EDUCATION

Update on Norms and Standards in Limpopo

1. INTRODUCTION

The Regulations Relating to Minimum Uniform Norms and Standards for Public Schools Infrastructure (referred to as the Regulations) were published in the Government Gazette No. 37081 on 29 November 2013. The stated objectives of the regulations are as follows:

- 1.1.To provide minimum uniform norms and standards for public schools infrastructure;
- 1.2.To ensure that there is compliance with minimum uniform norms and standards in the design and construction of new schools and additions, alterations and improvements to schools which exist when the regulations are published; and
- 1.3.To provide for timeframes within which school infrastructure backlogs must be eradicated.

2. PURPOSE OF THE IMPLEMENTATION PLAN

The Limpopo Department of Education (LDoE) has taken great strides in the provisioning of school infrastructure in the province. Since 2013/14, more than R 10.4 billion has been spent to create and maintain spaces conducive for learning and teaching. In line with the Regulation to Minimum Uniform Norms and Standards for Public School Infrastructure (2013) focus has been placed on ensuring Health and Safety and Basic services to all schools.

3. TIMEFRAMES APPLICABLE TO THESE REGULATIONS

The regulations spell out the minimum infrastructure norms and standards and set the timeframes for education departments to comply with. The Regulations prescribe that:

- 3.1 All schools built entirely from materials such as asbestos, metal and wood, as well as all those schools that do not have access to any form of power supply, water supply or sanitation must be prioritised and complied with, within a period of three years from the date of publication of these regulations.
- 3.2 The MEC must prioritise the norms and standards relating to the availability of classrooms, electricity, water, sanitation, electronic connectivity, and perimeter security

and that these norms and standards be phased in over a period of seven years from the date of publication of these regulations.

3.3 The MEC must specifically focus on the norms and standards relating to libraries and laboratories for science, technology and life sciences and that these norms and standards be phased in over a period of ten years from the date of publication of these regulations.

3.4 All other norms and standards contained in the regulations must be planned, prioritised and phased in before 31st December 2030.

3.5 Schools already in planning and prioritisation within the 2013/14, 2014/15 and 2015/16 MTEF cycle be excluded from having to comply with the regulations.

3.6 The implementation of the norms and standard is, where applicable, subject to the resources and co-operation of other government agencies and entities responsible for infrastructure in general and the making available of such infrastructure.

3.7 The overall budget since 2013 was R13.2 billion, as at the end of financial 2021/2022, R12.2 billion that has been spent on the delivery of infrastructure by LDoE, R10.4 billion was through the Education Infrastructure Grant (EIG) provided by National Government and through the Equitable Share of the Limpopo Province:

4. ABILITY TO MEET NORMS AND STANDARDS

The Regulations Relating to Minimum Norms and Standards for Public School Infrastructure as published in the Government Gazette (No 37081) on 29 November 2013 provide standards that need to be achieved for school infrastructure. The Regulations required that the Department comply within the 3 year period ending on 29 November 2016 to the following:

- All schools to have access to water supply,
- All schools have access to sanitation,
- All schools have access to electricity,
- All schools built with inappropriate material be eliminated or replaced.

To fully establish the situation in the Province the CSIR was engaged to undertake a condition assessment of all the schools in the Province. 4480 Facilities have been visited by CSIR and reports compiled. The outcome of the report indicated a serious backlog of infrastructure maintenance and shortage of facilities in terms of the norms, as at March 2020.

The Executive Council (EXCO) mandated the department to establish an Infrastructure Technical Resource Unit (ITRU) / in order to enhance its capacity and to undertake some

DEPARTMENT OF
EDUCATION

projects in-house. The procurement of the unit was finalized in September 2021. It has ushered in a new dawn and provide possibility of fully fledged in-house management of projects. The Unit is also assisting the Department with the condition assessment of all the schools in the province.

With respect to the Norms and Standards Regulations the following was identified:

According to the condition assessments previously done by the CSIR and the ITRU, 13 (thirteen) schools were identified as being built with in appropriate material and 202 still have pit latrines only and the Department of currently addressing it. In 2018, 523 schools identified as having pit toilets, 308 are being implemented by DBE through SAFE programme and to date 246 completed, while 215 schools are being implemented internally by the in house infrastructure technical professional. As at the end of the financial year 2021/2022 about 139 and 241 through in-house team and SAFE respectively,

Table1: Norms and Standards Non-compliant Projects

Item	Number of Schools without services	Corrective action taken
Access to water supply	312 schools do not have their own boreholes and get water from municipal water supply system (which are more often than not unreliable) 170 schools have equipped boreholes, but these went dry as a result of the recent few years draught 46 schools have boreholes which are not equipped	Drilling and equipment of boreholes become part of the Scope of Work as and when projects are implemented at the identified school, to mitigate the challenge of water supply Recent heavy rainfalls in the province have resulted in the rise of the water tables at those schools which experienced dry boreholes and the situation is improving. The Department is conducting an audit of all such cases with the intention of upgrading boreholes where necessary Department is designing a programme to test
Access to sanitation	166 schools adequate appropriate sanitation facilities. There are also pit toilets that are no longer in use. 475 schools have appropriate sanitation facilities which are inadequate in terms of the norms and standards. The said schools are also using pit toilets	The Department has contracted Mvula Trust to demolish the existing pit toilets at the identified schools The Department is designing a programme to provide such schools with additional appropriate sanitation facilities to meet the national norms and standards and to demolish all pit toilets at the identified schools

DEPARTMENT OF
EDUCATION

Access to electricity	All schools in the province are connected to the national electricity grid	No action required
Schools built with inappropriate material	13 schools in the province are built with asbestos material	8 out of the 13 schools are planned planning cycle to be attended to under the "asbestos eradication programme" and are included in the project list for implementation in the 2022/23 to 2024/25 MTEF
Number of schools with Pit latrines only	202 schools have been identified to be using pit toilets ONLY, with no any other form of appropriate sanitation facilities.	The Department of Basic Education (DBE) has allocated 113 out of the 202 schools to the Mvula Trust to eliminate pit toilets at those schools and replace them with appropriate sanitation facilities during 2022/23 financial year. The Limpopo Department of Education will allocate the remaining 89 schools to a yet to be appointed Implementation Agent to replace the pit toilets with appropriate sanitation facilities in the 2022/23 financial

IMPLEMENTATION PLAN: 1-3 YEAR PLAN

PROGRESS FOR NOVEMBER 2013

The progress that has been made towards addressing the schools in (i) above, i.e. progress made towards eradicating and replacing those that were built entirely of inappropriate materials and the provision of basic services to those that did not have any form of such services. This must indicate the schools that have been, or are being addressed under the Accelerated Schools Infrastructure Delivery Initiative (ASIDI) Programme. The reference to "reporting on progress" implies providing information on the schools that:

- Have only been identified and put on plans for future financial years but with no work done (i.e. planning or implementation) on them yet;
- Are at planning and procurement stages;
- Are at construction stage; and
- Have reached Practical Completion and beneficial occupation has been undertaken.

DEPARTMENT OF
EDUCATION

Table 2: Infrastructure Delivery

	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22	Total Achieved

DEPARTMENT OF
EDUCATION

1. ERADICATION OF INAPPROPRIATE MATERIAL

As at November 2011/12 the 4 schools built entirely of inappropriate material have been constructed and complete. The schools were mud schools and were implemented by the IDT

1.	Xhirhulurhulu Primary school	The school is now the state of the arts school.
2.	Makoma Secondary school	The school is now the state of the arts school.
3.	Matsepe Primary school	The school is now the state of the arts school.
4.	Photo Primary school	The school is now the state of the arts school.

2. WATER SUPPLY

The Department is running a water and sanitation programme where all schools without adequate or no water supply are being attended to.

It must be noted that due to the drought a number of existing boreholes have dried up and the schools have indicated that they also do not currently have access to water.

As at November 2011 to November 2021 all 407 schools have been provided with a means of drilling and equipping boreholes.

LIMPOPO

PROVINCIAL GOVERNMENT
REPUBLIC OF SOUTH AFRICA

DEPARTMENT OF EDUCATION

The expenditure for the majority of the projects completed since November 2013 have to a large extent not been specific to Water, or Sanitation nor Electrification, but part of larger programmes such as upgrade and addition, or Water and Sanitation where the expenditure relates to a greater scope and not restricted to only Water, or Sanitation or Electricity.

5. TOTAL NUMBER OF THE BACKLOGS AND THE PLANS TOWARDS ADDRESSING ANY SUCH BACKLOGS WITH PROJECTED BUDGET REQUIREMENTS.

To ensure that the infrastructure backlog is addressed the infrastructure backlog with the relevant costing has been brought to the attention of Department of Basic Education as well as Provincial Treasury in an attempt to source additional funding.

In the interim the schools with the highest needs will be addressed and planning will be done in line with the district priority and the CSIR priority indicator that incorporates the enrolment, toilet gap, classroom gap and the maintenance required in the calculation of the indicator.

The Department will also channel any additional funding into addressing the Water and Sanitation Programme.

IMPLEMENTATION PLAN: 4-7 YEAR PLAN

BACK LOGS ON NORMS AND STANDARD – 7 YEAR PLAN

As indicated in the Norms and Standards, a Member of the Executive Council must, for the purposes of subregulation (1)(b)(ii) prioritise. Norms and Standards to the availability of, **classrooms, electricity, water, sanitation, electronic connectivity and perimeter security;**

These norms and standards are to be phased in over a period of **seven years** from the date of publication of these regulations. The table below indicates based on the 2020 enrolment at the existing school – the backlogs per individual school was determined.

Table 5: Budget of projects in backlog

Item	Description/Costing	Number	Value
Backlog in terms of CSIR Assessment			
C LASSROOMS - unit price	R 650 000.00	6 819	R4 432 350 000
Grade R Classroom Gap	R 650 000.00	4 873	R3 167 450 000
Replace Mobile Classrooms (1969 Classrooms)	R 150 000.00	1 969	R295 350
Sub-Total		13 661	R8 879 650 000

1. ADDITIONAL CLASSROOMS (INCLUDING GRADE R)

Through the New and replacement and Upgrades and Addition programmes, the Department has provided additional standard classrooms with other supporting spaces. More than 160 schools have been provided with additional learner spaces since 2011/2012 financial year. As at the end of November 2021 a total of 4385 learner spaces have been provided.

LIMPOPO

PROVINCIAL GOVERNMENT
REPUBLIC OF SOUTH AFRICA

DEPARTMENT OF
EDUCATION

2. PERIMETER SECURITY - FENCING

The aim of this programme is to improve the safety and security of educators, learners, school structures and also for the school to be visually appealing. The Department appointed four Implementing agents to implement the fencing programme around Limpopo province. The monitoring of the projects is done through District Chief and Works Inspectors. The completed projects are reported on a quarterly basis using the standard assessment forms (NEIMS) for processing by the Department of Basic Education.

The fencing programme is funded through Education Infrastructure Grant with a total number of 154 schools were provided with fencing since 2015/16 financial year to date.

IMPLEMENTATION PLAN: 4-7 YEAR PLAN

PROGRESS AS AT NOVEMBER 2021

The Department continues to vigorously implement the Norms and Standards implementation plan formulated in November 2013.

Nonetheless, the infrastructure programmes are formulated and implemented as specific intervention against the Norms and Standards implementation plan as previously discussed. As at the end of November 2021 the 4-7 year period of the implementation plan address the inadequate and inappropriate sanitation structures, water supply and electricity.

This session of the report aims to report on the progress end of November 2021 specific interventions to additional classrooms inclusive of Grade R, Perimeter Fencing. The infrastructure programmes also addresses items which fall within the ten-year period namely provision of Laboratories (Science, technology and life science), School Nutrition Programme Kitchens, Libraries/Media Centres, Physical Education/Sport and Recreation Areas, Computer Rooms and Multipurpose Classrooms.

Limpopo Department of Education has vigorously pursued the attainment of targets for eradication of infrastructure backlogs as set out in the Norms and Standards Implementation Plan, in response to the introduction and publication of the Regulations Relation to the Minimum Norms and Standards for Public School Infrastructure by National Basic Education in November 2013.

1. ADDITIONAL STANDARD CLASSROOMS (INCLUDING GRADE R)

Through the New schools and Upgrades and Addition programmes, the Department provides additional standard classrooms at a ratio of 1 classroom per 40 learners (as per national norm) and Grade R classrooms at a ratio of 1:30.

2. PERIMETER SECURITY - FENCING

The aim of this programme is to improve the safety and security of educators, learners, school structures and also for the school to be visually appealing. The Department appointed Implementing agents to implement the fencing programme around Limpopo province. The monitoring of the projects is done through provincial Control works inspectors and District Chief and Works Inspectors. The completed projects are reported on a quarterly basis using the standard assessment forms (NEIMS) for processing by the Department of Basic Education.

3. PIT LATRINES

The Department of Basic Education has spearheaded a programme to eradicate pit latrines. This has added urgency in the provision of acceptable sanitation facilities in schools.

The Province quantified the backlogs, determined the number of required toilet seats, urinals, wash basins etc. per school and produced estimates to redress the backlogs. The Department continues to address water and sanitation backlogs through dedicated infrastructure programmes.

4. ERADICATION OF INAPPROPRIATE STRUCTURES - ASBESTOS

The Department continues to pursue the eradication of structures built out of inappropriate material, through the various dedicated programmes and implementing agents.

IMPLEMENTATION PLAN: 4-7 YEAR PLAN

PROGRESS AS AT NOVEMBER 2021

This report is a continuation of the 4-7 year Norms and Standards Implementation Plan. The report extends to the provision of appropriate sanitation facilities, water supply, additional learners spaces to address overcrowding at schools, electronic connectivity and perimeter fencing.

The Department does not only attend to the backlogs as indicated above, but also provide libraries, laboratories for science and technology and life sciences as per the 8-10 year implementation plan. This is addressed through various programmes and sub-programmes as indicated below:

- Establishment of New Schools,
- Upgrades and Additions to existing facilities,
- Provision of Water and Sanitation to marginalized schools,
- Provision of Fencing in support of the Departments School Safety strategy,
- Provision of Early Childhood Development classrooms and facilities; and
- Provision of mobiles to relieve overcrowding as an interim measure whilst permanent intervention is underway

1. PROVISION OF WATER AND SANITATION FACILITIES – PIT LATRINES

As part of the provision of decent Sanitation Facilities and ensuring compliance with the Norms and Standards of our Schools, the Department of Education's focus in the 2019/20 and 2020/21 financial years is on the eradication of pit latrines. A total of 215 Schools were identified by all Districts as having Pit Latrines across the Province. The Department focused on the implementation of the projects on the 215 projects and to date 139 schools out of 215 have been completed.

2. ELECTRIFICATION

The department in its APP for each financial year plan to electrify schools with no electricity, in 2021/2022 two schools were provided with Electricity (KK Monare Primary and Driekop Secondary)

3. ERADICATION OF INAPPROPRIATE STRUCTURES - ASBESTOS

The Department continues to pursue the eradication of structures built out of inappropriate material, through the various dedicated programmes and implementing agents.

4. PERIMETER SECURITY FENCING

The aim of this programme is to improve the safety and security of educators, learners, school structures and also for the school to be visually appealing. The Department appointed four Implementing agents to implement the fencing programme around Limpopo province. The monitoring of the projects is done through provincial Control works inspectors and District Chief and Works Inspectors. The completed projects are reported on a quarterly basis using the standard assessment forms (NEIMS) for processing by the Department of Basic Education.

5. PROVISION OF ADDITIONAL STANDARD CLASSROOMS

Through the New schools and Upgrades and Addition programmes, the Department provides additional standard classrooms at a ratio of 1 classroom per 40 learners (as per national norm) and Grade R classrooms at a ratio of 1:30.

The Department is implementing a total of 61 projects under New or Replacement schools and Upgrades & Additions in the 2021/22 financial year which will contribute to additional learner spaces.

6. PROVISION OF EARLY CHILDHOOD DEVELOPMENT FACILITIES

The main objective of the sub-programme is to address the White Paper 5 on ECDs, with the mandate to provide and maintain Grade R facilities. The intervention is focused at creating learner spaces for early childhood development in terms of establishing more Grade R Classrooms in support of providing quality education and a strong education foundation for all learners within the province.

The ECD function has been now transferred to LDoE as of 1st April 2022. An allocation has been made available for maintenance of existing and construction of new centres. Progress will be reported in the next norms and standards report

7. SPECIALIST ROOMS

The Multipurpose and Specialist classrooms (Laboratories, etc.), Workshops, Media Centre, Computer Rooms play an integral role in delivering the curriculum effectively and enhancing the learning experience of the learners, resulting in improved results. The LDoE has for a number of years been addressing the provision of Libraries, Laboratories, Multipurpose classrooms and Computer rooms at Secondary Schools through a dedicated programme (Curriculum Redress) whilst at the same time providing these facilities at all schools addressed through either the New school or Upgrades and Additions Programme.

8. PROGRAMME PERFORMANCE MEASURES 2021/2022

The Department sets targets as part of the Departments Strategic Plan. The targets are informed by the commitments documented in the Regulations Relating to Minimum Uniform Norms and Standards for Public Schools Infrastructure (referred to as the Regulations) were published in the Government Gazette No. 37081 on 29 November 2013. The Programme Performance Measures Targets are developed within the Departmental Strategic Plan unit and subsequently approved by Head of Department. The targets are reported per quarter towards achievement of the annual target. The PPMs assist the Department in measuring efforts made towards the eradication of school infrastructure backlogs as identified during the documentation of the Norms and Standards Implementation Plan.

Recommendation

It is recommended that DBE notes the status and progress of Norms & Standards in the Province as at November 2021
