**INTERNAL QUESTION PAPER: 20/2025**

**2538. Mrs N J Nolutshungu (EFF) to ask the Minister of Basic Education:**

- (1) Whether she will furnish Mrs N J Nolutshungu with a detailed list of all public schools where pit toilets have been eradicated in each province, as she claimed on 11 March 2025 that over 93% of identified pit toilets in public schools across the Republic have been eradicated; if not, why not; if so, what are the relevant details;
- (2) whether she intends to be accountable by resigning in the event that any of the schools on her list are still using pit toilets, as she would have knowingly shared misleading information in violation of the Executive Ethics Code; if not, why not; if so, what are the relevant details?
- (3) whether she will furnish Mrs N J Nolutshungu with a comprehensive list of all public schools that still have pit toilets; if not, why not; if so,
- (4) whether she will outline the (a) specific timeline and (b) budget allocation for their complete eradication; if not, why not; if so, what are the relevant details in each case?

#### **QUESTION 2538.**

#### **Response**

In terms of the South African Schools Act, read with the Government Immovable Asset Management Act, provinces are responsible for the provisioning, management and maintenance of public school infrastructure, including sanitation facilities at public schools.

The Department of Basic Education (DBE) is responsible for setting norms and standards for public school infrastructure. The DBE also provides support and oversight to PEDs and, in some instances, implements identified projects through programmes such as the Accelerated Schools Infrastructure Delivery Initiative (ASIDI) and Sanitation Appropriate for Education (SAFE) initiative.

The DBE has made significant progress in addressing the backlog of identified inappropriate sanitation infrastructure through the Sanitation Appropriate for Education (SAFE) programme. The DBE has advised that the full list of all identified SAFE initiative projects completed as at 12 May 2025 since inception is attached as *Annexure A*.

The DBE has advised that all public schools that have reached Practical Completion (PC) (as specified in *Annexure A*) should no longer have unsafe pit toilets in use, as the scope of work for each project includes the demolition of the old, unsafe pit toilets once the new sanitation facilities have been handed over. While there may be schools where demolition is still in progress, these pit toilets should not be in use.

The DBE has advised further that, of the original 3,372 projects identified under the SAFE programme in 2018, only 135 projects remain under construction as of 12 May 2025. These are also listed in *Annexure A*.

Once the identified sanitation projects have been completed under the SAFE initiative, the work of government in eradicating pit latrine toilets at public schools must continue. In this regard, the DBE will continue working collaboratively with PEDs to ensure that pit latrine toilets at public schools not identified for purposes of the SAFE initiative are appropriately and urgently replaced with suitable sanitation facilities. This must form part of the public school infrastructure development and maintenance plans of PEDs.

While notable progress has been made through the SAFE initiative, the persistent issue of pit latrine toilets underscores the complexity of addressing public school infrastructure backlogs in a sector with historical underinvestment, competing budgetary demands and implementation challenges at provincial levels.

Accountability mechanisms will need to be strengthened to prevent systemic negligence and to ensure the safety and dignity of all learners. In this regard, the

#### **QUESTION 2538.**

Minister of Basic Education intends to review the Regulations relating to Minimum Uniform Norms and Standards for Public School Infrastructure to ensure that they are clear, provide for clear oversight mechanisms and can lead to improvements in infrastructure delivery at a school level.

The eradication of pit toilets is primarily funded through the Education Infrastructure Grant (EIG) allocated to provinces. The DBE also provides technical support and oversight through the SAFE initiative. The DBE has advised that the remaining 135 projects under the SAFE initiative are scheduled for completion in the third quarter of the 2025/26 financial year. The estimated budget required to complete the eradication of all remaining identified unsafe pit toilets is R475 million. This will be funded through the capital allocation of the School Infrastructure Backlogs Grant (SIBG).

The Medium-Term Budget Policy Statement has outlined the integration of multiple conditional grants, including the EIG and the SIBG. While this reform aims to streamline resource allocation, it reduces the ability of the DBE to directly influence infrastructure delivery at a provincial level. Consequently, provinces will play an even greater role in the implementation of public school infrastructure projects, including sanitation projects.

It is important to remind Honourable Members that, while MECs for Education are responsible for the provisioning of public school infrastructure in their respective provinces, they do not report directly to the Minister, Deputy Minister or the Department of Basic Education. This reality necessitates heightened collaboration and oversight to ensure that national priorities are effectively implemented at the provincial level. PEDs should not be returning funds to the National Treasury while public school infrastructure backlogs persist.

To assist the basic education sector to eradicate pit latrine toilets in schools, we have launched a Safe Schools app – a digital platform developed and donated by Vodacom South Africa to empower users to report unsafe toilets in schools, monitor progress on their removal and provide real-time feedback on infrastructure improvements. By enabling the public to crowd-source information about unsafe toilets not identified for the purposes of the SAFE initiative, PEDs, together with the DBE, will have access to current data necessary to inform budgeting, planning and implementation of school sanitation projects. The Safe Schools app can be accessed via <https://safeschools.gov.za/>.

For further information regarding the steps that the Minister of Basic Education and the DBE are taking to improve access to safe and dignified sanitation facilities at public schools, please see the speech delivered by the Minister of Basic Education in
