

# Department of Basic Education Learner Performance Support Documentation focused on Curriculum and Assessment Support 2011-2017

**Department of Basic Education**  
**Learner Performance Support Documentation**  
**focused on Curriculum and Assessment**  
**Support**  
**2011-2017**

## Introduction

The purpose of this document is to highlight the provision of curriculum and assessment supporting materials for learners and teachers developed or approved by the Department of Basic Education and available online to support progressive learning and teaching. In some instances, policies and guideline booklets are attached to outline basic protocols to guide decisions and achieve improved outcomes. The materials are arranged according to specific themes, namely; the Annual National Assessments (ANA), the National Senior Certificate (NSC), the Curriculum Assessment Policy Statement (CAPS), the Workbooks, Mind the Gap (MTG) study guides and Thutong Education Resource Portal (Thutong) including all the e-learning resources under each theme. The documents referred to span from 2011 to 2017. This document is an update of the 2016 version.

The information from the themes in this document is organised in colour codes, ANA is highlighted in orange, NSC in green, CAPS in blue, Workbooks in grey, Mind the Gap(MTG) in pink and Thutong Portal in brown. They are also arranged in the order indicated above. The documents are also arranged in sub-categories from the first available version (for example 2011) to the latest version (2016 where possible). The purpose and definition of the themes are defined below as follows;

- The Department of Basic Education introduced the *Annual National Assessments* (ANA) nationally in 2011 to measure learner performance in Numeracy/Mathematics and Literacy/Language in public schools for Grade 1 -6 and Grade 9 learners from 2012. The ANAs are nationally standardised assessments that measure the skills and knowledge learners are expected to have acquired as a result of learning and teaching based on the curriculum. The purpose of ANA is captured in the Delivery Agreement as well as in the *Action Plan to 2014: Towards the Realisation of Schooling 2025*. In terms of these strategic documents, ANA is expected to have four key effects on schools: namely, expose teachers to better assessment practices, make it easier for districts to identify schools with the greatest need for assistance, encourage schools to celebrate outstanding performance; and empower parents with important information about their children's performance.

- The *National Senior Certificate* (NSC) examinations commonly known as “matric” have become an annual event of major public significance in South Africa. The NSC examinations are the exit examination Grade 12 learners complete to measure competencies learners are expected to have mastered over 12 years of schooling. The NSC is a requirement for enrolment in most higher education institutions, particularly universities. The NSC not only signifies the culmination of twelve years of formal schooling but the NSC examination is one of the key barometers to indicate the state of health of the education system. This examination which attracts attention from all sectors of society. The NSC stands on the shoulders of years of tradition and development in assessment since the first examination in 1858.

- The *National Curriculum and Assessment Policy Statement* (CAPS) is a single, comprehensive, and concise policy document, which replaces the Subject and Learning Area Statements, Learning Programme Guidelines and Subject Assessment Guidelines for all the subjects listed in the National Curriculum Statement Grades R - 12. CAPS form part of the *National Curriculum Statement Grades R-12*, which represents a policy statement for learning and teaching in South African schools and comprises the following:

- a) Curriculum and Assessment Policy Statements (CAPS) for all approved subjects

- b) National policy pertaining to the programme and promotion requirements of the National Curriculum Statement Grades R – 12; and

- c) National Protocol for Assessment Grades R – 12

The CAPS address the gaps and challenges that were identified in the National Curriculum Statements (NCS) thus facilitating improved understanding of the curriculum focus and direction by teachers and resultantly improved classroom practice.

- In response to concerns about the quality and effectiveness of textbooks and poor learner performance throughout the system, the DBE developed and delivered the first set of workbooks for Grade 1 to 9 in 2011 and Siyavula textbooks for Grade 10 to 12 in Mathematics and Physical Science. They are intended to assist teachers and learners directly in the classroom through the provision of worksheets; activities to reinforce Language and Literacy, Mathematics and Numeracy and Physical Science skills; provide teachers with a framework to monitor learner performance; provide lesson plans ;and pace curriculum coverage appropriately. The workbooks are organised into four worksheets per week, divided over eight weeks per term. All workbooks comply with the latest Curriculum Assessment Policy Statement (CAPS). For each year a learner (Gr1-9) will get two workbooks for each subject. Workbook 1, to use from January to June and Workbook 2, for use from July to December. Grade R learners will receive four books per year, one for each term. They provide every learner with worksheets to practise the language and numeracy skills they have been taught in class. They are also meant to help teachers track the progress of learners and provide extra support if needed. They are a simple way to structure learning activities for learners.

- The Department of Basic Education released the study guide series called *Mind the Gap* study guides for Grade 12

learners during the year 2012. The first subjects in the series include Life Sciences, Accounting, Economics, Geography and Geography Maps and the second edition of Mind the Gap is aligned to the Curriculum and Assessment Policy Statement (CAPS) and currently covers 7 subjects covered in English and some in Afrikaans, not just the ones you have here. Recently Afrikaans and English First Additional Language (EFAL) material that includes audio books titles have also been made available. These study guides are another innovative and committed attempt by the Department of Basic Education to improve the academic performance of Grade 12 candidates in the National Senior Certificate (NSC) examination. The first subjects in the series include Life Sciences, Accounting, Economics and Geography. The Mind the Gap study guide series is produced in both English and Afrikaans to assist those learners that have been underperforming due to a lack of exposure to the content requirements of the curriculum. The series aims to mind-the-gap between failing and passing, by bridging-the-gap in learners' understanding of commonly tested concepts so candidates can pass. Each of the Mind the Gap study guides provides explanations of key terminology, simple explanations and examples of the types of questions that learners can expect to be asked in an exam. Model answers are included to assist learners in building their understanding. Learners are also referred to specific questions in past national exam papers and exam memos that are available on the Department's website.

- Through the *Thutong Portal*, the South African Department of Basic Education aims to lead the drive to improve learning in the country through appropriate use of technology. The Thutong Portal is the online point of entry to a comprehensive array of free educational resources, policy information, and interactive services concerning all aspects of the South African Schooling Sector. It provides relevant information and services about the South African school curriculum, teacher development, school administration and management. Thutong aims to facilitate ease of use, enabling users to find and make use of its resources and services in the most intuitive ways possible. In order to help to develop and improve the quality of education in South Africa, the curriculum resources contained in the Thutong Portal will seek to describe the teaching and learning pathways and processes that learners should work through in order to achieve identified Learning Outcomes and/or Assessment Standards as set out in the South African National Curriculum Statements. Thutong's key focus is on creating strong and vibrant online communities of practice in order to facilitate discussion and sharing of information and ideas amongst peer networks, and in an effort to encourage South African educators to develop and improve education by sharing the country's common intellectual capital.

The tables following provide details on the supporting documents according to the discussed order, namely Annual National Assessments (ANAs), the National Senior Certificate (NSC), Curriculum Assessment Policy Statement (CAPS), the Workbooks, Mind the Gap (MTG) study guides and Thutong Education Resource Portal (Thutong). The document indicates the name, purpose and intended effect, the grade and subjects the documents support as well as a hyper-link to the website where the documents maybe accessed

The ANA Assessment Guidelines 2015	Curriculum & Assessment support	The ANA Assessment Guidelines define the scope of work that will be covered in the test for each grade and subject. The 2015 cycle of Annual National Assessment (ANA 2015) that will be administered in all public and designated independent schools will include tests in Language and Mathematics for Grades 7 - 9 - with the addition of Grade 7 and 8 taking place for the first time in 2015. Where relevant in the ANA section, documents for Grade 7 and 8 will be included.	Grade 1-6 Grade 7-9	Mathematics, Numeracy, Literacy, Language	<a href="https://www.education.gov.za/Curriculum/AnnualNationalAssessments/2015ANAAssessmentGuidelines.aspx">https://www.education.gov.za/Curriculum/AnnualNationalAssessments/2015ANAAssessmentGuidelines.aspx</a>
The Annual National Assessments 2011-A Guideline for the interpretation and use of ANA results	Curriculum & Assessment support/Teacher Support	The purpose of this document is to provide a guide on how to interpret and use the results of the Annual National Assessments (ANA). The ANA are an important strategy of the Department of Basic Education to improve the quality of learning outcomes in the education system. The results of ANA provide evidence-based feedback on how teaching translates into learner performance.	Grade 1-6 Grade 9	Mathematics Numeracy Literacy Language	<a href="https://www.education.gov.za/Portals/0/Documents/Publications/2011%20ANA%20Interpretation%20guideline.pdf?ver=2015-03-20-113433-993">https://www.education.gov.za/Portals/0/Documents/Publications/2011%20ANA%20Interpretation%20guideline.pdf?ver=2015-03-20-113433-993</a>
The Annual National Assessments 2012-A Guideline for the interpretation and use of ANA results	Curriculum & Assessment support/Teacher Support	The purpose of this document is to provide a guide on how to interpret and use the results of the annual national assessments (ANA). The ANA are an important strategy of the Department of Basic Education to improve the quality of learning outcomes in the education system. The results of ANA provide evidence-based feedback on how teaching translates into learner performance.
