $12\underset{3}{3}\ 212$ =
- $179\ 1\underset{6}{2}$ =
- $13\underset{2}{9}\ 007$ =
- $1\underset{9}{9}\ 999$ =

4. Circle the number that is:

- 40 000 more than 54 562:
 - 3 000 more than 42 985:
 - 900 more than 95 644:
 - 60 000 more than 15 487:
 - 100 000 more than 79 999:
- 94 652, 14 562, 94 562, 84 562
45 895, 45 985, 37 985, 72 985
96 900, 81 644, 84 644, 96 544
21 487, 75 487, 55 487, 75 874
179 999, 89 999, 69 999, 88 999

5. Use any of these digits to make five different 5-digit numbers smaller than 99 999 but bigger than 50 000.

a.

7. Write the following in numbers:

- One hundred and sixty five thousand three hundred and twenty one.
 - One hundred thousand and fifteen.
-

6. Answer <, > or =

a. 194 578 184 587

b. 14 680 15 680

c. 10 900 10 090

d. 15 303 15 003

e. 94 999 94 909

8. Write the following in words:

a. 123 633

b. 105 128

c. 62 805

d. 80 004

- Say if the numbers in question 8 are odd or even.
-

Up to 100 000

Find 10 numbers in a newspaper that are bigger than 10 000 but smaller than 100 000.

How many numbers are closer to 10 000 than to 100 000?
what do the numbers tell us?

Take each number and round it off to the nearest 5, 10, 100 and a 1 000.

Addition: 5-digit numbers

Revise place value and expanded notation.

Give the answer for:

- a. $90\ 000 + 7\ 000 + 800 + 3 =$
- b. $50\ 000 + 9\ 000 + 400 + 1 =$
- c. $30\ 000 + 2\ 000 + 60 + 2 =$
- d. $80\ 000 + 6\ 000 + 700 + 90 =$
- e. $40\ 000 + 1\ 000 + 5 =$

Write in expanded notation:

- a. $90\ 120$
- b. $75\ 300$
- c. $89\ 060$
- d. $34\ 000$
- e. $50\ 640$

3. Calculate and write your answers in expanded notation
(in units or tens or hundreds or thousands or ten thousands).

$8 + 7$	$80 + 70$	$800 + 700$	$8\ 000 + 7\ 000$	$80\ 000 + 70\ 000$
$= 15$	$= 150$	$= 1\ 500$	$= 15\ 000$	$= 150\ 000$
$= 10 + 5$	$= 100 + 50$	$= 1\ 000 + 500$	$= 10\ 000 + 5\ 000$	$= 100\ 000 + 50\ 000$

c. $3 + 9 =$ d. $6\ 000 + 7\ 000 =$ e. $70\ 000 + 80\ 000 =$

$d. 40 + 80 =$ <input type="text"/>	$f. 9 + 5 =$ <input type="text"/>
-------------------------------------	-----------------------------------

4. Calculate the following using the method below.

Example:

$$\begin{array}{r}
 56\ 832 \\
 + 9\ 396 \\
 + 33\ 254 \\
 \hline
 \text{Total} \\
 99\ 482
 \end{array}
 \begin{array}{l}
 = 50\ 000 + 6\ 000 + 800 + 30 + 2 \\
 = 9\ 000 + 300 + 90 + 6 \\
 = 30\ 000 + 3\ 000 + 200 + 50 + 4 \\
 = 80\ 000 + 18\ 000 + 1\ 300 + 170 + 12 \\
 = 80\ 000 + 10\ 000 + 9\ 000 + 400 + 80 + 2 \\
 = 99\ 482
 \end{array}$$

1. Give the answers for the following:

Example: $90\ 000 + 7\ 000 + 800 + 3 = 97\ 803$

- a. $90\ 000 + 5\ 000 + 800 + 20 + 5 =$
- b. $70\ 000 + 1\ 000 + 500 + 80 + 9 =$
- c. $30\ 000 + 700 + 10 + 4 =$
- d. $60\ 000 + 90 + 1 =$
- e. $40\ 000 + 9 =$

2. Write the following in expanded notation.

Example: $90\ 120 = 90\ 000 + 100 + 20$

- a. $34\ 248$
- b. $52\ 505$
- c. $41\ 094$
- d. $90\ 001$
- e. $30\ 130$

5. Do the following on an extra sheet of paper. A farmer sells fruit to several stores in his city. He sold 13 789 pears and 35 678 oranges in one month. How much fruit did he sell altogether?

Addition: 5-digit numbers continued

6. Calculate the following using the method below.

Example:

$$\begin{array}{r}
 & 6 & 5 & 4 & 3 & 2 \\
 + & 2 & 3 & 8 & 9 \\
 \hline
 & 6 & 7 & 8 & 2 & 1
 \end{array}$$

a. $74 + 18 =$

b. $54 + 39 =$

c. $39 + 45 =$

d. $42 + 39 =$

7. Calculate the following using the method below.

Example:

$$\begin{array}{r}
 & 4 & 3 & 2 & 6 & 5 \\
 + & 4 & 5 & 2 & 7 \\
 \hline
 & 4 & 7 & 7 & 9 & 2
 \end{array}$$

a. $93\ 254 + 3\ 429 =$

b. $73\ 236 + 6\ 537 =$

c. $78\ 224 + 1\ 569 =$

8. Calculate the following using the method below.

Example:

$$\begin{array}{r}
 & 6 & 5 & 4 & 3 & 2 \\
 + & 2 & 3 & 8 & 9 \\
 \hline
 & 6 & 7 & 8 & 2 & 1
 \end{array}$$

a. $56\ 636 + 2\ 198 =$

b. $45\ 883 + 2\ 098 =$

c. $41\ 892 + 6\ 039 =$

9. Calculate the following using the method below.

Example:

$$\begin{array}{r}
 & 8 & 7 & 5 & 9 & 6 \\
 + & 9 & 9 & 4 & 1 & 1 \\
 \hline
 & 9 & 7 & 0 & 0 & 7
 \end{array}$$

a. $43\ 356 + 32\ 867 =$

b. $25\ 626 + 52\ 675 =$

c. $76\ 734 + 12\ 587 =$

d. $58\ 272 + 30\ 849 =$

100

Date:

Farm costs

My uncle bought a second-hand tractor for R64 375 and a plough for R15 430. How much did he pay for the two items?

Subtraction: 5-digit numbers

107

How fast can you answer the following:

73 254 x	80 147 x	28 283 x	73 235 x	53 306 x
(90 000 + 3 000 + 200 + 50 + 4) - 2 =	(80 000 + 3 000 + 100 + 40 + 7) - 30 =	(30 000 + 8 000 + 200 + 80 + 3) - 100 =	(70 000 + 3 000 + 200 + 30 + 6) - 1 000 =	(50 000 + 4 000 + 300 + 6) - 10 000 =

David got these answers what did he wrong.

3. Calculate the following using the examples below to guide you.
You will need extra paper to complete this.

Example:

36 - 9	536 - 69	4 536 - 769
$= (30 + 6) - 9$	$= (500 + 30 + 6) - (60 + 9)$	$= (4 000 + 500 + 30 + 6) - (700 + 60 + 9)$
$= (20 + 16) - 9$	$= (400 + 130 + 6) - (60 + 9)$	$= (3 000 + 1 500 + 30 + 6) - (700 + 60 + 9)$
$= 20 + 7$	$= (400 + 120 + 16) - (60 + 9)$	$= (3 000 + 1 400 + 130 + 6) - (700 + 60 + 9)$
$= 27$	$= 400 + 60 + 7$	$= (3 000 + 1 400 + 120 + 16) - (700 + 60 + 9)$
	$= 467$	$= 3 000 + 700 + 60 + 7$
		$= 3 767$

a. $95 - 9 =$

b. $4715 - 956 =$

c. $765 - 96 =$

d. $9684 - 796 =$

e. $854 - 97 =$

f. $75 - 8 =$

g. $856 - 87 =$

h. $5738 - 859 =$

i. $6824 - 975 =$

1. Give an answer for the following:
Example: $(90\ 000 + 3\ 000 + 200 + 50 + 4) - (30 + 2) = 93\ 222$

4. Complete the following:

Example:

$$\begin{array}{r} 83\ 752 \\ - 32\ 575 \\ \hline \text{Total} \end{array} = \begin{array}{r} 80\ 000 + 3\ 000 + 600 + 140 + 12 \\ = 30\ 000 + 2\ 000 + 500 + 70 + 5 \\ = 50\ 000 + 1\ 000 + 100 + 70 + 7 \\ = 51\ 177 \end{array}$$

a. $58\ 476 - 29\ 697 =$

b. $71\ 432 - 30\ 675 =$

2. Write the subtraction in expanded notation and calculate the answer.

Example: $84\ 434 - 213 = (80\ 000 + 4\ 000 + 400 + 30 + 4) - (200 + 10 + 3) = 84\ 221$

- a. $96\ 653 - 312 =$
- b. $85\ 953 - 944 =$
- c. $74\ 009 - 13\ 211 =$
- d. $43\ 907 - 42\ 908 =$
- e. $60\ 080 - 31\ 345 =$

Cycling a long way!

My brother cycled 63 575 m. His friend cycled 36 589 m. How much farther did my brother cycle?

Subtraction using the vertical column method

Revise the following.

• Subtract the units.

$$\begin{array}{r} 7 & 10 \\ - 8 & 6 \\ \hline 4 & 8 \end{array}$$

• Note how we break down the 80 into **70 + 10**. We then add the **10** to the **6**; that gives us **16**.
 • Now we can subtract the units.
 • Subtract the tens.

1. Calculate the following using the method below.

a. $896 - 507 =$

b. $684 - 267 =$

c. $785 - 567 =$

d. $758 - 439 =$

i. $86964 - 37969 =$

The cost of training

My father paid R12 860 to go on a training course for two weeks. The next training course he wants to go on will cost R17 340 for a month. How much will the full costs of the training be?

Identifying and naming 3-D objects

111a

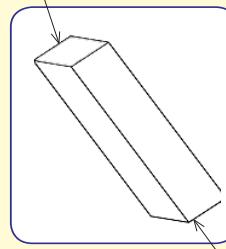

3. Describe the prisms by filling in the missing words.

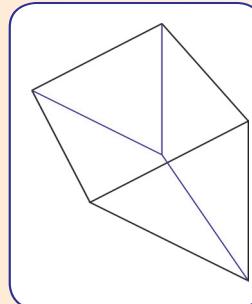

A prism is a solid object that has two flat ends of exactly the same shape and size and all flat sides. First we identify the two ends (bases) that are identical. We name the prisms by the shape of these ends.

Base (a rectangle)

This 3-D object is made up only of rectangles. This is a **rectangular prism**.

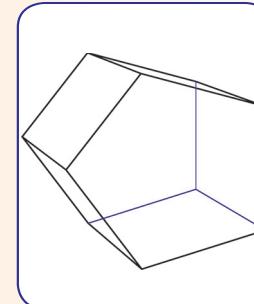

This 3-D object is made up of two _____ ends and three _____ sides. This is a _____ prism.

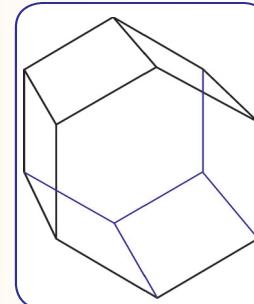

a.

This 3-D object is made up of two _____ and five _____ sides. This is a _____ prism.

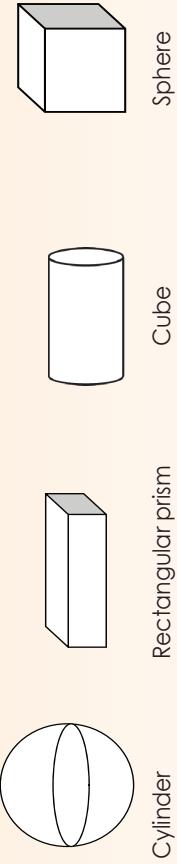

b.

This 3-D object is made up of two _____ and six _____ . This is a _____ prism.

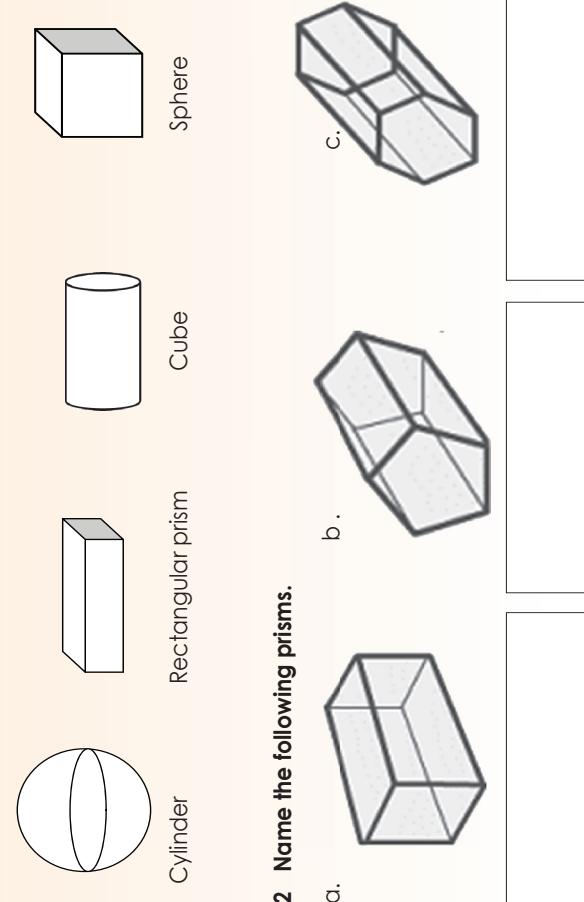

c.

1. Draw a line to match the names and the 3-D objects.

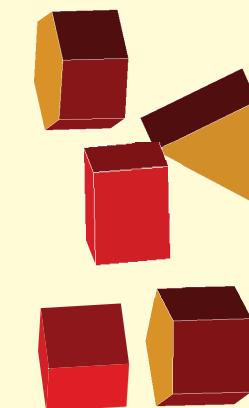

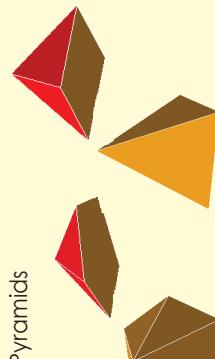

- 2 Name the following prisms.

continued ➔

111

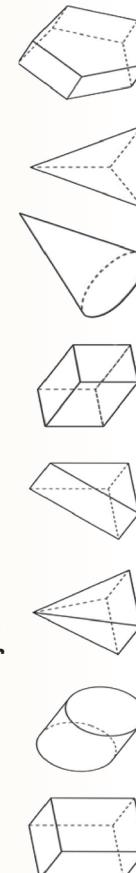

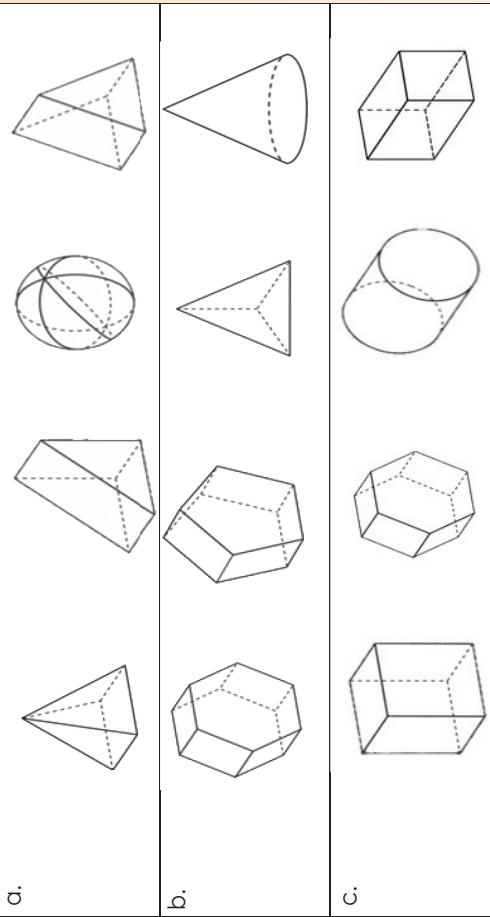

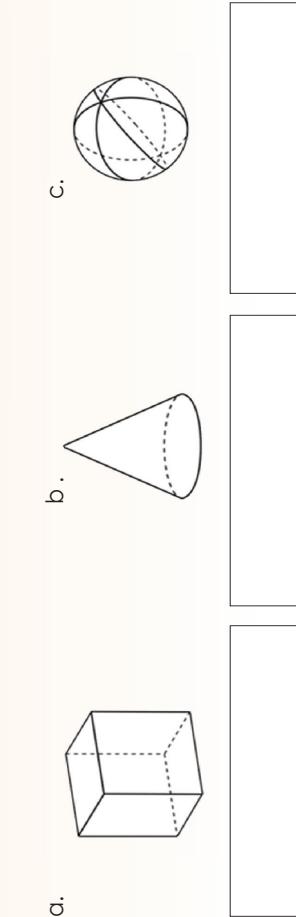

110

Examples:**Pyramids**

Explain what makes an object a prism and what makes it a pyramid.

4. Complete the table.

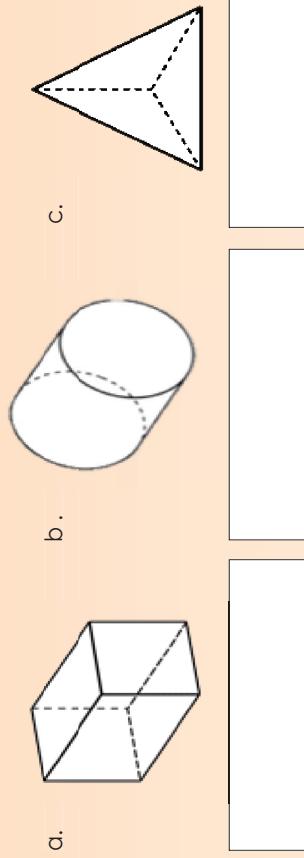

Name of object	Number of faces	Shapes that make up the faces	Flat or curved surfaces	Can roll or slide
a.				
b.				
c.				
d.				
e.				

5. Colour the 3-D objects with more than five faces blue.**6. Circle the odd 3-D object in each row.****7. Name the odd 3-D object in 6c and explain why it is the odd one out.****8. Name the following 3-D objects.**

Identifying and naming 3-D objects continued

111c

11. Name the following 3-D objects.

9. Make a triangular prism and answer the following questions about it.

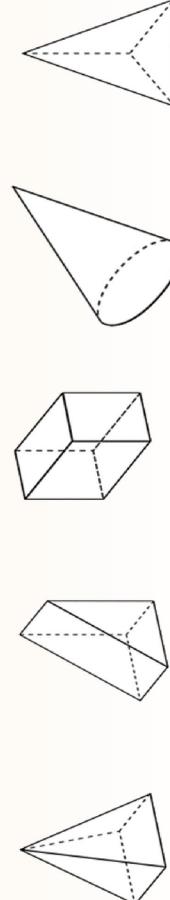

Term 4

12. Complete the table below.

Name of object	Number of faces	Shapes that make up the faces
a.		
b.		
c.		
d.		
e.		

- a. _____
 b. _____
 c. _____

10. Colour the triangular prisms.

114

115

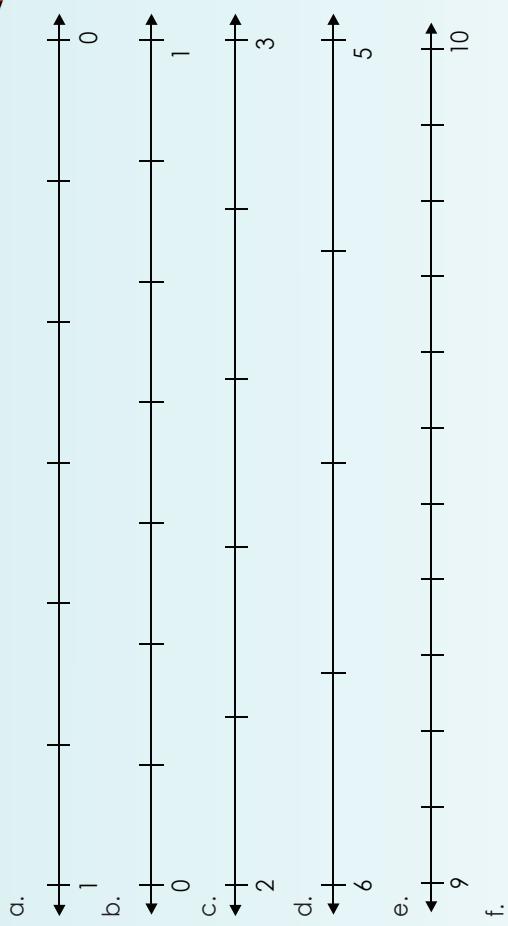

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

Ordering and comparing common fractions

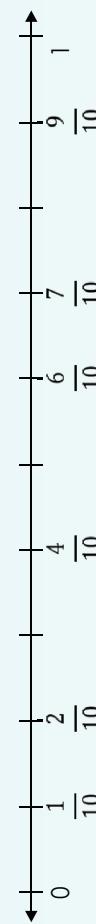

112

Term 4

3. Complete labelling the number line below by filling in the fractions.

1. Work out the missing fractions.

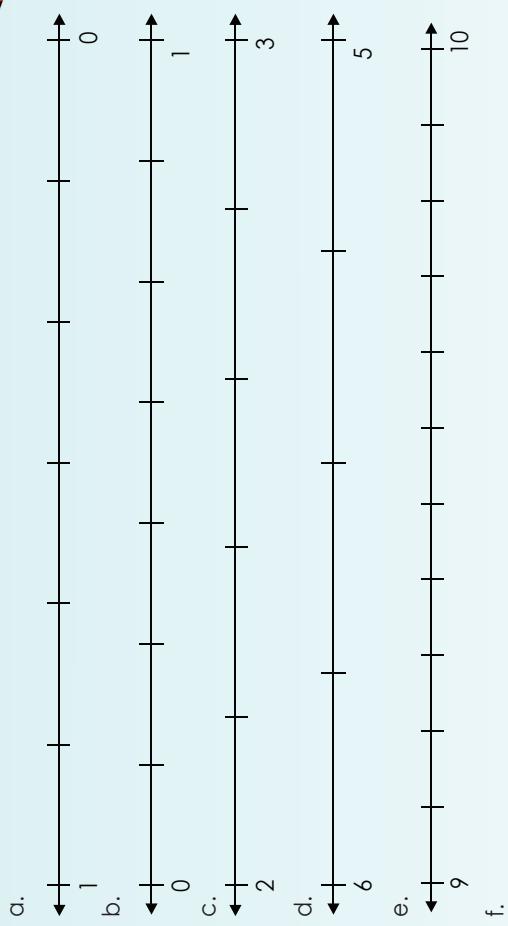

In order to label the number line we need to work out how much (in litres) is represented by each of the marks (graduation lines) on the number line. Once we have worked this out we need to label each line. In this example the number line starts with 0 and ends with 1, so it gets bigger. We were given the first two fractions that showed us we were working in tenths. The missing fractions to be filled in are $\frac{3}{10}$, $\frac{5}{10}$ and $\frac{8}{10}$.

2. Complete labelling the number line below by filling in the fractions.

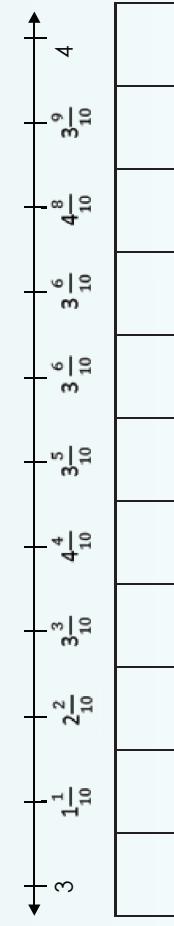

- What fraction does each graduation line represent? _____
- Do the numbers get bigger or smaller? _____

3. Complete labelling the number line below by filling in the fractions.

4. Circle the mistakes on this number line and write the correct answer underneath.

- Draw a number line that starts at 0 and ends at 1. Put the following fractions on the number line: $\frac{3}{10}$, $\frac{2}{3}$, $\frac{1}{3}$ and $\frac{1}{5}$.
- Draw a number line to show $\frac{3}{10}$, $1\frac{3}{10}$, $1\frac{2}{10}$, and $1\frac{8}{10}$.

Draw a number line

Draw a number line to show $\frac{3}{10}$, $1\frac{3}{10}$, $1\frac{2}{10}$, and $1\frac{8}{10}$.

Date:

Adding and subtracting common fractions

113a

I have one and my friend gives me a . How many apples will I have?

I have five s and I give my friend a . How many apples do I have?

Both examples are meant to show that we can only add 'like fruit'. In the same way, when we work with fractions we can only add or subtract the fractions with the **same denominators**.

1. Label the fraction showing the numerator and denominator.

$$\frac{2}{5}$$

2. Use a diagram to work out the following sums.

a. $\frac{2}{6} + \frac{3}{6} =$

b. $\frac{12}{12} - \frac{8}{12} =$

3. Fill in the missing information.

a. $\frac{9}{10} - \frac{3}{10} =$ b. $\frac{2}{3} +$ $= \frac{3}{3}$ c. $- \frac{1}{5} = \frac{3}{5}$
 d. $\frac{5}{7} + \frac{2}{7} =$ e. $- \frac{1}{6} = \frac{2}{6}$ f. $\frac{12}{12} -$ $= \frac{8}{12}$

4. Solve the following problems:

- a. My sister bakes a cake and slices it into 6 equal pieces. My father eats 3 slices and I eat 1 slice. What fraction of the cake is left over?

- b. My brother has a packet of sweets. If he eats a quarter of the packet of sweets every day, for how many days will he eat the sweets?

- c. I had 7 marbles but on the way home I lost 4. What fraction of my marbles did I lose?

Term 4

Fractions of whole numbers

114a

Explain the following:

2. Solve the following and show a drawing for each. You will need a separate piece of paper.

- a. $\frac{1}{3}$ of 39 =
- b. $\frac{1}{11}$ of 22 =
- c. $\frac{1}{7}$ of 63 =
- d. $\frac{1}{4}$ of 24 =
- e. $\frac{1}{7}$ of 49 =
- f. $\frac{1}{4}$ of 84 =
- g. $\frac{1}{10}$ of 60 =
- h. $\frac{1}{6}$ of 36 =
- i. $\frac{1}{9}$ of 954 =

3. Solve these story sums.

- a. Mandla earns $\frac{1}{3}$ of what his brother earns. If his brother earns R372, how much does Mandla earn? _____
- b. Andile has 784 trading cards. He gives $\frac{1}{4}$ of the cards to his friend. How many cards does his friend get? _____
- 4. What is $\frac{1}{15}$ of R1050? _____
- 5. Solve the following problems:
 - a. If a recipe asks for $\frac{4}{5}$ of a cup of rice (250 g), how many grams are needed?

Example 2:

- If we divide 40 sweets amongst 5 learners, it means each learner gets $\frac{1}{5}$
 - Each one gets 8 sweets.
 - $\frac{1}{5}$ of 40 sweets equals 8.
 - We write it as a number sentence:
- $$\frac{1}{5} \text{ of } 40 = 8$$

Example 1:

- If we divide 18 sweets amongst 3 learners, it means each learner gets $\frac{1}{3}$
 - Each one gets 6 sweets.
 - $\frac{1}{3}$ of 18 sweets equals 6.
 - We write it as a number sentence:
- $$\frac{1}{3} \text{ of } 18 = 6$$

1. Write a fraction number sentence for each.

- a. If we divide 33 marbles amongst 3 children, each one will get 11 marbles. $\frac{1}{3}$ of 33 = 11

- b. If we divide 54 cards amongst 9 children, each one will get 6 cards.

- c. If we divide 70 counters amongst 7 children, each one will get 10 counters.

- d. If we divide 48 sweets amongst 4 children, each one will get 12 sweets.

- e. If we divide 108 blocks amongst 12 children, each one will get 9 blocks.

- f. If we divide 48 coins amongst 6 children, each one will get 8 coins.

Quick recall:

$45 \div 9$	$35 \div 7$	$38 \div 2$	$36 \div 9$	$49 \div 7$	$50 \div 5$
$30 \div 6$	$36 \div 4$	$48 \div 6$	$42 \div 6$	$48 \div 8$	$36 \div 6$
$21 \div 3$	$12 \div 2$	$49 \div 1$	$12 \div 4$	$20 \div 4$	$42 \div 7$
$32 \div 8$	$27 \div 9$	$28 \div 2$	$24 \div 3$	$33 \div 3$	$28 \div 4$
$40 \div 5$	$42 \div 3$	$25 \div 5$	$40 \div 4$	$44 \div 4$	$35 \div 5$

Example 1:

$$\begin{aligned} 337 \div 3 &= (300 + 30 + 7) \div 3 \\ &= (300 \div 3) + (30 \div 3) + (7 \div 3) \\ &= 100 + 10 + 2 \text{ remainder } 1 \\ &= 112 \text{ remainder } 1 \end{aligned}$$

Test the answer.

1. Show your calculations on a separate piece of paper:

- a. $668 \div 6 =$
- b. $541 \div 6 =$
- c. $367 \div 6 =$
- d. $673 \div 6 =$
- e. $248 \div 6 =$

Example 3:

$$\begin{aligned} 842 \div 4 &= (800 + 42) \div 4 \\ &= (800 \div 4) + (42 \div 4) \\ &= 200 + 10 \text{ remainder } 2 \\ &= 210 \text{ remainder } 2 \end{aligned}$$

Test the answer.

3. Show your calculations on a separate piece of paper:

- a. $412 \div 5 =$
- b. $358 \div 5 =$
- c. $694 \div 5 =$
- d. $213 \div 5 =$
- e. $914 \div 5 =$

Example 2:

$$\begin{aligned} 775 \div 7 &= (700 + 75) \div 7 \\ &= (700 \div 7) + (75 \div 7) \\ &= 100 + 10 \text{ remainder } 5 \\ &= 110 \text{ remainder } 5 \end{aligned}$$

Test the answer.

2. Show your calculations on a separate piece of paper:

- a. $884 \div 8 =$
- b. $405 \div 8 =$
- c. $326 \div 8 =$
- d. $818 \div 8 =$
- e. $649 \div 8 =$

Example 4:

$$\begin{aligned} 745 \div 7 &= (700 + 45) \div 7 \\ &= (700 \div 7) + (45 \div 7) \\ &= 100 + 6 \text{ remainder } 3 \\ &= 106 \text{ remainder } 3 \end{aligned}$$

Test the answer.

4. Show your calculations on a separate piece of paper:

- a. $947 \div 9 =$
- b. $276 \div 9 =$
- c. $363 \div 9 =$
- d. $594 \div 9 =$
- e. $721 \div 9 =$

Term 4

Example 5:

$$\begin{array}{r} 8 \overline{)6\ 5\ 6} \\ - 6\ 4\ 0 \\ \hline 1\ 6 \\ - 1\ 6 \\ \hline 0 \end{array}$$

Answer: 82

5. Say in each case whether there is a remainder or not, and if there is, then what it is. Show all your calculations in your writing book or on a piece of paper.

Example 6:

$$\begin{array}{r} 8 \overline{)6\ 6\ 0} \\ - 6\ 4\ 0 \\ \hline 2\ 0 \\ - 8\times 80 \\ \hline 0 \end{array}$$

Answer: 82 remainder 4

6. Test all your answers by multiplying your results. Show all your calculations in your writing book or on a piece of paper.

Explain to your parent!!!

Why do we say division is the opposite of multiplication?
At home explain this to one of your family members.

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

142

143

Date:

Division: 3-digits by 2-digits

Quick recall:

$600 \div 60 =$	$840 \div 70 =$	$500 \div 20 =$	$780 \div 60 =$	$600 \div 25 =$
$250 \div 50 =$	$640 \div 80 =$	$600 \div 25 =$	$920 \div 40 =$	$490 \div 70 =$
$360 \div 60 =$	$440 \div 40 =$	$720 \div 80 =$	$950 \div 50 =$	$540 \div 60 =$
$400 \div 20 =$	$960 \div 30 =$	$990 \div 30 =$	$550 \div 25 =$	$910 \div 10 =$
$900 \div 90 =$	$810 \div 90 =$	$120 \div 30 =$	$480 \div 80 =$	$540 \div 90 =$

Example 1:

$$\begin{aligned} 480 \div 20 &= (400 + 80) \div 20 \\ &= (400 \div 20) + (80 \div 20) \\ &= 20 + 4 \\ &= 24 \end{aligned}$$

Test the answer.

1. Show your calculations in a writing book or on a piece of paper.

- a. $352 \div 30 =$
- b. $486 \div 30 =$
- c. $512 \div 30 =$
- d. $633 \div 30 =$
- e. $470 \div 30 =$

3. Show your calculations in a writing book or on a piece of paper.

- a. $354 \div 40 =$
- b. $682 \div 40 =$
- c. $448 \div 40 =$
- d. $960 \div 40 =$
- e. $862 \div 40 =$

5. Show your calculations in a writing book or on a piece of paper.

- a. $265 \div 80 =$
- b. $648 \div 80 =$
- c. $592 \div 80 =$
- d. $962 \div 80 =$
- e. $999 \div 80 =$

- Example 2:
- $$\begin{aligned} 670 \div 60 &= (600 + 70) \div 60 \\ &= (600 \div 60) + (70 \div 60) \\ &= 10 + 1 \text{ rem } 10 \\ &= 11 \text{ rem } 10 \end{aligned}$$
- Test the answer.

2. Show your calculations in a writing book or on a piece of paper.

- a. $480 \div 60 =$
- b. $568 \div 60 =$
- c. $990 \div 60 =$
- d. $847 \div 60 =$
- e. $605 \div 60 =$

4. Show your calculations in a writing book or on a piece of paper.

- a. $287 \div 70 =$
- b. $465 \div 70 =$
- c. $625 \div 70 =$
- d. $890 \div 70 =$
- e. $912 \div 70 =$

- You need to go and practice some of these sums at home.

Term 4

Example 3:

$$\begin{array}{r} 3 \quad 3 \quad \text{rem } 15 \\ 2 \quad 5 \overline{)8 \quad 4 \quad 0} \\ \quad - 7 \quad 5 \quad 0 \\ \quad \quad 9 \quad 0 \\ \quad \quad - 7 \quad 5 \\ \quad \quad \quad 1 \quad 5 \end{array}$$

6. Say in each case whether there is a remainder or not, and if there is, then what it is.
Show all your calculations in a writing book or on a piece of paper.

a. $338 \div 13 =$

b. $460 \div 26 =$

c. $873 \div 58 =$

d. $814 \div 37 =$

e. $960 \div 28 =$

f. $927 \div 63 =$

7. There are 678 books in the shop. The shop owner packed them 20 in a box. How many boxes does he need?

How fast can I calculate?

How fast can you do the sums below?

$$200 \quad \boxed{\div} \quad \boxed{2} \quad \boxed{\div} \quad \boxed{10} \quad \boxed{\div} \quad \boxed{5} \quad \boxed{\div} \quad \boxed{2} \quad =$$

$$128 \quad \boxed{\div} \quad \boxed{2} \quad \boxed{\div} \quad \boxed{2} \quad \boxed{\div} \quad \boxed{2} \quad \boxed{\div} \quad \boxed{2} \quad =$$

$$\boxed{\div} \quad \boxed{\div} \quad \boxed{\div} \quad \boxed{\div} \quad \boxed{\div} \quad =$$

Make your own sum.

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

Factors

124

A factor is a whole number that divides exactly into another whole number.
For example, what are the factors of 12? Try making 12 in different ways.

Your answer should look like this:
 $12 \times 1 = 12$
 $6 \times 2 = 12$
 $4 \times 3 = 12$

The full list of factors of 12 is 1, 2, 3, 4, 6, and 12.

Some numbers have many factors, so it is a good idea to work in an organised way or you may miss some.

Don't forget to include 1 and the number itself in your list.

Example:

Factors of 48. Start with 1 and break up your number into pairs of numbers.

1×48 , 2×24 , 3×16 , 4×12 and 6×8 all make 48.

Write the list in order: 1, 2, 3, 4, 6, 8, 12, 16, 24, 48.

1. Complete the following:

a. Factors of 36.

Write the list in order: _____

b. Factors of 18.

Write the list in order: _____

c. Factors of 72.

Write the list in order: _____

d. Factors of 54.

Write the list in order: _____

e. Factors of 16.

Write the list in order: _____

f. Factors of 84.

Write the list in order: _____

g. Factors of 30.

Write the list in order: _____

h. Factors of 44.

Write the list in order: _____

i. Factors of 63.

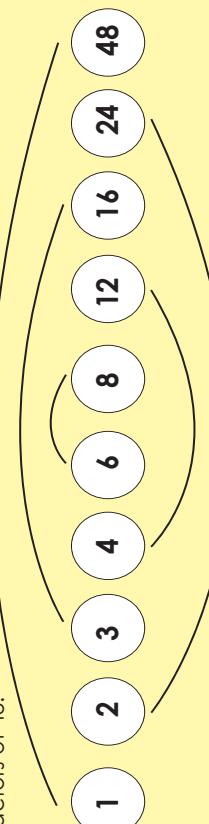

Write the list in order: _____

j. Factors of 108.

Write the list in order: _____

2. Look at the example. Do the same with the numbers below.

Factors of 48:

Factors of 48. Start with 1 and break up your number into pairs of numbers.

1×48 , 2×24 , 3×16 , 4×12 and 6×8 all make 48.

Write the list in order: 1, 2, 3, 4, 6, 8, 12, 16, 24, 48.

1. Complete the following:

a. **27**

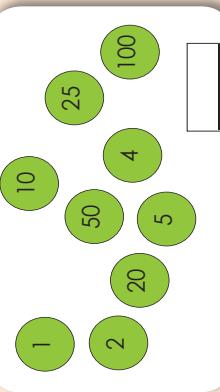

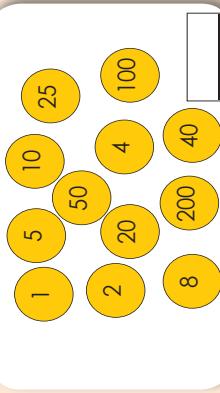

b. **33**

c. **28**

d. **45**

e. **66**

These are the factors of ...

More factors

125

Factors of 12: Look at the drawings and discuss it.

12

$$1 \times 12 = 12 \text{ or } 12 \div 1 = 12$$

$$3 \times 4 = 12 \text{ or } 12 \div 4 = 3$$

6

$$6 \times 2 = 12 \text{ or } 12 \div 6 = 2$$

The factors of 12 are 1, 2, 3, 4, 6 and 12.

1. In how many ways can you draw groups of circles to show the factors of each of the numbers below?

8	16
25	28
17	

Term 4

2. Fill in the missing numbers in the table below. Colour the following numbers, and then write down their factors (other than 1 and itself). Say if its only factors are itself and 1.

	2, 3, 4, 6
a. 12 in red	
b. 15 in green	
c. 35 in blue	
d. 50 in orange	
e. 81 in pink	
f. 100 in brown	

x	1	2	3	4	5	6	7	8	9	10
1										
2

8										
9										
10										

Factor quiz
Which number between 1 and 50 has the most factors?

148

149

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

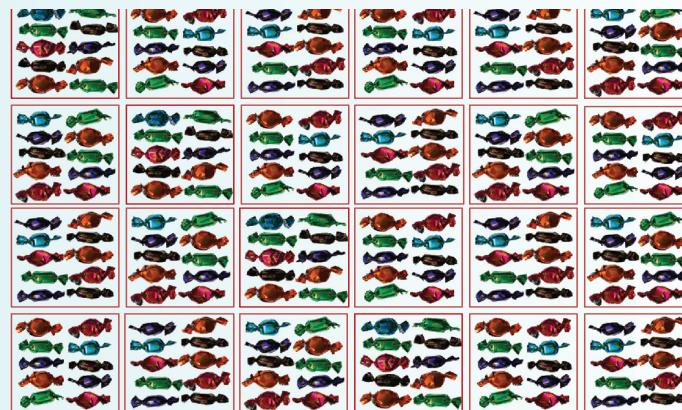

Date:

Division problem solving

126a

Sam shares 253 sweets equally amongst 24 children.
How many sweets does each child get?

Sam shares 253 sweets equally amongst 24 children.
How many sweets does each child get?

Read and underline the question.

Circle the key words.

Circle the key numbers and hidden numbers.

Are there any hidden numbers? (No)

Solve by using pictures/ drawings.

Sweets left over.

1. Solve the following problems:

- a. There are 328 learners in the Intermediate Phase. There are 8 classes.
About how many children are there in each class?

- Sam shares 253 sweets equally amongst 24 children. How many sweets does each child get?
- b. Jabu buys 376 sweets and packs them in 18 packets. How many sweets will be in each packet? How many remainders will there be?

- c. James and his class decided to go to a restaurant for their end of year party. There are 23 learners in the class, including James. The bill was R575. How much did each learner have to pay?

- d. Father has a 551 m long rope. He needs 29 equal pieces. How long will each piece of rope be?

Write a number sentence.

Show all your calculations.

Check your answers

$$253 \div 24 = \boxed{ }$$

$$\begin{array}{r} 10 r 13 \\ 24 \overline{)253} \\ -240 \\ \hline 13 \end{array}$$

$$24 \times 10 = 240 + 13 = 253.$$

126b

Division problem solving continued

- e. Bongi has 654 marbles. She has to share them equally amongst 32 learners. How many marbles will each learner get?

- i. Lucy rides in a long distance bicycle race of 855 km. There are 45 places where she has to check in throughout the race. If all the checkpoints are the same distance apart, how far is it from one point to the next one?

f. James bought 828 litres of water for 34 people. How much water will each person get?

Term 4

- g. A large supermarket has 16 tills. During a Saturday special 736 customers were served. Assuming all cashiers helped the same number of customers, how many customers were helped per till?

- h. Adam receives 984 cans of cool drink that he has to divide amongst 42 charities. How many cans will each charity receive?

- j. Buhle has a roll of string that is 546 m long. She has to divide it into 27 parts in order to complete a project. How long will each piece of string be?

- k. There are 728 books. We have to make 26 stacks of books. How many books will there be in each stack?

Sharing stickers

Max has collected 843 stickers and decides to share them amongst his 24 classmates. How many stickers will each learner receive?

Perimeter, length and width

127

What is the distance around the table?

10 cm

1. Complete the table.

Rectangle	Perimeter in units	Length	Width	Perimeter in:
30 mm	10 units			mm: <input type="text"/> cm: <input type="text"/>
200 mm	20 mm			mm: <input type="text"/> cm: <input type="text"/>
5 cm	7 cm			mm: <input type="text"/> cm: <input type="text"/>
100 mm	50 mm			mm: <input type="text"/> cm: <input type="text"/>
130 mm	40 mm			mm: <input type="text"/> cm: <input type="text"/>

2. Calculate the perimeter. Make a sketch to help you.

Length: 8 units Width: 4 units

Perimeter in mm: cm:

Length: 7 units Width: 5 units

Perimeter in mm: cm:

3. Make a drawing to show your answer.

- a. The length is 10 cm and the width is 5 cm. What is the perimeter?

- b. The length is 20 cm and the width is 10 cm. What is the perimeter?

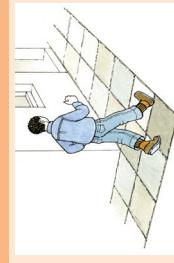

c. The perimeter is 24 cm. What can the length and width be. Give 3 possible answers.

Length:
Width:

Perimeter at home

Find out what is the perimeter of your stand.

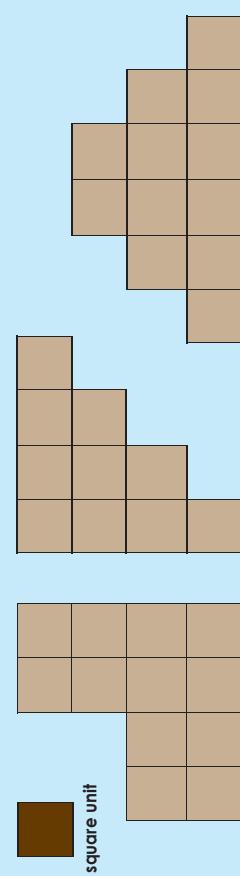

You should give your perimeter in the number of steps you take.

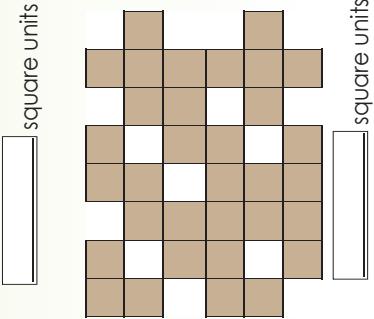

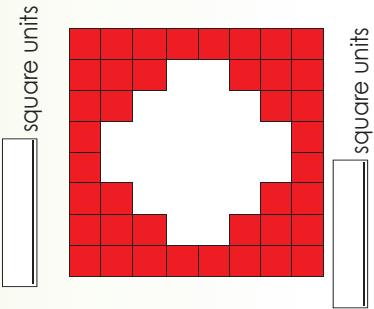

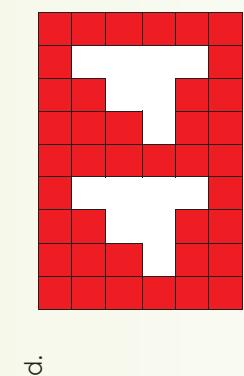

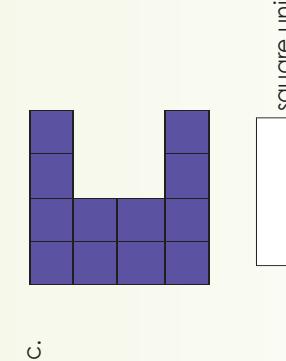

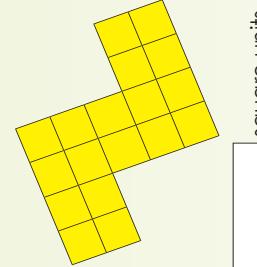

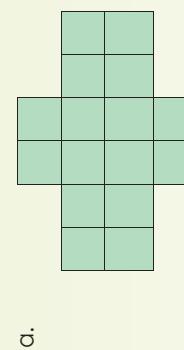

Square units

128

How many square units will it take to cover these shapes?

1. How many square units will it take to cover these coloured shapes?

2. Draw the following. Your drawings should all be different from each other.

A rectangle with 8 square units	A rectangle with 8 square units	A rectangle with 8 square units

A rectangle with 16 square units	A rectangle with 16 square units	A rectangle with 16 square units

A rectangle with 30 square units	A rectangle with 30 square units	A rectangle with 30 square units

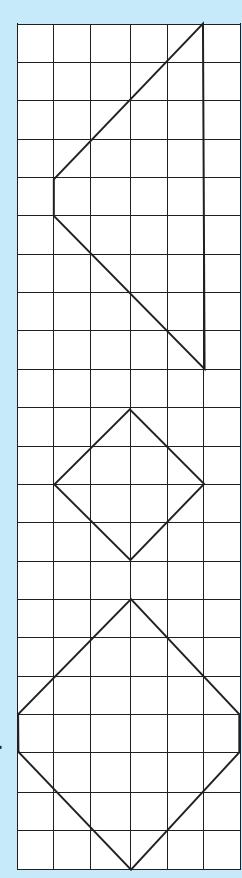

Date:

157

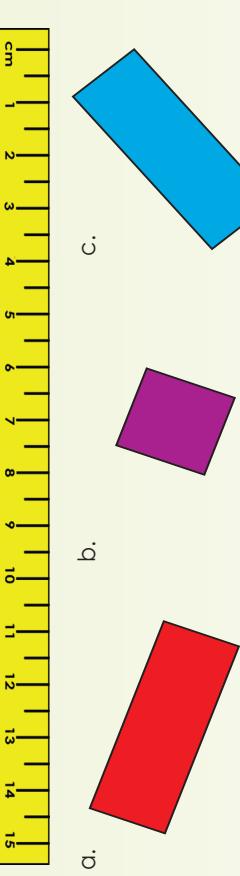

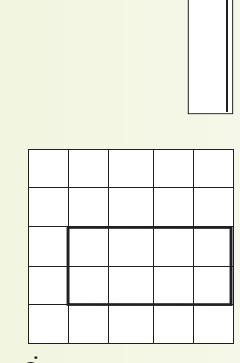

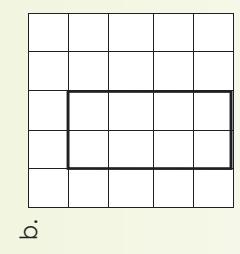

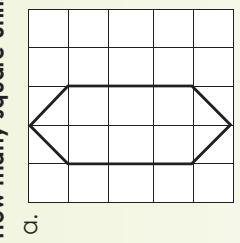

Area and perimeter

129

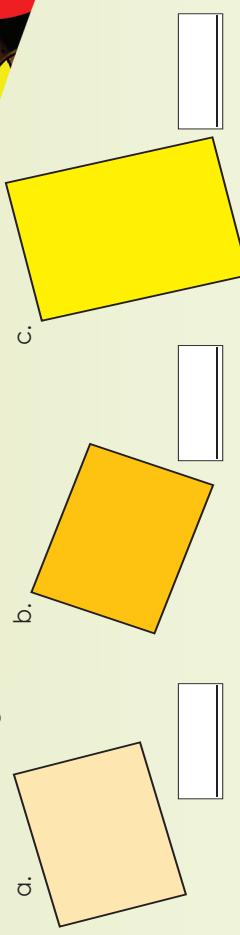

Count the square units

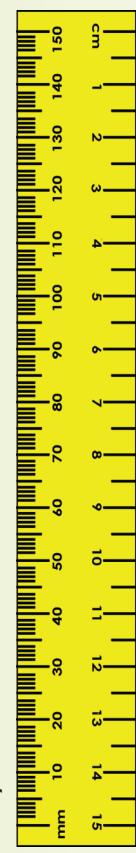

1. How many square units is each shape?

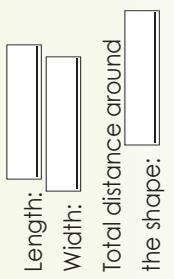

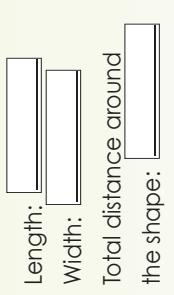

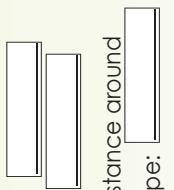

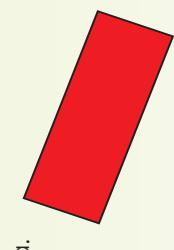

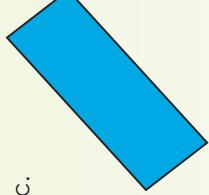

2. Measure the length and the width of the sides.

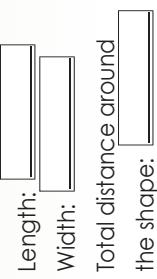

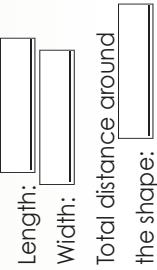

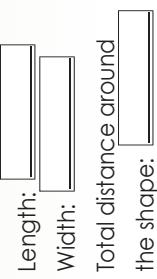

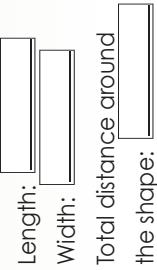

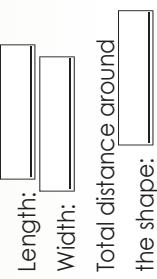

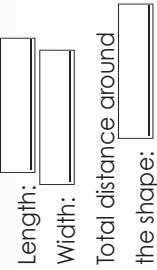

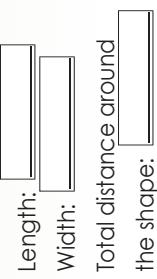

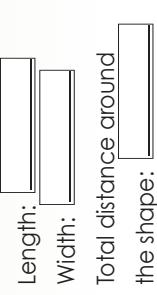

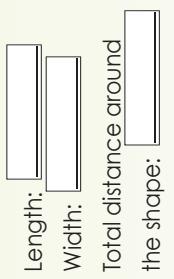

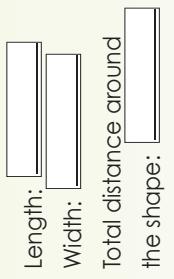

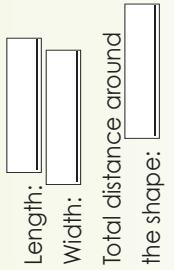

3. Use your ruler and measure the sides of the shapes. Give your answer in mm and cm.

Volume

130

How many cubes would you need to fill this box?

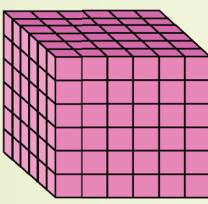

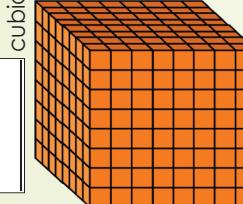

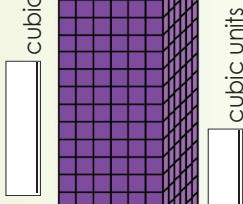

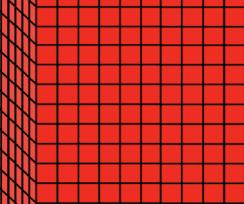

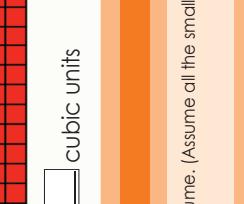

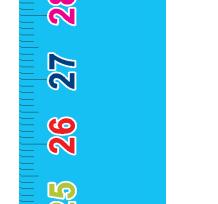

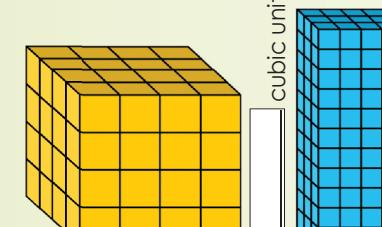

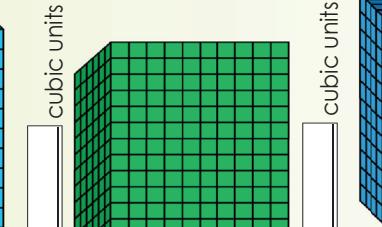

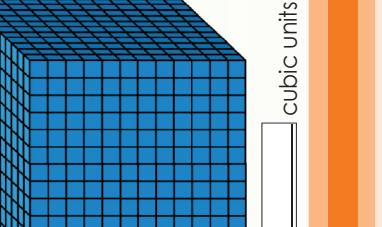

1. Answer the following questions:

- Place cubes in the first layer. How many cubes are in this layer? _____
- How many cubes are in the:
 2nd layer? _____
 3rd layer? _____
 4th layer? _____
 5th layer? _____
 6th layer? _____
 7th layer? _____
 8th layer? _____

2. How many cubes will fill the whole box?

- Calculate it using addition.
- Calculate it using multiplication.

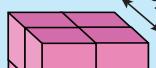

3. How many cubic units are there?

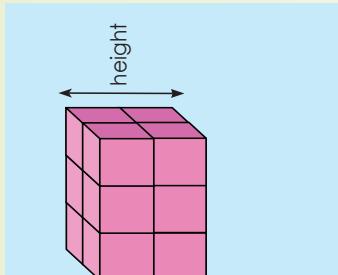

-  _____ cubic units
-  _____ cubic units
-  _____ cubic units
-  _____ cubic units
-  _____ cubic units
-  _____ cubic units
-  _____ cubic units
-  _____ cubic units
-  _____ cubic units

In order
List the objects above in order from the smallest to the biggest volume. (Assume all the small blocks have the same size.)

More volume

131

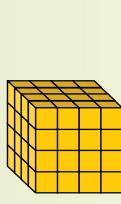

- What is the length, width and height of this block?**
- a.  length =
width =
height =
- b.  What is the length of the block?
What is the width of the block?
What is the height of the block?

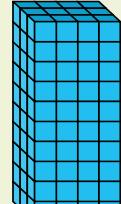

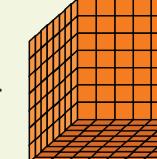

- 1. Show the length, width and height of each block.**
- a.  What is the width of the block?
What is the length of the block?
What is the height of the block?
- b.  What is the width of the block?
What is the length of the block?
What is the height of the block?

What is the length of the block?
What is the height of the block?

Term 4

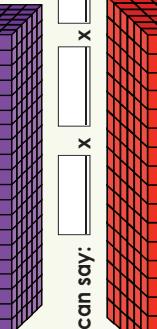

2. Without counting each unit say how many units there are.

- a.  We can say: x x = cubic units

- b.  We can say: x x = cubic units

- c.  We can say: x x = cubic units

- d.  We can say: x x = cubic units

- e.  We can say: x x = cubic units

- Length = units
Width = units
Height = units
- Length = units
Width = units
Height = units
- Length = units
Width = units
Height = units

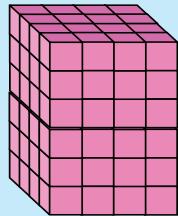

- Length = units
Width = units
Height = units
- Length = units
Width = units
Height = units
- Length = units
Width = units
Height = units

What will the length, width and height of an object with 240 cubic units be?

More about volume

132

Talk about these three solutions:

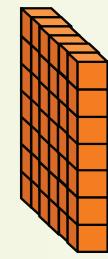

The length equals to **4** units.
The width equals to **4** units.
The height equals to **4** units.

Solution 1:
 $4 \times 4 \times 4 = 64$
= 64 cubic units.

Solution 2:
 $4 + 4 + 4 + 4 + 4 + 4 + 4 + 4 = 32$
= 96 cubic units.

Solution 3:
 $6 \times 6 \times 6 = 216$
= 24 cubic units.

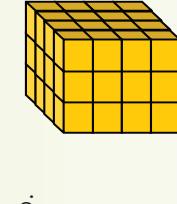

1. Give three ways to calculate the cubic units of the object.

Where will you find a _____?

- a. Triangle
- b. Square
- c. Rectangle
- d. Pentagon
- e. Hexagon
- f. Heptagon
- g. Cube
- h. Triangular pyramid
- i. Triangular prism
- j. Square pyramid

2. Draw the following on the grid:

- a. Triangle in E 1
- b. Square in F7
- c. Pentagon in B2
- d. Rectangle in A9
- e. Hexagon in G3
- f. Heptagon in H10
- g. Cube in D5
- h. Triangular prism in C3
- i. Triangular pyramid in J4
- j. Square pyramid in I8

**3. Draw the path on this map by following the instructions a to k.
We will start the first steps for you.**

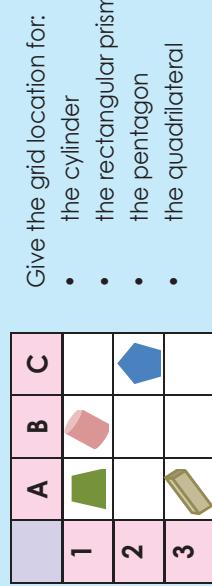

- a. Start on B2. Go 2 blocks to the right. You will be on D2 now.
- b. Go one down. You are in now
- c. Go three to the right. You are in now
- d. Go two up. You are in now.
- e. Go three to the right. You are in now
- f. Go eight down. You are in now.
- g. Go nine to the left. You are in now.
- h. Go one down. You are in now.
- i. Go five to the right. You are in now.
- j. Go four up. You are in now.
- k. Go five to the left. You are in now.

Where did Dudu go?

	Orange	Apple	Grapes
Pie	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Chips	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Juice	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If Dudu has grapes and pies, where did she go?
- If Dudu has orange and chips, where did she go?
- Dudu collected an apple and the juice, where did she go?
- Dudu collected apple and juice, where did she go?
- If Dudu has grapes and chips, where did she go?
- If Dudu has orange and juice, where did she go?

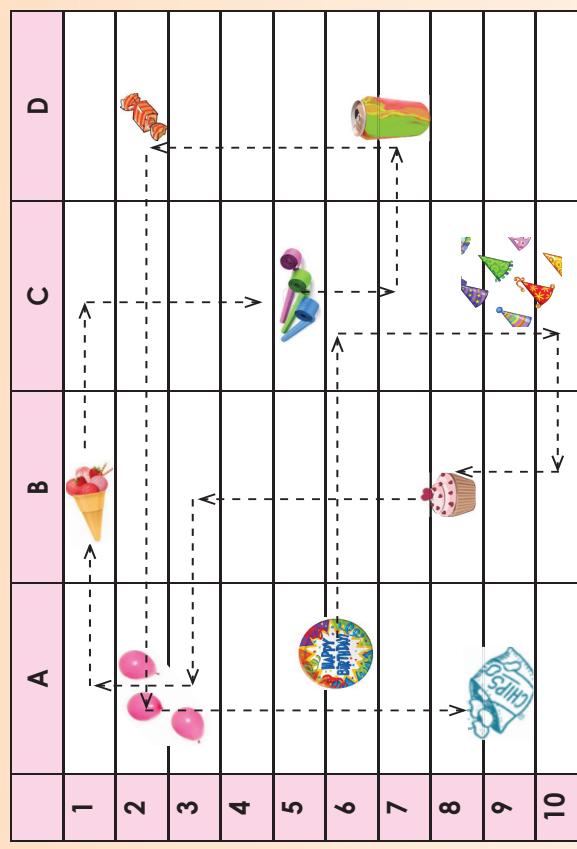

Position and direction: following direction

1. Follow the instructions below. We have shown the first 3 moves.

	A	B	C	D	E	F	G	H	I	J
1										
2										
3										
4										
5										
6										
7

Tessellations

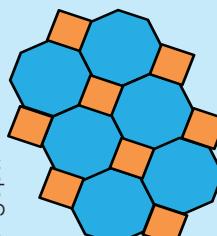

135

A **Tessellation** (or **Tiling**) is when you cover a surface with a pattern of flat shapes so that there are no overlaps or gaps.

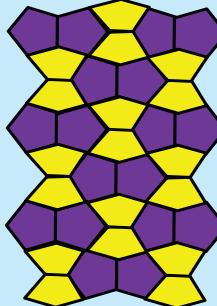

Examples:

rectangles

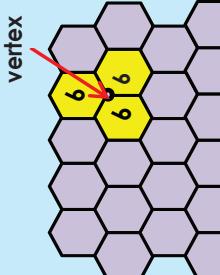

octagons and squares

different pentagons

To name a tessellation, look at a vertex and count how many polygons are joined there. For each of these polygons, write down how many sides it has.
So, for example here there are 3 polygons joined at the vertex. They each have 6 sides. So you write 6.6.6.
So this is called a "6.6.6" tessellation.

vertex

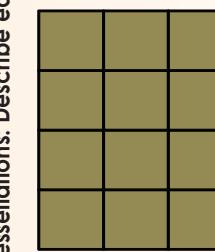

1. There are only 3 regular tessellations: Describe each, we did one for you.

Regular Tessellations:

Term 4

A **regular tessellation** is a pattern made by repeating a regular polygon.

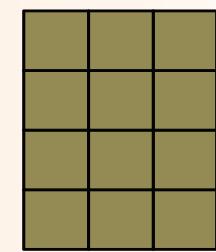

2. Which one of the following types of regular polygons cannot be used to make a regular tessellation? Circle the correct answer/s.

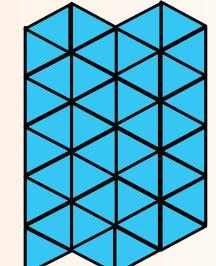

c.

b.

c.

a.

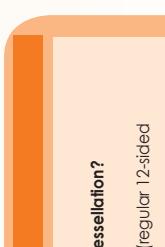

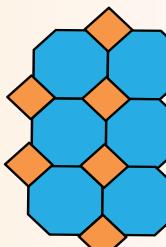

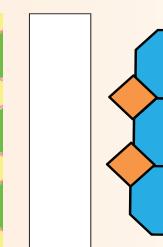

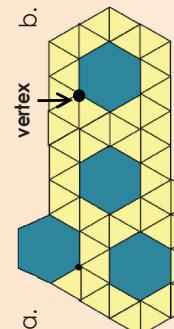

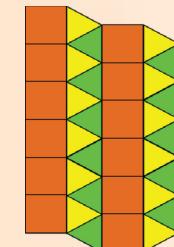

3. Which one of the following is not a regular tessellation?

a. 3.3.3.3.3.3 b. 4.4.4.4 c. 6.6.6 d. 8.8.8

Semi-regular Tessellations:

A semi-regular tessellation is made of two or more regular polygons. The pattern at each vertex must be the same!

4. There are only 8 semi-regular tessellations. Name and describe them. We have done the first one for you.

Sorting out tessellations

Circle the correct answer/s.

• Which one of the following combinations cannot be used to make a semi-regular tessellation?

- a. equilateral triangles and squares
- b. equilateral triangles and hexagons
- c. equilateral triangles and octagons
- d. equilateral triangles and dodecagons (regular 12-sided polygons)

Which one of the following is not a semi-regular tessellation?

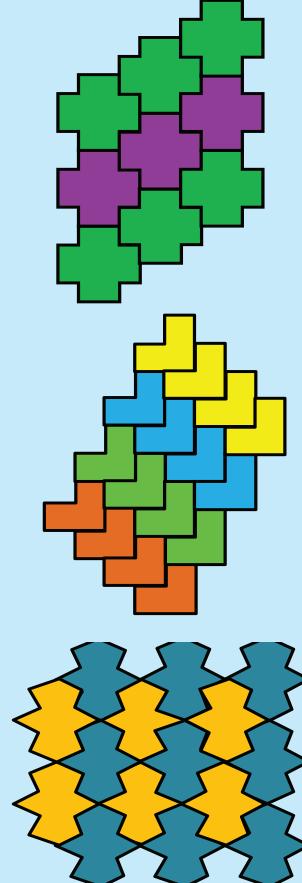

- a. 3.3.3.3.6 b. 3.4.6.3.4 c. 3.3.3.4.4 d. 3.3.4.3.4

Translation and tessellations

136

Translation

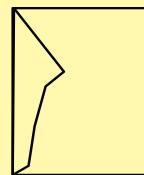

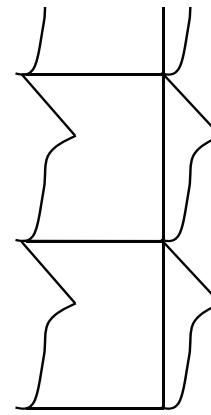

A translation is a shape that has simply been slid across the paper and drawn again in another place. The translation shows the geometric shape in the same alignment as the original; it does not turn or flip.

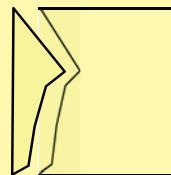

Practical activity

Trace the first pattern on a piece of paper. You can use recycled paper or newspaper.

1. Use the pieces cut out on the left hand side, as a stencil, to create your own translation (slide) pattern.

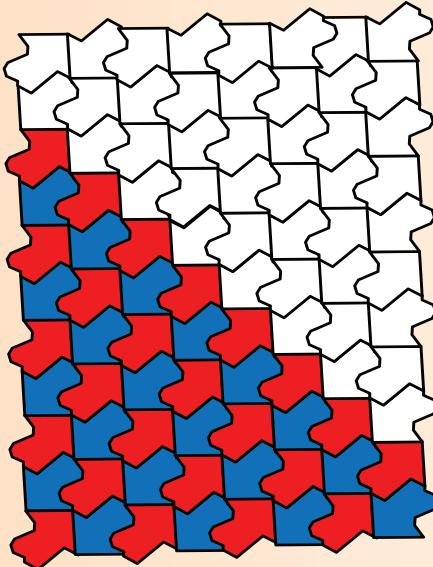

Cut the top part. We call this the 'nibble'.

Paste the nibble beneath the part you cut from.

2. Complete the translation pattern by colouring it.

Term 4

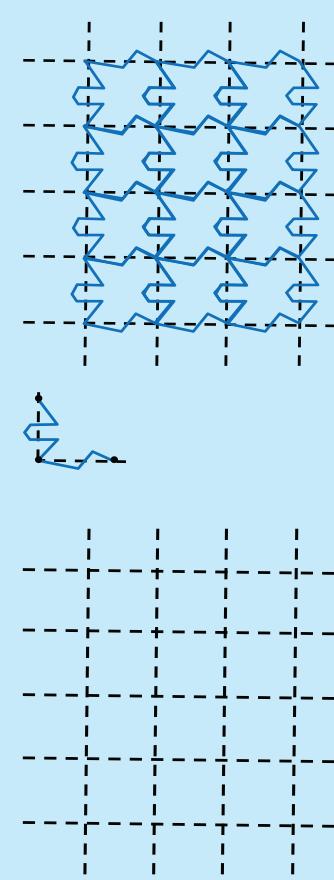

Maurits Cornelis Escher (1898–1972) is one of the world's most famous graphic artists. His art is enjoyed by millions of people all over the world, as can be seen on the many web sites on the internet. He is most famous for graphics such as transformation prints.
The simplest example of an Escher tessellation is based on a square. Start with a simple geometric pattern, like a square a square grid, and then change that square shape into another one that still fits more or less over the original square grid.

Step 3

Step 2

Step 1

My own creation

Try one like this on a sheet of grid paper..

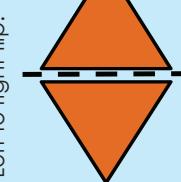

172

173

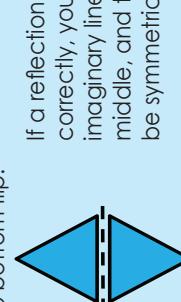

Reflections and tessellations

A reflection is a shape that has been flipped. They can be flipped directly to the left or right or flipped from the top or bottom.

Left to right flip.

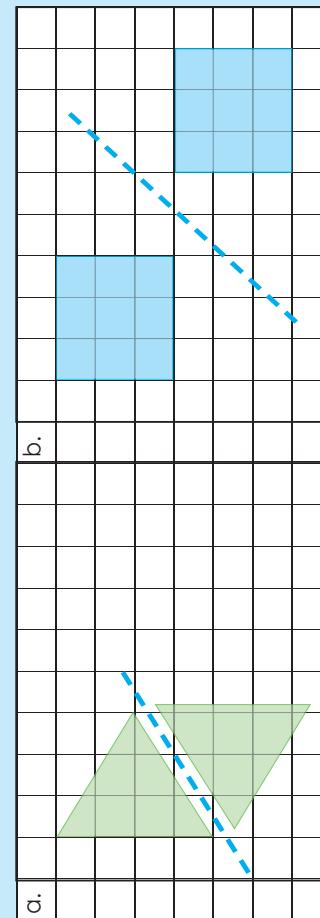

Top to bottom flip.

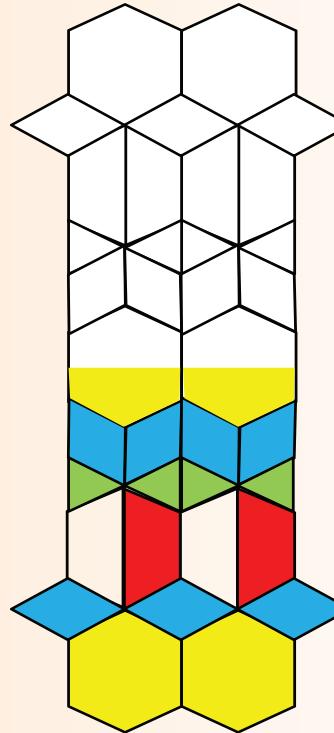

If a reflection has been done correctly, you can draw an imaginary line right through the middle, and the two parts will be symmetrical "mirror" images.

1. Are these lines of reflection? Why or why not?

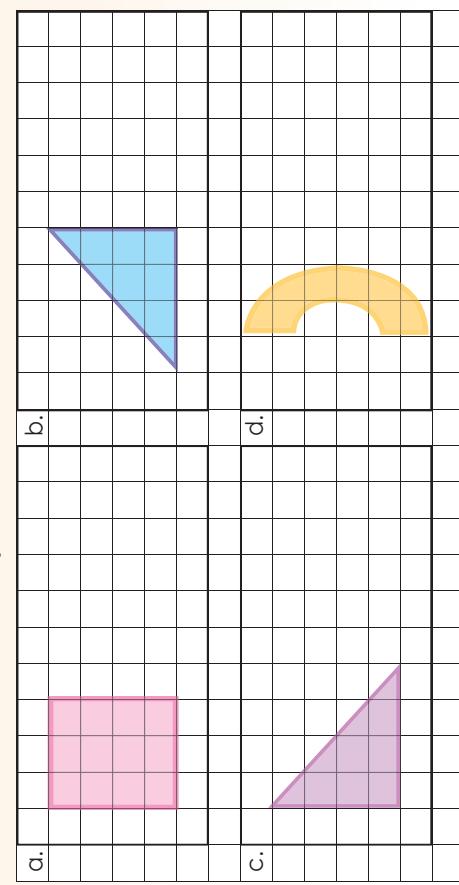

- a. Describe why it is a reflection tessellation.

4. Complete this reflection tessellation.

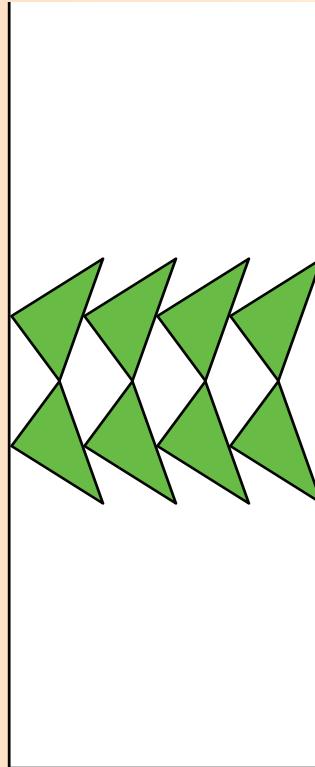

- a. Describe why it is a reflection tessellation.

2. Draw the reflection of the shape and show the line of reflection.

3. Here are examples of tessellations using reflection. Extend the pattern and describe it.

Sign:

Let's tessellate

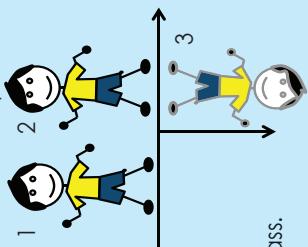

Create your own tessellation pattern using reflection (flipping).

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

Glide reflection

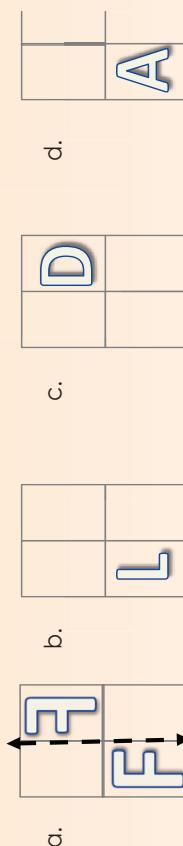

138

- A translation and a reflection can be performed one after the other to produce a transformation known as a **glide reflection**.
- The man is the **pre-image**.
 - He was then **translated (slid)** to the right.
 - He translated image was then **flipped** (top to bottom) over the reflection line.
 - The third man is the reflected **image** of the man.
 - This represents a **glide reflection**.

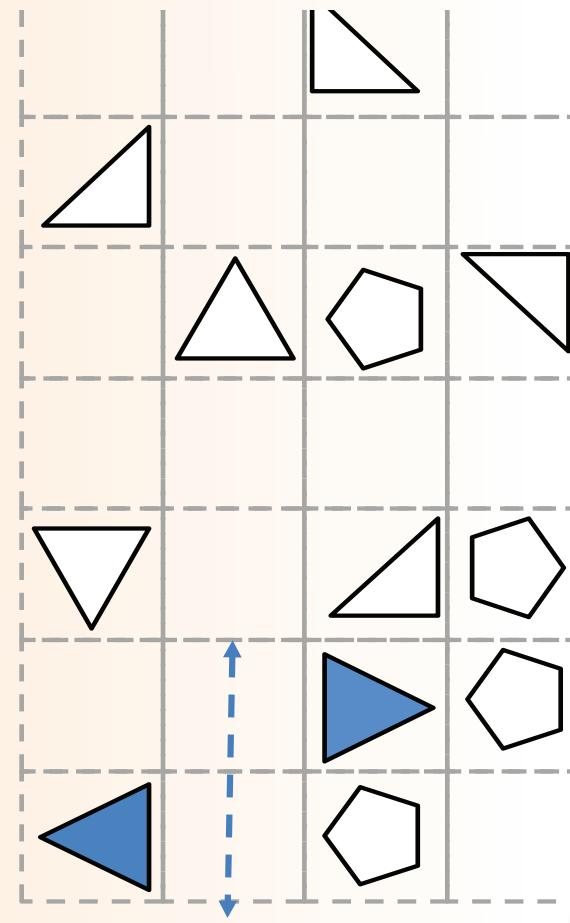

Go outside and do this glide reflection by lying on the grass.

1. Show glide reflection using letters of the alphabet.

2. Colour the glide reflected image the same colour. We did the first one for you.
Show the line of reflection in the same colour.

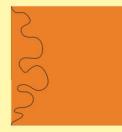

Practical activity

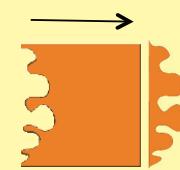

Cut a square from a piece of paper.

Copy this design on your square.

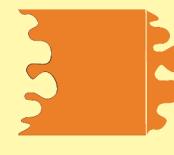

Cut the piece and slide (translate) it across to the opposite side of the square. Flip (reflect) the cut piece.

Flip (reflect) the cut piece.

Use this piece to create your own tessellation pattern.

Create a reflection tile

Create your own slide reflection tile.

3. Use the pieces cut out on the left hand side, as a stencil, to create your own tessellation pattern. Remember this pattern (tile) needs to be rotated or flipped as it is traced.

Date:

177

Term 4

176

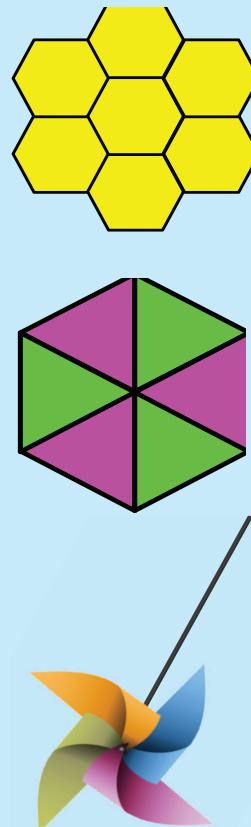

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

Rotations and tessellations

Rotation

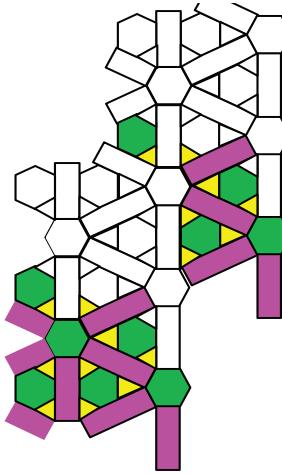

Rotation is spinning the pattern around a point, rotating it. A rotation, or turn, occurs when an object is moved in a circular fashion around a central point which does not move.

A good example of a rotation is one "wing" of a pinwheel which turns around the centre point. Rotations always have a centre, and an angle of rotation.

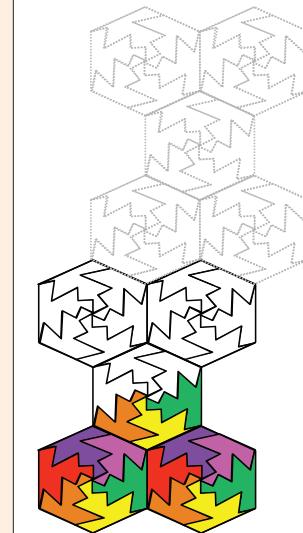

Term 4

2. Complete and extend the rotational tessellation pattern.

3. Complete and extend the rotational tessellation pattern.

Do another tessellation

Create your own tessellation pattern using rotation.

178

179

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

Geometric patterns

140

What will the next pattern be?

1. Write down the numbers in each pattern. Draw the next pattern:

e.

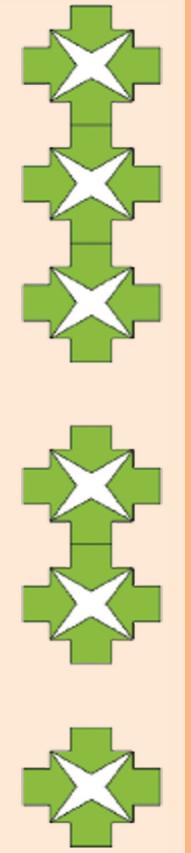

f.

g.

h.

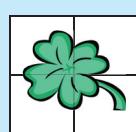

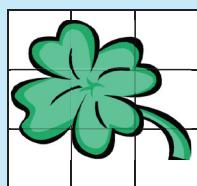

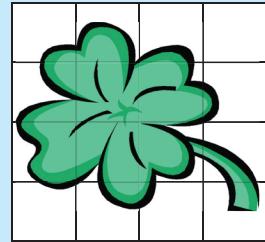

i.

Look at the pattern below, design your own. Add an African touch.

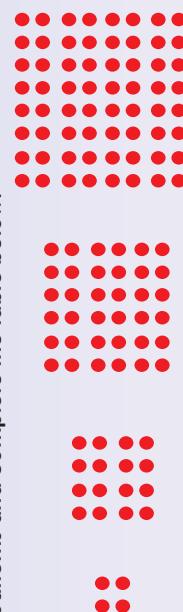

More geometric patterns

141a

1. Look at the patterns and complete the table below.

b.

Pattern	1	2	3	4	5	6	7	8	9	10
Dots	4	16								

c.

Pattern	1	2	3	4	5	6	7	8	9	10
Dots										

d.

Pattern

1	2	3	4	5	6	7	8	9	10
Dots									

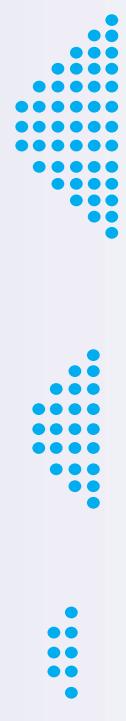

e.

Pattern

1	2	3	4	5	6	7	8	9	10
Dots									

f.

Pattern

1	2	3	4	5	6	7	8	9	10
Dots									

My own pattern

Now you know what a growing pattern is. Create a pattern and give it to your friend to solve.

Complete the pattern.

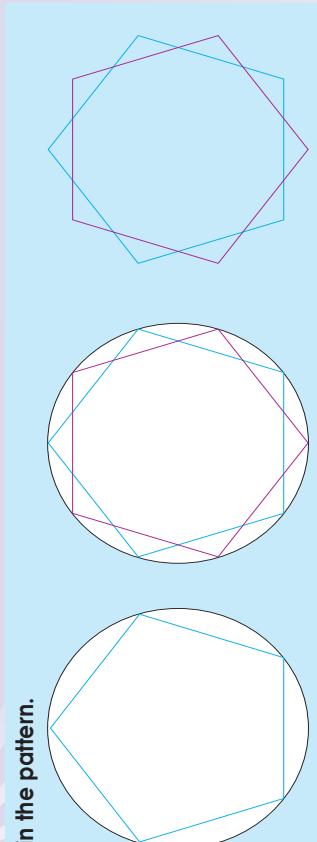

Pattern

1	2	3	4	5	6	7	8	9	10
Dots									

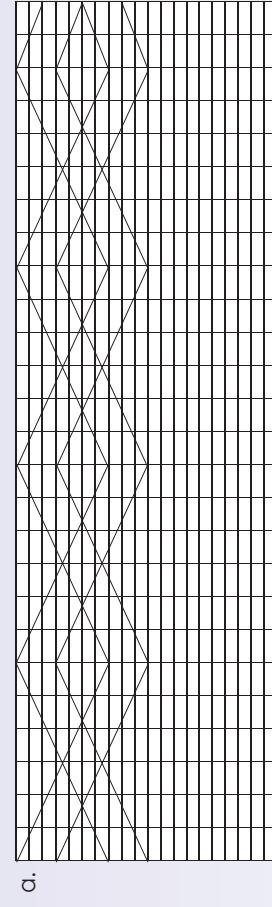

Even more geometric patterns

141b

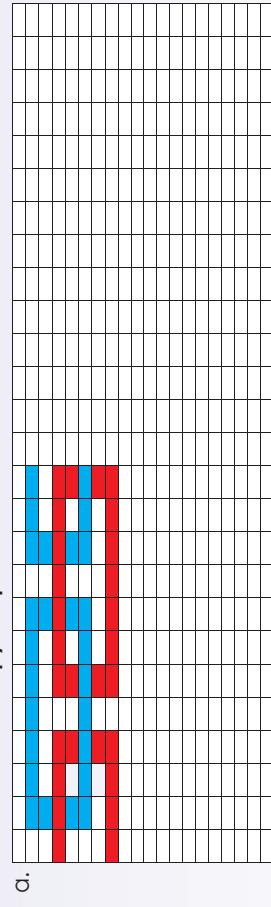

Explain the pattern.

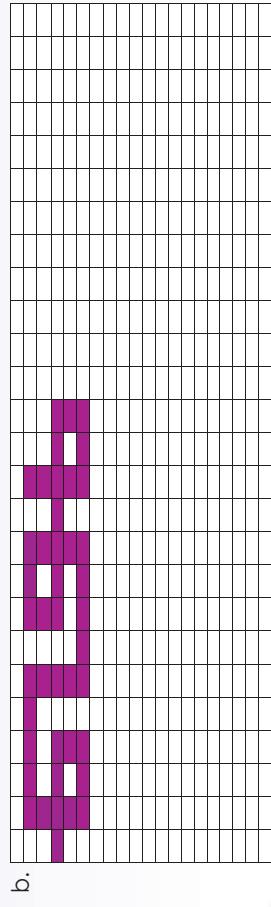

1. Copy the pattern.

2. Extend and then copy the pattern.

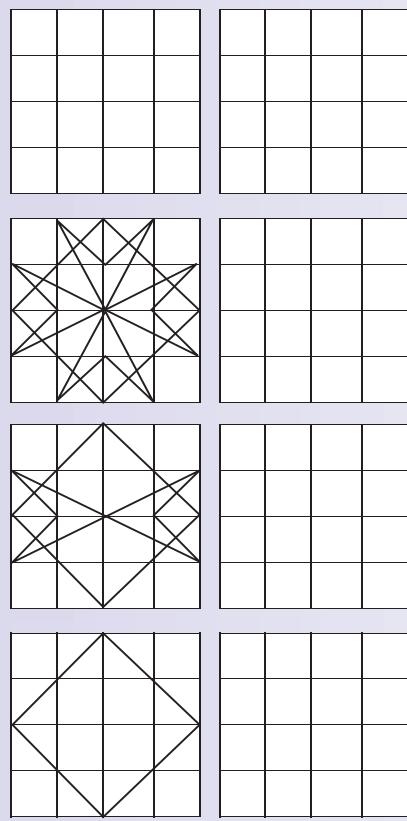

a.

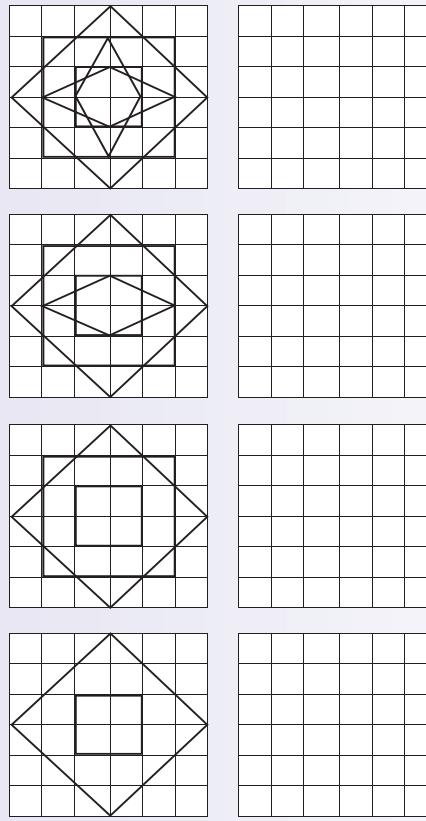

b.

3. Draw the next pattern in the top row. Then copy all the patterns.

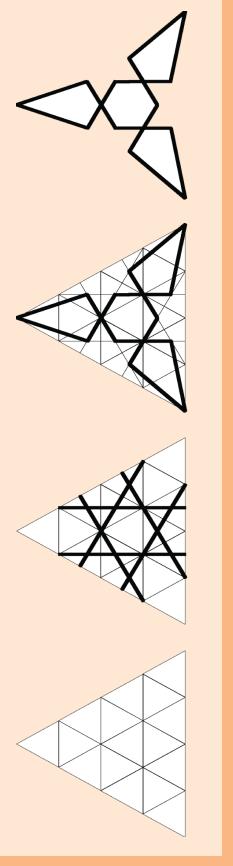

4. Draw the next pattern in the top row. Then copy all the patterns.

Pattern copying

Copy the pattern.

184

185

Properties of numbers

142

Quick recall. How fast can you answer the following?

$1 + 2 =$	$1 \times 2 =$	$5 \times 3 =$	$8 + 2 =$	$4 \times 2 =$	$6 + 2 =$
$7 \times 2 =$	$7 \times 3 =$	$6 \times 2 =$	$9 + 3 =$	$2 \times 3 =$	$5 + 3 =$
$4 \times 3 =$	$2 + 2 =$	$8 + 3 =$	$8 \times 2 =$	$3 + 2 =$	$5 \times 2 =$
$3 \times 2 =$	$1 \times 3 =$	$9 \times 3 =$	$2 \times 2 =$	$3 + 3 =$	$9 \times 2 =$
$9 + 2 =$	$8 \times 3 =$	$5 + 2 =$	$4 + 3 =$	$6 \times 3 =$	$4 + 2 =$

1. Complete the following. The example will guide you.

a. $4 + 3 = 3 + 4$	$40 + 30 = 30 + 40$	$400 + 300 = 300 + 400$
b. $6 + 5 = 5 + 6$	$60 + \boxed{5} = 50 + 60$	$600 + 500 = 500 + \boxed{6}$
c. $9 + 2 = 2 + \boxed{9}$	$90 + 20 = \boxed{20} + 90$	$900 + \boxed{200} = 200 + \boxed{900}$
d. $7 + 1 = \boxed{1} + 7$	$70 + \boxed{10} = 10 + 70$	$700 + \boxed{100} = 100 + 700$
e. $4 + 8 = 8 + \boxed{4}$	$\boxed{4} + \boxed{8} = \boxed{8} + \boxed{4}$	$\boxed{400} + \boxed{800} = \boxed{800} + \boxed{400}$

2. Look at the first example. Make your own drawings to show this.

a.			$3 \times 5 = 5 \times 3$	$4 \times 2 = 2 \times 4$
b.				$4 \times 2 = 2 \times 4$
c.				$6 \times 3 = 3 \times 6$
d.				$7 \times 1 = 1 \times 7$
e.				$8 \times 2 = 2 \times 8$
f.				$10 \times 4 = 4 \times 10$

3. Complete the following:

a. $2 \times (3 \times 4) = (2 \times 3) \times 4$

$$2 \times 12 = 6 \times \boxed{}$$

b. $4 \times (3 \times 2) = (4 \times 3) \times 2$

$$\boxed{} = \boxed{}$$

c. $1 \times (3 \times 6) = (1 \times 3) \times 6$

$$\boxed{} = \boxed{}$$

d. $5 \times (1 \times 4) = (5 \times 1) \times 4$

$$\boxed{} = \boxed{}$$

e. $6 \times (2 \times 3) = (6 \times 2) \times 3$

$$\boxed{} = \boxed{}$$

Play Sudoku

Fill in the empty small squares with numbers between 1 and 9. You can only use each number once in each full row and each full column. You can only use each number once in each coloured block.

6	1	4						
4			3				5	4
3	9			7				7
2	6				8		1	
8			2			5		5
		8	5	3				
		7	1			6	5	1

Basic operations

143a

Quick recall:

$10\ 000 + 1 =$	$50\ 000 - 4\ 000 =$	$70\ 000 - 60 =$
$200 \times 40 =$	$150 \times 20 =$	$5\ 000 \div 5 =$
$70\ 000 - 600 =$	$40\ 000 + 9 =$	$100 \times 60 =$
$6\ 400 \div 80 =$	$8\ 400 \div 70 =$	$5\ 600 \div 40 =$
$60\ 000 + 100 =$	$150 \times 30 =$	$74\ 000 + 900 =$

1. Work these out in your head.

- a. $15 + 19 =$
- b. $7 \times 6 =$
- c. $21 + 16 =$
- d. $480 \div 10 =$
- e. $30 \times 5 =$
- f. What is the remainder if 70 is divided by 6?
- g. What is 50 less than 4 times a thousand?

2. Tick (✓) the correct answer.

a. Another word for addition is:

- i. subtraction
- ii. product
- iii. plus

b. Minus means the same as:

- i. subtraction
- ii. product
- iii. divide

c. A hundred thousand has zeros.

- i. 4
- ii. 5
- iii. 6

d. A hundred thousand is a digit number.

- i. 5
- ii. 6
- iii. 7

3. Calculate the following.

a. $150 \div 30 =$

b. $120 \div 20 =$

c. $180 \div 60 =$

d. $140 \div 70 =$

e. $210 \div 30 =$

f. $240 \div 60 =$

4. Match column A with column B.

A

- a. Addition
- b. Subtraction
- c. Multiplication
- d. Division

B

- i. Share
- ii. Product
- iii. Increase by
- iv. Decrease by

5. Fill in the correct symbol.

+ - ÷

a. 80 $40 = 3200$

b. $50\ 000$ $200 = 50\ 200$

c. $3\ 999$ $876 = 2\ 123$

d. 300 $30 = 10$

e. 250 $4 = 1\ 000$

f. $9\ 999$ $9\ 999 = 19\ 998$

6. Fill in the correct symbol and number.

+ - ÷

Start $1\ 000$ 5 200 500 $1\ 000$ $1\ 200$

600 100 400 500 200

250 50 250 500 100 End

7. Share 2 500 between 5.

i. 5
ii. 50
iii. 500

8. Share R60 000 between two people.

i. R600
ii. R30 000
iii. R40 000

Basic Operations Continued

143b

7. Compare the three columns.

$5 + 3 = 3 + \boxed{ }$	$5 + 3 = 3 + \boxed{ }$	$5 + 3 = 3 + x$
$8 \times 9 - 9 \times \boxed{ }$	$8 \times 9 - 9 \times \boxed{ }$	$8 \times 9 - 9 \times x$
$2 + (3 + 5) = (2 + \boxed{ }) + 5$	$2 + (3 + 5) = (2 + \boxed{ }) + 5$	$2 + (3 + 5) = (2 + x) + 5$

Term 4

12. Circle the statements that are true.

a. $37 \times 12 =$

- i. $(30+7) \times (10+2)$
- ii. $(37 \times 10) + (37 \times 2)$
- iii. $30 + 7 \times 10 + 2$
- iv. $37 \times 10 \times 2$

b. $14 + \boxed{ } =$

- i. $14 + \boxed{ }$
- ii. $14 \times \boxed{ }$
- iii. $\boxed{ } + 14$
- iv. $\boxed{ } - 14$

c. 12×16 is more than 10×16 . How much more?

- i. 10
- ii. 2
- iii. 32
- iv. 16

13. Which of the statements below are equivalent to?

a. $26 \times (6 \times 8) ?$

- i. $(26 \times 6) \times 8$
- ii. $26 \times 3 \times 2 \times 2 \times 2 \times 2$
- iii. $(26 \times 6) + (26 \times 8)$
- iv. $(10 - 2)(26 \times 8)$

b. $(23 \times 12) + (123 \times 0) =$

- i. $286 + 123$
- ii. $(23 \times 12) \times 0$
- iii. 276
- iv. 0

c. $12 \times (3 + 9)$

- i. $(12 \times 9) + (12 + 3)$
- ii. 12×12
- iii. $12 \times 3 \times 9$
- iv. 121

14. Write the number sentences for these story sums.

a. A man gives boxes of toys to a school. Each box has 548 toys. How many toys did the school receive? _____

b. A farmer shares 654 apples equally amongst 45 shops. How many does each shop get? _____

c. A man struggles to sell his farm house. He decreases the original price by R10 456. He sells his house for R85 787. What was the original price? _____

15. Write a story sum for the following number sentence.

a. $5 \times 36 - 88 =$

b. $873 \times 534 + 91 =$

Joint effort
Write a story sum and let your friend write the number sentence.

0 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

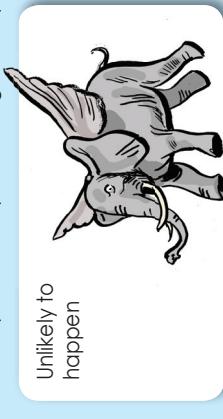

Probability

144

Talk about these pictures.

Probability is how likely something is to happen.

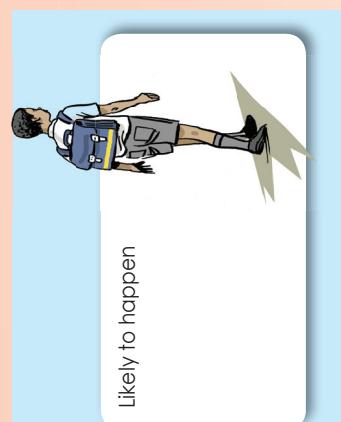

Unlikely to
happen

• [View details](#)

- b. What colour do you like the least on the die? _____

c. Ask your friend the same questions. What did she or he answer? _____

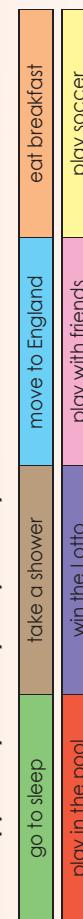

likely to happen

[1]: Answer: likely or unlikely to happen

- a. I will drive a car one day. _____
 - b. I can stay awake for 4 days. _____
 - c. I will play with my dog this afternoon. _____
 - d. I will buy a house tomorrow. _____
 - e. I will go to Europe this holiday. _____
 - f. I will sit down today. _____
 - g. The sun will shine next week. _____
 - h. This summer it will snow. _____
 - i. I will listen to music today. _____
 - j. I will go to bed tonight. _____

2. Something that is likely to happen to you today" and "Something that is not likely

Something that will likely happen to you today

Something that will not likely happen to you today.

192

3. Use the dice from Cut-out 6 or make your own from Cut-out 7.

- a. What colour do you like the most on the die?

b. What colour do you like the least on the die?

c. Ask your friend the same questions. What did she or he answer? _____

d. Roll the die. On what colour did it land? _____

e. Ask your friend to roll the die. On what colour did it land?

Term 4

a. What colour do you like the most on the die?

- 

b. What colour do you like the least on the die? _____

c. Ask your friend the same questions. What did she or he answer? _____

d. Roll the die. On what colour did it land? _____

e. Ask your friend to roll the die. On what colour did it land? _____
