The National Education Collaboration Trust (NECT) is effective because of its independence. It works closely and collaboratively with government, business, the unions and civil society. Government's commitment to business is that it will fund the NECT and for business. This funding arrangement is what underpins its independence and its credibility with all stakeholders. The NECT board of trustees would like to express their appreciation to the following organisations who have made significant funds available to the NECT:

Preface

The NECT has designed and developed a series of modules that are intended to help you to manage your own learning.

The modules have been designed and written for learners in Grades 7 to 12 and are consistent with the objectives of the life skills curriculum. They aim to provide you with a set of basic skills that will help you to make the best use of your educational opportunities.

As learners, it is important that you know how to learn and how to manage and achieve success in education and in life. This series will help you to build these skills over a period of one year.

This first module looks at why education is important. It focuses on the “journey of life” and the things that you need to do to ensure that your journey is a successful one. It contains many practical exercises that reinforce the importance of education, and the idea that you can learn anywhere and throughout your life.
